Vol. 44 No. 171
Pages 51177-51548

federal register

Friday
August 31, 1979

Highlights

Briefings on How to Use the Federal Register— For details on briefings in **Washington, D.C.**, and **Long Island, New York**, see announcement in the Reader Aids Section at the end of this issue.

51177 **Columbus Day** Presidential proclamation

51179 **Leif Erikson Day** Presidential proclamation

51181 **White Cane Safety Day** Presidential proclamation

51542 **Medicare and Medicaid Programs** HEW/HCFA sets initial schedule of limits on adjusted skilled nursing facility inpatient routine service costs that may be reimbursed; effective 10–1–79 (Part V of this issue)

51402 **Domestic Oil and Gas Reserves** DOE gives notice to well operators of data due for annual survey for Report Year 1978 (Part II of this issue)

51233 **Lead in Food Supply** HEW/FDA requests information and data on prior sanction status of lead and problem of presence in food; comments by 11–29–79

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Area Code 202–523–5240

Highlights

51211, 51230 Poison Prevention Packaging CPSC issues requirements (effective 2–27–80) and proposed rule (comments by 10–30–79) on child-resistant packaging of acetaminophen preparations (2 documents)

51218 Food Additives HEW/FDA amends regulations to provide for use of chemical as antioxidant and/or stabilizer in olefin polymers; effective 8–31–79

51217 Food Additives HEW/FDA amends regulations for adhesives; effective 8–31–79; comments by 10–1–79

51217 Food Additives HEW/FDA provides for safe use of N-methyldiallylamine hydrochloride polymer with epichlorohydrin in paper and paperboard; effective 8–31–79; objections by 10–1–79

51220 Senior Reserve Officers' Training Program DOD/Army prescribes policies for organization, administration, and training; effective 1–22–79

51219 Junior Reserve Officers' Training Corps and National Defense Cadet Corps DOD/Army prescribes policies for organization, administration, operation, and support; effective 1–22–79

51191 Fair Housing NCUA rules on real estate lending practices; effective 10–29–79; comments by 9–28–79

51183 Volunteer Service OPM implements a program for students within the executive branch of Federal Government; effective 8–31–79

51207 Bond Requirements CAB amends rules to allow charter operators to furnish security agreements instead of surety bonds; effective 8–28–79

51279 Wetlands and Floodplains Commerce/EDA publishes final procedures on protection and management

51348 Certain Marine Radar Systems from the United Kingdom ITC issues notice of investigation and hearing; hearing 10–10–79

51328 North Atlantic Telecommunications FCC initiates inquiry into policies followed in authorization of Common Carrier facilities during 1985–1995 period

51396 Sunshine Act Meetings

Separate Parts of This Issue

The President
PROCLAMATIONS
51177 Columbus Day (Proc. 4676)
51179 Leif Erikson Day (Proc. 4677)
51181 White Cane Safety Day (Proc. 4678)

Agricultural Marketing Service
RULES
51186 Lemons grown in Ariz. and Calif.
PROPOSED RULES
51230 Grapes (Ruby seedless) grown in Calif.

Agricultural Stabilization and Conservation Service
RULES
51186 Cotton; marketing quota penalty rate and recordkeeping requirements

Agriculture Department
See Agricultural Marketing Service; Agricultural Stabilization and Conservation Service; Animal and Plant Health Inspection Service; Commodity Credit Corporation; Food and Nutrition Service; Food Safety and Quality Service; Rural Electrification Administration.

Air Force Department
NOTICES
Environmental statements; availability, etc.:
51296 Fairchild AFB, Spokane, Wash.; coal-fired heating plant

Animal and Plant Health Inspection Service
NOTICES
Environmental statements; availability, etc.:
51272 Chemical and gas storage building, Ames, Iowa
51272 National Environmental Policy Act; implementation; guidelines; correction

Army Department
RULES
Reserve officers' training corps:
51220 Senior ROTC program; organization, administration, and training
Schools and colleges:
51219 ROTC—Junior Program and National Defense Cadet Corps; organization, administration, operation, and support

Blind and Other Severely Handicapped, Committee for Purchase From
NOTICES
51295 Procurement list, 1979; additions and deletions

Civil Aeronautics Board
RULES
Public charters:
51207 Bond requirements for charter operators
NOTICES
51279 Certificates of public convenience and necessity; foreign air carrier permits; applications
Hearings, etc.:
51278 Denver-Minneapolis nonstop route authority
51277 Northwest Alaska bush route proceeding
51396 Meetings; Sunshine Act

Commerce Department
See Economic Development Administration; Industry and Trade Administration; National Bureau of Standards; National Oceanic and Atmospheric Administration.

Commodity Credit Corporation
RULES
Export programs:
51187 Financing commodities sales; bank obligation coverage; CFR correction

Commodity Futures Trading Commission
PROPOSED RULES
51232 Confidential treatment of sensitive information; petition filing
NOTICES
51396 Meetings; Sunshine Act (2 documents)

Consumer Product Safety Commission
RULES
Poison prevention packaging:
51211 Acetaminophen preparations; child-resistant packaging
PROPOSED RULES
Poison prevention packaging:
51230 Acetaminophen preparations; child-resistant packaging exemption
NOTICES
Consent agreements:
51295 Sterned Knitting Mills, Inc., et al.

Defense Department
See also Air Force Department; Army Department.
NOTICES
Meetings:
51296 Armed Forces Epidemiological Board

Economic Development Administration
NOTICES
51279 Floodplain management and wetlands protection; implementation
Import determination petitions:
51292 Bonders, Inc., et al.

Economic Regulatory Administration
NOTICES
Consent orders:
51306 Egbert Square Service Center et al.
51306 Robert B. Sahagen & Co.
Decisions and orders:
51307 Aminoil USA, Inc.
51304 Archer Daniels Midland Co.
Natural gas; fuel oil displacement certification:
51308 Harbison-Walker refractories
Powerplant and industrial fuel use; existing powerplant or installations; classification requests:
51306 Gulf States Utilities Co.
51304 Niagara Mohawk Power Corp.

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

51303 Potomac Electric Power Co.
Remedial orders:
51307 Astoria 44 Service Station et al.
51308 DeLany, Thomas J.
51308 Dunlap, E. Jr.
51308 Super Value Service Station et al.

Employment and Training Administration
NOTICES
Comprehensive Employment and Training Act Programs:
51349 Reallocation of funds
51348 Employment transfer and business competition determinations; financial assistance applications

Employment Standards Administration
NOTICES

Energy Department
See also Economic Regulatory Administration; Energy Information Administration; Federal Energy Regulatory Commission; Hearings and Appeals Office, Energy Department.
NOTICES
51315 Davis pumped storage project, W. Va.; inquiry; correction
Meeting:
51297 Microbiological Conference
Remedial orders:
51315 Getty Oil Co.
51297 Uranium hexafluoride; separative work and base charges

Energy Information Administration
NOTICES
51402 Domestic oil and gas reserves, annual survey; data due for 1978 report year

Environmental Protection Agency
RULES
Air pollution; standards of performance for new stationary sources:
51225 Asphalt concrete; standards review
NOTICES
Air pollution control, new motor vehicles and engines:
51316 Federal certification test results, 1979 model year; correction
Environmental statements; availability, etc.:
51316 Agency statements, weekly receipts
Meetings:
51319 Science Advisory Board
Pesticide applicator certification and interim certification; State plans:
51320 Colorado and Nebraska; training programs for recertification; policy statement

Environmental Quality Council
NOTICES
51295 National Environmental Policy Act regulation; second progress report update

Federal Communications Commission
PROPOSED RULES
Radio services, special:
51257 Digital termination systems; frequency re-allocation in 10.55–10.68 GHz band
51270 Land mobile radio systems (community repeaters); multiple licensing; extension of time
NOTICES
Common carrier services:
51328 North Atlantic telecommunications needs during 1985–95 period
Hearings, etc.:
51323 Schultz, E. H. "Pepper," et al.
51326 Stevens, Bermey E., et al.
Meetings:
51323 Marine Services Radio Technical Commission; cancelled

Federal Deposit Insurance Corporation
NOTICES
51396 Meetings; Sunshine Act

Federal Election Commission
NOTICES
51396 Meeting; Sunshine Act

Federal Emergency Management Agency
RULES
Flood elevation determinations:
51228 Minnesota
51228 Virginia
PROPOSED RULES
Flood elevation determinations:
51255 Arizona
51256 California
51244 California et al.
51257 Connecticut
51255 Maryland
51256 Pennsylvania (2 documents)

Federal Energy Regulatory Commission
NOTICES
51397 Meetings; Sunshine Act (2 documents)
Natural gas companies:
51309 Certificates of public convenience and necessity; applications, abandonment of service and petitions to amend
51310 Small producer certificates, applications

NOTICES
51397 Meetings; Sunshine Act

Federal Home Loan Mortgage Corporation
51398 Meeting; Sunshine Act

Federal Reserve System
RULES
Credit extension by Federal Reserve banks:
51190 Discount rate changes
NOTICES
Applications, etc.:
51331 BankAmerica Corp.
51333 First Bancorporation of Cleveland, Inc.
51333 First Forest Park Corp.
51333 Jefferson County Bancorp., Inc.
51333 Mid-Continent Bancshares, Inc.
51332 UST Corp et al.
51398 Meetings; Sunshine Act

Federal Trade Commission
NOTICES
Premerger notification waiting periods; early terminations:
51334 Norsk Hydro A.S.

Fish and Wildlife Service
RULES
Hunting:
51229 Browns Park National Wildlife Refuge, Colo.
NOTICES
51346, 51347 Endangered and threatened species permits; applications (2 documents)

Food and Drug Administration
RULES
Color additives:
51216 Lead acetate; closing date postponed
Food additives:
51217 Adhesives; dipentene-styrene
51218 Antioxidants and/or stabilizers for polymers; butyric acid
51217 N-methyldiallylamine hydrochloride polymer with epichlorohydrin
Pesticides, tolerances in animal feeds and human foods:
51219 Glyphosate; correction
PROPOSED RULES
Animal drugs, feeds, and related products:
51242 Minor use new animal drugs; safety and effectiveness data supporting approval; correction
Food for human consumption:
51233 Lead in food; advance notice and data request
Human drugs:
51242 Antibiotic drug products, dermatologic and vaginal; batch certification exemption; correction
51242 Prescription drug patient labeling requirements; correction
NOTICES
Committees; establishment, renewals, terminations, etc.:
51334 Device Good Manufacturing Practice Advisory Committee; nomination request
Food additives; petitions filed or withdrawn:
51336 Farbenfabriken Bayer AG
Good laboratory practices:
51335 Nonclinical laboratory studies; post conference report, availability
Human drugs:
51512 Benylin; approval refused for cough treatment use
51338 Streptomycin sulfate for parenteral use; efficacy study implementation; followup notice; correction
Medical devices:
51337 RX-56 (porofocan A) contact lens; premarket approval; correction
51336 Softsite (hefilcon A) Hydrophilic Contact Lens PHP; premarket approval
Meetings:
51335 Consumer participation; information exchange
51335 Immunoglobulin workshop
51337 Milk; Grade A pasteurized milk ordinance, availability
Organization and functions:
51337 Small business special assistance; service desk establishment

Food and Nutrition Service
RULES
Child nutrition programs:
51183 State administrative expense funds; discretionary funds allocation; interim

Title 3—

The President

Proclamation 4676 of August 29, 1979

Columbus Day, 1979

By the President of the United States of America

A Proclamation

Four hundred and eighty-seven years have passed since an Italian navigator in the service of Spain left the Old World to find the New. Christopher Columbus was determined to test an audacious theory: to reach the East, sail west. On the morning of October 12, 1492, with ninety men in three small ships, he sailed into immortality.

The voyage of this intrepid explorer marked the convergence of American and world history. His discovery opened a new age—an age that gave the world a new center.

We are the inheritors of Columbus' legacy. As a nation which has always striven for the same qualities as the Great Navigator, we must continue the search for new horizons.

It is fitting that, on the observance of this October 12, we once again recall to mind Columbus' extraordinary voyage and, in the spirit of that undertaking, rededicate ourselves to that which is best and most courageous in us.

In tribute to Columbus' achievement, the Congress of the United States of America, by joint resolution approved April 30, 1934 (48 Stat. 657), as modified by the Act of June 28, 1968 (82 Stat. 250), requested the President to proclaim the second Monday in October of each year as Columbus Day.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby designate Monday, October 8, 1979, as Columbus Day; and I invite the people of this Nation to observe that day in schools, churches, and other suitable places with appropriate ceremonies in his honor.

I also direct that the flag of the United States of America be displayed on all public buildings on the appointed day in memory of Christopher Columbus.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

Jimmy Carter

Proclamation 4677 of August 29, 1979

Leif Erikson Day, 1979

By the President of the United States of America

A Proclamation

From time immemorial, explorers have sought new frontiers to explore and new worlds to conquer. Their insatiable curiosity, their willingness to face new challenges remain inspirations to the modern world.

Few people can surpass the courage and accomplishments of Leif Erikson, a remarkable representative of a remarkable people. His voyage west to uncharted waters epitomized the virtues of bravery, skill and imagination.

In honoring this great Norseman, we honor the representative of a people whose respect for law and whose early devotion to representative government mirrors our own commitments. We honor, too, Americans of Scandinavian descent, who have made such notable contributions to the development of the United States.

To express our respect for the accomplishments of Leif Erikson and his followers, the Congress of the United States, by joint resolution approved September 2, 1964 (78 Stat. 849, 36 U.S.C. 169) designated October 9 in each year as Leif Erikson Day.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim Tuesday, October 9, 1979, as Leif Erikson Day, and I direct the appropriate government officials to display the flag of the United States on all government buildings that day.

I also invite the people of the United States to honor the memory of Leif Erikson on that day by holding appropriate ceremonies in suitable places throughout the land.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

Jimmy Carter

Presidential Documents

Proclamation 4678 of August 29, 1979

White Cane Safety Day, 1979

By the President of the United States of America

A Proclamation

Most of us take it for granted that we can walk unaided through a crowded store or street. We give little thought to our freedom to come and go as we please, yet there are over six million Americans whose vision is so impaired that every corner is a place of danger.

For many of these people, help comes in the form of a white cane. This eight-ounce, long white stick is as useful as it is simple. For a blind person, it is a kind of beacon. In the hands of someone trained in its skillful use, the white cane becomes an extension of the body, providing assurance that the path ahead is clear.

Upon encountering someone using a white cane, those of us who are fortunate enough to see well should slow our pace for a moment to notice if the person seems to need assistance. Offering an arm to a blind person crossing the street or guiding him or her around a barrier requires only a few moments. Indeed, just yielding the right of way to a blind person can make the difference between a pleasant and safe excursion or a frustrating and possibly hazardous one. Motorists, cyclists, and joggers should be especially alert to the person with a white cane.

To heighten public awareness of the importance of the white cane to the independence and safety of blind and visually handicapped Americans, the Congress, by a joint resolution approved October 6, 1964 (78 Stat. 1003; 36 U.S.C. 169d) has authorized the President to proclaim October 15 of each year as White Cane Safety Day.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim October 15, 1979, as White Cane Safety Day.

On this occasion, I urge all Americans to consider the needs and accomplishments of those who successfully overcome the difficulties imposed by visual disability and blindness. Such individuals merit recognition and respect for the special efforts they must make to function independently in a world where the ability to see is taken for granted.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

Jimmy Carter

Rules and Regulations

Federal Register
Vol. 44, No. 171
Friday, August 31, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 308

Volunteer Service

AGENCY: Office of Personnel Management.

ACTION: Final Regulations.

SUMMARY: These regulations implement a Volunteer Service Program for students, as required by 5 U.S.C. 3111, and in accordance with program guidelines established by the Office of Personnel Management. These regulations are intended to provide a broad framework to ensure uniform acceptance of volunteer services within the executive branch of the Federal Government.

EFFECTIVE DATE: August 31, 1979.

FOR FURTHER INFORMATION CONTACT: James R. Poole, Student Employment Programs Section, Staffing Services, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C., 20415, (202) 632–5678.

SUPPLEMENTARY INFORMATION:

Background

On January 16, 1979, the Office of Personnel Management published interim regulations to implement the acceptance of Volunteer Service. The Office also issued program guidance through the Federal Personnel Manual (FPM) System on January 22, 1979. Both publications invited comments. During the public comment period, a total of 17 written comments were received—15 from Federal agencies and 2 from Labor organizations. All were addressed to the FPM guidance and none recommended changes to the regulations.

The major issues raised requested clarification of: (1) definitions, (2) the impact of guidance published pursuant to 5 U.S.C. 3111 upon existing volunteer programs conducted under different statutes, (3) procedures related to documentation and reports, and (4) program guidance language considered by commenters to be ambiguous. There are also recommendations for expanding coverage to include statements related to EEO, security clearances, Privacy Act, and relationships with Labor organizations.

The Office of Personnel Management has examined and considered all comments brought to its attention during the public comment period, and has modified, where appropriate, its program administration guidance to be published in subchapter 7, FPM chapter 308 in the Federal Personnel Manual.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly, the Office of Personnel Management is adding a new Part 308 to Title 5, Code of Federal Regulations, as set forth below:

PART 308—VOLUNTEER SERVICE

Secs.
308.101 Definitions
308.102 Eligibility and status
308.103 Authority

Authority: 5 U.S.C. 3111.

§ 308.101 Definitions.

In this part: "Student" is an individual who is enrolled not less than half-time in a high school, trade school, technical or vocational institute, junior college, college, university or other accredited educational institution. An individual who is a student is deemed not to have ceased to be a student during an interim between school years if the interim is not more than 5 months and if such individual shows to the satisfaction of the agency that the individual has a bona fide intention of continuing to pursue a course of study or training in the same or different educational institution during the school semester (or other period into which the school year is divided) immediately after the interim.

"Volunteer Service" under the Act is limited to services performed by a student, with the permission of the institution at which the student is enrolled, as part of an agency program established for the purpose of providing educational experience for the student. Such service is to be uncompensated and will not be used to displace any employee or to staff a position which is a normal part of the agency's work force.

§ 308.102 Eligibility and status.

(a) *Minimum Age.* The selection of students to participate under the program should be in conformance with either Federal, State, or local laws and standards governing the employment of minors.

(b) *Status.* A student participating under an agency volunteer program is not considered to be a Federal employee for any purposes other than injury compensation or laws related to the Tort Claims Act. Service is not creditable for leave accrual or any other employee benefits.

§ 308.103 Authority.

Section 301 of the Civil Service Reform Act of 1978, Pub. L. 95–454, authorized Federal departments and agencies to establish programs designed to provide educationally related work assignments for students in nonpay status.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 235

State Administrative Expense Funds; Interim Rule—Use of Discretionary Funds

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule.

SUMMARY: This regulation amends existing State Administrative Expense (SAE) Fund regulations (7 CFR Part 235) by establishing guidelines under which allocations of a portion of the SAE funds authorized by section 7(a) of the Child Nutrition Act of 1966 will be made. The rule provides that State agencies and other State-level agencies which administer the Child Care Food Program (7 CFR Part 226) and the Food Distribution Program (7 CFR Part 250) will receive allocations of additional SAE funds to assist them in strengthening their program administration.

A G 3 1 7 9
UMI

DATE: Effective August 31, 1979. To be assured of consideration, comments must be received by October 31, 1979.

ADDRESS: Comments should be sent to Margaret O'K. Glavin, Director, School Programs Division, FNS–USDA, Washington, D.C. 20250. Comments received will be available for inspection by interested parties in Room 4300B, Auditors Building, 14th Street and Independence Avenue, SW., Washington, D.C. during regular business hours (8:30 a.m. to 5:00 p.m.).

FOR FURTHER INFORMATION CONTACT: Margaret O'K. Glavin, at the above address or by phone (202) 447–8130.

SUPPLEMENTARY INFORMATION: Section 7 of Public Law 95–627, enacted on November 10, 1978, amended section 7 of the Child Nutrition Act of 1966 and established a new allocation formula for the allocation of SAE funds to State agencies which administer the child nutrition programs.

Under section 7(a)(1) as amended, by Pub. L. 95–627, the Department annually has available to it one and one-half percent of the total program funds expended by all administering agencies during the second preceding year in the National School Lunch, School Breakfast, Special Milk, Food Service Equipment Assistance, and Child Care Food Programs. Under section 7(a)(2), each State agency is allocated not less than one-percent of program funds expended by it during the second preceding year in the school feeding programs (i.e., the National School Lunch, School Breakfast, Special Milk and Food Service Equipment Assistance Programs). State agencies which administer the Child Care Food Program (CCFP) are allocated SAE funds for that program based on the application of a different formula as set forth in section 7(a)(3) of the Child Nutrition Act of 1966, as amended. Section 7(a)(3) also allows the Department to "adjust any State's allocation to reflect changes in the size of its program."

Section 7(a)(4) as amended, that provides, after the required allocations of sections 7(a)(2) and (3) have been made, the remaining monies be "allocated among the States by the Secretary in amounts the Secretary determines necessary for the improvement in the States of the administration of the programs. . . . including, but not limited to, improved program integrity and the quality of meals served to children." The Department has decided to allocate these discretionary funds in several ways. First, the Department is developing a system to assist in improving program management at the State and local levels. The system, known as AIMS (Assessment, Improvement and Monitoring System) will be issued in interim rulemaking in the near future. For the current fiscal year, $4 million in appropriated funds have been earmarked for AIMS. The Department expects that specific sums such as this will be needed as long as the system is being utilized. This interim regulation is intended to outline the Department's other plans for use of the remaining discretionary funds.

Child Care Food Program

Public Law 95–627 made several significant changes in the legislation governing the CCFP. These changes include the availability of start-up and advance payments to participating institutions, different reimbursement procedures by type of institution, and alternative institution approval procedures where licensing is not available. All of these changes will undoubtedly increase the administrative burden of State agencies by causing them to adjust existing systems or develop new ones and by requiring increased monitoring to ensure proper implementation. This fact, combined with the fact that in some States SAE funds are already being used in the CCFP in excess of that which will result from the new formula, has led the Department to believe that a portion of available discretionary SAE funds should be allocated for use in the CCFP.

As provided for in this regulation, each State which administers the CCFP will receive an additional $30,000 (the amount FNS estimates as necessary to employ one administrative staff person for one year, including salary, benefits, support staff, travel and other related expenses) in discretionary SAE funds annually. To be consistent with existing regulations, State agencies will not be required to spend these funds on CCFP administration but will have them available if needed.

Food Distribution Program

Current regulations (§ 235.6(c)) provide that SAE funds may be used in the administration of the Food Distribution Program. No specific funds or amount of funds are now set aside for this purpose. However, § 235.6, paragraph (d) further provides that the amount of total SAE funds which may be used for the Food Distribution Program is limited in each fiscal year to ten percent of the total amount of SAE funds made available to the State for that year.

This regulation establishes a minimum $30,000 payment to each State agency, which administers the food distribution program for child nutrition programs, whether it is the State Department of Education or other State-level agency, including the State distributing agency. It also eliminates the ten percent limitation in § 235.6(d). When funds remain after all other allocations of discretionary SAE monies have been made, such State agencies would also get a pro rata share of those remaining funds, based on the amount of donated food assistance provided under all child nutrition programs during the second preceding year. In those States where a different State agency services institutions, all SAE payments for food distribution will be provided to State agencies which administer the Food Distribution Program in schools. This limitation is intended to put SAE funds where they are most needed (i.e., where the larger food distribution program exists) and is based on an awareness that administrative funds are already being provided to some agencies which serve other than child nutrition programs under the Food Distribution Program. The Department is particularly interested in comments on the implications of this limitation.

The Department feels strongly that agencies administering the Food Distribution Program need administrative funding support. Some need additional qualified staff for monitoring contracts under which donated foods are processed or repackaged; others, improved accountability and tracking systems. Allocations in the amounts proposed could help eliminate these needs and the related problems.

Consistent with the intent for which SAE funds are provided, funds used by distributing agencies must be restricted to the administration of the Food Distribution Program in schools and institutions participating in the child nutrition programs.

This amendment also limits the eligible distributing agencies receiving SAE funds to public entities. Formerly, these regulations allowed private agencies to act in this capacity. This is a technical change which will bring the regulations into conformance with existing child nutrition program regulations.

Adjusted School Program Allocation

This regulation gives FNS the authority to adjust the amount of the school program allocation when the amount "does not accurately represent the level of funding intended by this formula" (i.e., one percent of second preceding year expenditures). This provision was included to give a reasonable amount of flexibility in allocating school program funds when unique situations arise. For example, if the level of program funding in a State during the second preceding year was significantly lowered by extraordinary circumstances such as the need to close schools for long periods of time, the school program allocation for the current year could be based on estimates of funding levels which would have been attained if schools had not been closed.

Public Comment

The decision to allocate these discretionary funds as described above was made to meet certain specified needs. Issuing these regulations on an interim basis was intended to expedite their allocation. At this point, the Department plans to use these allocation formulae for fiscal year 1979 and until such time as a more effective usage and/or methodology is deemed to be necessary. To this end, the Department is asking for public comment (1) on the merits of the interim system and (2) suggesting alternative systems.

Accordingly, the Department is amending 7 CFR Part 235 on an interim basis to read as follows:

1. Section 235.1 is amended to read as follows:

§ 235.1 General purpose and scope.

This part announces the policies and prescribes the regulations necessary to carry out the provisions of section 7 of the Child Nutrition Act of 1966, as amended. It prescribes the methods for making payments of funds to State agencies for use in meeting administrative expenses incurred in supervising and giving technical assistance in connection with activities undertaken by them under the National School Lunch Program (7 CFR Part 210), the Special Milk Program (7 CFR Part 215), the School Breakfast Program (7 CFR Part 220), the Child Care Food Program (7 CFR Part 226), the Food Service Equipment Assistance Program (7 CFR Part 230) and the Food Distribution Program (7 CFR Part 250).

2. In § 235.2, paragraphs (d) and (s) are amended to read as follows:

§ 235.2 Definitions.

* * * * *

(d) "Distributing agency" means a State agency which enters into an agreement with the Department for the distribution of donated foods pursuant to Part 250 of this title.

* * * * *

(s) "State agency" means (1) the State educational agency or (2) such other agency of the State as has been designated by the Governor or other appropriate executive or legislative authority of the State and approved by the Department to administer programs under Parts 210, 215, 220, 226, 230 or 250 of this title. Unless otherwise indicated, "State agency" shall also mean "distributing agency", as defined in § 235.2(d), when such agency is receiving funds directly from FNS under this part.

* * * * *

3. In § 235.4, a sentence is added to the end of paragraph (a), new paragraphs (b–1), (b–2) and (b–3) are added and paragraphs (c), (d) and (h) are amended to read as follows:

§ 235.4 Allocation of funds to States.

* * * * *

(a) * * * FNS may adjust the amount of funds allocated to any State under this paragraph when it determines that such amount does not accurately represent the level of funding intended by this formula.

(b)(1) For the fiscal year ending September 30, 1979, and for each succeeding fiscal year, FNS shall allocate $30,000 to each State agency which administers the Child Care Food Program (7 CFR Part 226).

(2) For the fiscal year ending September 30, 1979, and for each succeeding fiscal year, FNS shall allocate $30,000 to each State agency which administers the Food Distribution Program (7 CFR Part 250) in schools and institutions which participate in programs governed by Parts 210 and 220 of this title. *Provided, however,* That any State in which the Food Distribution Program in schools, as defined in § 235.2(o)(1) of this part, and the Food Distribution Program in institutions, as defined in § 235.2(o)(2) of this part, is administered by different agencies, this allocation and that provided for in paragraph (b)(3) of this section shall be made to the State agency which administers the Food Distribution Program in schools.

(3) Funds which remain after the allocations required in paragraphs (a), (b), (b)(1) and (b)(2) of this section, and after any payments provided for under paragraph (f) of this section, shall be allocated to State agencies which administer the Food Distribution Program (7 CFR Part 250). The amount of funds to be allocated to each State agency under this paragraph shall bear the same ratio to the total amount of such funds as the value of donated foods delivered to the State for schools and institutions participating in programs under Parts 210, 220 and 226 of this title during the second preceding fiscal year bears to the value of donated foods delivered to all the States for such schools and institutions during the second preceding fiscal year.

(c) Funds allocated under paragraphs (a), (b), (b)(1), (b)(2) and (b)(3) of this section and 7 CFR Part 225 shall be used by the State agency for administrative costs incurred by it in connection with the programs governed by Parts 210, 215, 220, 225, 226, and 230 of this title. In addition, funds allocated under paragraphs (a), (b), (b)(1), (b)(2) and (b)(3) of this section may be used for the Food Distribution Program (7 CFR Part 250), as provided for in § 235.6(c).

(d) As part of its State Plan of Child Nutrition Operations, required by § 210.4a of this title, each State agency except for distributing agencies, shall submit to FNS a plan for the use of State administrative expense funds in the school nutrition programs and in the Child Care Food Program, including a staff formula for State personnel, system level supervisory personnel and operating personnel, and school level personnel. By May 15 of each year, each distributing agency shall submit to FNS a plan for the use of SAE funds for the following fiscal year in a format prescribed by FNS.

* * * * *

(h) FNS shall have available to it the applicable amounts provided for in paragraphs (a), (b), and (b)(1) of this section, and Part 225 of this title, when it is responsible for the administration of a program or programs within a State.

4. In § 235.5, the last sentence is amended to read as follows:

§ 235.5 Payments to States.

* * * Funds shall not be made available before approval of the State Plan of Child Nutrition Operations provided for under § 210.4a and § 226.7 of this title or the plan required under § 235.4(d) of this Part.

5. In § 235.6, an additional sentence is added to paragraph (c) and paragraph (d) is deleted and reserved as follows:

§ 235.6 Use of funds.

* * * * *

(c) * * * The amounts of State administrative expense funds paid by a State agency to a distributing agency shall be based on the amount of additional funds needed to perform such supervisory and technical assistance deemed necessary by the State agency.

(d) [Reserved]

* * * * *

6. In § 235.8, paragraph (b) is amended to read as follows:

§ 235.8 Management evaluation and audits.

* * * * *

(b) Each State agency shall develop a plan for the conduct of such audits which shall (1) provide a description of the State agency in adequate detail to demonstrate the independence of the audit organization, and (2) provide a systematic method to assure timely and appropriate resolution of audit findings and recommendations. Each State agency shall include the plan in its State Plan of Child Nutrition Operations, except that distributing agencies which receive funds directly under this part shall provide such information in the plan referred to in § 235.4(d).

* * * * *

Authority: (Sec. 7, Pub. L. 95–627, 92 Stat. 3621 (42 U.S.C. 1776).)

Note.—In accordance with Executive Order 12044, a copy of the draft impact analysis for this proposed regulation is available at the Office of the Director, School Programs Division, USDA–FNS, Washington, D.C. 20250 during regular business hours.

Dated: August 28, 1979.

Carol Tucker Foreman,

Assistant Secretary for Food and Consumer Services.

[FR Doc. 79–27334 Filed 8–30–79; 8:45 am]

BILLING CODE 3410–30–M

Agricultural Stabilization and Conservation Service

7 CFR Part 722

[Amendment 6]

Marketing Quota Regulations for the 1972 and Succeeding Crops of Extra Long Staple Cotton and Recordkeeping Requirements for Extra Long Staple and Upland Cotton

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule announces the rate of penalty applicable to the 1979 crop of extra long staple cotton as prescribed by the Agricultural Adjustment Act of 1938, as amended. Also, since Title VI of the Food and Agriculture Act of 1977 suspended the statutory requirement with respect to marketing quotas for upland cotton for 1978 through 1981, this rule eliminates the recordkeeping requirement for upland cotton from the provisions of this subpart. All requirements for upland cotton may now be found in Part 713 of this chapter, as amended.

EFFECTIVE DATE: August 30, 1979.

FOR FURTHER INFORMATION CONTACT:
Charles Riley, Production Adjustment Division, ASCS, USDA, 3644 South Building, P.O. Box 2415, Washington, D.C. 20013, (202) 447–7633.

SUPPLEMENTARY INFORMATION: Section 347(c) of Agricultural Adjustment Act of 1938, as amended, specifies that the rate of penalty with respect to each crop of extra long staple cotton shall be the higher of 50 percent of the parity price as of June 15 of the calendar year in which the crop is produced or 50 percent of the support price of extra long staple cotton. The parity price effective for June 15 as published in "Agricultural Prices" was 161.0 cents per pound and the extra long staple cotton loan rate applicable for the 1979 crop is 92.95 cents per pound.

Accordingly, 7 CFR Part 722 is amended as follows:

1. The title of the first subpart is revised to read as follows:

Subpart—Marketing Quota Regulations and Recordkeeping Requirements for the 1972 and Succeeding Crops of Extra Long Staple Cotton

2. Section 722.61 is revised by deleting and reserving paragraph (b) and revising paragraph (d) to read as follows:

§ 722.61 Applicability.

* * * * *

(b) [Reserved]

* * * * *

(d) The marketing quota provisions of this subpart shall not apply to upland cotton produced in 1971–81, since marketing quotas are not in effect for those years under the statutory authority and amendments contained in the Agricultural Act of 1970 (Pub. L. 91–524, 84 Stat. 1358 et seq., approved November 30, 1970), the Agriculture and Consumer Protection Act of 1973 (Pub. L. 93–86, 87 Stat. 233, approved August 10, 1973), and the Food and Agriculture Act of 1977 (Pub. L. 95–113, 91 Stat. 933, approved September 29, 1977). The recordkeeping provisions of this subpart shall not apply to upland cotton produced in 1979–81.

* * * * *

3. Section 722.73 is amended by deleting paragraphs (c) (1) through (6) and revising paragraph (c) to read as follows:

§ 722.73 Rate of penalty.

* * * * *

(c) The 1979 ELS cotton penalty rate is 80.5 cents per pound.

(Secs. 346, 347, 373, 63 Stat. 674, as amended, 63 Stat 675 as amended; 52 Stat. 65, 66, as amended; 7 U.S.C. 1346, 1347, 1373, 1375)

Note.—The rate of penalty is a mathematical determination. The other changes make the regulations conform to the law by removing requirements no longer applicable to the public or are editorial in nature.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the **Federal Register.**

Further, this final rule has not been designated as "significant", and is being published in accordance with the emergency procedures in Executive Order 12044 and Secretary's Memorandum 1955. It has been determined by Ray Fitzgerald, Administrator, that the emergency nature of this final rule warrants publication without opportunity for public comment and preparation of an impact analysis statement at this time.

This final rule will be scheduled for review under provisions of Executive Order 12044 and Secretary's Memorandum 1955.

Signed at Washington, D.C., August 22, 1979.

Ray Fitzgerald,

Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 79–26985 Filed 8–30–79; 8:45 am]

BILLING CODE 3410–05–M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 214]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period September 2–8, 1979. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: September 2, 1979.

FOR FURTHER INFORMATION CONTACT:
Malvin E. McGaha, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This regulation is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee, and upon other information. It is hereby found that this action will tend to effectuate the declared policy of the act.

The committee met on August 28, 1979, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is somewhat slow.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Further, in accordance with procedures in Executive Order 12044, the emergency nature of this regulation warrants publication without opportunity for further public comment. The regulation has not been classified significant under USDA criteria for implementing the Executive Order. An Impact Analysis is available from Malvin E. McGaha, 202–447–5975.

§ 910.514 Lemon Regulation 214.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period September 2, 1979, through September 8, 1979, is established at 200,232 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 29, 1979.

D. S. Kuryloski,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Part 1488

Export Programs; CFR Correction

In the January 1, 1979 edition of Title 7, Code of Federal Regulations, Parts 1200–1499, under Subchapter C of Chapter XIV—Commodity Credit Corporation, the text of § 1488.12(a) which appears on pages 543 and 544 is incorrect and should read as follows:

§ 1488.12 Coverage of bank obligations.

(a) U.S. banks and branch banks shall be liable without regard to risk (i) for payment of bank obligations issued by them or (ii) for payment of bank obligations confirmed by them without regard to risk if a requirement for such confirmation is included in the financing agreement or (iii) as provided in paragraphs (c) and (d).

BILLING CODE 6820–27–M

Food Safety and Quality Service

9 CFR Part 381

Poultry Products Inspection Regulations; Definitions and Standards of Identity or Composition; Standards for Turkey Ham

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the poultry products inspection regulations by providing a standard for "Turkey Ham." The standard, among other things, provides that "Turkey Ham" shall be fabricated from cured, boneless turkey thigh meat with the skin and the surface fat attached to the skin removed, and that the product name "Turkey Ham" shall be qualified with the statement, "Cured Turkey Thigh Meat." This standard is necessary to assure that a product labeled as "Turkey Ham" would have the characteristics associated with the product name, and that consumers are fully informed of the nature of the product.

EFFECTIVE DATE: October 1, 1979.

FOR FURTHER INFORMATION CONTACT:
Mr. Irwin Fried, Director, Meat and Poultry Standards and Labeling Division, Compliance, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–6042.

SUPPLEMENTARY INFORMATION:

Background

On June 2, 1978, the Department published a document in the **Federal Register** (43 FR 24064–66) proposing a standard for "Turkey Ham." As explained in the proposal, the Department since 1975 has permitted certain cured poultry products fabricated from turkey thigh meat to be labeled as "Turkey Ham" without further qualification. The decision to permit this labeling was based on the view that the term "ham" when prefixed by the species name of an animal refers to the hind limb of that animal. Poultry products are subject to the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*) and the poultry products inspection regulations (9 CFR Part 381). The Act and regulations do not define the term "ham"; however, this conclusion concerning the meaning of the term "ham" was based on § 317.8(b)(13) of the Federal meat inspection regulations (9 CFR 317.8(b)(13)), which provides:

> The word "ham," without any prefix indicating the species of animal from which derived, shall be used in labeling only in connection with the hind legs of swine.

This provision implies that the term "ham" when prefixed by the species name of an animal refers to the hind limb of that animal.

Section 4(h)(1) and (3) of the Poultry Products Inspection Act (21 U.S.C. 451(h)(1) and (3)) provide that a poultry product is misbranded "if its labeling is false or misleading in any particular," or "if it is an imitation of another food, unless its label bears, in type of uniform size and prominence, the word 'imitation' and immediately thereafter the name of the food imitated." In this connection, the American Meat Institute (AMI) and the National Pork Producers Council (NPPC) petitioned the Department to amend the Fedeal meat inspection regulation and the poultry products inspection regulations to restrict the use of the term "ham" to the labeling of meat products prepared from the hind legs of swine. AMI and NPPC assert that the labeling of a turkey product merely as "Turkey Ham" would falsely indicate that the product contains pork, and that a "Turkey Ham" is an imitation of a pork ham. The proposal also referred to a market survey that the Department had conducted for the purpose of determining the consumers' understanding of the term "Turkey Ham." A substantial group of consumers indicated that the term "Turkey Ham" referred to a product that contained some pork or was made from meat only of pork.

V 4 4 / 1 7 1

Under these circumstances, the Department proposed that a standard be adopted for a product made from cured turkey thigh meat and that the product name be "Turkey Ham" qualified with the statement "Cured Turkey Thigh Meat."

Summary of Comments

A total of 553 submittals were received representing the views of 854 individuals and organizations. Of those individuals and organizations, 369 expressed support for the proposal, 481 were in opposition to the proposal (most were against the use of the word "Ham"), three were uncommitted, and one was a recorded duplicate.

There were 319 comments submitted from representatives of meat plants, pork producers, and their associations. Representatives of poultry plants, turkey growers, and their associations submitted 85 comments. A total of 428 consumers submitted comments on the proposal. The remainder of the comments were from feed suppliers; representatives of farm publications, agricultural colleges, State Boards of Agriculture, and Farm Bureaus; and persons who indicated that they raise both hogs and turkeys. Some of the comments submitted were in the form of congressional referrals.

Name of the Product

The majority of comments submitted in response to the proposal discussed reasons for and against the use of the word "ham" in the name of the product.

Many commenters referred to dictionary definitions and § 317.8(b)(13) of the Federal meat inspection regulations in support of their claim that "ham" is generally understood to mean the hind leg of swine. Others also referred to dictionary definitions and the same provisions of the Federal meat inspection regulations to support their position that the word "ham" should be permitted to be used in the product name when shown with the species "turkey." Several commenters indicated that at the time they purchased the product labeled as "Turkey Ham" they mistakenly thought it was turkey and pork ham combined. Another commenter wrote that because her husband cannot eat pork, she never purchased "Turkey Ham" until the recent publicity, because she previously was not aware that the product did not contain pork. One commenter stated that turkey is a favorite of the elderly, that some of the elderly are not permitted to eat "ham", and that the words, "Turkey Ham", could be particularly confusing to the elderly. Another said that using the word "ham" in the product name, regardless of the qualifiers proposed, will imply to at least some consumers that the product is made or contains the flesh of the hind legs of swine.

A number of commenters indicated that a ham style product made from meat other than pork satisfies the needs of many consumers who for ethnic or religious reasons cannot eat pork and that the name "Turkey Ham" qualified by "Cured Turkey Thigh Meat" is sufficient to differentiate between a pork product and a turkey product. One commenter suggested naming the product "Ham Style Turkey." Another commenter indicated that the product is being produced and marketed to resemble the pork ham and as such should be labeled "Imitation Ham." Some commenters wanted the phrase "No Pork Added" on the label. A large number of commenters indicated that the term "Turkey Ham" should be completely deleted from the product name and that the product name merely should be "Cured Turkey Thigh Meat." Other commenters suggested simply naming the product "Smoked Turkey" or "Smoked Turkey Loaf."

The results of the market survey and the comments submitted in response to the proposal indicate that the term "Turkey Ham" without further qualification appears to have been incorrectly understood by many persons to represent a product containing pork. Accordingly, it has been determined that the name "Turkey Ham" without further qualification would cause such products to be misbranded and, therefore, could not be used as the standard name for the product.

Consideration has been given to names suggested by the comments.

The names "Ham Style Turkey", "Smoked Turkey", and "Smoked Turkey Loaf" are not acceptable because they do not reflect that the turkey used in the product comes only from the "ham" portion of the turkey. Further, the products are not required to be smoked.

The name "Imitation Ham" would also not be acceptable. The product, although having certain unique characteristics, has some characteristics similar to a "pork ham." However, it would not be an "imitation" of a "pork ham" within the meaning of the Poultry Products Inspection Act. This document establishes a standard for the product and it is an established policy of the Department not to require a standardized product to be labeled as an "imitation." This is required pursuant to the Poultry Products Inspection Act which provides that a product represented as a standardized product must bear the standard name (21 U.S.C. 453(h)(7)). The Federal Meat Inspection Act contains provisions identical to the provisions in the Poultry Products Inspection Act concerning the term "imitation." In this connection, it should be noted that the standardized product "beef patties" must be labeled as "beef patties" and not "imitation ground beef" or "imitation hamburger" (see 9 CFR 319.15).

The name "Cured Turkey Thigh Meat" accurately describes the product now known as "Turkey Ham." However, the term "Turkey Ham" has been used as the name of the product since 1975 and better connotes the characteristics which have become associated with the product. As noted above, the term "Turkey Ham" has been misleading to some consumers because they thought it represented a product containing pork. This problem, of course, has been lessened somewhat as more persons have become acquainted with the name and the product. However, in order to assure that consumers are not misled, it has been determined that the product should be named "Turkey Ham" but also qualified by the term "Cured Turkey Thigh Meat" in order to clearly inform consumers that the product consists of turkey but not pork. This is also in accordance with the proposal.

In addition, some comments indicated that the name should be qualified by the statement "No Pork Added." The Department does not favor the adoption of negative labeling requirements if the information intended to be presented can be feasibly presented otherwise. This is because some persons may wrongly interpret certain negative labeling in a pejorative sense. In this case, some persons might incorrectly interpret the term "No Pork Added" to include the concept that pork is inferior to turkey, rather than merely what was intended; i.e., that the product does not contain pork. It is the view of the Department that the qualifying term "Cured Turkey Thigh Meat" adequately informs consumers of the true nature of the product and that negative labeling is not necessary to indicate the absence of pork.

Miscellaneous

Section 381.171(a) of the proposed standard reads, in part, that "'Turkey Ham' shall be fabricated from boneless turkey thigh meat with the skin and surface fat removed." Many commenters claimed that the determination of whether surface fat is adequately removed would be inherently subjective and will vary from inspector to inspector. It was also pointed out that surface fat removal is not required of pork hams. There is a misunderstanding with respect to what was meant by "surface fat removed." Some surface fat is attached to skin and is removed along with the skin. It was merely intended that this fat would not be used as part of the product. This is clarified in the final rule.

Section 381.171(b) of the proposed standard provides that the product, among other things, may contain "seasonings." Comments requested clarification with respect to what was intended by the term "seasonings." This term was intended to include common salt, sugars, spices, spice extractives, dehydrated garlic, and onions, as well as flavoring agents as provided for in § 381.147(f) of the current poultry products inspection regulations (9 CFR 381.147(f)); i.e., approved artificial smoke flavorings, approved smoke flavoring, autolyzed yeast extract, corn syrup solids, corn syrup, glucose syrup, disodium inosinate, diosodium guanylate, hydrolyzed plant protein, malt syrup, milk protein hydrolysate, monosodium glutamate, sodium sulfoacetate (derivative of mono- and diglycerides) and approved sugars (sucrose and dextrose). The final rule was amended accordingly.

Also, it was evident from the proposal that water would be used in the product for the purpose of dissolving many of the added ingredients, such as curing agents, cure accelerators, and phosphates. Accordingly, water is added to the list of permitted ingredients.

The following statement in § 318.171(c) of the proposal was confusing to many commenters: "The finished product weight after cooking shall be no more than the original weight of the turkey thigh meat used prior to curing." The exact intent of the term "after cooking" was not clear to many commenters. Some comments questioned whether "after packing" was closer to what was intended. The phrase "after cooking" was intended to indicate the cooked finished product which allows for shrinkage up to the time of packaging. To clarify this concept, the Administrator has rephrased the requirement to read "The cooked finished product weight shall be no more than the original weight of the turkey thigh meat used prior to curing."

Commenters questioned whether a protein multiplier would be utilized to determine whether the finished product weighs more than the original weight prior to curing. A protein multiplier has not been established for turkey meat. This determination will be made on a weight basis.

The proposal provided that "qualifying statements shall not be less than one-half the size of the product name, but the letters shall not be less than one-eighth inch in height." A number of poultry establishments claimed that a minimum type size of one-eighth inch for the qualifying statement "Cured Turkey Thigh Meat" would be proportionally too large for the product name and for small packages of sliced product. A number of other commenters claimed that a qualifying statement of only one-eighth inch would be too small. In particular, it was stated that the small black print on a red background is difficult to read, and small type is a disadvantage to the elderly. One of the commenters noted that the term "Water Added" on labels for water added hams is required to be three-eighths inch in height and asserted that the qualifying statement "Cured Turkey Thigh Meat" should also be required to be three-eighths inch in height. In support of this assertion, the commenter stated that there is more possibility of confusion in the consumer's mind regarding "Turkey Ham vs. Real Ham" than there is with "Ham vs. Water Added Ham."

The name of the product and the qualifying statement must be close enough in size to assure that they are both read and understood by consumers. There does not appear to be any valid reason for permitting the qualifying statement to be smaller in comparison to the product name than was proposed.

Also, particularly with respect to color combinations and small packages, it should be noted that the Poultry Products Inspection Act specifically provides that ". . . information required to appear on a label must be prominently placed on the label with such conspicuousness (as compared with other words, statements, designs, or devices, in the labeling) and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use . . . ." Color combinations, of course, must be reviewed as part of the label on an individual basis, and may not be used if they cause information to be difficult to read. Also, first priority for label space must be given to mandatory label information. If this requires elimination of designs, advertising logos, and the like to prominently display mandatory labeling information, then that is the only course left for the processor. In addition, there are relevant differences between the qualifying statement "Cured Turkey Thigh Meat" and the term "Water Added." The term "Water Added" under the provisions of the Federal meat inspection regulations (9 CFR 319.104) is required to be three-eighths inch in height on consumer-sized packages. However, the term "Water Added" indicates that the product contains a substance in addition to ham: i.e., water, and is required to be part of the product name and the term "Cured Turkey Thigh Meat" clarifies the name "Turkey Ham." It does not appear that a phrase which merely clarifies the meaning of a product name should be required to be in letters as large as the product name itself. Further, it appears that the proposed requirements with respect to minimum heights would be sufficient and necessary to assure that consumers would be informed of the nature of the product. Accordingly, they are adopted as proposed.

The proposal provides that a product would be required to be labeled with the qualifying statement "Chunked and Formed" if fabricated from chunks of turkey thigh meat or "Ground and Formed" if fabricated from ground turkey thigh meat. Comments from poultry processors questioned what criteria would be utilized to determine when a product would be classified as "Chunked or Formed" or "Ground and Formed." Poultry processors further asserted that the product should not be labeled with the term "chunked" if it consists of whole thighs, even if separated into a few pieces during removal of the bone. The Department agrees that clarification should be made with respect to these matters. As noted in the proposal, there is a textural difference among products prepared from whole thighs, chunked thigh meat, and ground thigh meat. The final rule is changed to more clearly reflect these differences and help consumers better understand what general texture to expect from such products. Accordingly, it has been determined that pieces of turkey thigh meat that result from the cutting through the muscle (as opposed to whole thighs intact or whole thighs with some incidental separation of muscle tissue during removal of the bone) should be labeled with the qualifying statement "Chunked and Formed" if the pieces are at least the equivalent of a one-half inch cube. Smaller pieces of turkey thigh meat used in the product will be required to be qualified by the term "Ground and Formed" or "Chopped and Formed" as appropriate.

The final rule was also clarified to specify that qualifying statements must be contiguous to the product name and that no intervening type or designs may be placed between the qualifying statement "Cured Turkey Thigh Meat" and the product name "Turkey Ham." This will help assure that the qualifying

A G 3 1 7 9

UMI

statements are conspicuous and likely to be read and understood by consumers. Further, the additional requirement for the qualifying statement "Cured Turkey Thigh Meat" will help to assure that the name and the qualifying statement are read together and thereby clearly identify the nature of the product.

Some comments suggested that any required information relating to texture; e.g., "Chunked and Formed", be permitted to be combined with the qualifying phrase "Cured Turkey Thigh Meat" in order to conserve label space. An example of this suggested combination would be "Cured Chunked and Formed Turkey Thigh Meat." This suggestion was not adopted. As explained above, it is intended that the qualifying statement "Cured Turkey Thigh Meat" be read together with the product name in order to clearly identify the nature of the product; i.e., that it is a turkey product and that it does not contain pork. This statement will be more forcefully presented and more likely to be correctly understood if it does not contain additional information.

A few processors requested that the poultry products inspection regulations be further amended to provide a separate standard for canned "Turkey Ham" and to provide an additional standard for a "Water Added Turkey Ham", similar to that provided in the Federal meat inspection regulations for pork hams. These concepts were not included in the proposal. However, consideration will be given concerning whether such standards should be proposed in the future.

The standard provides that "Turkey Ham" shall be cured using one or more of the approved curing agents "as provided in § 381.147(f) of this Part." Nitrates and nitrites are listed therein as curing agents. The matter of the use of nitrates and nitrites in poultry products is under active review by the Food and Drug Administration. The provisions in the standard prescribing the use of nitrites may be affected by action undertaken in the future by the Food and Drug Administration.

On July 18, 1979, the National Advisory Committee on Meat and Poultry Inspection was consulted regarding this standard. Members of the Committee expressed comments both in support of the proposal and in opposition to it. The Committee members did not raise issues outside the scope of the written comments as discussed above, but their views were also considered in the preparation of this final rule.

Under the circumstances referred to above, the poultry products inspection regulations (9 CFR Part 381) are amended as follows:

1. The table of contents for Part 381, Subpart P, is amended to add

Sec.
"381.171 Definition and standard for "Turkey Ham."

2. A new section 381.171 is added to Part 381, Subpart P, to read as follows:

§ 381.171 Definition and standard for "Turkey Ham."

(a) "Turkey Ham" shall be fabricated from boneless, turkey thigh meat with skin and the surface fat attached to the skin removed. The thighs shall be that cut of poultry described in § 381.170(b)(5) of this Part.

(b) The product may or may not be smoked, and shall be cured using one or more of the approved curing agents as provided in § 381.147(f) of this Part. The product may also contain cure accelerators, phosphates, and flavoring agents as provided in § 381.147(f) of this Part; common salt, sugars, spices, spice extractives, dehydrated garlic, and dehydrated onions; and water for purpose of dissolving and dispersing the substances specified above.

(c) The cooked finished product weight shall be no more than the original weight of the turkey thigh meat used prior to curing.

(d) The product name on the label shall show the word "Turkey" in the same size, style, color, and with the same background as the word "Ham" and shall precede and be adjacent to it.

(e) The product name shall be qualified with the statement "Cured Turkey Thigh Meat." The qualifying statement shall be contiguous to the product name, without intervening type or designs, shall be not less than one-half the size of the product name but not less than one-eighth inch in height, and shall be in the same style and color and with the same background as the product name.

(f) If the product is fabricated from pieces of turkey thigh meat that result from the cutting through the muscle (as opposed the whole thighs intact or whole thighs with some incidental separation of muscle tissue during removal of the bone), the product name shall be further qualified by a descriptive statement. The product name of product fabricated from such pieces of turkey thigh meat equivalent in size to a one-half inch cube or greater shall be further qualified to specify that the product is "Chunked and Formed." The product name of product fabricated from such pieces of turkey thigh meat smaller than the equivalent of a one-half inch cube shall be further qualified to specify that the product is "Ground and Formed" or "Chopped and Formed" as appropriate. The qualifying statement shall immediately follow and be contiguous to the statement required in paragraph (e) of this section, and shall be not less than one-half the size of the product name but not less than one-eighth inch in height, and shall be in the same style and color and with the same background as the product name.

(Sec. 14, 71 Stat. 447, as amended 21 U.S.C. 463; 42 FR 35625, 35626, 35631)

It does not appear that additional relevant information would be available by further public participation in rulemaking proceedings on this amendment. Accordingly, it is found upon good cause under the administrative procedure provisions of 5 U.S.C. 553, that further notice or other public procedures with respect to this amendment are impracticable and unnecessary.

Note.—This final rule has been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulations," and has been designated "significant." An Approved Final Impact Statement is available from Mr. Fried, Director, Meat and Poultry Standards and Labeling Division, Compliance, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250. The alternatives considered during the analysis are listed in the Final Impact Statement.

Done at Washington, D.C., on August 15, 1979.

Donald L. Houston,
Administrator, Food Safety and Quality Service.

BILLING CODE 3410-37-M

FEDERAL RESERVE SYSTEM

12 CFR Part 201

Extensions of Credit by Federal Reserve Banks; Changes in Rates

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule (Change in discount rates).

SUMMARY: The Board of Governors has amended its Regulation A, "Extensions of Credit by Federal Reserve Banks," for the purpose of adjusting discount rates with a view to accommodating commerce and business in accordance with other related rates and the general credit situation of the country.

Pursuant to the authority of 5 U.S.C. Sec. 553(b)(3)(B) and (d)(3), these amendments are being published without prior general notice of proposed rulemaking, public participation, or deferred effective date. The Board has for good cause found that in view of emerging economic and financial considerations, these amendments must be adopted immediately.

EFFECTIVE DATE: The changes were effective on the dates specified below.

FOR FURTHER INFORMATION CONTACT: Theodore E. Allison, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202/452-3257).

Pursuant to section 14(d) of the Federal Reserve Act (12 U.S.C. 357), Part 201 is amended as set forth below:

1. Section 201.51 is amended to read as follows:

§ 201.51 Advances and discounts for member banks under sections 13 and 13a.

The rates for all advances and discounts under sections 13 and 13a of the Federal Reserve Act (except advances under the last paragraph of such section 13 to individuals, partnerships, or corporations other than member banks) are:

Federal Reserve Bank of—	Rate	Effective
Boston	10½	August 20, 1979.
New York	10½	August 17, 1979.
Philadelphia	10½	August 17, 1979.
Cleveland	10½	August 17, 1979.
Richmond	10½	August 17, 1979.
Atlanta	10½	August 20, 1979.
Chicago	10½	August 20, 1979.
St. Louis	10½	August 17, 1979.
Minneapolis	10½	August 17, 1979.
Kansas City	10½	August 17, 1979.
Dallas	10½	August 20, 1979.
San Francisco	10½	August 20, 1979.

2. Section 201.52 is amended to read as follows:

§ 201.52 Advances to member banks under section 10(b).

(a) The rates for advances to member banks under section 10(b) of the Federal Reserve Act are:

Federal Reserve Bank of—	Rate	Effective
Boston	11	August 20, 1979.
New York	11	August 17, 1979.
Philadelphia	11	August 17, 1979.
Cleveland	11	August 17, 1979.
Richmond	11	August 17, 1979.
Atlanta	11	August 20, 1979.
Chicago	11	August 20, 1979.
St. Louis	11	August 17, 1979.
Minneapolis	11	August 17, 1979.
Kansas City	11	August 17, 1979.
Dallas	11	August 20, 1979.
San Francisco	11	August 20, 1979.

(b) The rates for advances to member banks for prolonged periods and significant amounts under section 10(b) of the Federal Reserve Act and § 201.2(e)(2) of Regulation A are:

Federal Reserve Bank of—	Rate	Effective
Boston	11½	August 20, 1979.
New York	11½	August 17, 1979.
Philadelphia	11½	August 17, 1979.
Cleveland	11½	August 17, 1979.
Richmond	11½	August 17, 1979.
Atlanta	11½	August 20, 1979.
Chicago	11½	August 20, 1979.
St. Louis	11½	August 17, 1979.
Minneapolis	11½	August 17, 1979.
Kansas City	11½	August 17, 1979.
Dallas	11½	August 20, 1979.
San Francisco	11½	August 20, 1979.

3. Section 201.53 is amended to read as follows:

§ 201.53 Advances to persons other than member banks.

The rates for advances under the last paragraph of section 13 of the Federal Reserve Act to individuals, partnerships, or corporations other than member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest by, the United States or any agency thereof are:

Federal Reserve Bank of—	Rate	Effective
Boston	13½	August 20, 1979.
New York	13½	August 17, 1979.
Philadelphia	13½	August 17, 1979.
Cleveland	13½	August 17, 1979.
Richmond	13½	August 17, 1979.
Atlanta	13½	August 20, 1979.
Chicago	13½	August 20, 1979.
St. Louis	13½	August 17, 1979.
Minneapolis	13½	August 17, 1979.
Kansas City	13½	August 17, 1979.
Dallas	13½	August 20, 1979.
San Francisco	13½	August 20, 1979.

(12 U.S.C. 248(i). Interprets or applies 12 U.S.C. 357)

By order of the Board of Governors, August 24, 1979.

Theodore E. Allison,
Secretary of the Board.

BILLING CODE 6210-01-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Organization and Operations of Federal Credit Unions

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: This rule addresses Federal credit union compliance with the Fair Housing Act of 1968. The rule prohibits a Federal credit union from denying a real estate related loan (or offering it on less favorable terms and conditions) based upon certain criteria, including the age or location of the dwelling, and the race, color, sex, religion, or national origin of the borrower or of the people who reside (or may reside) in the vicinity of the dwelling securing the loan. The rule also enables any requesting member/applicant to obtain a copy of the appraisal and states that complaints will be received by the National Credit Union Administration. Finally, the rule contains guidelines for compliance with its provisions.

DATES: Effective date: October 29, 1979. However, comments will be considered if received on or before September 28, 1979. If necessary, an amended rule will be issued prior to October 29, 1979.

ADDRESS: National Credit Union Administration, 2025 M Street, NW., Washington, D.C., 20456.

FOR FURTHER INFORMATION CONTACT: Edward J. Dobranski, Senior Attorney, Office of General Counsel, at the above address. Telephone: (202) 632-4870.

SUPPLEMENTARY INFORMATION: On January 18, 1979, the Administration published a proposal (44 FR 3722 (1979)) to broaden its non-discrimination regulation (Part 701.31) and to guide and monitor Federal credit unions (FCU's) with respect to compliance with the Fair Housing Act of 1968 (42 U.S.C. 3601 *et seq.*). Public comment upon the proposed rule was requested to be received by February 28, 1979. Based upon consideration of the numerous comments received, and after a thorough review of the proposed rule by the Administration, various changes have been made. The Administration believes that this comprehensive final rule will help Federal credit unions comply with non-discrimination laws.

Analysis of Changes and Comments

1. *Definition of "Application".* In § 701.31(a)(1) of the proposed regulation, the term 'application' was defined in accordance with the definition of that term in 12 CFR 202.2(f) (Regulation B). One commenter stated that such a definition appears too limited, in that it does not call attention to the illegality of discouraging loan applications on a basis prohibited by the Fair Housing Act. The Administration agrees that such a practice, commonly known as prescreening, should be prohibited by this regulation. However, rather than expand the definition of application, subsection (b)(1) has been changed by adding a provision prohibiting an FCU from discouraging an application on a basis prohibited by the Fair Housing Act.

2. *Definition of "Dwelling" and of "Real Estate Related Loan".* The proposed regulation did not define the term 'dwelling', although that term appeared in the regulation. Based upon

V 4 4 / 1 7 1
A G 3 1 7 9
UMI

its review, the Administration has determined that the term should be defined. Consequently, in order to ensure that the scope of the regulation is consistent with the scope of the Fair Housing Act, the Administration has incorporated the Fair Housing Act definition of 'dwelling'. (With respect to the scope of this definition, note *United States* v. *Grooms*, 348 F. Supp. 1130 (M.D. Fla. 1972), which held that the term 'dwelling' encompasses a mobile home site.)

The proposed definition of the term 'real estate related loan' referenced specific lending provisions of the Federal Credit Union Act (e.g., § 107(5)(A)(i)). In this final rule, the Administration has deleted reference to those provisions, and the definition of 'real estate related loan' has been changed to reflect the wording of the Fair Housing Act. This change is necessary because a Federal credit union could make a 12 year loan for the purchase of a dwelling which would fall within the scope of the Fair Housing Act, but which would not have been a 'real estate related loan' as defined in the proposed rule, because the loan would not have been made pursuant to section 107(5)(A)(i) of the Federal Credit Union Act.

A few commenters stated that only those home improvement loans which are over a certain dollar amount and which are secured by a lien on the dwelling should be covered by the regulation. The Administration has not chosen to so limit the scope of the regulation because the Fair Housing Act is not so limited.

3. *Nondiscrimination in Lending.* Commenters addressing proposed § 701.31(b) requested that it be changed and clarified in various respects: first, that this section specifically refer to the "effects test," as section (c)(1) does; second, that guidelines be adopted which would explain the "effects test"; third, that the regulation proscribe the use of certain criteria, in addition to age and location, which when used often have a discriminatory effect and which bear little or no relation to the applicant's creditworthiness; and fourth, that Regulation B should be cross-referenced. The Administration agrees with these suggestions and has revised the regulation accordingly, as explained below.

With respect to *per se* and in effect discrimination, the Administration has changed the regulation to state explicitly that an FCU's lending policies and criteria may not discriminate, either *per se* or in effect, on the basis of race, color, sex, religion, or national origin. This has been accomplished by addresing each type of discrimination separately in the regulation.

Section 701.31(b)(1) proscribes the *per se* violations. That is, it prohibits an FCU from treating an applicant differently because of racial, religious, ethnic, or sexual considerations. FCU's should therefore ensure that prohibited considerations are not present in their general lending policies, lending procedures, or in their criteria used in reviewing applications (e.g., prescreening minority applicants, encouraging married female applicants to bring in their husbands, or gathering racial data about the neighborhood where a dwelling is located, are all prohibited).

Section 701.31 (b)(2) prohibits the use of criteria or the exercise of lending policies or procedures which have the *effect* of making real estate related loans unavailable or less available on the basis of race, color, religion, sex, or national origin, unless a legitimate business necessity exists justifying the use of such procedures, criteria, or policies. For purposes of § 701.31(b)(2) and (c)(2), the Administration has included guidelines in the regulation which explain the "effects test" and the business necessity exception. § 701.31(e)(1).) This approach was chosen in response to the suggestions of a number of commenters. Also in response to the comments, reference is made in the guidelines to the Equal Credit Opportunity Act and Regulation B to emphasize that they prohibit discrimination on the basis of age, marital status, receipt of public assistance, or the exercising of rights under the Consumer Credit Protection Act.

Many commenters also pointed out that, in addition to age and location of the dwelling, there are other criteria which lenders have used in their lending procedures which usually have the effect of discriminating on a basis prohibited by the Fair Housing Act, which bear little or no relation to the applicant's creditworthiness and which lack a business necessity justification for their use. They are: zip code of the present residence of the applicant; age or location of dwellings in the neighborhood of the dwelling; absence of prior home ownership; and the income level of residents in the neighborhood of the dwelling.

The Administration agrees that consideration of any of these factors cannot be justified as a valid consideration in the review of a real estate related loan application, and since their use often has the effect of discriminating on a basis prohibited by the Fair Housing Act, the consideration of such factors has been proscribed by this regulation. For purposes of clarification, the Administration has given guidelines on the meaning of the prohibited factors. § 701.31(e)(2).) For example, the guidelines explain that an FCU may consider an applicant's payment history on a prior loan as evidence of creditworthiness even if that prior loan was secured by a purchase money home mortgage. The distinction, of course, lies in the fact that the emphasis is on the payment record on the prior *loan*, and not on the existence of prior home *ownership*.

Finally, the Administration has changed § 701.31(b) to specifically preclude an FCU from discriminating on a basis prohibited by the Fair Housing Act when it exercises its rights under the terms or conditions of a real estate related loan contract. Thus, for example, racially discriminatory foreclosure is prohibited. (*See Harper* v. *Union Savings Association*, 429 F. Supp. 1254 (E.D. Ohio 1977).)

4. *Nondiscrimination in Appraisals.* The proposed regulation would have imposed liability upon an FCU for reliance upon a discriminatory appraisal, even if the FCU could not determine that the appraisal was discriminatory. Most of the commenters, however, believed that FCU reliance upon a discriminatory appraisal should result in a violation of this section only if the FCU knew or should have known that the appraisal was discriminatory. The commenters pointed out that on many loans (e.g., FHA and VA), the FCU neither sets the standards nor controls the process by which appraisers are chosen. Consequently, the FCU would be unable to screen appraisers so that liability (under a strict liability standard) could often be avoided. The Administration finds this argument persuasive and has therefore changed the regulation to prohibit reliance upon an appraisal the FCU knew or should have known was discriminatory.

This section also has been changed to require specific documentation in the appraisal of any consideration of the location of the dwelling. In addition, any location factors relied upon must be listed in precise fashion in the appraisal. A statement such as "declining neighborhood" would not be sufficient. In response to the comments, guidelines are also given on certain location factors that may be used in the appraisal. (Section 701.31(e)(3).) These guidelines should enable an FCU to determine whether the appraisal was discriminatory because it relied on location factors.

Section 701.31(c)(5) requires an FCU to make the appraisal available to an applicant for 25 months after the FCU notifies the applicant of the action taken on the loan application. This time period coincides with the record retention requirement of Regulation B.

Finallly, § 701.31(c) has been restructured for the purposes of clarity and now makes specific mention of the considerations which constitute *per se* violations of the Fair Housing Act. As in section 701.31(b), specific reference is made to consideration of factors that have a discriminatory effect. Also following the format of § 701.31(b), § 701.31(c)(3) prohibits consideration of certain factors, in addition to the age and loc. ion of the dwelling, which generally have a discriminatory effect, and which have no business necessity justifying their use in the appraisal. These factors are: the location of dwellings in the neighborhood of the dwelling; and the income level of residents in the neighborhood of the dwelling.

5. *Nondiscrimination in Advertising.* A number of commenters pointed out that proposed subsection (d)(3) would require that the Fair Housing logotype and the entire notice appear in every real estate related loan advertisement. This result was not intended by the Administration. The regulation has been changed to require that the logotype and notice appear on a poster in the lobby/offices of the FCU, and that only the logotype (symbol, Equal Housing Lender, "We do business in accordance with the Federal Fair Housing Law") appear in advertisements. In addition, in any radio advertisement, it must be stated that the FCU is an equal housing lender that complies with the Federal Fair Housing Law.

Based upon various comments, the Administration has changed the notice appearing under the logotype in order to present its content in plain English.

Monitoring

A few commenters stated that the information an FCU complies pursuant to other laws (such as the Equal Credit Opportunity Act and the Home Mortgage Disclosure Act) will not always be sufficient to enable NCUA to detect violations of the Fair Housing Act. Consequently, they asked that additional monitoring information be maintained, either by all FCU's engaged in real estate related lending, or by FCU's over a certain asset size.

The Administration has not adopted these recommendations. As stated in the preamble to the proposed rule, NCUA presently believes that it can adequately determine compliance with the Fair Housing Act without imposing additional record keeping requirements on FCU's. Of course, as the number of long term real estate loans made by Federal credit unions increases, the Administration will review the effectiveness of its consumer examination compliance procedures. Any such review will entail consideration of requiring FCU use of a version of the FNMA/FHLMC application form that requires a loan officer to insert the applicant's race/national origin and sex if the applicant does not volunteer this information. Should the Administration eventually decide that such an application form must be used, its long term real estate regulation (12 CFR 701.21–6) would be amended accordingly.

Effective Date

Given the fact that substantive changes have been made (e.g., the Administration has added a prohibition on consideration of the income level of the neighborhood's residents), the Administration has decided to provide an opportunity for further comment. Therefore, comments received on or before September 28, 1979, will be considered, and should a demonstrated need arise, further amendments to the rule will be made prior to the effective date of the regulation. Finally, since this regulation was published in proposed form prior to NCUA's promulgation of its Final Report "In Response to E.O. 12044: Improving Government Regulations," some of the procedures contained in such Final Report were rendered inapplicable or unnecessary.

Dated: August 23, 1979.

Authority: Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and sec. 209, 84 Stat. 1104 (12 U.S.C. 1789). 42 U.S.C. 3601–3610; 42 U.S.C. 1981; 15 U.S.C. 1601 et seq.; 12 U.S.C. 1757, 1759, 1786 and 1789.

Lawrence Connell,
Chairman.

Accordingly, 12 CFR § 701.31 is revised as follows:

§ 701.31 Nondiscrimination requirements.

(a) *Definitions:* As used in this Part, the term: (1) "Application" carries the meaning of that term as defined in 12 CFR 202.2(f) (Regulation B), which is as follows: "An oral or written request for an extension of credit that is made in accordance with procedures established by a creditor for the type of credit requested";

(2) "Dwelling" carries the meaning of that term as defined in 42 U.S.C. 3602(b) (Fair Housing Act), which is as follows: "Any building, structure, or portion thereof which is occupied as, or designed or intended for occupancy as, a residence by one or more families, and any vacant land which is offered for sale or lease for the construction or location thereon of any building, structure, or portion thereof"; and

(3) "Real estate related loan" means any loan for which application is made to finance or refinance the purchase, construction, improvement, repair, or maintenance of a dwelling.

(b) *Nondiscrimination in lending:* (1) A Federal credit union may not deny a real estate related loan, nor may it discriminate in setting, or exercising its rights pursuant to, the terms or conditions of such a loan, nor may it discourage an application for such a loan, on the basis of the race, color, religion, sex, or national origin of:

(i) Any applicant or joint applicant;

(ii) Any person associated, in connection with a real estate related loan application, with an applicant or joint applicant;

(iii) The present or prospective owners, lessees, tenants, or occupants of the dwelling for which a real estate related loan is requested;

(iv) The present or prospective owners, lessees, tenants, or occupants of other dwellings in the vicinity of the dwelling for which a real estate related loan is requested.

(2) With regard to a real estate related loan, a Federal credit union may not consider a lending criterion or exercise a lending policy which has the effect of discriminating on the basis of race, color, religion, sex, or national origin. Guidelines concerning possible exceptions to this provision appear in § 701.31(e)(1) of this Part.

(3) Consideration of any of the following factors in connection with a real estate related loan is not necessary to a Federal credit union's business, generally has a discriminatory effect, and is therefore prohibited:

(i) The age or location of the dwelling;

(ii) Zip code of the applicant's current residence;

(iii) Previous home ownership;

(iv) The age or location of dwellings in the neighborhood of the dwelling;

(v) The income level of residents in the neighborhood of the dwelling.

(c) *Nondiscrimination in appraisals:* (1) A Federal credit union may not rely upon an appraisal of a dwelling if it knows or should know that the appraisal is based upon consideration of the race, color, religion, sex, or national origin of:

(i) Any applicant or joint applicant;

(ii) Any person associated, in connection with a real estate related loan application, with an applicant or joint applicant;

(iii) The present or prospective owners, lessees, tenants, or occupants of

the dwelling for which a real estate related loan is requested;

(iv) The present or prospective owners, lessees, tenants, or occupants of other dwellings in the vicinity of the dwelling for which a real estate related loan is requested.

(2) With respect to a real estate related loan, a Federal credit union may not rely upon an appraisal of a dwelling if it knows or should know that the appraisal is based upon consideration of a criterion which has the effect of discriminating on the basis of race, color, religion, sex, or national origin. Guidelines concerning possible exceptions to this provision appear in § 701.31(e)(1) of this Part.

(3) A Federal credit union may not rely upon an appraisal that it knows or should know is based upon consideration of any of the following criteria, for such criteria generally have a discriminatory effect, and are not necessary to a Federal credit union's business:

(i) The age or location of the dwelling;

(ii) The age or location of dwellings in the neighborhood of the dwelling;

(iii) The income level of residents in the neighborhood of the dwelling.

(4) Notwithstanding paragraph (c)(3) of this section, it is recognized that there may be factors concerning location of the dwelling which can be properly considered in an appraisal. If any such factor(s) is relied upon, it must be specifically documented in the appraisal, accompanied by a brief statement demonstrating the necessity of using such factor(s). Guidelines concerning the consideration of location factors appear in § 701.31(e)(3) of this Part.

(5) Each Federal credit union shall make available, to any requesting member/applicant, a copy of the appraisal used in connection with that member's real estate related loan application. The appraisal shall be available for a period of 25 months after the applicant has received notice from the Federal credit union of the action taken by the Federal credit union on the real estate related loan application.

(d) *Nondiscrimination in advertising.* (1) *Advertising notice of nondiscrimination compliance.* (i) No Federal credit union may directly or indirectly engage in any form of advertising of real estate related loans which implies or suggests that the Federal credit union discriminates in violation of the provisions of the Fair Housing Act of 1968 or of this Part. Advertisements of such loans shall include a facsimile of the following:

Equal Housing Lender

We do business in accordance with the Federal Fair Housing Law.

(ii) Advertisements of real estate related loans which are broadcast on the radio shall contain the following statement: "The [insert name] Federal Credit Union is an equal housing lender which does business in accordance with the Federal Fair Housing Law."

(2) *Lobby notice of nondiscrimination compliance.* Every Federal credit union which engages in real estate related lending shall conspicuously display in the public lobby of such credit union and in the public area of each office where such loans are made, in a manner so as to be clearly visible to the general public entering such lobby or area, a notice that incorporates a facsimile of the logotype and notice appearing in paragraph (d)(3) of this section. Posters containing this notice and logotype may be obtained from the regional offices of the National Credit Union Administration.

(3) *Logotype and notice of nondiscrimination compliance.* The logotype and text of the notice required in paragraph (d)(2) of this section shall be as follows:

Equal Housing Lender

We do business in accordance with the Federal Fair Housing Law and the Equal Credit Opportunity Act.

It is illegal, because of the race, color, religion, sex, national origin, marital status, or age of any person, or because a person receives income from a public assistance program, or has in good faith exercised any rights under the Consumer Credit Protection Act, to:

Deny a loan, including a loan for the purpose of purchasing, constructing, improving, repairing, or maintaining a dwelling, or

Discriminate in fixing the amount, interest rate, duration, application procedures or other terms or conditions of a loan.

If you believe you have been discriminated against, you may send a complaint to: National Credit Union Administration, Division of Consumer Affairs, Washington, D.C. 20456, or U.S. Department of Housing and Urban Development, Assistant Secretary for Fair Housing and Equal Opportunity, Washington, D.C. 20410.

(e) *Guidelines:* (1) Compliance with the Fair Housing Act is achieved when each loan applicant's creditworthiness is evaluated on an individual basis, without presuming that the applicant has certain characteristics of a group. If certain lending policies or procedures do presume group characteristics, they may violate the Fair Housing Act, even though the characteristics are not based upon race, color, sex, religion, or national origin. Such a violation occurs when otherwise facially nondiscriminatory lending procedures (either general lending policies or specific criteria used in reviewing loan applications) have the effect of making real estate related loans unavailable or less available on the basis of race, color, sex, religion, or national origin. Note, however, that a policy or criterion which has a discriminatory effect is not a violation of the Fair Housing Act if its use achieves a legitimate business necessity which cannot be achieved by using less discriminatory standards. (See *Albermarle Paper Co. v. Moody*, 422 U.S. 405 (1975) and *Griggs v. Duke Power Co.*, 401 U.S. 424 (1971).)

It is also important to note that the Equal Credit Opportunity Act and Regulation B prohibit discrimination, either *per se* or in effect, on the basis of the applicant's age, marital status, receipt of public assistance, or the exercise of any rights under the Consumer Credit Protection Act.

(2) Paragraph (b)(3) of this section prohibits considerations of certain factors because of their likely discriminatory effect and because they are not necessary to make sound real estate related loans. For purposes of clarification, the prohibited use of location factors in this section is intended to prevent abandonment of areas in which a Federal credit union's members live or want to live. It is not intended to require loans in those areas that are geographically remote from the FCU's main or branch offices or that contravene the parameters of a Federal credit union's charter. Further, this prohibition does not preclude requiring a borrower to obtain flood insurance protection pursuant to the National Flood Insurance Act and Part 760 of NCUA's Rules and Regulations, nor does it preclude involvement with Federal or state housing insurance programs which provide for lower interest rates for the purchase of homes in certain urban or rural areas. Also, the legitimate use of location factors in an appraisal does not constitute a violation of the provision of paragraph (b)(3) of this section, which prohibits consideration of location of the dwelling.

Finally, the prohibited use of prior home ownership does not preclude a Federal credit union from considering an applicant's payment history on a loan which was made to obtain a home. Such action entails consideration of the payment record on a previous loan in determining creditworthiness, it does not entail consideration of prior home ownership.

(3)(i) Paragraph (c)(3) of this section prohibits consideration of the age or location of a dwelling in a real estate related loan appraisal. These restrictions are intended to prohibit the use of unfounded or unsubstantiated assumptions regarding the effect upon loan risk of the age of a dwelling or the physical or economic characteristics of an area. Appraisals should be based on the present market value of the property offered as security (including consideration of specific improvements to be made by the borrower) and the likelihood that the property will retain an adequate value over the term of the loan.

(ii) The term 'age of the dwelling' does not encompass structural soundness. In addition, the age of the dwelling may be used by an appraiser as a basis for conducting further inspections of certain structural aspects of the dwelling. Paragraph (c)(3) of this section does, however, prohibit an unsubstantiated determination that a house over X years in age is not structurally sound.

(iii) With respect to location factors, paragraph (c)(4) of this section recognizes that there may be location factors which may be considered in an appraisal, and requires that the use of any such factors be specifically documented in the appraisal. These factors will most often be those location factors which may negatively affect the short range future value (up to 3–5 years) of a property. Factors which in some cases may cause the market value of a property to decline are recent zoning changes or a significant number of abandoned homes in the immediate vicinity of the property. However, not all zoning changes will cause a decline in property values, and proximity to abandoned buildings may not affect the market values of a property because the cause of abandonment is unrelated to high risk. Proper considerations include the condition and utility of the improvement, and various physical factors such as street conditions, amenities such as parks and recreation areas, availability of public utilities and municipal services, and exposure to flooding and land faults.

BILLING CODE 7535-01-M

12 CFR Part 703

Interpretative Ruling—Investment Activities

AGENCY: National Credit Union Administration.

ACTION: Interpretation of General Applicability.

SUMMARY: The purpose of this interpretative ruling is to set forth the Administration's position on certain activities resulting from 12 CFR 703.3 published on July 20, 1979 (44 FR 42673), and to establish accounting procedures to be used in conjunction with the investment authorities permitted by that rule. The accounting procedures will be reflected in future changes to the Accounting Manual for Federal Credit Unions, NCUA 8022.

EFFECTIVE DATE: August 31, 1979.

ADDRESS: National Credit Union Administration, 2025 M Street, N.W., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Robert F. Schafer, Chief, Supervision Section, Office of Examination and Insurance, at the above address. Telephone (202) 254–8760.

SUPPLEMENTARY INFORMATION: On October 17, 1978, the Administration published a proposed rule (43 FR 47731) to restrict Federal credit unions from engaging in certain investment activities, which the Administration believed to be unauthorized, or unsafe and unsound in that they resulted in losses to Federal credit unions and/or in a risk to the National Credit Union Share Insurance Fund. The comment period on the rule ended on December 15, 1978, but was extended to March 15, 1979 (43 FR 58096, December 12, 1978). The final rule was published July 20, 1979 (44 FR 42673).

As a result of the final rule the Administration has established certain accounting procedures for those investment activities which are permissible. It is the Administration's opinion that the new procedures are necessary for Federal credit unions to provide for "full and fair disclosure" which is required by § 702.3 of the rules and regulations (12 CFR 702.3).

Some of the accounting procedures were cited in the preamble to the proposed regulation while others are the result of comments which were received. The Administration has reviewed all comments on accounting procedures and made changes as discussed below.

1. Procedures for Investment Activities

a. Background. The current Accounting Manual for Federal Credit Unions (accounting manual) does not address some of the accounting procedures necessary to implement the investment activities permitted under § 703.3 of the National Credit Union Administration rules and regulations (the investment rule). Prior to the publication of the investment rule the Administration did recommend certain procedures for reverse repurchase transactions, which were distributed to all Federal credit unions in a letter from the Administrator. Additionally, the preamble to the proposed investment rule cited additional accounting procedures for investments. A copy of the proposed rule was also sent to all Federal credit unions for comment.

Numerous comments were received regarding the accounting procedures listed in the preamble to the proposed rule. Most of the comments objected to recognition of losses due to the mark to the lower of cost or market concept on forward placement contracts or to various aspects of fuller disclosure on the Statement of Financial Condition.

(A) Marking to the Lower of Cost or Market

Most of the comments received objected to recording securities purchased via forward placement contracts (forwards) at the lower of cost or market on settlement date. Commenters claimed that it is unfair or inconsistent to do so for forwards when the same was not done for cash/immediate purchases. Others commented that this procedure does not comply with Generally Accepted Accounting Principles (GAAP). Some suggested that a footnote would suffice to provide full disclosure.

The Administration believes that there is a general misunderstanding of the basis for marking forwards to the lower of cost or market, as well as the basis for recording cash purchases at cost.

Federal credit unions have traditionally recorded investment purchases at cost. This price however, is also the market value of the security on the date of purchase. Under current

V 4 4 / 1 7 1

accounting procedures Federal credit unions may choose to reflect declines in market value if the board determines that the securities purchased will not be held to maturity. Premiums and discounts are amortized or accreted, respectively, over the life of the security.

The accounting procedures for forward placement contracts are similar to cash purchases, except for the initial recording of the asset. The Administration believes that the requirement to record forwards at the lower of cost or market prevents the recording of an inflated asset on the books which could materially distort the financial statement. Thus the Administration believes its position complies with GAAP. Once the asset is recorded all other accounting procedures for investments prevail.

Marking forwards to the lower of cost or market on settlement date is not a new concept as the Comptroller of the Currency requires it for all national banks. Additionally, Federal credit unions may be interested to know that approved common trust funds are required to reflect market fluctuation of forward commitments not only at settlement date, but also during the period between trade date and settlement date. The reflection of market changes, ultimately affects the rate of return on these accounts.

Accordingly, the Administration believes that in order to provide for full and fair disclosure under § 702.3 of the rules, it would be necessary for Federal credit unions to mark to the lower of cost or market on settlement date any security purchased via a cash forward agreement (which is the only forward placement contract permitted under the investment rule).

(B) Commitment Fees on Standby Commitments.

Several commentors stated that it is inconsistent to prohibit the recording of commitment fees received as income until settlement date, while requiring the recording of commitment fees paid as an expense on the date of payment. The discrepancy is now moot since Federal credit unions are prohibited from purchasing or selling securities via a standby commitment.

(C) Footnotes to the Financial Statements

Several commentors objected to footnoting financial statements to reflect the current market value of outstanding commitments. Some pointed out that present accounting procedures do not require that Federal Credit Unions footnote their Statements of Financial Condition to reflect the current market value of the investment portfolio, and wondered why commitments should be footnoted. Others objected because they did not want to disclose large discrepancies between book and market value to their members "who would not understand."

The Administration has considered the former comment and determined that its policy on footnoting the impact of investment market conditions must be consistent for both recorded investments and commitments. The importance of this information in providing full and fair disclosure for recorded investments apparently had been overlooked in the past.

The Administration believes that the latter comment is contrary to the purpose of "full and fair disclosure". A Federal credit union has a responsibility to provide its members and creditors with sufficient and accurate information to make an informed decision on investing their funds.

Therefore Federal credit unions must footnote their Statements of Financial Condition to reflect the current market value of the investment portfolio as well as the value of outstanding commitments.

(D) Investment-type Repurchase Transactions

An noted in the preamble to the investment rule, the Administration reconsidered its position on the requirements necessary for delivering securities under an investment-type repurchase agreement. In light of this change, the Administration believes that some of the accounting procedures contained in the preamble to the proposed investment regulation are no longer applicable. These procedures required that interest and dividends on the securities purchased be recorded separately from a gain or loss on the sale of the securities. The Administration now believes that the purpose of repurchase agreements is to obtain a specified yield on the investment made and that this yield represents operating income. As such, it should be recorded in account No. 121, Income from Investments.

(E) Amortization/Accretion of Premiums/Discounts

The current Accounting Manual for Federal Credit Unions requires that premiums on investments be amortized over a period from the purchase date to maturity date, or in the case of call bonds to the call date. Discounts in all cases are accreted from purchase date to maturity date.

It was suggested that the Administration review that position in light of the increased use of pass-through securities backed by mortgage loans such as Government National Mortgage Association securities (Ginnie Maes) and Federal Home Loan Mortgage Corporation securities (Freddie Macs). These securities provide for principal repayments on a monthly basis that may be repaid prior to maturity. As a standard for comparing yield, mortgage-backed pass-through securities, such as Ginnie Maes and Freddie Macs which have 30-year maturities, are considered to have a 12-year average life. The average life is based upon data published by the Federal Housing Administration (FHA). Other pass-through securities, such as SBA guaranteed loans have no established average life.

In order to meet the needs of credit unions that have extensive pass-through security portfolios, the Administration has determined that it is necessary to provide alternative methods for amortizing or accreting premiums and discounts as set forth below in section (a)(8) of the Interpretative Ruling and Policy statement.

2. Adjusted Trading.

As noted in the preamble to the final investment rule the Administration has documented a growing number of instances where Federal credit unions have attempted to hide or defer losses occurring from their investment transactions. The reasons for such actions have varied but generally can be attributed to the desire of officials to pay dividends when sufficient earnings would not be available had the investment losses been recognized. In some cases the officials may not have been aware of the impact of their actions, or that the adjusted trading was in violation of National Credit Union Administration Rules and Regulations. Thus, the Administration prohibited such activity in § 703.3(b)(8) of the rules and regulations, and now spells out some of the types of transactions that constitute this activity in section (b) of the Interpretative Ruling and Policy Statement.

3. Other Investment Transactions

The final rule prohibits certain investment activities, such as standby commitments, adjusted trading and short sales, and limits other activities such as cash forward agreements and reverse repurchase transactions. The Administration has determined that Federal credit unions have engaged in transactions which in whole or in part are prohibited by the rule. Therefore, the Administration believes it is necessary to clarify those transactions which it has determined are prohibited by § 703.3 of the rules. The fact that a particular transaction is not described in section (c) of this Interpretative Ruling does not mean that it would necessarily be permitted. Each transaction must be reviewed on its own merits in light of the investment rule. Should the Administration determine in the future that other transactions violate the rule, additional Interpretative Rulings will be issued.

Interpretative Ruling—IRPS No. 79-4

a. *Accounting Procedures.* The Administration believes that for the transactions listed below the following accounting procedures provide for full and fair disclosure as required by § 702.3 of the National Credit Union Administration Rules and Regulations.

(1) Cash Forward Agreement to Purchase Securities

(A) Federal Credit Unions must be able to provide information on the type of security purchase by use of a cash forward agreement to include a complete description, trade date, settlement date, amount, coupon rate, purchase price, and name of the seller. Such information should be kept in a current register for that purpose.

(B) Written cash flow projections evidencing the credit union's ability to purchase the underlying securities must be prepared prior to making a commitment to purchase the securities, as required by § 703.3(b)(3) of the investment rule.

(C) Prior to settlement the amount of the cash forward agreement represents a contingent liability to the credit union. Therefore, in accordance with the Accounting Principles and Standards for Federal Credit Unions it must be shown as a footnote or memorandum entry on the credit union's Statement of Financial Condition for each month the commitment is outstanding. The footnote will reflect the agreed upon purchase price and the market price on the statement date.

(D) When purchased, the underlying security shall be recorded at the lower of cost or market. Losses, if any shall be shown in account No. 420, Gain (Loss) on Investments.

(2) Cash Forward Agreement to Sell Securities

(A) A Federal Credit Union must be able to provide information on the type of security sold by use of a cash forward agreement to include a complete description, trade date, settlement date, sale price and name of the purchaser. Such information should be kept in a current register for that purpose.

(B) Prior to settlement the amount of the cash forward agreement represents a contingent liability to deliver securities. Therefore, in accordance with the Accounting Principles and Standards for Federal Credit Unions it must be shown as a footnote or memorandum entry on the credit union's Statement of Financial Condition for each month the commitment is outstanding.

(C) The gain or loss on the sale of the underlying security will not be recognized until the settlement date and will be recorded in account No. 420, Gain (Loss) on Investments.

(3) Investment-Type Repurchase Transaction

(A) A Federal Credit Union must be able to provide information on the type of security purchased by use of an investment-type repurchase transaction to include an identification of the security (type, face value, coupon rate), trade date, settlement date, amount, repo rate, purchase price and the name of the seller. Such information should be kept in a current register for that purpose.

(B) Each investment-type repurchase transaction must be documented by the following as required by § 703.3(a)(4) of the investment rule.

(i) For those securities in the physical possession of the credit union, there must be clear evidence of ownership of the security.

(ii) For those securities held in safekeeping, there must be a copy of the "bailment for hire contract" from the third party bank or other financial institution, and a safekeeping receipt.

(C) The security purchased will be recorded at cost in the appropriate investment account (series 740).

(D) The credit union's Statement of Financial Condition will be footnoted to reflect the amount of securities which are subject to resale and the date of resale.

(E) Income earned on the securities purchased will be recorded in account No. 121 Income from investments.

(4) Loan-Type Repurchase Transaction

(A) Loan-type repurchase agreements to members must be made in accordance with within the limitations established in the Federal Credit Union Act, the Federal Credit Union Bylaws, the National Credit Union Administration Rules and Regulations, and policies established by the board of directors. These requirements include but are not limited to a maximum loan limit of 10 percentum of unimpaired capital and surplus to one member, the receipt of a properly supported loan application, approval of the loan by the credit committee, and execution of a note supported by documentation of the collateral. Account No. 705, Loans Subject to Repurchase Agreements, will be used to record these loans.

(B) Loan-type repurchase agreements to other credit unions must conform with limitations contained in sections 107(5)(C) and 107(7)(C) of the Act and Section 703.2 of the National Credit Union Administration Rules and Regulations. These loans will be recorded in account 747, Loans to Other Credit Unions.

(C) Loan-type repurchase agreements to approved credit union organizations must be in compliance with section 107(5)(D) of the Act and National Credit Union Administration Rules and Regulations. Account No. 744 Loans to Credit Union Service Corporations, will be used to record these loans.

(D) Where material in amount the securities used as collateral for the loan-type repurchase agreement will be identified in a footnote or memorandum entry on the credit union's Statement of Financial Condition for each month the repurchase agreement is outstanding. The footnote will reflect the market price of the securities on the statement date.

(E) Income received from loans to members will be recorded in account No. 111, Interest on Loans. Income received from loans to credit union organizations and loans to other credit unions will be recorded in account No. 121, Income from Investments.

(5) Reverse Repurchase Transaction

(A) Since Reverse repos represent a borrowing activity, such activity must be approved by the board of directors or a duly appointed executive committee as required by section 113 of the Federal Credit Union Act.

(B) Funds received from reverse repos will be recorded as borrowed funds in account No. 812, Notes Payable—Other.

(C) The securities used as collateral for the reverse repos will be identified in a footnote or memorandum entry on the credit union's Statement of Financial Condition for each month the reverse repo is outstanding. The footnote will reflect both the book value and the market price on the statement date.

(D) Interest paid on reverse repos will be recorded in account No. 340, Interest on borrowed Money.

(6) Commitment Fees

Section 703.3(b)(2) of the investment rule prohibits Federal credit unions from entering into standby commitments to purchase or sell securities. Those credit

A G 3 1 7 9

UMI

unions, that prior to the publication of the final rule entered into standby commitments to purchase or sell securities, need not adjust their records to reflect the accounting procedure for commitment fees which was noted in the preamble to the proposed rule.

(7) Footnotes to Financial Statements

In order to provide for full and fair disclosure as required by § 702.3 of the National Credit Union Administration Rules and Regulations, Federal credit unions must footnote their statements of Financial Condition to reflect the market value of the securities recorded in accounting series 740.

(8) Amortization/Accretion of Premiums/Discounts on Pass-through Securities

Federal credit unions may select from the following methods for amortizing and accreting premiums and discounts on pass-through securities, provided the method selected is used for all such securities.

(A) For pass-through securities backed by mortgage loans:

(i) Maturity method. The maturity method calls for amortization or accretion of premiums or discounts from date of purchase to date of maturity.

(ii) Average life method. This method provides for amortization or accretion from the purchase date to 12 years from the date the security was originally issued.

(iii) Repayment factor method. This method provides for amortization or accretion based upon the percentage of the principal repaid to the par value of the security on the purchase date.

(B) For pass-through securities not backed by mortgage loans:

(i) Maturity method

(ii) Repayment factor method

(9) Examples

Examples of the accounting entries for the transactions discussed above are found in Appendices A through F.

b. *Adjusted Trading.* The Administration believes that the following types of transactions constitute adjusted trading (as defined in § 703.3(a)(10)), and therefore, are prohibited. The most common form of adjusted trading occurs when a credit union cannot meet its commitment to purchase a security on the settlement date and the market price is below the commitment price. Thus, if the credit union is forced to immediately sell the security it will incur a loss. In order to prevent the loss, the credit union would enter into an agreement to resell the security to the broker at the commitment price and to enter into another commitment to purchase a different security at a price that exceeds its market value. Thus the credit union has deferred its loss in hopes that the market price of the security underlying the new commitment will increase by the new settlement date.

A less common form of adjusted trading occurs when a credit union swaps or exchanges a lower yielding security for a higher yielding security. In this case, the sale of the low yielding security would result in a loss, which the credit union does not wish to recognize during the current accounting period. Again the credit union agrees to sell its security and buy the new security at prices above market. Another name for these transactions is overtrading.

A variation of the adjusted trade involving a forward commitment is known as "fee trading" or "reposition trading." This transaction is the same as the first example above except that the broker is unwilling to take the risk of purchasing the initial security the credit union would sell at a price above market. Therefore, the broker requires that the credit union pay a fee, which is the difference in the commitment price and the market price when they enter into the transactions. When the credit union purchases the new security, the broker returns the fee. Often, this type of transaction occurs repeatedly. The fee is usually recorded by the credit union as a receivable, deferred expense, or other asset.

The Administration believes that the transactions described above, under whatever name, constitute adjusted trading and thus are prohibited under § 703.3(b)(8) of the final investment regulation.

c. *Other Investment Transactions.* The Administration believes that the following transactions are in whole or in part in violation of § 703.3 of the National Credit Union Administration Rules and Regulations and thus are prohibited.

(1) Yield maintenance contract

(A) *Definition.* A yield maintenance contract, also known as a pair-off hedge, is the concurrent commitment to purchase a security via a cash forward agreement and to sell the same security on the same settlement date via a standby commitment. The credit union is required to pay a commitment fee to the vendor which is generally exorbitant. The purpose of the transaction is to "guarantee" a specified yield which is based upon the commitment fee paid. Generally, the purchase and sale prices are not related to the current market price.

(B) *Basis for Prohibition.* Yield maintenance contracts violate § 703.3(b)(2) which prohibits a Federal credit union from entering into a standby commitment and § 703.3(b)(10) which requires that all purchases and sales of securities be done at market prices. Additionally, the Administration believes that a yield maintenance contract is an unsecured loan to a broker (a non-member) and thus is in violation of section 107(5) of the Federal Credit Union Act.

(2) Pair-Off Transaction

(A) *Definition.* A pair-off transaction is the matching or netting of commitments to purchase and sell securities via cash forward agreements. Generally a Federal credit union would commit to purchase a security and sometime thereafter commit to sell the security on the same settlement date. The purpose in engaging in pair-off transactions is not to take delivery of the security purchased, but to speculate that the market price will increase before settlement date and a gain will result from its sale. Many times the commitment to sell is made the same day as the commitment to purchase. There may even be a standard order with the vendor to sell when a certain market price is reached.

(B) *Basis for Prohibition.* Pair-off transactions are prohibited by § 703.3(b)(3) which prohibits Federal credit unions from selling securities via a cash forward agreement that they do not own. The Administration also believes that pair-off transactions represent a speculative activity which is unsafe and unsound. Additionally, there is strong evidence to show that it has been used as a means of "churning" credit union accounts to benefit brokers commission.

It should be noted that a short sale, which is a pair-off transaction in reverse, is prohibited under § 703.3(b)(9).

(3) Dollar Price Repurchase Agreement (dollar price repo)

(A) *Definition.* A dollar price repurchase agreement means a contract whereby a Federal credit union sells a security that it owns and agrees to purchase another security on a future date. Because of the reasons set forth below, the Administration has determined that the dollar price repo does not represent borrowing by a Federal credit union as does a reverse repurchase transaction defined in § 703.3(a)(5) of the investment regulation.

In the case of a reverse repurchase agreement, the transaction represents borrowing because ownership of the security "sold" does not change; that is, the "seller" of the security still has title and still receives the dividend or interest income from the security. Interest based upon the balance of the proceeds received from the transaction are paid by the "seller." Additionally, the same security "sold" must be "repurchased." As such the essential elements of a sale and repurchase do not exist.

In the case of a dollar price repo, the essential elements of a sale do exist, i.e., ownership of the security does change. The buyer now receives the dividend or interest income on the security. No interest is paid by the seller for funds received. The same security sold is not required to be repurchased.

The Administration believes that some Federal credit unions have been encouraged to adopt accounting practices that make a dollar price repo appear to be a reverse repurchase transaction.

Such practices include:

(i) Not recording gains and losses when the security is sold.

(ii) Prorating the difference between the price of the security sold and the price of the security purchased over the transaction period and recording this difference as interest income or expense.

(iii) Accruing or accreting premiums or discounts on the security that is sold.

(iv) Not recording the purchase of the new security.

(B) *Policy.* The Administration believes that a dollar price repo represents the sale of a security and a simultaneous agreement to purchase another security at a future date by use of a forward placement contract. As such a Federal credit union may enter into such an agreement only if:

(i) Gains and losses on the sale of the security sold are recognized on the settlement date of the sale.

(ii) The limitations cited in § 703.3(b)(3) for purchasing a security under a cash forward agreement are met.

Lawrence Connell,

Chairman.

August 23, 1979.

Appendix A—Accounting Entries for a Cash Forward Agreement To Purchase a Security

Assume that an FCU entered into a Cash Forward Agreement to purchase a $1 million par value Federal Agency security on March 16 at 95, which is the market price for a 90 day forward. The FCU had written projections which showed that it had a $1 million CD maturing on June 15, the settlement date of the forward. The market value of the security was 93 on June 14.

Entries:

March 16

The commitment is recorded in the cash forward agreement register.

Future financial statements of the Federal credit union are footnoted.

June 15

Dr. Federal Agency Securities (742)..... 930,000
Dr. Gain (Loss) on Investments (420)..... 20,000
Cr. Cash (731)..... 950,000

To record purchase of security at lower of cost or market.

Footnote is removed from the financial statements.

Appendix B—Accounting Entries for a Cash Forward Agreement To Sell a Security

Assume that an FCU owns a Federal Agency Security recorded on its books for $950,000. It commits on June 10 to sell the security on August 20 for $975,000.

Entries:

June 10

The commitment is recorded in the cash forward agreement register.

Future financial statements are footnoted.

August 20

Dr. Cash (731)..... $975,000
Cr. Federal Agency Securities (742)..... 950,000
Cr. Gain (Loss) on Investments (420)..... 25,000

To record the sale of the security and recognize the gain on the sale.

Footnote is removed from the financial statements.

Appendix C—Accounting Entries for an Investment-Type Repurchase Transaction

Assume that an FCU entered into an investment-type repurchase transaction on September 30 to purchase a mortgage-backed Federal agency security with a face value of $2,142,857 and a coupon rate of 8.50. The parties agreed upon a repo rate of 9.0. The purchase price was 98. Also assume that the FCU agreed to resell a similar type security to the vendor on October 1 at 98.0245.

Entries:

September 30

The funds are transferred to the broker through the credit union's custodial bank, which transmits a custodial slip to the FCU. The transaction is recorded in the repurchase transaction register.

The financial statements of the Federal credit union are footnoted.

Dr. Federal Agency Securities (742) ($2,142,857 x 98)..... 2,100,000
Cr. Cash (731)..... 2,100,000

To record the purchase of the security.

October 1

Dr. Cash (731)..... 2,100,525
Cr. Federal Agency Securities (742)... 2,100,000
Cr. Income from Investments (121)..... 525

To record repurchase of security and receipt of income.

Footnote is removed from financial statements.

Appendix D—Accounting Entries for a Loan-Type Repurchase Agreement

Assume FCU "A" enters into a Repurchase Agreement with FCU "B" whereby "A" lends $1 million to "B" on February 1 and receives as collateral a $1 million Federal Agency security valued at par. FCU "B" agrees to repay the loan on August 1. The interest rate is 6 percent.

Entries on the books of FCU "A"

February 1

Dr. Loans to Other Credit Unions (747)..... 1,000,000
Cr. Cash (731)..... 1,000,000

To record loan.

The records of the Federal credit union are footnoted.

August 1

Dr. Cash (731)..... 1,030,000
Cr. Loans to Other Credit Unions (747)..... 1,000,000
Cr. Income from Investment (121)..... 30,000

To record repayment of loan with interest.

Footnote is removed from records.

Entries for FCU "B" are contained in Appendix E.

Appendix E—Accounting Entries for a Permissible Reverse Repurchase Transaction

Referring to Appendix D, FCU "B" would record the transaction as a Reverse Repurchase Agreement. In addition to the information given in that example, assume also that FCU "B" is unable to repay the loan from available funds on settlement date. FCU "B" chooses to sell the underlying security at its fair market value of 99½. The security is booked at par.

Entries on the books of FCU "B"

February 1

Dr. Cash (731)..... 1,000,000
Cr. Notes Payable—Other (812)..... 1,000,000

To record the Reverse Repo as borrowed funds.

The records of the Federal credit union are footnoted.

August 1

Dr. Cash (731)..... 995,000
Dr. Gain (Loss) on Investments (420)..... 5,000
Cr. Federal Agency Securities (742)... 1,000,000

To record sale of the underlying security recognizing a $5,000 loss.

Dr. Notes Payable (812)..... 1,000,000
Dr. Interest on Borrowed Money (340)..... 30,000
Cr. Cash (731)..... 1,030,000

To record payment of notes payable and interest due.

Footnote is removed from records.

Appendix F.—Repayment Factor Method of Amortizing/Accreting Premiums and Discounts for Modified Pass Through Securities

Assume that an FCU purchases a modified pass through security with a par value $932,577 on March 1 at 92²⁸⁄₃₂. Principal repayments in March, April and May were $500, $625, and $750. Accretion of the discount would be as follows:

1. Determine the amount of the discount—

Par value on date of purchase	$932,577
Less purchase price (par × 92²⁸⁄₃₂)	860,302
Discount	72,275

2. Determine the repayment factor—

$$\frac{\text{Premium or discount}}{\text{Par value}} = \text{Repayment factor}$$

$$\frac{\$72,275}{932,577} = .0775$$

3. Determine the amortization/accretion—

	Principal repayment		Repayment factor		Amortization/accretion
April	$500	×	.0775	=	$38 75
May	625	×	.0775	=	48 44
June	750	×	.0775	=	58 13

[FR Doc. 79-27029 Filed 8-30-79; 8:45 am]

BILLING CODE 7535-01-M

12 CFR Part 742

Liquidity Reserves

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: This rule applies to all credit unions that are insured by the National Credit Union Share Insurance Fund and either (i) have assets of $2,000,000 or more, or (ii) operate share draft or equivalent programs. The rule requires that such credit unions hold liquid assets in an amount equalling at least 5% of their member accounts and notes payable (excluding certain non-volatile accounts). The rule is needed to address significant declines in credit union liquidity and capital which, if continued, may threaten the interests of insured credit unions, their members and the National Credit Union Share Insurance Fund. The rule will enhance the ability of insured credit unions to meet member demands for liquid funds and avoid asset losses. The Administration is at this time also repealing the existing share draft liquidity reserve requirement for Federal credit unions (12 CFR 701.34(c)(5)(xiv)).

EFFECTIVE DATE: October 31, 1979.

ADDRESS: National Credit Union Administration, 2025 M Street NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Robert H. Dugger, Director, Office of Policy Analysis, 1375 K Street NW., or Robert M. Fenner, Assistant General Counsel, at the above address. Telephone: (202) 633-6775 (Mr. Dugger), (202) 632-4870 (Mr. Fenner).

SUPPLEMENTARY INFORMATION:

Background

On June 8, 1979, the National Credit Union Administration ("Administration") issued a proposed rule, "Liquidity Reserves of Insured Credit Unions" (12 CFR Part 742, published at 44 FR 33094). The proposed rule was to appy to all credit unions whose member accounts are insured by the National Credit Union Share Insurance Fund ("insured credit unions"). It was proposed that insured credit unions be required to maintain at least a prescribed minimum portion of their assets in the form of liquid assets, or in other words, that they maintain minimum liquidity reserves. The proposed minimum amount of liquid assets was set at 5% of member accounts (shares, share certificates and similar accounts) and notes payable. The liquid assets, including such interest earning assets as short-term insured deposits and government securities, would be depletable if share outflows necessitated.

The rule was proposed as a result of significant declines in liquidity and capital among insured credit unions. These declines have contributed to substantial demands for assistance (in the form of loans and guarantees) from the National Credit Union Share Insurance Fund, and, if not averted, the declines may threaten the interests of insured credit unions and their members. The proposed rule was intended to address these declines and enhance the ability of insured credit unions to meet member demands for liquid funds and avoid asset losses. The Draft Regulatory Analysis issued in connection with the proposed rule (pursuant to the Administration's Final Report on Improving Government Regulations, which voluntarily implements Executive Order 12044) provided additional information concerning the need for and benefits of the rule, and the costs of the rule to insured credit unions.

Public participation in the proposed rule was requested in the form of written comments. Comments were originally to be received on or before July 25, 1979. In response to requests by some commenters, the comment period was extended to August 10, 1979. A notice of extension was published on July 23, 1979, at 44 FR 43001. The Administration also accepted and considered comments received as late as August 13, 1979.

Commenters

A total of one hundred and seventy-six comment letters were received on the proposed rule: 119 from Federal credit unions, 32 from federally-insured state credit unions, 9 from state credit union leagues and other local trade associations, 8 from state agencies that supervise credit unions (and, in some cases, other financial institutions), 5 from national credit union trade associations and their affiliates, one from the National Association of State Credit Union Supervisors, one from a credit union service center and one from a securities brokerage firm.

Of the one hundred and seventy-six commenters, seventy-two expressed clear opposition to any rule requiring liquidity reserves. Included among those opposing the rule were one national trade association, five state credit union leagues and the National Association of State Credit Union Supervisors. Thirty-nine commenters expressed support for the rule, but many suggested significant changes. Included among these commenters were one national trade association and three state financial institution supervisory agencies. The remaining sixty-five commenters recommended various changes without expressing a clear position on whether the regulation is advisable.

Based upon its review of the comments and further analysis, the Administration has decided to issue a final regulation. A summary of the Administration's decision and an analysis of the comments and changes follow.

Decision

The Administration has proceeded, as proposed, with a final rule requiring a minimum level of liquid assets determined as 5% of an affected credit union's liability base. There are, however, significant changes from the proposal. First, the rule will apply only to insured credit unions that have $2,000,000 or more in assets, or that operate share draft or equivalent programs. (This excludes some 13,000 small credit unions from any regulatory burden. It does not, however, except them from requirements of sound liquidity management as explained below.) Second, while the rule will apply to federally-insured state chartered credit unions, special provisions have been added to accommodate the concerns of state credit unions and their supervisors. Third, the definition of reserve-qualifying "liquid assets" has been significantly expanded, for example by the inclusion of common trust fund investments and similar authorized investments that are designed to provide liquidity for participating credit unions. Fourth, the liability base against which the 5% reserve must be determined has been narrowed by the exclusion of certain non-volatile accounts. A further explanation of these and other changes is set forth in the following analysis of comments and changes.

Analysis of Comments and Changes

Authority

The rule is based both on the special reserve authority of sections 116(b) and 201(b)(6) of the Federal Credit Union Act ("the Act") (12 U.S.C. 1762(b), 1781(b)(6)), and the general rulemaking authority of sections 120(a) and 209(a)(11) (12 U.S.C. 1766(a) and 1789(a)(11)). (The citation to the latter Section was inadvertently omitted from the proposed rule. In any event, the general rulemaking authority of Section 120(a) relates to the entire Act.)

A few commenters questioned the Administration's reading of its authority. One suggested, in a rather lengthy analysis, that the intent of the special reserve authority is only to protect against unusual loan losses. Other commenters suggested that the special reserve authority only allows the Administration to require a faster build-up, or a higher goal, of reserved assets, but not to require that a portion of the credit unions' assets be held in any specific form as proposed.

The Administration has studied the Act and legislative history, and believes its authority to impose liquidity reserves on insured credit unions is well founded. Both section 116(b) (in the case of Federal credit unions) and section 201(b)(6) (in the case of all insured credit unions) authorize the Administration to impose "special reserves" by regulation in order "to protect the interest of [credit union] members." There are at least two instances of historical precedent for liquidity reserves; the existing share draft liquidity reserve, and the 5% cash reserve that was prescribed for Federal credit unions as early as 1934 (by Article XIII, section 2 of the then Standard FCU Bylaws). While portions of the Act's legislative history may indicate that the authors of the special reserve authority were concerned that the Administration have the ability to increase the regular reserve in the event of unusual loan losses, an exercise of the special reserve authority is not limited to that use. Sections 116 and 201(b) of the Act simply specify the purposes of reserve requirements; to protect against loan losses and *other asset losses* and to protect the interests of insured members. The purpose of the liquidity reserve rule is to protect against asset loss as a result of unexpected share withdrawals, and thus to protect the soundness of insured credit unions and the interests of their members.

Finally, if it were determined that liquidity reserves are not within the scope of the reserve provisions of the Act, the Administration believes the difference in the nature of liquidity reserves as compared to the regular or "surplus" reserve (i.e., liquidity reserves entail a segregation of existing assets as compared to a required build-up of reserved assets) allows the imposition of liquidity requirements under the general rulemaking authority of sections 120(a) and 209(a)(11).

Need for a Liquidity Reserve Requirement

The most frequently cited reason in opposition to the liquidity reserve proposal, expressed in various ways by the commenters, was that for those credit unions that do not presently maintain 5% "liquid assets" (as defined in the rule), required asset adjustments will mean a reduction in income that will hamper the credit unions' ability to provide optimum member services. The commenters noted that unless a credit union is presently making regular additions to undivided earnings, a reduction in income will over time require some combination of increased loan interest rates or reduced dividends and expenses. Various commenters also suggested that the proposal is a disincentive for credit union management to establish individually tailored funds management programs, and that a uniform percentage liquidity reserve against all liability accounts is not realistically related to individual credit unions' needs, which vary according to factors such as liability and asset structure and characteristics of the credit union's field of membership. It was also suggested that the imposition of liquidity reserves at this time is inappropriate, in view of the apparent trend (as reflected in legislative *proposals*) away from fixed liquidity reserves on non-demand accounts. Finally, it was suggested that the proposed rule and the draft regulatory analysis do not properly assess the costs of the rule and demonstrate that other, less burdensome alternatives are unacceptable (such as the "Michigan plan", requiring that each credit union board of directors adopt a written liquidity management plan based on criteria developed by the regulatory agency).

In response to these comments, the Administration believes the need for action is well established by the evidence, set forth in both the draft regulatory analysis and the proposed rule, of recent substantial declines in credit union liquidity and capital. The need for action is further supported by the fact that the National Credit Union Share Insurance Fund presently has outstanding more than $25 million dollars in assistance (including $15.5 million in loans and other "cash" assistance) to insured credit unions, much of which was required in part because of liquidity problems. The Final Regulatory Analysis issued in connection with this rule (which is available upon request) contains further information concerning the magnitude of the liquidity problem. In any event, the proposal is preventive in its intent, and need not be founded on a demonstration that it is already overdue.

As to the suggestion that the Administration should further consider alternatives to a liquidity reserve requirement, it is noted that the only realistic alternative (other than to maintain the status quo and deal with individual cases) is that of requiring written liquidity management plans of each insured credit union. The substantial costs to credit unions in the form of increased fees resulting from the monitoring of such a requirement, and the questionable value of plans that are developed only because of a legal requirement and that afford no minimum level of protection, cause the Administration to seriously question the utility of such a proposal. As to the argument that liquidity reserves are a disincentive to more creative, individually tailored liquidity management plans, the Administration believes this is true only for those insured credit unions that would not have developed such plans anyway. Finally, it is noted that pending legislative proposals to abolish reserves on bank time deposits relate to fixed, sterile reserves that are of questionable value for either liquidity or monetary control. In contrast, the Administration's proposed liquidity reserve does provide for depletion as necessary to meet share withdrawal demands.

The Draft Regulatory Analysis on the proposed rule estimated that no more than 2% of insured credit unions would face a 5% or more reduction in income (as a result of adjustments into lower earning "liquid assets"). As a result of the exclusion, in the final rule, of most insured credit unions with less than $2,000,000 in assets, and changes in the definition of liquid assets and in the liability base that must be reserved against, it is now estimated that only 89 insured credit unions will face a reduction in income of 5% or more. This is roughly one-half of one percent of all insured credit unions.

For the reasons discussed above, and based on its evaluation—further addressed in the Final Regulatory Analysis—that the benefits of the rule will far exceed the costs involved, the

Administration has proceeded with a final rule.

Exclusion for Most Small Credit Unions

A number of commenters expressed concerns about the burden of required liquidity reserves on small credit unions. The Administration is sensitive to the difficulties of small, largely volunteer-operated credit unions in contending with increasing regulatory burdens. Further, considering the provisions of the rule, discussed below, regarding notification of depletion (of the minimum liquidity reserve) and processing of requests for extensions, the rule would, if applied to all insured credit unions, impose a substantial monitoring burden on the Administration.

The Administration has reviewed the share account structure of insured credit unions, and determined that in credit unions of asset-sizes below $2,000,000, the volume of large (above $5,000) and traditionally volatile accounts is substantially below 50% (as compared to higher percentages for larger credit unions). Further, these smaller credit unions have not required significant assistance from the National Credit Union Share Insurance Fund related to liquidity problems.

It is recognized, however, that some liquidity resource must be available to those small credit unions that operate share draft programs. It is the Administration's judgment that this rule is less costly to comply with and enforce than the existing share draft liquidity reserve requirement for Federal credit unions (12 CFR 701.34(c)(5)(xiv)). Therefore, the share draft liquidity reserve requirement is being repealed, and all insured credit unions that operate share draft or equivalent programs are covered by this rule.

With the exception of those operating share draft programs, the Administration has decided to exclude insured credit unions with less than $2,000,000 in assets from the coverage of the rule. These changes are set forth in Section 742.1 of the final rule. Excluded credit unions are not, however, excepted from the need for sound asset/liability management. The Administration will continue to monitor liquidity in these credit unions and will not hesitate to take appropriate action in individual cases or at some future date by regulation.

Definitions of Liquid Assets

Section 742.2(a) of the proposed rule defined the "liquid assets" that would qualify for the required 5% reserve. A number of commenters raised concern about various aspects of the proposed definition:

(a) *Common trust fund investments.* The proposed rule excluded common trust fund investments from the definition of liquid assets. The exclusion was based on the reasoning that the securities held in common trust funds are of varying and in some cases long-term maturities, presenting an apparent potential for loss of capital in the event a fund is faced with heavy withdrawal demands.

The exclusion of common trust fund investments was addressed by sixty commenters. All opposed the exclusion. In support of the common trust funds, the commenters cited their relative high earning potential, the low average maturity of the underlying investments, the historical record of the funds in handling substantial withdrawal demands on a daily basis without advance notice and without loss of capital, and the fact that if the funds are excluded many credit unions will be forced to opt for lower earning demand or passbook accounts because they do not have the experience to invest in other short-term liquidity instruments.

Considering the unanimity of comments on this issue and the good historical record of common trust funds in providing daily liquidity, the Administration agrees that they should be included as liquid assets. Their inclusion is, however, subject to two conditions. First, to address the Administration's concern regarding a potential for loss of capital, common trust fund investments are to be valued, for purposes of the liquidity reserve determination, net of any deferred loss. Second, in order to exclude funds that invest largely in long-term securities or impose restrictions on withdrawal rights, only investments in funds the objectives of which are to provide daily liquidity will qualify as liquid assets. Also, to avoid the possibility of having to amend the rule at a future date, the authorization includes common trust funds *and* similar authorized investment funds. These changes are reflected in §§ 742.2(a)(4) and 742.3(c) of the final rule.

(b) *Insured deposits and government securities.* The proposed rule included, in the definition of liquid assets, federally-insured deposits in banks and savings and loan associations (and deposits in central credit unions) with remaining maturities of 6 months or less, and certain United States Government and agency obligations with remaining maturities of 1 year or less. Twenty-nine commenters addressed these provisions. All recommended that the maturity limits on one or both types of investments be extended. Many of the commenters noted that insured time deposits are available via early withdrawal at any time without loss of principal, and thus suggested that it is inconsistent that the maximum maturity on such deposits would be any less than that on government obligations (one year). The Administration agrees that the maximum remaining maturity on insured deposits should be extended to one year.

A majority of the twenty-nine commenters also requested some form of relaxation of the 1 year limit on qualifying government securities. Most simply requested that the maturity ceiling be raised, to anywhere from 2 to 5 years. Other commenters requested that all government securities qualify, but at their market value. A few commenters suggested that long-term securities be grandfathered for a period, to avoid having to sell them at a loss to meet the reserve requirement. Others suggested that the Administration allow a set percentage of the reserve to be comprised of long-term securities. Finally, three commenters requested that they be allowed to include the guaranteed annual pay down (presumably for 1 year forward) on GNMA and FHLMC participation certificates that they hold.

While the guaranteed annual paydowns on GNMA and FHLMC certificates do represent a reliable short-term source of funds, these payments are different from a short-term (1 year or less) security in one important sense: They cannot be converted to immediate cash, not even at a loss of principal. Thus, the paydowns are not considered a liquid asset.

The other various suggestions for relaxing the qualifications for government securities all fail for one reason: The market fluctuation potential inherent in government securities weighs against their consideration as liquid assets. Securities with remaining maturities up to 1 year were included because of their flexibility. They can either be sold (possibly at a small loss) or they can be held to maturity, in which case they are self liquidating over a fairly short term (1 year at most). Longer term securities provide liquidity only at a risk of greater loss of capital, and this is inconsistent with the purpose of the rule (to meet withdrawal demands while avoiding asset losses). In further response to the request that the Administration grandfather existing long-term securities, so that they need not be sold at a loss, it is noted first that the sale of such securities is not the only possible way to make asset adjustments in order to meet a liquidity requirement, second that an equitable period of time will be allowed to make necessary adjustments (see the discussion below on the effective date of the rule) and third, a short-term depletion of undivided earnings may be a necessary expense of assuring liquidity and avoiding later, more serious losses.

As a final point regarding qualifying securities, the proposed rule was inadvertently worded so as to qualify only U.S. Government and agency *issued* securities. The Administration believes that U.S. and agency backed securities should qualify as well, assuming they are authorized for investment under the Federal Credit Union Act and the maturity limitations are met.

Accordingly, the definition of liquid assets has been revised to include (i) share or deposit accounts with remaining maturities of *one year or less* maintained in central credit unions or in institutions insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation and (ii) investments in obligations of the United States or an agency thereof, *or securities fully guaranteed as to the principal and interest thereby*, which are authorized under 12 U.S.C. 1757(7) and which have a remaining maturity of one year or less. These changes are reflected in § 742.2(a)(2) and (3) of the final rule.

(c) *Loans and deposits in insured credit unions.* The proposed rule did not include deposits in insured credit unions (except centrals) in the definition of liquid assets. Sixteen commenters noted this, and all objected. Some of these commenters noted that the rule included deposits in other insured institutions, but not credit unions, and suggested that this promotes the profitability of other institutions at the expense of credit unions. A few commenters suggested that it is inconsistent to include centrals but not other credit unions. Finally, three commenters suggested that demand and short-term loans to insured credit unions also be qualified as liquid assets.

The inclusion of deposits in, and loans to, insured credit unions as reserve-eligible assets would allow credit unions to "cross-liquidify" each other. Looking at such credit unions individually, they would meet minimum standards. Looking at any two or more cross-liquidified credit unions as a group, however, there is no liquidity. It is for this reason that deposits in insured credit unions were excluded. The Administration believes it is a valid reason and thus the exclusion has been retained. The distinction relevant to central credit unions is that they serve a broad base of credit unions which are less likely to experience serious drains on liquidity all (or in substantial numbers) at the same time.

(d) *Book versus market value.* A few commenters noted that the proposed rule did not specify whether liquid assets are to be valued at book or market value for the reserve computation. They suggested that the assets be valued at book, because of the burden of monitoring fluctuations in market value. Also, it is noted that the qualifying assets are for the most part subject to little fluctuation in value or can be redeemed at little loss of principal if any, and in any event, because of their short-terms, can be held to maturity in order to avoid loss of capital and still provide liquidity. Except in the case of common trust funds and similar investments (discussed above), the Administration agrees that liquid assets should be counted at book value. This point is clarified in § 742.3(c) of the final rule.

(e) *Central Liquidity Facility Stock.* The proposed rule included, in the definition of liquid assets, shares of stock in the National Credit Union Administration Central Liquidity Facility (CLF). Two commenters, suggesting that CLF stock is not in fact liquid, recommended that it not be included in the definition of liquid assets. A number of other commenters asked about the relationship between the liquidity reserve proposal and the CLF.

The Administration believes the inclusion of CLF stock (both the actual amount of stock held by a credit union, and its "on-call" portion which will contribute to the credit union's liquidity requirements by virtue of being held in other qualifying assets) is well founded for the following reasons: (i) CLF stock can be liquidated in six months, (ii) membership in the CLF provides access to an institution whose sole function is to provide liquidity, in an amount which exceeds the credit union's initial investment, (iii) in contrast to contracted liquidity sources (e.g., lines of credit) discussed below, the CLF is statutorily mandated to provide liquidity, and (iv) in large part the success of the CLF and its ability to function as intended depend upon general credit union participation and the overall liquidity position of the industry. Accordingly, CLF stock has been retained, as a reserve-eligible asset, in § 742.2(a)(5) of the final rule.

(f) *Lines of credit and other sources of borrowing.* Sixteen commenters recommended that some consideration be given to lines of credit and other sources of borrowing (such as reverse repurchases on government securities) as liquidity tools. The form that the suggested consideration would take was in most cases unclear. Presumably, however, these commenters would have it that the amount of the otherwise required reserves for an individual credit union (i.e., 5% of its liability base) would be offset by the amount of any contractually guaranteed source of borrowing.

The Administration perceives a fundamental problem with this suggestion and has decided against its adoption. Lines of credit, reverse repurchases and other sources of borrowing, including guaranteed ones, are only as good as the capacity of the other party. Contracts are subject to breach, and the only recourse is through the judicial process which may be unacceptably time-consuming. (In contrast, a credit union has an irremovable right to sell its own unpledged assets). Further, the times when credit unions face illiquidity are likely to be precisely those times when potential lenders will wish to avoid extending credit.

(g) *Federally-insured state chartered credit unions.* Several commenters expressed concern about the imposition of the liquidity reserve rule on federally-insured state chartered credit unions. These concerns and the Administration's response are discussed in greater detail below. In partial response to these concerns, the Administration has revised the definition of liquid assets to include, for covered federally insured state credit unions, any asset held in satisfaction of liquidity requirements imposed by applicable state law or regulation. This change is found at § 742.2(a)(6) of the final rule.

Liabilities that Must Be Reserved Against; Shares and Notes Payable

As proposed, the 5% reserve would be calculated against all shares (and similar liability accounts) and notes payable. This fact drew 18 comments. Most recommeded that reserves not be required against notes payable, inasmuch as they have a definite term and their payoff can be readily met by planning cash flows. Other commenters questioned whether the rule intends to require reserves against a credit union's mortgage and other long-term notes.

The Administration agrees that notes payable having a set maturity do not generally present the kind of volatile demands on credit union funds that the rule attempts to solve. Notes payable with remaining maturities of one year or less do, however, represent a potential

near-term demand for funds that should be considered in determining a minimum level of liquid assets. Thus notes payable with *remaining maturities in excess of one year* have been *excluded* from the liability base against which the minimum 5% liquidity reserve is determined. (A definition of "liability base" has been added to the final rule in this regard. See § 742.2(c)(2).)

Several commenters also suggested that reserves not be required against share certificate accounts (and similar member time accounts), as they are generally not a source of unanticipated withdrawals. While share certificate accounts are subject to potential early withdrawal (limited, for Federal credit unions, only by the interest penalty and the 30 day notice of withdrawal requirement that may be imposed on any share account), past patterns of conduct indicate a low likelihood of early withdrawal. As with notes payable, however, the Administration believes that short-term share certificates should be considered in determining a minimum prudent level of liquid assets. Accordingly, share certificate accounts with *remaining maturities in excess of one year* are *excluded* from the liability base for determining minimum liquidity reserves. (See § 742.2(c)(1) of the final rule.)

A few commenters suggested that shares that have been pledged as security on loans are not volatile and should be excluded from the liability base. The Administration agrees with such an exclusion, but does not believe it should extend to shares that "secure" loans merely by virtue of either the statutory lien of Section 107(11)) of the Federal Credit Union Act (12 U.S.C. 1757(11) (which is activated only to the extent of a delinquency or default) or a similar provision of state law, or a "boilerplate" pledge-of-shares contract clause. Thus, the final rule excludes, from the liability base, shares in which the credit union has received a loan-related security interest *in a specific amount*, and then only to the extent of the existing balance on the secured debt. (See § 742.2(c)(3) of the final rule.)

Question of 5% Level Reserves

Forty-nine commenters questioned NCUA's decision to propose a 5% uniform reserve on various types of liability accounts. Twenty-two felt the minimum level should be set somewhat lower, ranging from 2 to 4 percent. A dozen commenters suggested that the reserve level should vary for different types of liability accounts, e.g., a graduated scale of required reserves for share certificates, regular shares and share draft or other transactional accounts. Twelve commenters requested an explanation of how the proposed 5% figure was arrived at, some suggesting that it is an arbitrary figure.

Admittedly, the basis for the 5% figure might have been more clearly explained in the proposed rule. The 5% determination was necessarily somewhat judgmental. As the proposal and the draft analysis imply, however, the figure was arrived at from a process of balancing a perception of the ideal minimum level of liquidity against a sensitivity to avoid any unreasonable regulatory or economic burden on insured credit unions. As discussed in the final regulatory analysis, in view of the changes in the liability base and the definition of liquid assets, the minimum 5% reserve level will, it is hoped, at least maintain average liquidity at its present levels (which are somewhat low from an historical standpoint) for affected credit unions, while limiting adverse economic impact in the form of significantly reduced earnings to something around 2% of affected credit unions, or one half of one percent of *all* insured credit unions. While a higher minimum level might be desirable purely from a standpoint of liquidity planning, the Administration has avoided imposing a higher level by regulation (it may still be done in individual cases) in order to minimize the economic impact and the number of adversely affected credit unions.

While the suggestion that different percentage reserve requirements be established for different types of liability accounts (based on the volatility of the accounts) may have some theoretical merit, the Administration does not believe such a revision would significantly alter the already slight economic impact of the regulation. Nor would it significantly enhance the utility of minimum liquidity reserves, which must in any event be supported by a sound plan of asset/liability management. Thus, in the interest of simplicity, the uniform 5% requirement has been retained. (See § 742.3(a) of the final rule).

Daily Reserves

The proposed rule would have required a *daily* 5% liquidity reserve. Technically, this would require that affected credit unions close out their general ledgers, or at least conduct some monitoring of their assets and liabilities, on every business day. Twelve commenters objected to this requirement, noting that it would mean a considerable expense of time and effort for those credit unions that are not presently on a system of daily posting. (A great number of such credit unions are likely to be covered by the exclusion of most insured credit unions with assets less than $2,000,000).

The Administration believes, nonetheless, that this is a legitimate concern and that the daily requirements would impose an unnecessary regulatory burden. While a few of the commenters suggested that the liquidity reserves be adjusted each month on the basis of the previous month's average daily liability base, this too would require a daily monitoring of liabilities. The Administration has determined instead that liquid assets should be adjusted monthly—not later than on the tenth day of the month—but that the required level of liquid assets be determined simply as 5% of the credit union's liability base *on the last business day* of the previous month. In addition to accommodating the concern with the proposed daily reserve, this revision—with its month-end determination of the liability base—avoids distortions that might otherwise result in credit unions that have substantial payroll inflows and liquid asset holdings early in the month. This change is reflected in § 742.3(b) of the final rule.

Duality; State Regulators' and Credit Unions' Concerns

The proposed liquidity reserve rule would have application to federally-insured state credit unions as well as Federal credit unions. Most of the Administration's existing rules (all but those related to mergers, liquidations, insurance and administrative actions) apply only to Federal credit unions. Twenty commenters addressed this change of approach. One supported including all federally-insured credit unions, on the reasoning that federally-insured state credit unions share the benefits of the National Credit Union Share Insurance Fund and they should share on an equal basis with Federal credit unions in the responsibilities—such as maintaining liquidity reserves—that ensure the security of the fund. Thirteen of the twenty commenters expressed blanket opposition to including state credit unions. These and other commenters expressed various concerns, including that the proposal by-passes state supervisory authorities, raises questions of pre-emption of state liquidity requirements and creates duplication and confusion if state requirements are not pre-empted. A few commenters suggested that state credit unions should not be included in the proposal because the economic justification did not isolate and provide a separate analysis of the need for and effect of liquidity reserves on federally-insured state credit unions.

The Administration's analyses (in the draft regulatory analysis) of the need for and costs of liquidity reserves were based on data for all federally-insured credit unions. While it is true that neither state nor Federal charters were isolated and studied as a separate group, the Administration believes that this is neither required nor warranted. It is, after all, illiquidity among insured credit unions as a whole that is of concern to the Administration, because of its responsibilities to protect both the National Credit Union Share Insurance Fund and the credit unions' members. The final rule applies to all insured credit unions, subject to the "small credit union" exclusion discussed above. Certain other charges have been made, however, in response to state concerns.

First, to clarify the relationship between the final rule and any state liquidity requirements, the definition of liquid assets has been revised, as previously indicated, to include, for state credit unions, unpledged assets held in satisfaction of a liquidity requirement imposed by state law or regulation. It is not the Administration's intent to pre-empt liquidity requirements applicable to state credit unions unless, in some unexpected way, compliance with the state requirements would cause federally-insured state credit unions to be in violation of this final rule. (Any state requirements *are pre-empted* with respect to *Federal credit unions.*) Second, to respond to the concerns of Federal encroachment upon state supervisory jurisdiction, the rule has been revised such that the depletion and replenishment procedures for state credit unions are channeled to the appropriate state supervisor. (The state should determine the appropriate supervisor in those cases where the credit union department functions under another official such as the Banking Superintendent or the Secretary of Commerce). Both the initial notification that liquidity reserves have been depleted (below the 5% level) and any extension request should, for federally-insured state credit unions, be submittted to the appropriate state supervisor. The state supervisor may rule on extension requests for federally-insured state credit unions.

Prior to the effective date of the rule, the Administration will poll state supervisors to assure they are willing to assume this role. In any case where the supervisor is unwilling, affected federally-insured state credit unions will be advised that they may submit notification and extension requests to the Administration.

Finally, in any case where an extension has not been obtained or the reserve has not been replenished within the required period, the insured credit union is responsible to notify the Administration, unless the state supervisor assumes that role.

Sections 742.4 (b)(2) and (c) of the final rule reflect these changes.

Effective Date of the Regulation

Forty-five commenters raised questions concerning the effective date of the rule. They generally requested that the Administration delay the effective date as much as possible. Many suggested that the Administration phase in the 5% requirement over an extended period. The commenters noted that the shorter the timing of the effective date or of any phase-in period, the greater the adverse impact will be on those credit unions that do not presently hold the minimum required liquid assets. It was noted that an early effective date will mean more abrupt adjustment costs for such credit unions, resulting from sale of existing assets at a capital loss or borrowing at a negative income flow (i.e., the rate paid for borrowed funds will be greater than the credit union can earn on the "liquid asset" investments).

As noted earlier, a short-term drain on undivided earnings (resulting from an unanticipated asset sale or short-term borrowing) may not be undesirable, if it protects against a more severe crisis at a later date. Further, inasmuch as it is estimated that only 89 insured credit unions will face significant earnings reductions, this would suggest that only a small percentage of insured credit unions will have to make significant asset adjustments to meet the liquidity reserve. Thus the overall impact of even a short-term effective date should not be severe. The Administration believes these considerations and the seriousness of the present liquidity problem weigh against an extensively delayed effective date.

Thus, the final rule is issued with an effective date of October 31, 1979. Credit unions not in compliance on that date will be required to notify the Administration (or the state supervisor in cases of federally-insured state credit unions) and will then have a period of sixty days—until year end—to reach the 5% level. Credit unions that are unable to meet that time frame must apply for an extension in accordance with the discussion below.

Replenishment Period and Extension

The rule allows depletion of the 5% liquidity reserve to meet share withdrawals, but will require replenishment within 60 days, unless an extension is granted by the Administration or, where applicable, the state supervisor. Thirty-two commenters addressed this facet of the regulation. All objected to the initial sixty day replenishment period and suggested that it be extended. Most commenters suggested a period of 120 or 180 days. Some credit unions serving school employees noted that they would face a special problem with such a short replenishment period, in that they have a very predictable annual drain on liquidity during the summer months (due to heavy share withdrawals and loan demand, and a cut-back in payroll deduction) that is often not replenished until early in the following year.

Instead of increasing the original 60 day replenishment period, the Administration chooses to use the extension process to accommodate credit unions that cannot replenish within the required period. Extension requests should contain a statement of the difficulty in replenishing within 60 days and a plan for replenishment within a reasonable, longer period. The Administration will issue guidelines in the near future concerning the general standards that it will apply, and that it would hope participating state supervisors will apply, in ruling on extension requests. The guidelines will also include a sample form that may be used in requesting extensions.

An insured credit union that is subject to the rule, depletes its reserve, and either does not receive an extension after 60 days, or receives an extension but does not replenish its reserve by the end of the extension period, will be in violation of the final rule, and subject to possible cease and desist action and other administrative remedies.

The provisions regarding depletion, replenishment and extensions are set forth at § 742.4 of the final rule.

Definition of Corporate Central Credit Union

The proposed rule included, in the definition of liquid assets, short-term shares or deposits in "corporate central credit unions." That term was defined in the proposed liquidity reserve rule, as has been done in recently issued rules regarding the CLF (12 CFR 725), based on a "50% of activity" test (i.e., a credit union is a "corporate central" if its loans to and deposits from other credit unions amount to 50% or more of its total loans and deposits), rather than the more

restrictive "75% of activity" test of the Administration's existing rules regarding Federal corporate central credit unions (12 CFR 704). This relaxed test was adopted in order to allow certain state chartered central credit unions to qualify for agent membership in the CLF.

To avoid confusion, the term "central credit union" (dropping the "corporate") is used in the final liquidity reserve rule as was done in the CLF rule. The 50% of activity test is retained, thus providing a slightly broader base of liquid assets. There is also one technical change: The proposed rule set the activity test as 50% of shares and deposits plus loans *to members*. Since the test is one of activity with other credit unions as a percentage of *total activity*, the words "to members" are dropped from the final rule.

The definition of central credit union is found at § 742.2(b) of the rule.

Public Hearings

A few commenters requested that the Administration hold public hearings on the liquidity reserve proposal. Under the Administrative Procedure Act, oral hearing is a matter for agency discretion in this type of rulemaking (5 U.S.C. 553(c)). The requirements of notice and an opportunity for the submission of written views have been met, and the Administration believes the record of comments provides more than an adequate basis for deciding on a final rule. Accordingly, the Administration has determined not to hold public hearings on the proposed rule.

Regulatory Analysis

In accordance with the Administration's Final Report on Improving Government Regulations, a Final Regulatory Analysis has been prepared in connection with this rule and is available upon request.

Lawrence Connell,

Chairman.

August 23, 1979.

Accordingly, effective October 31, 1979:

§ 701.34 [Amended]

1. 12 CFR 701.34(c)(5)(xiv) (Share Draft Liquidity Reserves) is repealed.

2. A new Part 742 (12 CFR 742) is added to read as follows:

PART 742—LIQUIDITY RESERVES

742.1 Scope and purpose.
742.2 Definitions.
742.3 Liquidity reserve.
742.4 Depletion and replenishment.

Authority: 12 U.S.C. 1762(b), 12 U.S.C. 1766(a), 12 U.S.C. 1781(b)(6), 12 U.S.C. 1789(a)(11).

§ 742.1 Scope and purpose.

(a) This part applies to all credit unions that are insured by the National Credit Union Share Insurance Fund and either

(1) have assets of $2,000,000 or more; or

(2) operate share draft (as defined at 12 CFR 701.34(a)(1)) or equivalent programs.

(b) The purpose of this part is to establish a liquidity reserve requirement that enhances the ability of covered credit unions to meet member demands for liquid funds and avoid asset losses.

§ 742.2 Definitions.

As used in this part:

(a) "Liquid Assets" means the following unpledged assets:

(1) Cash on hand;

(2) Share or deposit accounts with remaining maturities of 1 year or less maintained in central credit unions or institutions insured by the Federal Deposit Insurance Corporation or Federal Savings and Loan Insurance Corporation;

(3) Investments in obligations of the United States or an agency thereof, or securities fully guaranteed as to principal and interest thereby, which are authorized under 12 U.S.C. 1757(7) and which have a remaining maturity of 1 year or less;

(4) Common trust investments, and similar investments in funds of securities authorized for Federal credit unions, the objectives of which are to provide daily liquidity for participating credit unions;

(5) Shares in the National Credit Union Administration Central Liquidity Facility;

(6) In the case of a federally-insured state chartered credit union, any asset held in satisfaction of liquidity requirements imposed by applicable state law or regulation.

(b) "Central credit union" means a credit union operated primarily to serve other credit unions and in which the total dollar amount of shares and deposits received from other credit unions plus loans to other credit unions exceeds 50 percent of the total dollar amount of all shares and deposits plus loans.

(c) "Liability base" means an insured credit union's member accounts (as defined at 12 U.S.C. 1752(5)) and notes payable, excluding

(1) Share certificates (as defined at 12 C.F.R. 701.35(a)(2)) and equivalent member accounts with remaining maturities in excess of 1 year,

(2) Notes payable with remaining maturities in excess of one year, and

(3) Member accounts that have been provided in a specific amount as security on a loan, up to the amount of the loan balance.

§ 742.3 Liquidity reserve.

(a) Each credit union that has assets of $2,000,000 or more and is insured by the National Credit Union Share Insurance Fund shall maintain a reserve of liquid assets ("liquidity reserve") the amount of which shall equal, at a minimum, 5% of the total dollar value of the credit union's liability base.

(b) The liquidity reserve shall be determined on a monthly basis, not later than the tenth day of each month, and shall be based on the insured credit union's liability base as of the last day of business of the previous month.

(c) Liquid assets shall be valued at their book value for purposes of the liquidity reserve, except that common trust investments and similar investments shall be valued net of any deferred loss.

§ 742.4 Depletion and replenishment.

(a) The liquidity reserve may be depleted below the level required by this part only to meet outflows of shares or deposits.

(b) In the event of depletion of the liquidity reserve below the level required by this part:

(1) A Federal credit union shall immediately notify the appropriate National Credit Union Administration Regional Director and shall replenish the reserve within 60 days unless an extension is approved by the Regional Director;

(2) A federally-insured state chartered credit union shall immediately notify its state supervisory authority and shall replenish the reserve within 60 days unless an extension is approved by the state supervisory authority.

(c) In any case where the liquidity reserve has been depleted below the level required by this part, and the reserve has not been replenished within 60 days or any extended time period in accordance with paragraph (b) of this section, the credit union must notify the appropriate National Credit Union Administration Regional Director (unless, in the case of a federally-insured state chartered credit union, the state supervisory authority assumes this responsibility).

[FR Doc. 79-27028 Filed 8-30-79; 8:45 am]

BILLING CODE 7535-01-M

CIVIL AERONAUTICS BOARD

14 CFR Part 380

[Reg. SPR-165; Amdt. No. 7]

Modification of Bond Requirements for Charter Operators

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., August 23, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The CAB is amending its Public Charter rules to allow charter operators to furnish, instead of surety bonds, security agreements issued by banks that provide equivalent or greater protection of charter participants' funds. These alternative agreements have been frequently used in the past after special Board approval, and this rule is intended to remove the expense and inconvenience of obtaining special approval in each case.

DATES: Adopted: August 23, 1979. Effective: August 28, 1979.

FOR FURTHER INFORMATION CONTACT: Mark Frisbie, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C., 20428; 202-673-5442.

SUPPLEMENTARY INFORMATION:

Public Charter operators are required to maintain a surety bond in a specified amount to assure the performance of the services contracted for by charter participants. Many bonding companies, in addition to charging a premium, require charter operators to put up 100 percent of the amount of the bond as collateral. Charter operators have, in turn, sought approval from the Board for alternative arrangements that would provide equivalent protection to charter participants, but with reduced premium or collateral requirements. In many individual cases, the Board has permitted the use of alternative arrangements by waiver of its regulations upon application and payment of a $300 filing fee.

City National Bank of Detroit (Detroit National) filed a petition for rulemaking to amend 14 CFR Part 389 to eliminate the filing fee charged for requesting a waiver when a charter operator seeks to furnish a "surety trust agreement" in lieu of a surety bond. In response to the petition, we proposed to amend the Public Charter rules to allow the use of security agreements provided by banks, to the extent that the agreements provide equal or better protection than is provided by surety bonds. SPDR-66, 43 FR 40880, September 13, 1978. Although the petition discussed only arrangements called "surety trust agreements," we proposed to allow any type of security agreement, as long as it provided protection comparable to a bond.

Comments were filed by Detroit National, Maryland National Bank (Maryland National), Barclays Bank of California (Barclays), Western Federal Savings, the Comptroller of the Currency (Comptroller), Hamilton, Miller, Hudson & Fayne Travel Corporation, Pan American World Airways (Pan Am), and the American Society of Travel Agents (ASTA). Having considered the comments, we now amend our regulations to permit the use of alternative security agreements to satisfy our financial security regulations. This change will obviate the need to pay a filing fee whenever these security agreements are used. We expect that this change will aid charter operators who now have difficulty finding a bonding company willing to issue a surety bond, and we hope that it will reduce the cost of maintaining financial protection.

We are amending the Public Charter rule (14 CFR Part 380) by replacing the term "surety company" with "securer," and the term "surety bond" with "security agreement" wherever they appear. Security agreement includes the traditional surety bond (which, if it is used, must still adhere to the form prescribed in Appendix A to Part 380), as well as any other type of agreement that meets the requirements of § 380.34. Some of the possible security devices discussed in the comments to SPDR-66 are letters of credit, trust agreements, and assignments of savings accounts.

In the past, surety trust agreements have often been allowed in place of surety bonds. The Board has distributed a standard form for surety trust agreements upon request, which has provided adequate protection over several years of use. Therefore, we are permitting the use of either the bond or the surety trust agreement in the form prescribed in Appendices A and E, respectively. The words of the standard surety trust form describing the scope of protection have been changed to be consistent with the bond language. In addition, we are allowing any type of arrangement that provides equivalent or greater protection than a surety bond, in order to permit maximum latitude in devising agreements that suit particular needs. Our primary interest is in protecting the funds of charter participants, and any arrangement that will do so to the same extent as the traditional bond is acceptable.

We have chosen to allow an unrestricted variety of alternatives so that operators do not in the future face the same problem that led to this rulemaking—the need to obtain a special waiver to use a preferred form of security agreement. Many different arrangements may be devised to provide protection equivalent to a bond, and the Board cannot predict which types of arrangements will satisfy present or future needs for all operators. Charter operators should be free to use the form that is most attractive to them.

With a broad variety of permissible alternatives, it is impracticable for the Board to review each agreement for legal sufficiency. Therefore, where an agreement other than the standard bond or surety trust agreement is used, we have placed the responsibility on the bank to insure that its agreement provides the requisite degree of protection.

The Board has jurisdiction over banks that enter into security agreements with tour operators.[1] Banks should examine their agreements for compliance with our regulations in the course of reviewing for their own purposes. We find it a reasonable condition on permitting the use of variant agreements that the banks, who will derive commercial benefit from them, guarantee that they provide as much protection to participants as is now provided by bonds. Thus, if a participant would otherwise be injured because any such agreement does not provide at least as much protection as a bond would have provided, the bank will be held liable as though it had furnished a bond for the tour operator.

Maryland National stated that it did not clearly understand the bank's liabilities in the event that an alternative security agreement does not give as much protection as a bond. The language (in § 380.34(c)(2)) describing these liabilities has been redrafted to be clearer. First, if the standard surety trust agreement is used as a substitute for the bond, the bank's liabilities will be defined by the terms of the surety trust agreement. Alternatively, if an agreement other than the standard bond or surety trust forms is used, the bank guarantees that it provides protection equivalent to the standard bond. Thus, if a non-standard form of agreement is used, the bank will be responsible for the stated coverage, even if the security agreement assets prove to be worth less than the coverage, or if the assets are claimed by the charter operator's trustee in bankruptcy. We do not mean to imply that the bank has a lesser duty under the standard surety trust agreement to

[1] *C.A.B. v. Tour Travel Enterprises*, 440 F. Supp. 1265, 1267 (N.D.Ill. 1977)

insure the availability and adequacy of trust assets.

Maryland National argued that a broadly worded general provision on bank liability might discourage bank participation in security agreements because of the risk of litigation over the limits of the liability. We find, however, that a securer's liabilities under a bond, which must follow a prescribed form, are clear enough that it will not be unreasonably difficult to decide whether a security agreement provides equivalent protection. If a bank has enough doubts about an agreement to refrain from using it, it would indicate that the agreement might not provide the required degree of protection, and should not be used.

Western Federal Savings specifically suggested that an "assignment of savings account" be permitted as a substitute for a surety bond. Under such an arrangement, the tour operator could deposit money in a savings account, and then pledge the funds to the CAB, authorizing their release upon demand to the CAB. Funds could be returned to the charter operator only upon written authorization from the CAB. Meanwhile, the funds earn a high rate of interest.

We make no judgment as to whether savings account assignments are an adequate substitute for surety bonds. However, the Board will not become involved in authorizing the release of funds to any person under a security agreement.

In SPDR-66, we requested comments on whether the Board should require State banks to obtain an opinion from the State attorney general or other responsible official that it is authorized under State law to issue the security agreement. Such agreements appear to be authorized for national banks under 12 CFR 7.7010(a), although the Comptroller and Maryland National indicated that this view was not clearly accepted. In any case, Pan Am, Hamilton, Miller, Hudson & Fayne, Barclays, and ASTA recommended against requiring an official opinion, because of the anticipated delay involved. Instead, Pan Am and ASTA suggested requiring a statement from the bank that it was authorized to enter into the agreement. We have decided to require neither an official opinion nor a statement from the bank. We are persuaded that obtaining an official government opinion could be unduly time consuming, and since the opinion might be limited to the facts of a particular case, a new opinion might have to be obtained in each case. We see no need for a separate written statement from the banks, as the very fact that the bank makes an agreement is an implicit representation that it has power to do so.

The regulation requires that all banks providing security agreements be insured by the Federal Deposit Insurance Corporation or by the Federal Savings and Loan Insurance Corporation. This requirement is intended to assure the financial fitness of the bank, rather than to insure the security agreement assets as such. Although the $40,000 maximum coverage under FDIC or FSLIC will be less than the amount of most security agreements, the FDIC and FSLIC have standards for evaluating the financial condition of the banks they insure. We have decided that these standards provide a convenient and satisfactory indication of fitness for entering into security agreements under this rule.

The notice of proposed rulemaking requested comments on whether the agreements should be filed with the Board for approval, or whether a simple statement of compliance with § 380.34 would be sufficient. Maryland National, Detroit National, and Barclays all recommended that a copy of the agreement be filed with and approved by the Board. Detroit National specifically opposed certifying to the Board that the security agreement complies with the regulations, fearing that changes in staff interpretations might cause unpredictable liability. Also, it was concerned that a representation of compliance might lead to liability apart from the security agreement. Pan Am favored using a short statement of certification.

Although banks have a strong interest in avoiding the potential risks of certifying compliance, we think that certification is reasonable and necessary in order to permit a variety of security options. If a bank is wary of staff interpretations or unexpected liabilities, it may use the standard form surety trust agreement, in which its liabilities are defined by the document itself.

Since we do not intend to screen new agreements for compliance, a copy of each agreement need not be filed. A statement of compliance will require less paperwork of the charter operator and securer, while still assuring adequate protection for participants. We have revised the statement form, Appendix C, to use the words "securer" and "security agreement" instead of "surety company" and "surety bond", and to require specification of the type of security agreement used.

Detroit National requested in its comments that a participant filing a claim under a security agreement be required to file notice with *both* the securer and the charter operator. Currently, the participant must file with the securer only if the charter operator is unavailable. In the alternative, Detroit National asked the Board to establish a 1-year statute of limitations for filing suit to recover under the security agreement. These suggestions were intended to allow expeditious termination of a security arrangement, which is hindered when the securer cannot definitely ascertain the number of outside claims. Although participants must file a claim within 60 days after termination of the charter, the securer must rely on the charter operator's representations in determining the number or amount of claims outstanding. Consequently, the securer may decide to retain control of the collateral until it is convinced that no more claims on the security will be pursued. Meanwhile, the charter operator is deprived of the use of the collateral.

The problem of notice to the securer is one that has been brought to the Board's attention before. The suggestion that claims should be filed with the securer as well as the operator, however, has been rejected because many securers object to the paperwork burden of handling every claim. And we see no reason to make participants forfeit potential rights for the benefit of tour operators and banks by imposing a shorter statute of limitations. Therefore, we are retaining our current claim procedures.

Detroit National also commented that the "termination" date of a canceled charter is unclear, and should be better defined. We agree that a more precise definition of "termination" is called for, since the period for filing a claim runs from that time. We have considered four possible definitions: (1) The date that notice of the cancellation is sent to participants by the charter operator, (2) the date that notice of cancellation is received by the participant, (3) the intended departure date of the outbound charter flight, or (4) the intended arrival date of the returning charter flight. We have chosen the fourth alternative as the date on which a charter will be considered terminated.

The first option is unsatisfactory because not all cancellation notices may be sent out on the same day, and it would be confusing to keep track of which day was applicable to each participant. The second option is not helpful, since notices would probably be received at different times, and it would be difficult to prove the applicable day in most cases. The third solution is unacceptable because a vacation traveler whose charter is canceled may find alternative transportation and go ahead with the vacation, or pursue other vacation activities. Those days of vacation, often inflexible and planned far in advance, should not count against the time for filing a claim. The fourth alternative is easy to determine with certainty, and fair to participants who may not turn their attention to filing a claim until after their intended vacation plans are completed. In the event that there is no return charter in a participant's itinerary, the claim period runs from the departure of the last flight in the itinerary.

Effectiveness

This rule is being made effective immediately so that charter operators may use alternative agreements, and avoid paying the waiver fee, without delay. Because the rule relieves a restriction, the Board finds that it may be made effective less than 30 days after publication.

Final Rule

The Civil Aeronautics Board amends 14 CFR Part 380 as follows:

1. The Table of Contents is amended to read as follows;

PART 380—PUBLIC CHARTERS

* * * * *

Sec.
§ 380.34 Security and depository agreements.
* * * * *

§ 380.2 [Amended]

2. Section 380.2 is amended by adding the following definitions in the proper alphabetical order:

* * * * *

"Securer" means the charter operator's surety company, if a surety bond is used, or the bank making the security agreement, if a security agreement other than a bond is used.

"Security agreement" means either a surety bond in the form set forth in Appendix A, a surety trust agreement in the form set forth in Appendix E, or an arrangement with a bank that provides protection of charter participants' funds equivalent to or greater than that provided by the bond.

* * * * *

3. Section 380.25 is amended to read as follows:

§ 380.25 Prospectus filing and related requirements.

A charter operator may organize and operate a Public Charter only in accordance with this part, and subject to the following conditions:

* * * * *

(c) The following deviations from a filed prospectus may be made only in accordance with paragraph (d) of this section:

* * * * *

(3) A change in or addition of any direct air carrier, securer, or depository bank.

(d) * * *

(e) The charter operator shall notify the depository bank (if any) and the securer of any change described in paragraph (c)(1) or (c)(2) of this section not later than when he files a prospectus amendment to reflect the change. If the securer is unable to adjust the security agreement as required by the change, it shall notify the Board (Special Authorities Division, Bureau of Domestic Aviation) of this fact within 2 business days after receiving notice of the change for the charter operator.

4. Section 380.28 is amended to read as follows:

§ 380.28 Charter prospectus.

(a) The charter prospectus shall include an original and one copy of the following:

(1) From the charter operator and the direct air carrier: (i) The proposed flight schedule, listing the origin and destination cities, dates, type of aircraft, number of seats, and charter price for each flight; (ii) the tour itinerary (if any) including hotels (name and length of stay at each), and other ground accommodations and services; and (iii) a statement that they have entered into a charter contract that covers the proposed flight schedule, that the contract complies with all applicable Board regualtions, and that a copy of the schedule has been sent to the depository bank (if any) and the operator's securer. The schedule shall be identified with a number assigned by the charter operator that does not duplicate any schedule numbers assigned by the operator to other proposed flight schedules. The proposed flight schedule, tour itinerary (if any), and statement shall be in the form set out in Appendix B to this part.

(2) From the charter operator and the securer, a statement: (i) That they have entered into a security agreement covering the proposed flight schedule that complies with § 380.34, including the amount of the coverage, the number assigned to it by the securer, and the amount of any outstanding claims against it, and (ii) that the securer has received a copy of the proposed flight schedule. The statement shall identify the proposed flight schedule by the schedule number assigned by the charter operator in accordance with paragraph (a) of this section. If there are any outstanding claims against the agreement, the charter operator and securer shall also state that they have executed a rider or amendment increasing the coverage by the amount of the claims, or that the securer will separately pay any claims for which it may be liable without impairing the agreement or reducing the amount of its coverage. These statements shall be in the form set out in Appendix C to this part.

(3) * * *

* * * * * *

5. Section 380.32(v) is amended to read as follows:

§ 380.32 Specific requirements for operator-participant contracts.

Contracts between charter operators and charter participants shall state:

* * * * *

(v) The name and address of the surety company or bank issuing the security agreement; and that unless the charter participant files a claim with the charter operator or, if he is unavailable, with the securer, within 60 days after termination of the charter, the securer shall be released from all liability under the security agreement to that participant. Termination means the date of arrival (or in the case of a canceled charter, the intended date of arrival) of the return flight. If there is no return flight in a participant's itinerary, termination means the date or intended date of departure of the last flight in the participant's itinerary;

* * * * *

6. Section 380.34 is amended to read as follows:

§ 380.34 Security and depository agreements.

(a) Except as provided in paragraph (b) of this section, the charter operator or foreign charter operator shall furnish a security agreement in an amount for not less than the charter price for the air transportation, if only air transportation is involved, or, if the charter involves land accommodations in addition to air transportation, a security agreement in one of the following amounts dependent upon the length of the charter or series of charters: (1) For a charter or series of charters of 14 days or less, security in an amount of not less than the charter price for the air transportation to be furnished in connection with such charter or series of charters; (2) for a charter or series of charter of more than 14 days but less than 28 days, security in an amount of not less than twice the charter price; and (3) for a charter or series of charters of 28 days or more, security in an amount of not less than three times the charter price: *Provided, however,* That the

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

liability of the securer to any charter participant shall not exceed amounts paid by that participant to the charter operator with respect to the charter.

(b) The direct air carrier and the charter operator or foreign charter operator may elect, in lieu of furnishing a security agreement as provided under paragraph (a) of this section, to comply with the requirements of paragraphs (b)(1) and (b)(2) of this section, as follows:

(1) The charter operator shall furnish a security agreement in an amount of at least $10,000 times the number of flights, except that the amount need not be more than $200,000. The liability of the securer to any charter participant shall not exceed the amount paid by the participant to the charter operator for that charter.

(2) * * *

* * * * *

(viii) Notwithstanding any provisions above, the amount of total cash deposits required to be maintained in the depository account of the bank may be reduced by one or both of the following: The amount of the security agreement in the form prescribed herein in excess of the minimum coverage required by subparagraph (1) of this paragraph; an escrow with the designated bank of Federal, State, or municipal bonds or other securities, consisting of certificates of deposit issued by banks having a stated policy of redeeming such certificates before maturity at the request of the holder (subject only to such interest penalties or other conditions as may be required by law), or negotiable securities which are publicly traded on a securities exchange, all such securities to be made payable to the escrow account: *Provided,* That such other securities shall be substituted in an amount no greater than 80 percent of the total market value of the escrow account at the time of such substitution: *And provided, further,* That should the market value of such other securities subsequently decrease, from time to time, then additional cash or securities qualified for investment hereunder shall promptly be added to the escrow account, in an amount equal to the amount of such decreased value;

* * * * *

(c)(1) The security agreement required under paragraphs (a) and (b) of this section shall insure the financial responsibility of the charter operator or foreign charter operator and the supplying of the transportation and all other accommodations, services, and facilities in accordance with the contract between the charter operator or foreign charter operator and the charter participants.

(2) The security agreement may be either—

(i) A surety bond in the form set forth as Appendix A to this part;

(ii) A surety trust agreement in the form set forth as Appendix E to this part; or

(iii) An arrangement with a bank (for instance, a standby letter of credit) that provides protection of charter participants' funds equivalent to or greater than that provided by the bond in Appendix A. An arrangement that furnishes a lesser degree of protection than would be provided under the bond shall be invalid to that extent, and instead the bank, the charter operator or foreign charter operator, and the charter participants shall have the same rights and liabilities as provided under a bond in the form of Appendix A. If the arrangement does not give as much protection as a bond against the risk of the charter operator's bankruptcy, the bank shall be liable in the event of bankruptcy to the same extent as if it had entered into a bond.

(3) Any agreement under paragraph (c)(2)(iii) of this section shall include a statement that, in the event that the other provisions of the agreement do not provide protection to charter participants comparable to that provided under a bond in the form of Appendix A, the bank shall assume, for the benefit of the charter participants, all the liabilities it would have if it entered into the bond.

(4) The security agreement shall be effective on or before the date the charter prospectus is filed with the Board.

(5) The security agreement shall be specifically identified by the issuing securer with a numbering system so that the Board can identify the security agreement with the specific charter or charters to which it relates. These data may be set forth in an addendum attached to the security agreement, which addendum must be signed by the charter operator or foreign charter operator and the securer.

(6) When security is provided by a surety bond, such bond shall be issued by a bonding or surety company (i) whose surety bonds are accepted by the Interstate Commerce Commission under 49 CFR 1084.6; or (ii) which is listed in Best's Insurance Reports (Fire and Casualty) with a general policyholders' rating of "A" or better. The bonding or surety company shall be one legally authorized to issue bonds of that type in the State in which the charter originates. For purposes of this section, the term "State" includes any territory or possession of the United States, or the District of Columbia.

(7) When security is provided by a security agreement other than a bond, the agreement shall be issued by a national bank complying with the provisions of 12 CFR 7.7010(a), or by a State bank complying with applicable State laws that give authority to issue such agreements, and all such banks must be insured by the Federal Deposit Insurance Corporation or by the Federal Savings and Loan Insurance Corporation.

(d) The security agreement required by this section shall provide that unless the charter participant files a claim with the charter operator or foreign charter operator, or, if it is unavailable, with the securer, within 60 days after termination of the charter, the securer shall be released from all liability under the security agreement to such charter participant. Termination means the date of arrival (or in the case of a canceled charter, the intended date of arrival) of the return flight. If there is no return flight in a participant's itinerary, termination means the date or intended date of departure of the last flight in the participant's itinerary.

7. Appendix C is amended and a new Appendix E is added, to read as set forth below.

Appendix C

Statement of Charter Operator and Securer

We,———(charter operator) and———(securer), certify that we have entered into a security agreement, No.———, in the amount of $—, on———(date). This agreement covers proposed flight schedule number———, a copy of which has been received by———(securer). This agreement complies with § 380.34 of the Civil Aeronautics Board's Special Regulations (14 CFR 380.34). This agreement is a:

—surety bond
—surety trust agreement
———(specify type of agreement if other than a bond or surety trust agreement).

(check one)

—There are no outstanding claims against this agreement.
—There are outstanding claims against this agreement in the amount of $———. We have executed a rider or amendment to the agreement on———(date) increasing the coverage by this amount.*

Charter Operator

By: (Signature and date) ———
(Title) ———
(Address) ———

Securer

By: (Signature and date) ———

* In the place of this sentence, the following statement may be used: "———(securer) will separately pay any claims for which it may be liable without impairing the security agreement or reducing the amount of its coverage."

(Title) ———
(Address) ———

8. A new Appendix E is added to read as follows:

Appendix E

No.———

Public Charter Surety Trust Agreement

This Trust Agreement is entered into between———(Charter operator) incorporated under the law of———with its principal place of business being——— (hereinafter referred to as the Operator), and———(Bank) with its principal place of business being———(hereinafter referred to as the "Trustee"), for the purpose of creating a trust to become effective as of the——— which trust shall continue in force until terminated as hereinafter provided.

The Operator intends to become a Public Charter operator pursuant to the provisions of Part 380 of the Board's Special Regulations and other rules and regulations of the Board relating to insurance or other security for the protection of charter participants, and has elected to file with the Civil Aeronautics Board such a Surety Trust Agreement as will insure financial responsibility with respect to all monies received from charter participants for services in connection with a Public Charter to be operated subject to Part 380 of the Board's Special Regulations in accordance with contracts, agreements, or arrangements therefor.

This Surety Trust Agreement is written to assure compliance by the Operator with the provisions of Part 380 of the Board's Special Regulations and other rules and regulations of the Board relating to insurance or other security for the protection of charter participants. It shall inure to the benefit of any and all charter participants to whom the Operator may be held legally liable for any of the damages herein described.

It is mutually agreed by and between the operator and Trustee that the Trustee shall manage the corpus of the trust and carry out the purposes of the trust as hereinafter set forth during the term of the trust for the benefit of charter participants (who are hereinafter referred to as "Beneficiaries.")

Beneficiaries of the trust created by this Agreement shall be limited to those charter participants who meet the following requirements:

1. Those charter participants who have contractually bound themselves to participate in charters operated or proposed to be operated by the Operator;

2. Who have legal claim or claims for money damages against the Operator by reason of the Operator's failure faithfully to perform, fulfill, and carry out all contracts, agreements, and arrangments made by that Operator while this trust is in effect with respect to the receipt of monies and proper disbursement thereof pursuant to Part 380 of the Board's Special Regulations; and

3. Who have given notice of such claim or claims in accordance with this Trust Agreement, but who have *not* been paid by the Operator.

The Operator shall convey to the Trustee legal title to the trust corpus, which has a value of ——, by the time of the execution of this Agreement.

Trustee shall assume the responsibilities of the Trustee over the said trust corpus and shall distribute from the trust corpus to any and all Beneficiaries to whom the Operator, in its capacity as a Public Charter operator, may be held legally liable by reason of the Operator's failure faithfully to perform, fulfull, and carry out all contracts, agreements, and arrangements made by the Operator while this trust is in effect with respect to the receipt of monies and proper disbursement thereof pursuant to Part 380 of the Board's Special Regulations in connection with said charters, such damages as will discharge such liability while this trust is in effect; *Provided, however,* That the liability of the trust to any Beneficiary shall not exceed the charter price (as defined in Part 380 of the Board's Special Regulations) paid by or on behalf of any such Beneficiary; *Provided further,* That there shall be no obligation of the trust to any Beneficiary if the Operator shall pay or cause to be paid to any Benficiary any sum or sums for which the Operator may be held legally liable by reason of its failure faithfully to perform, fulfill, and carry out all contracts, agreements, and arrangments made by the Operator in its capacity as charter operator while this trust is in effect with respect to the receipt of monies and proper disbursement thereof pursuant to Part 380 of the Board's Special Regulations; *And provided still further,* That the liability of the trust as administered by the Trustee shall not be discharged by any payment or succession of payments hereunder, unless and until such payment or payments shall amount in the aggregate to——. Notwithstanding anything herein to the contrary, in no event shall the obligation of the trust or the Trustee hereunder exceed the aggregate amount of ——.

The Trustee agrees to furnish written notice to the Civil Aeronautics Board forthwith all suits or claims filed and judgements rendered (of which its has knowledge), and of payments made by the Trustee under the terms of this trust.

The trust shall not be liable hereunder for the payment of any damages hereinbefore described which arise as a result of any contracts, agreements, undertakings, or arrangements for the supplying of transportation and other services made by the Operator after the termination of this trust as herein provided, but such termination shall not affect the liability of the trust hereunder for the payment of any damages arising as a result of contracts, agreements, or arrangements for the supplying of transportation and other services made by the Operator prior to the date that such termination becomes effective.

Liability of the trust shall in all events be limited only to a Beneficiary or Beneficiaries who shall within sixty days after the termination of the particular charter give written notice of claim to the Operator or, if it is unavailable, to the Trustee, and all liability of the trust with respect to participants in a charter shall automatically terminate sixty days after the termination date of each particular charter covered by this trust except for claims filed in the time provided herein.

Sixty-one days after the completion of the last charter covered by this Trust Agreement, the trust shall automatically terminate except for claims of any Beneficiary or Beneficiaries previously made in accordance with this Agreement still pending on and after said sixty-first day. To the extent of such claims, the trust shall continue until those claims are discharged, dismissed, dropped, or otherwise terminated; the remainder of the trust corpus shall be conveyed forthwith to the Operator. After all remaining claims which are covered by this Trust Agreement pending on and after the said sixty-first day have been discharged, dismissed, dropped, or otherwise terminated, the Trustee shall convey forthwith the remainder of the trust corpus, if any, to the Operator.

Either the Operator or Trustee may at any time terminate this trust by written notice to the Civil Aeronautics Board at its office in Washington, D.C., such termination to become effective thirty days after the actual receipt of said notice by the Board.

In the event of any controversy or claim arising hereunder, the Trustee shall not be required to determine same or take any other action with respect thereto, but may await the settlement of such controversy or claim by final appropriate legal proceedings, and in such event shall not be liable for interest or damages of any kind.

Any Successor to the Trustee by merger, consolidation, or otherwise, shall succeed to this trusteeship and shall have the powers and obligations set forth in this Agreement.

The trust created under this Agreement shall be operated and administered under the laws of the State of ——.

IN WITNESS WHEREOF, the Operator and Trustee have executed this instrument on the —— day of ——, 19—.

Trustee ———
Charter Operator ———

(Secs. 101(3), 204(a), 401, 402, and 416 of the Federal Aviation Act of 1958, as amended; 72 Stat. 737, 743, 754, 757, and 92 Stat. 1731; (49 U.S.C. 1301, 1324(a), 1371, 1372, and 1386))

By the Civil Aeronautics Board.

BILLING CODE 6320-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1700

Requirements for Child-Resistant Packaging of Acetaminophen Preparations

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Commission requires child-resistant packaging for Acetaminophen-containing preparations that are in a dosage form intended for oral administration and that contain more than one gram of acetaminophen in a single package. The requirement is issued in order to protect children under

5 years of age from serious personal injury and serious illness resulting from ingesting such preparations.

DATES: The requirement shall be effective February 27, 1980, for products packaged after that date.

As to effervescent acetaminophen preparations, and acetaminophen preparations in powder form, that meet criteria specified in proposals published elsewhere in today's issue of the **Federal Register**, the effective date of the requirement is stayed pending Commission consideration of issuing final exemptions.

FOR FURTHER INFORMATION CONTACT: Sandra Eberle, Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207. (301) 492–6400.

SUPPLEMENTARY INFORMATION:

Background

The Poison Prevention Packaging Act of 1970 (the "PPPA," 15 U.S.C. 1471–1476) authorizes the Commission to establish standards for the "special packaging" of any household substance if (1) the degree or nature of the hazard to children in the availability of such substance, by reason of its packaging, is such that special packaging is required to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting such substance and (2) the special packaging is technically feasible, practicable, and appropriate for such substance. Special packaging is often referred to as "child-resistant packaging" and is defined as packaging that is (1) designed or constructed to be significantly difficult for children under five years of age to open or obtain a toxic or harmful amount of the substance contained therein within a reasonable time and (2) not difficult for normal adults to use properly. (It does not mean, however, packaging which all such children cannot open, or obtain a toxic or harmful amount from, within a reasonable time.) Under the PPPA, effectiveness standards have been established for special packaging (16 CFR 1700.15), as has a procedure for evaluating the effectiveness (§ 1700.20). Regulations have been issued requiring special packaging for a number of household products (§ 1700.14).

By a letter dated March 16, 1976 (Petition PP 76–9), Steven D. Steckel, Assistant Director for Pharmacy of Strong Memorial Hospital, Rochester, New York, requested that the Commission require that acetaminophen be packaged in child-resistant containers. Acetaminophen is an analgesic and antipyretic which is widely used as a substitute for aspirin. (The Commission had already begun a study of this substance with the intent of targeting it for future regulatory action.)

Although acetaminophen is safe and effective when taken in its proper dosage, and is also valuable for those individuals who are sensitive or allergic to aspirin, ingestion of large amounts of acetaminophen can cause serious toxic effects.

Liver damage and deterioration of liver function are the major toxic effects of ingestion of large amounts of acetaminophen.

After considering the medical literature, injury data, and death certificates that are available to the Commission, the Commission's staff concluded that a regulation was needed that would require preparations containing more than one gram of acetaminophen in a single package to be in special packaging in order to protect children under five years of age.

The Commission requested comments from the members of the Technical Advisory Committee for Poison Prevention Packaging on the desirability of a special packaging requirement for products that contain more than one gram of acetaminophen in a single package. Ten of the Technical Advisory Committee members responded. All of those members indicated that child-resistant packaging should be required. Eight of the members concurred with the recommended level of one gram, while two of the members believed that a lower level should be established.

The Food and Drug Administrations's Panel for Over The Counter Drugs (Internal Analgesic, Antipyretic, and Antirheumatic Products) also recommended the packaging of acetaminophen products in child-resistant packaging (see 42 FR 35368; July 8, 1977).

In issuing a standard for special packaging under the PPPA, the Commission is required by section 3(a)(2) of the PPPA to find that the special packaging is "technically feasible, practicable, and appropriate." The information available to the staff showed that there were numerous forms of special packaging available for use with each form of acetaminophen and that the available packaging would not be detrimental to the integrity of the substance or interfere with its storage or use.

After considering all of the available information, the Commission preliminarily concluded that preparations containing more than 1 gram of acetaminophen in a single package should be in special packaging in order to protect children under five years of age and that special packaging for acetaminophen preparations is technically feasible, practicable, and appropriate. It also preliminarily concluded that an appropriate effective date for such a requirement would be 180 days after the final regulation is published in the **Federal Register**. Accordingly, the Commission published a **Federal Register** notice proposing such a requirement (43 FR 4632; February 3, 1978). That **Federal Register** notice contains a more detailed discussion of the reasons for the Commission's decision.

Comments on the Proposal

In response to its proposal, the Commission received 11 comments. All of the comments supported the general idea of requiring acetaminophen preparations to be in special packaging. However, some of the comments raised other issues that are discussed separately below.

Effective date for blister packs. The regulations that specify the minimum effectiveness of child-resistant packaging with respect to unit packaging (16 CFR 1700.20) state that it is a test failure if, during the 10 minute test period, a child is able to open or gain access to the number of individual units which constitute the amount that may produce serious personal injury or serious illness in a 25 pound child. In the case of acetaminophen, under the standard issued below, it would be a test failure if the child gained access to 4 325 mg tablets or 3 500 mg tablets. For unit packaging, the child-resistant effectiveness must be such that not more than 20 percent of the children produce a test failure.

Blister packaging is a commonly used form of unit packaging in which the item is secured between a preformed (usually transparent plastic) dome or bubble and a paperboard surface or other carrier.

Warner-Lambert Company, while not disputing the need for child-resistant packaging for acetaminophen-containing preparations, stated that the majority of such preparations that they market are packaged in blister packaging and that blister packs suitable for use with acetaminophen that comply with special packaging requirements had not been developed. They stated that "[w]e have examined all known currently available (blister pack) configurations, and all wholly or partially expose at least four (4) dosage units in any one opening operation." They conclude from this that suitable blister packs are not available. The Commission agrees that a blister pack that exposed 4 units of acetaminophen during the test period would not comply with the standard.

Warner-Lambert stated that they had begun the process of developing a suitable package, but that they did not believe the program "could be completed by six (6) months following publication of the final order, assuming the latter occurs reasonably soon after the close of the comment period." They request an effective date of 12 months after the final order is published.

The Commission notes that over a year has passed since this comment, requesting a 12 month effective date, was submitted. The commenter has recently informed the Commission that it has developed a blister pack that meets the special packaging criteria that allows access to less than 3 500 mg tablets. However, the package the company has developed for its 325 mg tablets allowed access to at least 4 tablets more often than allowed by the special packaging regulations.

A survey by the Commission's staff of two major contract packagers, and a review of relevant test data, indicate that child-resistant blister packs are available that do not permit more than the allowable number of children to gain access to 3 or more tablets during the effectiveness test. One of these packagers indicated that he could manufacture one million such packages within 6 to 8 weeks. Thus, these commenters could use packages supplied by a contract packager if the commenter does not develop its own package before the rule becomes effective. Accordingly, the Commission finds that special packaging for blister packages of acetaminophen is technically feasible, practicable, and appropriate and that the proposed 180 day period for the effective date will be adequate for manufacturers to comply with the special packaging requirement.

Exemption for effervescent formulations. Warner-Lambert Company also requested that the regulation exempt effervescent formulations, which are those in which the presence of moisture causes the rapid liberation of carbon dioxide. They contend the exemption should be granted because:

1. In the granular form, such products are difficult for children to ingest or consume.
2. Effervescence while the product is on the tongue is markedly unpleasant.
3. The volume of foam and carbon dioxide that is produced when the product is ingested in undissolved form tends to produce gagging.
4. In undissolved form, the products have an objectionable salty taste.
5. It is possible for nausea and vomiting to be caused by the product's salinity.

They note that the Commission has previously exempted effervescent aspirin tablets from the regulation that requires child-resistant packaging for aspirin (16 CFR 1700.14(a)(1)).

After considering this exemption request, the Commission has preliminarily concluded that special packaging is not necessary to protect children from serious personal injury or serious illness caused by effervescent acetaminophen products. Accordingly, elsewhere in this issue of the **Federal Register**, the Commission has proposed that this form of acetaminophen be excluded from the scope of the requirement being issued below. The reasons for the proposed exemption are discussed more fully in the notice that proposes the exemption. The effective date of the regulation issued below is stayed as to effervescent acetaminophen products pending the Commission's consideration of the exemption request.

Exemption for acetaminophen products in powder form. Block Drug Company Inc. commented that they generally agreed with the proposed requirement but requested that powdered acetaminophen preparations should be exempt. They stated that there should not be a problem with ingestion by children of this form of the product because of its unpleasant taste and because the child is likely to spill much of it before it can be ingested. They contend that this product is analagous to the powdered aspirin products that have been previously exempted by the Commission. See 42 FR 20291, April 19, 1977, and 43 FR 173330, April 21, 1978.

After considering this exemption request, the Commission has preliminarily concluded that special packaging is not necessary to protect children from serious personal injury or serious illness caused by powdered acetaminophen products. Accordingly, elsewhere in this issue of the **Federal Register**, the Commission has proposed that this form of acetaminophen be excluded from the scope of the requirement being issued below. The reasons for the proposed exemption are discussed more fully in the notice that proposes the exemption. The effective date of the regulation issued below is stayed as to acetaminophen products in powder form pending the Commission's consideration of the exemption request.

Exemption for dilute solutions of acetaminophen. Richardson-Merrell, Inc. requests an exemption for liquid products containing less than 1 gram acetaminophen per fluid ounce. It contends that these products have "high impact flavors" which should be unpalatable to children. The company does not define "high impact" flavor nor does it provide supporting data for the contention that high impact flavoring would be a deterrent to accidental ingestion. In fact, there are flavoring agents in use that could be considered to have "high impact" that are intended to enchance the palatability of drug products and would not necessarily be a deterrent to ingestion by children.

In 1977, the company had submitted to the Commission the results of a toxicity study in rats for a product within the requested exemption, and these data were referred to in the comment requesting the exemption. The manufacturer concludes from this study that the toxicity of acetaminophen must be low for this formulation since the toxicity of the combination (acetaminophen and vehicle) did not differ from that of the vehicle alone.

However, the Commission does not believe the results of the study sufficiently support this conclusion. In the study, the volumes of test materials administered to the animals were larger than those generally considered appropriate for the size of the animals tested. As a general rule, for rats of this size (100 to 200 gram rats), the maximum dosage volumes should not have exceeded 1 ml. The volumes given in this study ranged from 3 to 10 ml. In a weight to weight comparison, for a person weighing 70 kg (154 lb), these volumes would be equivalent to 1 to 3½ quarts given at one time. In addition, no attempt was made to standardize the volume administered to all the animals tested. Therefore, it is possible that the toxicity of acetaminophen was masked by the combined effects of alcohol toxicity and fluid overload.

In addition, it has been reported in the literature that humans are more susceptible to acetaminophen toxicity than are most laboratory animals. Therefore, human experience data is much more reliable in determining a toxic level for humans than are animal toxicity studies. The Commission has determined that more than one gram of acetaminophen may be potentially hepatotoxic if ingested by a child. For a formulation containing 600 mg in 30 cc, or approximately 600 mg per ounce, a child would obtain a potentially toxic amount by ingesting approximately 2 ounces of the product (600 mg/oz × 2 oz = 1.2 grams acetaminophen). These products are sold in 6 and 10 ounce sizes, containing 3.6 and 6 grams acetaminophen, respectively. It is conceivable that a child might ingest the entire contents of either package size, obtaining an amount of acetaminophen

greatly exceeding the estimated toxic level.

The commenter also submitted data to the Commission showing that in a number of cases where ingestion of more than 1 gram of acetaminophen in a liquid product by young children was alleged, there was no identifiable injury. In view of the considerable evidence that ingestion of more than 1 gram of acetaminophen can cause serious personal injury or serious illness in small children, the Commission does not find this data persuasive. In the first place, the amount of a product that is reported ingested is usually only an estimate. In addition, there are difficulties in diagnosing many cases of liver damage or in associating liver damage with the ingestion of acetaminophen.

Accordingly, the Commission cannot conclude that such liquid products involve any less of a risk of serious personal injury or serious illness than the other acetaminophen products to which the requirement will apply, and the request for an exemption of these liquid products is therefore denied.

The requirement should be more stringent. The American Society of Hospital Pharmacists commented in support of the proposal. However, they also indicated that they believed that the threshold level for invoking the requirement should be lower than the 1 gram level that was proposed. They contend this is needed because "acetaminophen is perceived by consumers as safe and harmless and * * * this misconception may make people careless in securing and placing the product to protect against access by children." However, no alternative level was suggested nor were any data provided to establish that a lower level is indeed necessary. For the reasons stated in the proposal, the Commission still believes that the proposed 1 gram level is sufficient to protect children against serious personal injury or serious illness from ingesting acetaminophen. The available human experience data and medical literature do not reveal any instance in which one gram or less of acetaminophen has caused serious injury or illness after ingestion, nor do they indicate that such an amount has the potential to produce serious injury or illness. Accordingly, the 1 gram threshold level of the proposal is adopted in the final requirement.

Exemptions for elderly or handicapped persons or for households without small children. Mallard, Incorporated commented that the final regulation should provide exemptions for the elderly and handicapped and for households without small children.

In passing the Poison Prevention Packaging Act, Congress recognized that some aged or infirm persons might have difficulty in gaining access to products contained in special packaging. Therefore, section 4(a) of the act provides for the marketing of a noncomplying size of the product to accommodate these consumers. Since this provision is contained in the act itself, it need not be repeated in each individual regulation. Each over-the-counter product for which regulations have been issued is permitted this noncomplying size unless otherwise specified.

Toxicity of acetaminophen. McNeil Consumer Products Company indicated that it supports the principle of the Commission's proposal and had voluntarily initiated a program to convert its products to special packaging prior to the Commission's proposal. However, the company expressed its belief that the preamble of the proposal could create the inaccurate impression that acetaminophen is more toxic than it actually is. McNeil's specific contentions are addressed below.

McNeil believes the proposal did not sufficiently point out the safety of acetaminophen at normally recommended doses. It cites data which it contends show that acetaminophen is safer than aspirin in normal use.

The proposal states only that the ingestion of excessive amounts of acetaminophen can cause serious toxic effects. The Commission did not state, and does not mean to imply, that acetaminophen is not safe at recommended doses. [The Commission has required child-resistant packaging for both aspirin and acetaminophen.] In discharging its statutory responsibility to protect children by the issuance of special packaging regulations, the Commission addresses whether such regulations are needed for the product in question. It need not analyze which of two drugs, both subject to special packaging requirements, might be more toxic under certain conditions. The general questions of safety and efficacy of drugs are within the province of the Food and Drug Administration.

The commenter also alleges that the proposal creates the inaccurate impression that hepatic toxicity from acetaminophen overdosage is a common and major cause of drug overdosage toxicity in children. The Commission notes that what constitutes a common or major cause is a somewhat subjective determination. However, the literature provides many examples of hepatic toxicity and abnormal liver function in adults following an overdose of acetaminophen. Similar effects would be expected to occur in overdosages involving young children.

The commenter also disagreed with the proposal's statement that there are indications in the medical literature that all acute ingestions of acetaminophen produce some degree of liver damage. This statement in the proposal pertained only to the overdose situation. However, even if liver damage is not always associated with acetaminophen overdoses, the Commission believes that a special packaging requirement for acetaminophen is required to protect children from serious injury or illness. For this reason, and since there can be some uncertainty about the minimum amount that must be ingested to produce liver damage, the Commission has omitted such a statement from this notice.

This commenter also believes that because of duplicate reports to the Commission, only 2 of the 3 deaths attributed to acetaminophen during the period of 1969–1975 in the data referred to in the proposal actually occurred. Because of the confidential nature of the information provided in the death certificate file, the Commission is unable to determine whether this contention is correct. However, even if the correct figure is 2 and not 3, a special packaging requirement would be warranted for the reasons explained in this notice and in the preamble to the document in which the Commission proposed the regulation.

The commenter also contends that in the 2 remaining deaths there is insufficient evidence to establish a causal role for acetaminophen.

In one of the cases referred to, products other than acetaminophen had also been ingested. Since the amount of acetaminophen reported ingested in this incident is lower than that usually considered to be a potentially fatal dose, it is likely that the other products ingested had a significant effect on the toxicological outcome of this ingestion. However, the coroner determined the cause of death to be acetaminophen overdose, and the Commission does not have enough information to warrant contradicting the coroner's verdict.

In the other case, the cause of death was reported to the National Clearinghouse for Poison Control Centers (NCPCC) as an overdose of acetaminophen. Although the possibility that this report may be in error cannot be ruled out, the Commission has no reason to doubt its accuracy.

In any event, there is ample evidence of non-lethal adverse effects associated with acetaminophen sufficient to warrant the special packaging requirement.

The commenter also indicated that the extrapolation of adult overdose data to children was inappropriate since the matabolism of acetaminophen differs in young children from that of adults.

As noted in the proposal, the Commission is well aware of possible differences in the metabolism of acetaminophen in children versus adults and that direct extrapolation from adult data may not provide an exact toxic dose for children. However, the exact nature of any difference in metabolism is not yet known, and no numerical value can be used to determine the difference in toxicity between adults and children. Although it is assumed that the toxic dose for children as derived from extrapolation from adult data may be somewhat smaller than that which might actually be toxic to children, the Commission feels that the calculation provides a margin of safety necessary to insure the safety of young children.

Finally, the commenter argues that the recitation in the proposal of symptoms other than liver damage that can occur as a result of acetaminophen overdose should have noted that these other symptoms may occur in other patients that have liver failure and are not in and of themselves specific toxic effects of acetaminophen overdose. The Commission notes that the proposal stated that these other symptoms were in *addition* to liver failure and considers whether the symptoms are directly or indirectly caused by acetaminophen ingestion to be immaterial to the determination of whether a special packaging requirement is needed.

Statutory Findings

1. Serious illness or serious injury.

Data obtained from the National Clearinghouse for Poison Control Centers (NCPCC) for the years 1969–76 reveal 6,523 reported ingestions of acetaminophen-containing products among children under five years of age. Four hundred sixty-two (462) of these cases exhibited symptoms, and 129 of these required hospitalization, which was usually of unspecified duration (some cases were 1–2 days). Two of the 6,523 cases resulted in death. It is significant to note that there has been an increase in ingestions reported from 1,425 for 1969–1972 to 1,704 in 1976 alone, which may reflect the increase in sales of acetaminophen containing products.

The Consumer Product Safety Commission's file of data from six Poison Control Centers on contract with the Commission shows that for 1976 and 1977, 901 of 18,668 reported ingestions involved acetaminophen-containing products. Seventeen of these 901 ingestions resulted in hospitalization.

During calendar year 1978 there were 20 ingestions reported to National Electronic Injury Surveillance System (NEISS) hospitals involving children under 5 and identifiable as associated with products containing acetaminophen; there were two hospitalizations. For the first six months of 1979, 63 ingestions were reported to NEISS hospitals, with 7 hospitalizations. The increase over 1978 may be attributed in part to increased sales of acetaminophen.

Data concerning death certificates on file with the Commission reveal one death to a three-year old child as a result of acetaminophen ingestion. However, it is not known if this death was also reported in the data from the National Clearinghouse for Poison Control Centers.

The medical literature indicates that acute acetaminophen ingestions are relatively more toxic in humans than in animals. Consequently, the results of toxicity studies involving animals are not an accurate reflection of the toxicity of acetaminophen in humans.

Extrapolation of the toxicity levels that have been reported for adults may provide an indication of the toxic and lethal values for acetaminophen in children under 5 years of age. It is recognized that such extrapolations may not always be a true reflection of the toxicity of a product in children, since children may not metabolize and/or eliminate the product in a manner similar to adults. Nevertheless, acetaminophen, while it may be metabolized differently in children than adults, is eliminated at a similar rate. To the extent that adults may be more sensitive to acetaminophen overdoses than children, the toxic doses for children obtained by extrapolating data for adults will provide a desirable margin of safety for young children.

Assuming a maximum weight of 16 kg for a two year old child, an ingestion of 2 grams would constitute a dose of at least 125 mg/kg of body weight. The medical literature, in general, reports that 10–15 grams of acetaminophen causes hepatotoxicity in adults and that 13–25 grams may result in death for an adult. Assuming an average adult weight of 70 kg, these values would indicate a minimum toxic dose of approximately 140 mg/kg of body weight and a minimum lethal level of approximately 190 mg/kg. A dose of 6 grams of acetaminophen has also been reported as producing hepatotoxicity in a 16-year old female. Assuming that this patient weighed 50 kg, extrapolation would yield a possible minimum toxic dose of 120 mg/kg for a 10 kg child. The death of an adult has been reported following an ingestion of 8.125 grams of acetaminophen. Assuming an average adult weight of 70 kg, an equivalent minimum lethal dose for a 10 kg child could be as low as 1.2 grams. Furthermore, the death of a child was reported after the ingestion of 1.08 grams of acetaminophen. (Although these figures are close to the exempted level, it must be emphasized that these are highly unusual cases compared to other reported fatalities. In the case of the 1.08 gram ingestion, other substances were also ingested that probably contributed to the fatal result.)

The literature also contains reports that there exists a likelihood of liver damage in a two year old child who has ingested more than 3 grams of acetaminophen and that an ingestion of 2 grams could produce hepatotoxicity in a two year old child.

Some of the cases mentioned above represent considerable deviations from the values generally recorded in the literature. However, these cases show that products containing levels of more than one gram of acetaminophen have the potential for producing serious injury or illness in children under five years of age. On the other hand, the available human experience data and the medical literature do not reveal any instance in which one gram or less of acetaminophen has caused serious injury or illness after an acute ingestion, nor do they indicate that such an amount has the potential to produce serious injury or illness.

In view of the reports in the medical literature, the data showing numerous ingestions by children, and the comments that have been received by the Commission, the Commission finds that preparations containing more than 1 gram of acetaminophen in a single package are available to young children in or about the household and that a regulation requiring special packaging of such preparations is required to protect children under 5 years of age.

2. Technical feasibility, practicability, and appropriateness.

In issuing a standard for special packaging under the PPPA, the Commission is required by section 3(a)(2) of the PPPA to find that the special packaging is "technically feasible, practicable, and appropriate>* * *".

A. *Technical Feasibility.* Acetaminophen is marketed in tablets, powders, and capsules, and in various

V 4 4 / 1 7 1

liquid formulations, and there are numerous package designs that meet the requirements of 16 CFR 1700.15(b) that are suitable for use with each form of this product. Therefore, the Commission finds that special packaging for acetaminophen is technically feasible.

B. *Practicability.* Because many existing designs suitable for use with the acetaminophen preparations that are the subject of the proposed regulation are currently being used in the special packaging of other drugs and dietary supplements, the Commission finds that special packaging for this product is practicable because it is adaptable to modern mass production and assembly line techniques. The Commission conducted a survey in May 1977 of the affected industries and packaging manufacturers. Based on the survey, a December 16, 1977, "Preliminary Study of Sales and Packaging of Acetaminophen" prepared by the staff, and its inquiries concerning blister packs for acetaminophen, the Commission concludes that there will be no major supply or procurement problems for the packagers of acetaminophen-containing products or the manufacturers of child-resistant closure and capping equipment. In addition, there should be no serious problems experienced by manufacturers of the products in incorporating the child-resistant packaging features into their existing packaging lines.

C. *Appropriateness.* There are existing special packaging designs for other drug products that use the same materials for the container, closure, and liner that are currently used for acetaminophen products. Therefore, the Commission finds that special packaging is appropriate for acetaminophen since the packaging is available in forms that are not detrimental to the integrity of the substance and that do not interfere with its storage or use.

Effective Date

The PPPA provides that, except for good cause, no regulation shall take effect sooner than 180 days or later than one year from the date such regulation is issued. A Commission survey of the affected industry and packaging manufacturers, discussed above, indicates that a period of six months (180 days) from the issuance of the final regulation will be sufficient for the manufacturers of these preparations to obtain suitable child-resistant packaging and incorporate its use into their packaging lines. Accordingly, the effective date is February 27, 1980, for all acetaminophen preparations packaged after that date. The effective date is stayed as to the effervescent acetaminophen preparations and acetaminophen preparations in powder form for which the Commission has proposed exemptions elsewhere in this issue of the **Federal Register**, pending the Commission's consideration of these exemptions.

Conclusion

Therefore, for the reasons set forth above and in the proposal, and after considering (1) the reasonableness of the standard, (2) available scientific, medical, and engineering data concerning special packaging and concerning childhood accidental ingestions, illness, and injury caused by household substances, (3) the manufacturing practices of industries affected by the PPPA, and (4) the nature and use of acetaminophen, the Commission finds that the special packaging requirement set forth below as 16 CFR 1700.14(a)(16) is required to protect children from serious personal injury or serious illness from ingesting acetaminophen and that the special packaging required by such standard is technically feasible, practicable, and appropriate.

Accordingly, pursuant to provisions of the Poison Prevention Packaging Act of 1970 (Pub. L. 91–601, secs. 2(4), 3, 5, 84 Stat. 1670–1672; 15 U.S.C. 1471(4), 1472, 1474) and under the authority vested in the Commission by the Consmer Product Safety Act (Pub. L. 92–573, sec. 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission amends 16 CFR 1700.14 by adding a new paragraph (a)(16), reading as follows (although unchanged, the introductory text of paragraph (a) is included below for context):

§ 1700.14 Substances requiring special packaging.

(a) *Substances.* The Commission has determined that the degree or nature of the hazard to children in the availability of the following substances, by reason of their packaging, is such that special packaging is required to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting such substances, and that the special packaging herein required is technically feasible, practicable, and appropriate for these substances:

* * * * *

(16) *Acetaminophen.* Preparations for human use in a dosage form intended for oral administration and containing in a single package a total of more than one gram acetaminophen shall be packaged in accordance with the provisions of § 1700.15(a), (b) and(c).

(Secs. 2, 3, 5, Pub. L. 91–601, 84 Stat. 1670–1672 (15 U.S.C. 1471, 1472, 1472))

Effective date. This paragraph becomes effective on February 27, 1980, for all acetaminophen products packaged after that date. The effective date is stayed until further notice as to the effervescent acetaminophen preparations and acetaminophen preparations in powder form that have been proposed to be exempted from the regulation and published elsewhere in this issue of the **Federal Register.**

Dated: August 27, 1979.

Sadye E. Dunn,

Secretary Consumer Product Safety Commission.

BILLING CODE 6355–01–M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

21 CFR Part 81

[Docket No. 79C–0053]

Color Additives Used in Foods, Drugs, and Cosmetics; Provisional Listing of Lead Acetate; Postponement of Closing Date

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of lead acetate for use as a color additive in cosmetics that color the hair on the scalp. A new closing date is being established in response to a notice of proposed rulemaking that published in the **Federal Register.** The new closing date will be March 1, 1980.

EFFECTIVE DATE: September 1, 1979.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Bureau of Foods (HFF–334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: The current closing date of September 1, 1979 for the provisional listing of lead acetate was established by a regulation published in the **Federal Register** of March 6, 1979 (44 FR 12169). A notice of proposed rulemaking was published in the same issue of the **Federal Register** to extend the date further to March 1, 1980. All interested persons were invited to submit comments by May 7, 1979. FDA proposed to extend the closing date for lead acetate to provide time for the submission of information about the evaluation of studies showing lead salts to be animal carcinogens. The agency

expects to receive information that may be relevant to the use of lead acetate as a hair dye in response to a request for data concerning the presence of lead in food published elsewhere in this issue of the **Federal Register.**

No comments were received on the proposal, and the agency is issuing the regulation in the form in which it was proposed. Thus, the regulation set forth below will postpone the September 1, 1979 closing date for the provisional listing of lead acetate until March 1, 1980.

This regulation will permit the uninterrupted use of this color additive until March 1, 1980. To prevent any interruption in the provisional listing of lead acetate, and in accordance with 5 U.S.C. 553(d)(1) and (3), this regulation is being made effective on September 1, 1979.

Therefore, under the Transitional Provisions of the Color Additive Amendments of 1960 to the Federal Food, Drug, and Cosmetic Act (Title II, Pub. L. 86–618; sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 81 is amended as follows:

§ 81.1 [Amended]

1. In § 81.1 *Provisional lists of color additives,* by revising the closing date for "Lead acetate" in paragraph (g) to read "March 1, 1980."

§ 81.27 [Amended]

2. In § 81.27 *Conditions of provisional listing of additives,* by revising the closing date for "Lead acetate" in paragraph (b) to read "March 1, 1980."

Effective date. This regulation is effective September 1, 1979.

(Sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note).)

Dated: August 28, 1979.

Sherwin Gardner,

Acting Commissioner of Food and Drugs.

[FR Doc. 79–27387 Filed 8–30–79; 8:45 am]

BILLING CODE 4110–03–M

21 CFR Part 175

[Docket No. 79F–0114]

Safe Use of Dipentene-Styrene Resin as Component of Adhesives Intended for Use in Food Packaging Materials

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for safe use of dipentene-styrene resin as a component of adhesives intended for use in food packaging materials. This action is based on a petition by American Cyanamid Co.

DATES: Effective August 31, 1979; objections by October 1, 1979.

ADDRESS: Written objections to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Bureau of Foods (HFF–334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of May 8, 1979 (44 FR 26966), notice was given that a petition (FAP 8B3392) had been filed by American Cyanamid Co., Wayne, NJ 07470, proposing that § 175.105 *Adhesives* (21 CFR 175.105) be amended to provide for safe use of a dipentene-styrene resin as a component of adhesives intended for food-contact use.

The agency has evaluated data in the food additive petition and other relevant material and concludes that the regulation should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 175 is amended in § 175.105 by alphabetically inserting a new item in paragraph (c)(5), to read as follows:

§ 175.105 Adhesives.

* * * * *

(c) * * *

(5) * * *

Substances	Limitations
* * * * *	
Dipentene-styrene resin (CAS Registry No. 64536–06–7)	
* * * * *	

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 1, 1979, submit to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective August 31, 1979.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: August 24, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110–03–M

21 CFR Part 176

[Docket No. 78F–0014]

N-Methyldiallylamine Hydrochloride Polymer With Epichlorohydrin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the food additive regulations to provide for the safe use of N-methyldiallylamine hydrochloride polymer with epichlorohydrin as a retention aid, flocculating agent, and to improve the wet strength of paper and paperboard intended for food contact use. Hercules Inc. filed a petition requesting such use.

DATES: Effective August 31, 1979; objections by October 1, 1979.

ADDRESS: Written objections to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Bureau of Foods (HFF–334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Notice was published in the **Federal Register** of February 28, 1978 (43 FR 8183) that a food additive petition (FAP 7B3303) had been filed by Hercules Inc., 910 Market St., Wilmington, DE 19899, proposing

A G 3 1 7 9 UMI

that § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170) be amended to provide for safe use of poly(methyldiallylamine-epichlorohydrin)resin as a retention aid, flocculating agent, and to improve the wet strength of paper and paperboard in contact with aqueous and fatty foods.

The Food and Drug Administration, having evaluated data in the petition and other relevant material, concludes that § 176.170 should be amended as set forth below to provide for the use of the additive under the preferred name of N-methyldiallylamine hydrochloride polymer with epichlorohydrin.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), § 176.170 is amended by alphabetically adding to the list of substances in paragraph (a)(5) a new item to read as follows:

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods.

* * * * *

(a) * * *

(5) * * *

List of substances	Limitations
. . . .	. . . .
N-methyldiallylamine hydrochloride polymer with epichlorohydrin having a nitrogen content of 4.8 to 5.9 percent (Kjeldahl dry basis) such that a 20 percent by weight aqueous solution has a minimum viscosity of 30 centipoises and maximum viscosity of 100 centipoises at 25° C, as determined by LVF Model Brookfield viscometer using a No. 1 spindle at 60 r.p.m. (or equivalent method).	For use only as a retention aid, flocculating agent, and wet-strength agent employed in the manufacture of paper and paperboard prior to the sheet-forming operation and limited to use at a level not to exceed 1.5 percent by weight of the dry paper and paperboard.
. . . .	. . . .

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 1, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective August 31, 1979.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)))

BILLING CODE 4110-03-M

21 CFR Part 178

[Docket No. 79F-0085]

Antioxidants and/or Stabilizers for Polymers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the food additive regulations to provide for the use of butyric acid, 3,3-bis(3-*tert*-butyl-4-hydroxyphenyl) ethylene ester as an antioxidant and/or stabilizer in olefin polymers. A petitioner requested the amendment.

DATES: Effective August 31, 1979; objections by October 1, 1979.

ADDRESS: Written objections to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St., SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of April 24, 1979 (44 FR 24235), the Food and Drug Administration (FDA) announced that a food additive petition (FAP 8B3408) had been filed by the American Hoechst Corp., Route 202-206 N. Bridgewater, Somerville, NJ 08876, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) be amended to provide for the use of butyric acid, 3,3-bis(3-*tert*-butyl-4-hydroxyphenyl) ethylene ester as an antioxidant and/or stabilizer in olefin polymers.

FDA has evaluated data in the petition and other relevant material and concludes that § 178.2010 should be amended as set forth in this document.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 178 is amended in § 178.2010 by alphabetically inserting a new item in the list of substances in paragraph (b), to read as follows:

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b)* * *

Substances	Limitations
. . . .	. . . .
Butyric acid, 3,3-bis(3-*tert*-butyl-4-hydroxyphenyl) ethylene ester [Chemical Abstracts Service Registry No. 32509-66-3].	For use only: 1. At levels not to exceed 0.5 percent by weight of olefin polymers complying with § 177.1520(c) of this chapter, items 1.1, 3.1, and 3.2, except that when used in contact with foods described as types III, IV-A, V, VII-A, and IX in Table 1 of § 176.170(c) of this chapter, the polyolefins may only be used under conditions of use E, F, and G set forth in Table 2 of § 176.170(c) of this chapter. 2. At levels not to exceed 0.2 percent by weight of olefin polymers complying with § 177.1520(c) of this chapter, items 2.1 and 2.2, except that when used in contact with foods described as types III, IV-A, V, VII-A, and IX in Table 1 of § 176.170(c) of this chapter, the polyolefins may only be used under conditions of use E, F, and G set forth in Table 2 of § 176.170(c) of this chapter.
. . . .	. . . .

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 1, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective August 31, 1979.

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Part 561

[FAP 6H5126/R45A; FRL 1303-3]

Tolerances for Pesticides in Animal Feeds Administered by the Environmental Protection Agency; Glyphosate; Correction

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule that appeared on the pesticide glyphosate at page 17658 in the **Federal Register** of Friday, March 23, 1979, (FR Doc. 79-8977). This correction is made to rectify certain paragraph designations in 21 CFR 561.253.

EFFECTIVE DATE: Effective on August 31, 1979.

FOR FURTHER INFORMATION, CONTACT: Mr. Edward Gross, Federal Register Section, Office of Toxic Substances, Chemical Information Division (TS-793), EPA, 401 M Street, SW, Washington, DC 20460 (202/426-1800).

SUPPLEMENTARY INFORMATION:

In FR Doc. 79-8977 appearing at page 17658 in the issue of Friday, March 23, 1979, the following change should be made:

In the third column on page 17658 in § 561.253 *Glyphosate*, paragraph "(f)" should be redesignated paragraph "(d)", and the present paragraph "(d)" should be deleted.

(Section 409(c)(1) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 348(c)(1)])

Dated: August 16, 1979.

DEPARTMENT OF DEFENSE

Department of the Army

32 CFR Part 542

[AR 145-2]

Schools and Colleges; ROTC—Junior Program and National Defense Cadet Corps Organization, Administration, Operation, and Support

AGENCY: Department of the Army, DoD.

ACTION: Final rule.

SUMMARY: The regulation prescribing the policies for administering the Junior Reserve Officers' Training Corps (JROTC) and the National Defense Cadet Corps (NDCC) has been amended. These changes update and clarify policies for the organization and administration of the JROTC program in all secondary schools, including overseas dependents schools and permits the statutory enrollment of female students.

EFFECTIVE DATE: January 22, 1979.

FOR FURTHER INFORMATION CONTACT: Lieutenant Colonel James P. Hunt, US Army, Chief, Procurement and Accessions Branch, US Army Military Personnel Center, 200 Stovall Street, Alexandria, VA 22332 (202-325-0596).

SUPPLEMENTARY INFORMATION: One comment on the December 18, 1978 proposed rulemaking was received from the National Archives and Records Service. Their suggestions have been incorporated into the final rule. The JROTC/NDCC programs are prescribed in Army Regulation 145-2. Copies of AR 145-2 may be purchased from the Army. Address your letter to the following address for the cost of the publication: Commander, US Army AG Publications Center, 2800 Eastern Boulevard, Baltimore, Maryland 21220.

Dated: August 20, 1979.

James P. Hunt,

LTC, US Army, Chief, Procurement and Accessions Branch, MILPERCEN.

In consideration of the above, 32 CFR Part 542 is revised as set forth below:

PART 542—SCHOOLS AND COLLEGES

Sec.

542.1 Purpose.
542.2 Applicability.
542.3 Definitions.
542.4 Objectives.
542.5 Policies.
542.6 Responsibilities.
542.7 Program Information.

Authority: 10 U.S.C. 2031 and 4651.

Source.—AR 145-2.

§ 542.1 Purpose.

This regulation prescribes policies for administering the Junior Reserve Officers' Training Corps (JROTC) and the National Defense Cadet Corps (NDCC).

§ 542.2 Applicability.

This regulation applies to the Department of the Army (including the corps and their units), schools, and personnel associated with applying for these programs.

§ 542.3 Definitions.

The following terms apply to the JROTC and NDCC programs:

(a) *Junior Reserve Officers' Training Corps (JROTC).* The organization of

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

units established by the Department of the Army (under 10 U.S.C 2031) at public and private secondary schools to conduct student leadership training. Also, a general term used:

(1) To describe all JROTC training conducted at secondary schools.

(2) To denote the members, instruction, and other related matters.

(b) *National Defense Cadet Corps (NDCC).* Students taking part in leadership studies at any school under 10 U.S.C. 4651 and as prescribed by the Secretary of the Army. Used in a broad sense to refer to the program and related matters.

(c) *Leadership Development (LD) Program.* The JROTC curriculum which consists of a 4- or 3-year program of instuction (LD–1, –2, –3, and –4).

(d) *Military Science (MS).* The Senior ROTC curriculum which consists of two courses—the basic course (MS–I and MS–II) and the advanced course (MS–III and MS–IV).

(e) *Region commander.* The commanding general of a US Army ROTC Region who is responsible for the operation, training, and administration of the ROTC program within his/her geographical area. Region commanders are located at:

(1) US Army First ROTC Region, Fort Bragg, NC 28307.

(2) US Army Second ROTC Region, Fort Knox, KY 40121.

(3) US Army Third ROTC Region, Fort Riley, KS 66442.

(4) US Army Fourth ROTC Region, Fort Lewis, WA 98433.

(5) The Commander-in-Chief, US Army Europe and Seventh Army, APO New York 09102.

§ 542.4 Objectives.

The Army JROTC/NDCC objectives are to develop in each cadet—

(a) Good citizenship and partiotism.

(b) Self-reliance, leadership, and responsiveness to constituted authority.

(c) The ability to communicate well both orally and in writing.

(d) An appreciation of the importance of physical fitness.

(e) A respect for the role of the US Army in support of national objectives.

(f) A knowledge of basic military skills.

§ 542.5 Policies.

(a) The Junior Reserve Officers' Training Corps and the National Defense Cadet Corps programs are designed for physically fit citizens attending participating schools. They provide meaningful leadership instruction of benefit to the student and of value to the Armed Forces. The programs provide unique educational opportunities for young citizens through their participation in a Federally-sponsored course while pursuing a normal civilian education. Students will acquire:

(1) An understanding of the fundamental concept of leadership, military art and science,

(2) An introduction to related professional knowledge, and

(3) An appreciation of requirements for national security. The dual roles of citizen/soldier and soldier/citizen are studied.

(b) Participants in either of the programs will acquire relevant knowledge and develop personally. Schools conducting these programs will offer their students the challenge of intellectual inquiry under the direction of instructors who are experienced leaders. (JROTC instructors are active duty or retired members of the US Army. NDCC schools may employ retired or Reserve members.) These programs provide an atmosphere designed to develop the qualities of leadership. Through classroom and other activities, the students will acquire the knowledge, self-discipline, patriotism, sense of responsibility, and responsiveness to constituted authority which will better prepare them for the future. These programs will enable cadets to better serve their country as leaders, as citizens, and in military service should they enter it.

(c) The programs were set up as part of the National Defense Act of 1916. The principle of maintaining national programs of training for the young citizens attending school was validated during congressional hearings preceding passage of the ROTC Vitalization Act of 1964. The JROTC and NDCC are not, of themselves, officer-producing programs but should create favorable attitudes and impressions toward the Services and toward careers in the Armed Forces. JROTC/NDCC cadets may qualify for an advantageous position in the Senior ROTC and for a higher pay grade upon enlistment in a Regular or Reserve component of the Armed Forces.

(d) Participation in JROTC/NDCC does not obligate the student to perform military or any other Federal service. Although all qualified students of JROTC/NDCC host schools are encouraged to take part in these programs, they are not required by Federal law to do so. State, community, or school authorities decree whether students must be in the programs.

§ 542.6 Responsibilities.

(a) *The Commanding General, US Army Military Personnel Center, 200 Stovall Street, Alexandria, VA 22332,* is responsible for administering the Army JROTC/NDCC programs and announcing policy changes.

(b) *The Commanding General, US Army Training and Doctrine Command, Ft. Monroe, VA 23651,* is responsible for managing the JROTC/NDCC except for those functions and responsibilities retained by Headquarters, Department of the Army.

(c) *Region commanders* are responsible for operating and administering the JROTC/NDCC training conducted within their areas.

§ 542.7 Program Information.

(a) The JROTC/NDCC is organized into units at public and private secondary schools. The NDCC differs from the JROTC in that NDCC instructors must be provided by the school. Although these instructors are subject to Army approval, there is no cost-sharing arrangement as exists for JROTC. Also schools or students must provide uniforms, if desired, in the NDCC program. Schools desiring to conduct either program must apply to the region commander of the area in which the school is located. To participate in the program a school must maintain an enrollment in the unit of at least one hundred physically fit students who are at least 14 years of age and meet one of the following accreditation standards:

(1) Be accredited by a nationally recognized accrediting agency.

(2) Be accredited by a State, State educational agency, or State university.

(3) Have attained a preaccreditable status of reasonable assurance subject to attainment and maintenance of a status listed above within 5 years of initial academic enrollment of students.

(b) Students who desire to enroll and continue as a member of the JROTC/NDCC program must:

(1) Be enrolled in and attending full-time a regular course of instruction at a JROTC/NDCC institution.

(2) Be a citizen of the United States.

(3) Be at least 14 years of age.

(4) Meet the physical fitness standards prescribed by the school.

32 CFR Part 562

[AR 145–1]

Senior ROTC Program-Organization, Administration, and Training

AGENCY: Department of the Army, DoD.

ACTION: Final rule.

SUMMARY: The regulation prescribing the policies for administering the Senior Reserve Officers' Training Corps (ROTC) Program has been amended These changes reflect establishment of a new chain of command for internal reorganization within the Department of Army, including transfer of some ROTC functions from The Adjutant General's Office to the U.S. Army Military Personnel Center and others to the U.S. Army Training and Doctrine Command and the ROTC regions, provides for enrollment of female cadets, and lowers the minimum age for enrollment without parental consent.

EFFECTIVE DATE: January 22, 1979.

FOR FURTHER INFORMATION CONTACT: Lieutenant Colonel James P. Hunt, U.S. Army, Chief, Procurement and Accessions Branch, U.S. Army Military Personnel Center, 200 Stovall Street, Alexandria, VA 22332 (202–325–0596).

SUPPLEMENTARY INFORMATION: One comment on the December 21, 1978 proposed rulemaking was received from the National Archives and Records Service. Their suggestions have been incorporated into the final rule. Copies of Army Regulation 145–1 on the Senior ROTC Program may be purchased from the Army. Address your letter with request of cost to: Commander, U.S. Army AG Publications Center, 2800 Eastern Boulevard, Baltimore, Maryland 21220.

Dated: August 20, 1979.

James P. Hunt,

LTC, U.S. Army, Chief, Procurement and Accessions Branch, MILPERCEN.

In consideration of the above, 32 CFR 562 is revised as set forth below:

PART 562—RESERVE OFFICERS' TRAINING CORPS

Sec.

562.1 Purpose.
562.2 Applicability.
562.3 Definitions.
562.4 Objectives.
562.5 Policies.
562.6 Responsibilities.
562.7 Program Information.

Authority: 10 U.S.C. 2101–2111.

§ 562.1 Purpose.

This regulation gives policies for conducting the Army's Senior Reserve Officers' Training Corps (ROTC) Program.

§ 562.2 Applicability.

This regulation applies to the program given at college level institutions and at the college level in military junior colleges.

§ 562.3 Definitions.

The following terms apply to the Army's Senior Reserve Officers' Training Corps Program:

(a) *Academic year.* A period covering two semesters, or the equivalent, in which a student should complete one-fourth of the baccalaureate degree requirements under a 4-year college curriculum, or one-fifth of the requirements under a 5-year curriculum. The vacation period or summer session which follows is not normally included.

(b) *Advanced camp.* The advanced camp training period held on a military installation. This is part of the advanced course and normally attended between Military Science (MS)–III and MS–IV. (The Ranger camp is an acceptable alternate).

(c) *Advanced course.* The Senior ROTC 2–year advanced course of study (MS–III and MS–IV), including advanced camp. This advanced study normally taken by the cadet during his/her junior and senior years in college (freshman and sophomore years in a military junior college (MJC)).

(d) *Basic camp.* The 6-week ROTC training course held at a military installation. This course is normally taken before the applicant's junior academic year. It is a prerequisite to enrollment in the 2-year ROTC program.

(e) *Basic course.* The 2-year senior ROTC basic course (MS–I and MS–II) normally pursued by the cadet during freshman and sophomore years in college.

(f) *Branch material.* Designation of a course of instruction designed to prepare the cadet for appointment as a commissioned officer in a specific branch of the Army. A branch material unit may offer training in one or more specific branches.

(g) *Cadet.* A term applied to each enrolled member of the ROTC program, including alien students in MS–I or MS–II. As a grade of rank, this term applies only to advanced course cadets.

(h) *Four-year Senior ROTC Program.* The 4-year Senior ROTC Program consisting of 4 years of military science (MS–I, –II, –III, and –IV), and ROTC advanced camp.

(i) *General military science (GMS).* A ROTC instruction program to prepare a cadet for appointment as a commissioned officer in any branch of the Army for which he/she is qualified.

(j) *Military science (MS).* The Senior ROTC curriculum which consists of two courses, the basic course (MS–I and MS–II) and the advanced course (MS–III and MS–IV).

(k) *Professor of Military Science (PMS).* The academic and military title of the senior commissioned Army officer assigned to a Senior ROTC unit.

(l) *Region commander.* The commanding general of a U.S. Army ROTC Region who is responsible for the operation, training, and administration of the ROTC program within his/her geographical area. Region commanders are located at:

(1) US Army First ROTC Region, Fort Bragg, NC 28307.

(2) US Army Second ROTC Region, Fort Knox, KY 40121.

(3) US Army Third ROTC Region, Fort Riley, KS 66442.

(4) US Army Fourth ROTC Region, Fort Lewis, WA 98433.

(m) *ROTC ranger camp.* The ranger course conducted by the US Army Infantry School for volunteer cadets. Those selected attend in lieu of advanced camp.

(n) *Two-year ROTC Program.* A Senior ROTC Program of the same status as the 4-year program. It consists of the advanced course, preceded by basic camp as a qualifying step (in lieu of MS–I and MS–II).

§ 562.4 Objectives.

The objectives of the ROTC program are to:

(a) Attract, motivate, and prepare students with potential to serve as commissioned officers in the Regular Army or the US Army Reserve.

(b) Understand the concepts and principles of military art and science.

(c) Develop potential to lead and manage.

(d) Understand other professions.

(e) Develop integrity, honor, and responsibility.

(f) Appreciate the need for national security. Attaining these objectives prepares students for commissions and establishes a basis for future professional development and performance in the Army.

§ 562.5 Policies.

(a) The ROTC draws young men and women from all geographic areas and all strata of our country. It uses the many educational disciplines required for the modern Army. The ROTC ensures that men and women educated in a variety of American schools of higher learning are commissioned annually in the Army officer corps. In the future, the ROTC will continue to be the major source of newly commissioned officers for the Active Army, both Regular Army and Reserve forces. In addition, ROTC provides an advantage both to the Army and institutions of higher learning by assisting in the education of future Army Officers and providing a communication

link between our military leaders and our developing students.

(b) The Army Senior ROTC program is a cooperative effort, contracted between the Army and host institution to provide junior officer leadership in the interest of national security. The Army maintains a cordial and cooperative relationship with host institutions. The Army's goal is to continue to develop well-educated young men and women with potential as leaders in both civilian enterprise and national defense. The Army is receptive to valid criticism, regardless of source, as a means of maintaining a workable program. The right of orderly campus dissent is recognized. However, anti-ROTC activities which degrade and distort the Army image cannot be ignored. Consequently, the Army must look to its institutional hosts to provide campus support for the ROTC program.

(c) The program meets changing educational philosophies and concepts. It gives a flexible course of study in the changing environment of the academic community. A curriculum in the ROTC program is not restricted to classroom teaching. Program objectives may be satisfied in a variety of ways. A program may include a curriculum of other than classroom instruction if: it provides stated learning results, it is adopted by the host institution as part of its curriculum, and it follows the program of instruction published by the US Army Training and Doctrine Command. The PMS has authority, subject to limits set by the region commander, to develop courses that accomplish program objectives of the host institution. Activities which are part of the host school's curriculum require the same degree of support as other elements of the curriculum. The goal of the ROTC program is to commission well-educated young men and women in the Army.

(d) The PMS is responsible to see that each cadet realizes the importance of choice of branch preferences and what is involved in making an intelligent selection. Each graduating cadet by Army policy is assigned to the branch indicated by personal preference, academic major, physical qualifications, ROTC training, and demonstrated abilities, whenever possible. However, the assignment must be made by the needs of the service and may prevent selection based on the other factors. In assigning branches consideration is given to the cadet's academic specialization.

§ 562.6 Responsibilities.

(a) *The Commanding General, US Army Military Personnel Center, 200 Stovall Street, Alexandria, VA 22332,* is the adminstrator of the Department of the Army for ROTC.

(b) *The Commanding General, US Army Training and Doctrine Command, Ft. Monroe, VA 23651,* manages and operates the ROTC program, except for those functions and responsibilities retained by Headquarters, Department of the Army.

(c) *The Professor of Military Science (PMS)* is the key to the success of the ROTC program. He is responsible for setting up the Military Science Program to blend the philosophies of the institution with the needs of the Army.

§ 562.7 Program information.

(a) The Senior ROTC is conducted at military colleges, civilian colleges and universities and military junior colleges. School authorities may apply for a ROTC unit to the region commander of the area in which the school is located or to TRADOC. To be eligible for a unit, the institution must:

(1) Be a 4-year degree granting college or university.

(2) Be accredited by an appropriate regional accrediting association or accredited by a nationally recognized professional accrediting association.

(3) Have an enrollment large enough to ensure that officer production requirements will be met.

(4) Agree to—

(i) Establish a Department of Military Science as an integral academic and administrative department of the institution.

(ii) Adopt as part of the institution's curriculum either the 2- or 4-year program (or both) of the senior ROTC.

(iii) Require each cadet enrolled in any ROTC course to devote the number of hours to military instruction prescribed by the Secretary of the Army.

(iv) Make available for use by the Senior ROTC unit necessary and adequate classrooms, administrative offices, office equipment, storage space, drill field, and other required facilities in a fair and equitable manner in comparison with other departments of the institution (or other elements of the institution, if the institution does not have departments) and to pay the costs of utilities and maintenance thereof.

(v) Grant appropriate academic credit applicable toward graduation for successful completion of courses offered by the Department of Military Science.

(vi) Arrange for the scheduling of military classes to make it equally convenient for students to participate in ROTC as in other courses at the same educational level.

(vii) Include a representative of the Department of Military Science designated by the PMS on all faculty committees whose recommendations would directly affect the Department of Military Science.

(viii) Provide, without expense to the Army, adequate storage and issue facilities for all Government property provided for the ROTC program, when the Army assumes accountability and responsibility for Government property. Adequate facilities will consist of safe, well-lighted, dry, heated, ventilated areas, provided with office space, shelving, bins, clothing racks, and cabinets, as required, and suitable storage space for arms and ammunition. All windows will be securely barred or provided with heavy mesh screen, and doors will be reinforced and fitted with cylinder locks. Such facilities will be separate and apart from those occupied by any other department of the institution or other Government agency. Determination will be made by the region commander as to adequacy, safety, and satisfactory nature of storage and issue facilities.

(5) produce a minimum annual average of 15 qualified commissioned officers from each 4-year senior division unit or a combination of a 4- and 2-year senior division unit; or a minimum annual average of 10 qualified officers from each 2-year senior division unit.

(6) Comply with the following requirements:

(i) There will be no discrimination with respect to admission to the institution or subsequent treatment of students on the basis of race, color, or national origin.

(ii) The senior commissioned officer of the ROTC unit at the institution will be given the academic rank of Professor.

(b) Institutional authorities may, subject to approval of Department of the Army, elect to—

(1) Administer a GMS unit or a branch material unit. Their preference will be given consideration, but the type of unit approved for establishment will be determined on the basis of the needs of the Army.

(2) Administer the 4-year or the 2-year ROTC program, or both.

(3) Maintain accountability and responsibility for Government property issued for the ROTC program by complying with the following requirements or apply for relief therefrom.

(i) Appoint an officer of the institution as military property custodian who will be empowered to requisition, receive, stock, and account for Government property issued to the institution, and otherwise transact matter pertaining thereto for and in behalf of the institution.

(ii) Conform to the regulations of the Secretary of the Army relating to issue, care, use, safekeeping turn-in and accounting for such Government property as may be issued to the institution.

(iii) Comply with the provisions of law and regulations of the Secretary of the Army pertaining to the furnishing of a bond to cover the value of all Government property issued to the institutions, except uniforms, expendable articles, and supplies expendable in operation, maintenance, and instruction.

(c) Students desiring enrollment in a unit must:

(1) Be enrolled in and attending fulltime a regular course of instruction at a school participating in the program.

(2) Be a citizen of the United States.

(3) Be at least 17 years of age.

(4) Be physically capable of participating in the program.

BILLING CODE 3710-08-M

POSTAL SERVICE

39 CFR Parts 261, 262, 264

Records and Information Management Program; Technical Modifications

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This document describes a number of technical modifications to the regulations which define the Postal Service policy for its Records and Information Management Program. No change in policy is reflected by these modifications.

EFFECTIVE DATE: August 31, 1979.

ADDRESS: Records Officer, U. S. Postal Service, Washington, DC 20260.

FOR FURTHER INFORMATION CONTACT: A. Scott Hamel, 202-245-4142.

SUPPLEMENTARY INFORMATION: With the increasing emphasis being placed by the Federal Government on the entire area of records and information management, and with the maturation of the Postal Service's Records Program, it has become necessary to make several minor technical modifications in its supporting regulations. These modifications do not reflect any changes in Postal Service policy regarding the subject.

The modifications to Part 261—Records and Information Management—reflect the new location of the Records Officer under the Senior Assistant Postmaster General, Finance Group, and more clearly define his authority and responsibility. Subsection 261.3(c) remains as USPS policy, however, since it is a specific policy rather than a broad policy as is defined in .3(a) and (b), it is being deleted for sake of consistency.

The technical modifications to Part 262—Records and Information Management Definitions and Part 264—Vital Records—are being made to more completely and accurately define the basic elements of and responsibilities for the Program. These changes reflect the manner in which the Program is being administered on a daily basis.

Accordingly, 39 CFR is amended as set forth below:

1. Strike out the heading immediately preceding Part 261, which reads "Release of Information" and insert in its place "Records and Information".

Records and Information

PART 261—RECORDS AND INFORMATION MANAGEMENT

2. Delete § 261.3(c) and revise § 261.2(b) and § 261.4(a) to read as follows:

§ 261.2 Authority.

* * * * *

(b) 39 CFR 224.3(b) assigns to the Postal Service Records Officer, located under the Senior Assistant Postmaster General, Finance Group, responsibility for the retention security and privacy of Postal Service records and the power to authorize the disclosure of such records and to order their disposal by destruction or transfer. Included is the authority to issue records management policy and to delegate or take appropriate action if that policy is not adhered to or if questions of interpretation of procedure arise.

§ 261.3 Policy.

* * * * *

(c) [Deleted]

§ 261.4 Responsibility.

(a) The Records Officer administers the Postal Service Records and Information Management Program through a Headquarters organizational component, Regional Records Control Officers, representatives assigned by each Headquarters department, and contacts in each district, data processing center and other major Postal Service installation.

* * * * *

PART 262—RECORDS AND INFORMATION MANAGEMENT DEFINITIONS

3. Revise § 262.1, § 262.2(a)(3), § 262.2(a)(4), § 262.4, § 262.6 and § 262.7 as follows:

§ 262.1 Custodian.

The postmaster or other head of a facility such as a postal data center, mailbag depository, management sectional center, district office or Regional Headquarters, or a group or department of Headquarters, who maintains USPS records. Senior medical personnel are the custodians of medical records maintained within medical facilities.

§ 262.2 Records.

* * * * *

(a) * * *

(3) *Permanent Records.* Those records determined by the USPS Records Officer or the National Archives and Records Service of the General Services Administration as having sufficient historical or other value to warrant continued preservation by the Government. (All other records are considered temporary and must be scheduled for disposal.)

(4) *Vital Records.* Records which must be available in order to ensure the continuity of Postal Service operations and the preservation of the rights and interests of the Postal Service, its employees, contractors and customers.

(i) *Emergency Operating Records.* Copies of records necessary to support the essential functions of the Postal Service during and immediately following a national emergency.

(ii) *Rights and Interests Records.* Records maintained to ensure the preservation of the rights and interests of the Postal Service, its employees, contractors and customers.

* * * * *

§ 262.4 Information.

A combination of data which has the potential to serve a useful purpose.

(a) Sensitive Information (does *not* include National Security Information)—

(1) *Critical Information.* That information which must be available in order that the Postal Service effectively perform its mission and meet legally assigned responsibilities; and, for which special precautions are taken to insure its accuracy, relevance, timeliness, and completeness. (This information, if lost, would cause significant financial loss, inconvenience, or delay in performance of the USPS mission.)

(2) *Restricted Information.* Any information which has limitations placed upon its internal or external disclosure: exists as one of two categories:

(i) *Restricted-Mandatory*—that information which can be disclosed only in accordance with an Executive Order, public law or other Federal statute and their supporting postal regulations.

(ii) *Restricted-Discretionary*—that information which may be withheld from disclosure solely in accordance with postal regulations, consistent with the Freedom of Information Act.

(b) *National Security Information.* Information on the national defense and foreign relations of the United States that has been determined under Executive Order 12065, National Security Information, or prior Orders, to require protection against unauthorized disclosure and has been so designated.

* * * * *

§ 262.6 Privacy Act System of Records.

A system which contains information about individuals, including mailing lists, from which information is retrieved by the name of an individual or by some identifying number or symbol assigned to the individual, such as a social security number. ("Individual" in this context does not include proprietorships, businesses, or corporations, which are not covered by the Privacy Act.)

§ 262.7 Information System Executive.

The Postal Service official who prescribes the existence of and the policies for an information system.

PART 264—VITAL RECORDS

4. Revise § 264.1, § 264.2, § 264.3 and § 264.4 as follows:

§ 264.1 Purpose and scope.

Certain records are critical to the continuity of Postal Service operations or to the preservation of the rights and interests of the Postal Service, its employees, contractors or customers. To ensure that these records are available when needed, specific controls are required which affect all organizational components having the custody of records defined as being "vital."

§ 264.2 Policy.

It is the policy of the United States Postal Service to ensure the availability of all records considered critical to the continuity of its operations and the preservation of the rights and interests of the Postal Service, its employees, contractors, and customers. Vital records shall be routinely maintained at predesignated off-site locations to ensure their availability when needed by management and operating personnel.

§ 264.3 Responsibility.

(a) *Records Officer.* The Records Officer is responsible for categorizing records as vital. The Records Officer shall establish and maintain the vital records program, insofar as rights and interests records are concerned, and shall ensure compliance with supportive procedures.

(b) *Chief Postal Inspector.* As the Postal Service's Emergency Coordinator, the Chief Postal Inspector (with the assistance of Headquarters and Regional Emergency Coordinating Committees and the advice of the USPS Records Officer) shall establish and maintain a program to ensure that emergency operating records are available at predesignated off-site locations for use during a national emergency.

(c) *Custodians.* Custodians are responsible for following vital records program procedures including the forwarding of vital records to predesignated off-site locations.

§ 264.4 Vital Records Program.

Complete procedures concerning the identification, categorization, processing, protection, and transfer of vital records are provided by the USPS Records Officer or the USPS Emergency Coordinator, as appropriate.

(39 U.S.C. 401)

W. Allen Sanders,

Acting Deputy General Counsel.

BILLING CODE 7710-12-M

39 CFR Part 267

National Security Information Policy and Guidelines; Implementing Regulations

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: Executive Order 12065, 43 FR 28949, relating to national security information, requires that implementing regulations establishing agency national security information policy and guidelines be published in the **Federal Register**. Consequently, this notice adopts a new § 267.5 of 39 CFR and corresponding technical modifications to existing § 267.2 in compliance with the Order.

EFFECTIVE DATE: August 31, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. A. Scott Hamel, (202) 245-4142.

Accordingly, 39 CFR is amended as follows:

In Part 267, revise § 267.2 and add new § 267.5 to read as follows:

PART 267—PROTECTION OF INFORMATION

§ 267.2 Policy.

Consistent with the responsibility of the Postal Service to make its official records available to the public to the maximum extent required by the public interest, and to ensure the security, confidentiality, and integrity of official records containing sensitive or national security information, it is the policy of the Postal Service to maintain definitive and uniform information security safeguards. These safeguards will have as their purpose: (a) Ensuring the effective operation of the Postal Service through appropriate controls over critical information, and (b) Protecting personal privacy, the public interest, and the national security by limiting unauthorized access to both restricted and national security information.

§ 267.5 National Security Information.

(a) *Purpose and Scope.* The purpose of this section is to provide regulations implementing the requirements in Executive Order 12065, National Security Information (hereinafter referred to as the Executive Order), which deals with the protection, handling and classification of national security information in the custody of the Postal Service.

(b) *Definitions.* (1) In this section, "National Security Information" means information on the national defense and foreign relations of the United States that has been determined under the Executive Order or prior Orders to require protection against unauthorized disclosure and has been so designated.

(2) "Derivative Classification" means the carrying forward of a classification from one document to a newly created document that contains national security information which is in substance the same as information that is currently classified.

(3) "In the Custody of the Postal Service" means any national security information transmitted to and held by the U.S. Postal Service for the information and use of postal officials. (This does not include any national security information being transmitted via the U.S. Mail to or from a non-postal organization.)

(c) *Responsibility and authority.* (1) The Postal Service Records Officer shall serve as the USPS National Security Information Oversight Officer. This officer shall:

(i) Conduct an active oversight program to ensure that the appropriate provisions of the Executive Order are complied with;

(ii) Chair a committee composed of the Records Officer, the Chief Postal Inspector (USPS Security Officer), the General Counsel, the Executive Assistant to the Postmaster General, and the Assistant Postmaster General, Mail Processing Department, or their designees, with authority to act on all suggestions and complaints concerning the Postal Service's compliance with the Executive Order;

(iii) Ensure that appropriate and prompt corrective action is taken whenever a postal employee knowingly, willfully and without authorization:

(A) Discloses national security information properly classified under the Executive Order, or prior Orders,

(B) Compromises properly classified information through negligence, or

(C) Violates any provisions of the Executive Order or its implementing regulations or procedures;

(iv) In conjunction with the USPS Security Officer, prepare and issue instructions for the control, protection, and derivative classification of national security information in the custody of, and use by, the Postal Service. These instructions shall include requirements that:

(A) A demonstrable need for access to national security information is established before requesting the initiation of administrative clearance procedures,

(B) Ensure that the number of people granted access to national security information is reduced to and maintained at the minimum number consistent with operational requirements and needs;

(v) Establish, staff and direct activities for controlling documents containing national security information at USPS Headquarters and provide functional direction to each Regional Records Control Officer;

(vi) As part of the overall program implementation, develop a training program to familiarize appropriate postal employees of the requirements for control, protection and classification; and

(vii) Report to the USPS Security Officer any incidents of possible loss or compromise of national security information.

(2) The USPS Security Officer (the Chief Postal Inspector) shall:

(i) Provide technical guidance to the USPS Records Officer in implementing the national security information program;

(ii) Conduct investigations into reported program violations or loss or possible compromise of national security information and report any actual loss or compromise to the originating agency;

(iii) Periodically conduct an audit of the USPS national security information program;

(iv) Process requests for sensitive clearances; conduct the appropriate investigations and grant or deny a sensitive clearance to postal employees having an official "need to know" national security information; and

(v) Report to the Attorney General any evidence involving national security information of possible violations of federal criminal law by a USPS employee and of possible violations by any other person of those federal criminal laws specified in guidelines adopted by the Attorney General.

(3) All postal employees who have access to national security information shall:

(i) Be familiar with and follow all Program regulations and instructions;

(ii) Actively protect and be accountable for all national security information entrusted to their care; and

(iii) Immediately report to the USPS Records Officer and the USPS Security Officer any suspected or actual loss or compromise of national security information.

(d) *Derivative classification.* When applying derivative classifications to documents created by the Postal Service, the Postal Service shall:

(1) Respect original classification decisions;

(2) Verify the information's current level of classification so far as practicable before applying the markings; and

(3) Carry forward to any newly created documents the assigned dates or events for declassification or review and any additional authorized markings in accordance with section 2 of the Executive Order.

(e) *General provisions*—(1) *Dissemination.* Except to the extent consistent with Section 102 of the National Security Act of 1947, 61 Stat. 495, 50 U.S.C. 403 (1970 and Supp. V 1975), national security information received by the U.S. Postal Service shall not be further disseminated to any other agency without the consent of the originating agency.

(2) *Disposal.* Classified documents no longer needed by the Postal Service shall be either properly destroyed or returned to the originating agency.

(3) *Freedom of Information Act or Mandatory Review Requests.* (i) In response to a mandatory review request or a request for a document made under the Freedom of Information Act (FOIA), the Postal Service shall not refuse to confirm the existence or non-existence of the document, unless the fact of its existence or non-existence would itself be classifiable.

(ii) The Postal Service shall forward all FOIA and mandatory review requests for national security information in its custody (including that within records derivatively classified by the USPS) to the originating agency for review unless the agency objects on the grounds that its association with the information requires protection. The requester shall be notified that:

(A) The request was referred, and

(B) The originating agency will provide a direct response.

(4) *Research requests.* Requests from historical researchers for access to national security information shall be referred to the originating agency.

(39 U.S.C. 401)

W. Allen Sanders,

Acting Deputy General Counsel.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[FRL 1231-3]

Standards of Performance for New Stationary Sources: Asphalt Concrete; Review of Standards

AGENCY: Environmental Protection Agency (EPA)

ACTION: Review of Standards.

SUMMARY: EPA has reviewed the standard of performance for asphalt concrete plants (40 CFR 60.9, Subpart I). The review is required under the Clean Air Act, as amended August 1977. The purpose of this notice is to announce EPA's intent not to undertake revision of the standards at this time.

DATES: Comments must be received by October 29, 1979.

ADDRESS: Comments should be submitted to the Central Docket Section (A-130), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Attention: Docket No. A-79-04.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Ajax, telephone: (919) 541-5271. The document "A Review of Standards of Performance for New Stationary Sources—Asphalt Concrete" (EPA-450/3-79-014) is available upon request from Mr. Robert Ajax (MD-13), Emission Standards and Engineering Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION:

Background

In June 1973, EPA proposed a standard under Section 111 of the Clean Air Act to control particulate matter emissions from asphalt concrete plants. The standard, promulgated on March 8, 1974, limits the discharge of particulate matter into the atmosphere to a maximum of 90 mg/dscm from any affected facility. The standard also limits the opacity of emissions to 20 percent. The standard is applicable to asphalt concrete plants which commenced construction or modification after June 11, 1973.

The Clean Air Act Amendments of 1977 require that the Administrator of the EPA review and, if appropriate, revise established standards of performance for new stationary sources at least every 4 years [Section 111(b)(1)(B)]. Following adoption of the Amendments, EPA contracted with the MITRE Corporation to undertake a review of the asphalt concrete industry and the current standard. The MITRE review was completed in January 1979. Preliminary findings were presented to and reviewed by the National Air Pollution Control Techniques Advisory Committee at its meeting in Alexandria, Virginia, on January 10, 1979. This notice announces EPA's decision regarding the need for revision of the standard. Comments on the results of this review and on EPA's decision are invited.

Findings

Overview of the Asphalt Concrete Industry

The asphalt concrete industry consists of about 4,500 plants, widely dispersed throughout the Nation. Plants are stationary (60 percent), mobile (20 percent), or transportable (20 percent), i.e., easily taken down, moved and reassembled. Types of plants include batch-mix (91 percent), continuous mix (6.5 percent), or dryer-drum mix (2.5 percent). The dryer-drum plants, which are becoming increasingly popular, differ from the others in that drying of the aggregate and mixing with the liquid asphalt both take place in the same rotary dryer. It is estimated that within the next few years, dryer-drum plants will represent up to 85 percent of all plants under construction.

Current national production is about 263 to 272 million metric tons (MG)/year, with a continued rise expected in the future. It is estimated that approximately 100 new and 50 modified plants become subject to the standard each year. Operation is seasonal, with plants reportedly averaging 666 hours/year although many operate more extensively.

Particulate Matter Emissions and Control Technology

The largest source of particulate emissions is the rotary dryer. Both dry (fabric filters) and wet (scrubbers) collectors are used for control and are both capable of achieving compliance with the standard. However, all systems of these types have not automatically achieved control at or below the level of the standard.

Based on data from a total of 72 compliance tests, it was found that 53 or about three-fourths of the tests for particulate emissions showed compliance. Thirty-three of the 53 produced results between 45 and 90 Mg^3/dscm (.02 and .04 gr/dscf). Of the 47 tests of fabric filters or venturi scrubber controlled sources over 80 percent showed compliance. The available data do not provide details on equipment design and an analysis of the cause of failures has not been performed. However, EPA is not aware of any instances in which a properly designed and installed fabric filter system or high-efficiency scrubber has failed to achieve compliance with the standard. The fact that certian facilities controlled by fabric filters and high-efficiency scrubbers have failed to comply is attributed to faulty design, installation, and/or operation. This conclusion and these data are consistent with data and findings considered in the development of the present standard.

On the basis of these findings, EPA concludes that the present standard for particulate matter is appropriate and that no revision is needed.

Much less test data are available for opacity than for particulates. Of the 26 tests for which opacity levels are reported, only 5 failed to show compliance with the opacity standard. However, none of these 5 met the standard for particulate matter. Of the 21 plants reported as meeting the current standard for opacity, 19 met the particulate standard. On the basis of these data, EPA concludes that the opacity standard is appropriate and should not be revised. While the data do indicate that a tighter standard may be possible, the rationale and basis used to establish the present standard are considered to remain valid.

Enforcement of the Standard

Because the cost of performance tests which are required to demonstrate compliance with the standard are essentially fixed and are independent of plant size, this cost is disproportionately high for small plants. Due to this, the issue was raised as to whether formal testing could be waived and lower cost, alternative means be established for determining compliance at small plants. Support for such a waiver can be found in the fact that emission rates are generally lower at these plants and errors in compliance determinations would not be large in terms of absolute emissions. However, testing costs at all sizes of plants are small in relation to the cost of asphalt concrete production over an extended period and these costs can be viewed as a legitimate expense to be considered by an owner at the time a decision to construct is made. A number of State agencies presently require, under SIP regulations, initial and in some cases annual testing of asphalt concrete plants. Moreover, available compliance test data show that performance of control devices is variable and even with installation of accepted best available control technology the standard can be exceeded by a significant degree if the control system is not properly designed, operated, and maintained. Relaxing the requirement for formal testing thus could lead to a proliferation of low quality or marginal control equipment which would require costly repair or retrofit at a later time.

A further performance testing problem indentified in the review of the standard concerns operation at less than full production capacity during a compliance test. When this occurs, EPA normally accepts the test result as a demonstration of compliance at the tested production rate, plus 23 Mg (25 tons)/hr. To operate at a higher production rate, an owner or operator must demonstrate compliance by testing at that higher rate. Industry representatives view this limitation as an unfair production penalty. It is noted in particular that reduced production is sometimes an unavoidable consequence associated with use of high moisture content aggregate. Furthermore, it is argued that facilities which show compliance at the maximum production rate associated with a given moisture level can be assumed to comply at higher production rates when moisture is lower. However, this argument assumes that the uncontrolled emission rate from the facility does not increase as production rate increases and EPA is not aware of data to support this assumption.

As a general policy it is EPA's intent to minimize administrative costs imposed on owners and operators by a standard, to the maximum extent that this can be done without sacrificing the Agency's responsibility for assuring compliance. Specifically, in the cases cited above, EPA does not intend to impose costly testing requirements on small facilities or any facilities if compliance with the standard can be determined through less costly means. However, EPA at this time is not aware of a procedure which could be employed at a significantly lower cost to determine compliance with an acceptable degree of accuracy. Although opacity correlaters with grain loading and serves as a valid means for identifying excess emissions, due to dependence on stack diameter and other factors opacity alone is not adequate to accurately assess compliance with the mass rate standard. Similarly, the purchase and installation of a baghouse or venturi scrubber does not in itself necessarily imply compliance. EPA is concerned that approval of such equipment without compliance test data or a detailed assessment of design and operating factors would provide an incentive for installation of low cost, under-designed equipment. This would place vendors of more costly systems which are well designed and properly constructed and operated at a competitive disadvantage; in the long term this would not only increase emissions but would be to the detriment of the industry.

EPA has, however, concluded that a study program to investigate alternative compliance test and administrative approaches for asphalt plants is needed. An EPA contractor working for the Office of Enforcement has initiated a study designed to assess several administrative aspects of the standard, including possible low cost alternative test methods; administrative mechanisms to deal with the problem of process variability during testing; and physical constraints affecting the ability to perform tests. If the results of this program, which is scheduled to be completed later in 1979, show that the regulations or enforcement policies can be revised to lower costs, such revisions will be adopted.

Hydrocarbon Emissions

While the principal pollutant associated with asphalt concrete production is particulate matter, the trend noted previously toward dryer-drum mix plants has raised question as to the significance of hydrocarbon emissions from these facilities. In the dryer-drum mix plant, drying of the aggregate as well as mixing with asphalt and additional fines takes place within a rotary drum. Because the drying takes place within the same container as the mixing, emissions are partly screened by the curtain of asphalt added so that the uncontrolled particulate emissions from the dryer are lower than from conventional plants. In contrast, it has been reported that the rate of hydrocarbon emissions may be substantially higher than from conventional plants. However, data recently reported from one test in a plant equipped with fabric filters showed only traces of hydrocarbons in dust and condensate and did not support this suggestion. Thus, while these data do not indicate a need to revise the standard, more definitive data are needed on hydrocarbon emission rates and related process variables. This has been identified as an area for further research by EPA.

An additional source of hydrocarbon emissions in the asphalt industry is the use of cutback asphalts. Although not directly associated with asphalt concrete plants, this represents a significant source of hydrocarbon emissions. As such, the need for possible standards of performance pertaining to use of cutback asphalt was rasied in this review. The term cutback asphalt refers to liquified asphalt products which are diluted or cutback by kerosene or other petroleum distillates for use as a surfacing material. Cutback asphalt emits significant quantities of hydrocarbons—at a high rate immediately after application and continuing at a diminishing rate over a period of years. It is estimated that over 2 percent of national hydrocarbon emissions result from use of cutback asphalt.

The substitution of emulsified asphalts, which consist of asphalt suspended in water containing an emulsifying agent, for cutback asphalt nearly eliminates the release of volatile hydrocarbons from paving operations. This substitute for petroleum distillate is approximately 98 percent water and 2 percent emulsifiers. The water in emulsified asphalt evaporates during curing while the non-volatile emulsifier is retained in the asphalt.

Because cutback asphalt emissions result from the use of a product rather than from a conventional stationary source, the feasibility of a standard of performance is unclear and the Agency has no current plans to develop such a standard. However, EPA has issued a control techniques guideline document, *Control of Volatile Organic Compounds from Use of Cutback Asphalt* (EPA–450/2–77–037) and is actively pursuing control through the State Implementation Plan process in areas where control is needed to attain oxidant standards. Because of area-to-area differences in experience with emulsified asphalt, availability of suppliers, and ambient temperatures, the Agency believes that control can be implemented effectively by the States.

Asphalt Recycling Plants

A process for recycling asphalt paving by crushing up old road beds for reprocessing through direct-fired asphalt concrete plants has been recently implemented on an experimental basis. Plants using this process, which uses approximately 20 to 30 percent virgin material mixed with the recycled asphalt, are subject to the standard and at least two have demonstrated compliance. However, preliminary indications are that the process may have difficulty in routinely attaining the allowable level of particulate emissions and/or that the cost of control may be higher than a conventional process. The partial combustion of the recycled asphalt cement reportedly produces a blue smoke more difficult to control than the mineral dusts of plants using virgin material.

It is EPA's conclusion that there is no need at this time to revise the standard as it affects recycling, due to its limited practice and due to the data showing that compliance can be achieved at facilities which recycle asphalt. However, this matter is being studies further under the previously noted study by an EPA contractor.

Educational Program for Owners and Operators

The asphalt industry consists of a large number of facilities which in many cases are owned and operated by small businessmen who are not trained or experienced in the operation, design, or maintenance of air pollution control equipment. Because of this, the need to comply with emission regulations, and the changing technology in the industry (i.e., the introduction of dryer-drum plants, recycling, the possible move toward coal as a fuel, and the use of emulsions), the need for a training and educational program for owners and operators in the operation and maintenance of air pollution control equipment has been voiced by industry. This offers the potential for cost and energy savings along with reduced pollution.

To meet this need, EPA's Office of Enforcement, in cooperation with the National Asphalt Paving Association, conducted a series of workshops in 1978 for asphalt plant owners and operators. Only limited future workshops are currently planned. However, EPA will consider expansion of the programs if a continued need exists.

Dated: August 23, 1979.

Douglas Costle,

Administrator

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FI-5147]

Final Flood Elevation Determinations for the City of Martinsville, Va.; Cancellation

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Cancellation of final rule.

SUMMARY: The Federal Insurance Administration has erroneously published at 44 FR 41458 on July 17, 1979, the final flood elevation determination for the City of Martinsville, Virginia. This notice will serve as a cancellation of that publication. A new notice of flood elevation determination at a later date.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, Assistant Administrator, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872, (In Alaska and Hawaii call Toll Free Line (800) 424-9080), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

Issued: August 15, 1979.

BILLING CODE 4210-23-M

44 CFR Part 67

[Docket No. FI-4955]

Final Flood Elevation Determination for the City of Sartell, Stearns County, Minn.

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Sartell, Stearns County, Minnesota.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of Sartell, Stearns County, Minnesota.

ADDRESSES: Maps and other information showing the detailed outlines of the flood prone areas and the final elevations for the City of Sartell are available for review at the Sartell City Hall, 2nd Street South, Sartell, Minnesota.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or toll free line (800) 424-8872, (In Alaska and Hawaii call toll free (800-424-9080), room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determination of flood elevations for the City of Sartell, Stearns County, Minnesota.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87, Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mississippi River	Downstream corporate limits	1000
	Just downstream of St. Regis Dam.	1004
	Just upstream of St. Regis Dam.	1019
	Upstream corporate limits	1020
Watab River	200 feet upstream Riverside Avenue.	1004
	900 feet upstream of Riverside Avenue.	1010
	2300 feet upstream of Riverside Avenue.	1018
	Upstream corporate limits	1022

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1978), as amended; (42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963).)

Issued: August 13, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 79-27076 Filed 8-30-79; 8:45 am]

BILLING CODE 4210-23-M

OFFICE OF PERSONNEL MANAGEMENT

45 CFR Part 801

Voting Rights Program; Appendix A: Mississippi

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: Reorganization Plan No. 2 of 1978 and the Civil Service Reform Act of 1978 created the Office of Personnel Management, vesting in it most of the functions of the U.S. Civil Service Commission (44 FR 1501). These regulations redesignate Chapter VIII as "Office of Personnel Management".

The Attorney General has designated Covington and Greene Counties, Mississippi, as coming within the provisions of the Voting Rights Act of 1965, as amended. These regulations add these counties to Appendix A of this Part, under "Dates, Times and Places" for filing in Mississippi.

EFFECTIVE DATE: August 3, 1979.

FOR FURTHER INFORMATION CONTACT:
Mr. Ritchey P. Williams, Jr., Acting Coordinator, Voting Rights Program, Office of Personnel Management, Washington, D.C. 20415, 202-632-6140.

SUPPLEMENTARY INFORMATION: The Attorney General has designated additional counties as coming under the provisions of the Voting Rights Act of 1965, as amended, in the primary election on August 7, 1979. This designation requires Federal observers (under the administrative direction of the Office of Personnel Management) to be on site, in the specified county, to monitor the election. This designation also requires the Office of Personnel Management to identify the location of a new office for the filing of applications or complaints under the Voting Rights Act of 1965, as amended.

Office of Personnel Management.

Beverly M. Jones,

Issuance Systems Manager.

Accordingly, the Office of Personnel Management is revising 45 CFR, Chapter VIII as follows:

(1) Chapter VIII of title 45, Code of Federal Regulations, is redesignated to read as follows:

Chapter VIII—Office of Personnel Management

PART 801—VOTING RIGHTS PROGRAM

Appendix A [Amended]

(2) Appendix A to 45 CFR Part 801 is amended to show two additional places under the heading "Dates, Times and Places" for filing in Mississippi, as follows:

Mississippi

County; Place for filing; Beginning date

* * * * *

Covington; Collins—McLauren Building, FHA Conference Room; August 10, 1979.

Greene; Leakesville—FHA Conference Room, New Bank Annex, Main and Lafayette Street; August 10, 1979.

(5 U.S.C. 1103,; Secs. 7, 9, 79 Stat. 440, 441 (42 U.S.C. 1973c, 1973g).)

BILLING CODE 6325-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 32

Opening of Browns Park National Wildlife Refuge, Colorado, to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Browns Park National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Cottontail rabbit season, September 8, 1979, through February 29, 1980, inclusive.

FOR FURTHER INFORMATION CONTACT:
Refuge Manager, Browns Park National Wildlife Refuge, Greystone Route, Maybell, Colorado 81640, telephone: 303-365-3695.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of cottontail rabbits is permitted on the Browns Park National Wildlife Refuge, Colorado, except in those areas designated by signs as closed to hunting. These areas are delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, 1311 Federal Building, 125 South State Street, Salt Lake City, Utah 84138. Upland game hunting shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Note.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purpose for which the Browns Park National Wildlife Refuge was established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

James A. Creasy,

Refuge Manager, Browns Park National Wildlife Refuge, Maybell, Colorado.

Proposed Rules

Federal Register
Vol. 44, No. 171
Friday, August 31, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 933]

[Docket No. AO-383]

Ruby Seedless Grapes Grown in California; Termination of Proceeding AO-383

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Termination.

SUMMARY: This document terminates proceedings with respect to a proposed marketing order program because it was not favored by the required two-thirds majority of growers voting in the referendum, either by number of producers or the volume of production they represented. The proposal had been requested by the "Proponents for Ruby Seedless Marketing Order" on behalf of producers and handlers of Ruby Seedless grapes grown in California. The proposed marketing order would have: Established a committee of growers for local administration, authorized grade, size, quality, maturity, pack, and container regulations; and allowed the committee to engage in production and marketing research and development projects financed by handler assessments.

EFFECTIVE DATE: August 31, 1979.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, (202) 447-5975.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing—Issued November 24, 1978; published November 30, 1978 (43 FR 56045); Notice of Recommended Decision—Issued June 11, 1979; published June 14, 1979 (44 FR 34135); and Final Decision—Issued July 30, 1979; published August 2, 1979 (44 FR 45400).

Preliminary Statement

A public hearing was held upon the proposed marketing agreement and order (hereinafter referred to collectively as the "order") regulating the handling of Ruby Seedless grapes grown in California. The hearing was held at Reedley, California, on February 1–2, 1979, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable procedure specified in 7 CFR Part 900.

The recommended decision of the Deputy Administrator, Marketing Program Operations, Agricultural Marketing Service, was published on June 14, 1979 (44 FR 34135). On August 2, 1979 (44 FR 45400) the final decision of the Assistant Secretary for Marketing and Transportation Services was published and directed that a referendum be conducted among producers of Ruby Seedless grapes in the production area to determine whether the required percentage of producers favored issuance of the proposed order.

It is hereby determined on the basis of the referendum, conducted August 14–15, 1979, that the proposed order failed to get the required two-thirds favorable producer vote and therefore the proposed order should not be made effective.

Accordingly, the proceeding with respect to the proposed order is hereby terminated.

Signed at Washington, D.C., on August 28, 1979.

P. R. "Bobby" Smith,
Assistant Secretary for Marketing and Transportation Services.

[FR Doc. 79-27338 Filed 8-30-79; 8:45 am]
BILLING CODE 3410-02-M

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1700]

Proposed Exemptions from Child-Resistant Packaging Requirements; Acetaminophen Preparations

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to exempt powdered and effervescent acetaminophen preparations from its regulation, under the Poison Prevention Packaging Act of 1970, that will require child-resistant packaging for any acetaminophen preparation in a dosage form intended for oral administration that contains a total amount of more than one gram of acetaminophen in a single package. The exemptions are proposed because special packaging may not be required to protect children under 5 years of age from serious personal injury and serious illness resulting from ingesting such substances.

DATES: Written comments should be submitted on or before October 30, 1979

The exemption is proposed to be effective upon publication of the final exemption in the **Federal Register.**

ADDRESSES: Written comments should be submitted to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. All material which the Commission has that is relevant to this proceeding, including any comments that may be received on this proposal, may be seen in, or copies obtained from, the Office of the Secretary, Consumer Product Safety Commission, Third Floor 1111 18th Street, NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Fred J. Marozzi, Ph.D., Division of Safety Packaging and Scientific Coordination, Directorate for Engineering and Sciences, Consumer Product Safety Commission, Washington, D.C. 20207 (301) 492-6477.

SUPPLEMENTARY INFORMATION:

Background

The Poison Prevention Packaging Act of 1970 (the "PPPA," 15 U.S.C. 1471–1476) authorizes the Commission to establish standards for the "special packaging" of any household substance if (1) the degree or nature of the hazard to children in the availability of such substance, by reason of its packaging, is such that special packaging is required to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting such substance and (2) the special packaging is technically feasible, practicable, and appropriate for such substance. Special packaging is often referred to as "child-resistant packaging" and is defined as packaging that is (1) designed or constructed to be significantly difficult for children under five years of age to open or obtain a toxic or harmful amount of the substance contained therein within a reasonable time and (2) not difficult for normal adults to use

properly. (It does not mean, however, packaging which all such children cannot open, or obtain a toxic or harmful amount from, within a reasonable time.) Under the PPPA, effectiveness standards have been established for special packaging (16 CFR 1700.15), as has a procedure for evaluating the effectiveness (§ 1700.20). Regulations have been issued requiring special packaging for a number of household products (§ 1700.14).

Elsewhere in this issue of the **Federal Register** the Commission has issued a requirement, under the Poison Prevention Packaging Act of 1970, that will require all preparations for human use in a dosage form intended for oral administration and containing in a single package a total of more than one gram of acetaminophen to be packaged in special packaging (§ 1700.14(a)(16) of Title 16 of the Code of Federal Regulations). This requirement will become effective February 27, 1980, for all acetaminophen products packaged after that date. Acetaminophen is an analgesic and antipyretic which is widely used as a substitute for aspirin. Although acetaminophen is safe and effective when taken in its proper dose, and is also valuable for those individuals who are sensitive or allergic to aspirin, ingestion of large amounts of acetaminophen can cause serious toxic effects.

Liver damage and deterioration of liver function are the major toxic effects of ingestion of large amounts of acetaminophen. A detailed discussion of the Commission's reasons for requiring acetaminophen preparations to be in special packaging is contained in the notice that issues the requirement.

Several of the comments that were received after the acetaminophen special packaging requirement was proposed suggested that certain products should be exempted from the requirement. Two of these exemption requests, for powdered and effervescent acetaminophen preparations, were deemed by the Commission to have sufficient merit to warrant proposal of the exemptions, and the Commission stayed the effective date of the requirement as to these products. These products are discussed separately below.

Requests for Exemptions

Exemption for effervescent formulations. Warner-Lambert Company requested that the regulation exempt effervescent formulations, which are those in which the presence of moisture causes the rapid liberation of carbon dioxide. The company contends that the exemption should be granted because:

1. In the granular form, such products are difficult for children to ingest or consume.
2. Effervescence while the product is on the tongue is markedly unpleasant.
3. The volume of foam and carbon dioxide that is producted when the product is ingested in undissolved form tends to produce gagging.
4. In undissolved form, the products have an objectionable salty taste.
5. It is possible for nausea and vomiting to be caused by the products' salinity.

Warner-Lambert notes that the Commission has previously exempted effervescent aspirin tablets from the regulation that requires child-resistant packaging for aspirin (16 CFR 1700.14(a)(1)(i)). This exemption for aspirin is limited to tablets with less than 10% of aspirin and an oral median lethal dose (LD–50) of greater than 5 grams per kilogram of body weight and contains a requirement that the tablet produce at least a specified amount of carbon dioxide when placed in water.

The limitation requiring the release of a minimum amount of carbon dioxide (85 ml of carbon dioxide when a single dosage of aspirin is placed in water at standard temperature and pressure) was established because tablets releasing this amount of carbon dioxide have been found to be repulsive to children because of their effervescent characteristic.

The aspirin exemption's limitations that the dosage contain not more than 10 percent of the regulated ingredient and have an LD–50 of greater than 5 grams per kilogram of body weight were designed to establish reasonable limits for the allowable concentration of the regulated ingredient and the toxicity of a single dosage unit.

These particular boundaries were also requested for the exemption for effervescent acetaminophen products, since the commenter asked for an exemption similar to that available for aspirin.

The Commission has determined that the considerations that apply to effervescent tablets also apply to effervescent products in granular form. Therefore, after considering this exemption request, the Commission concludes that the effervescent acetaminophen products for which the exemption is requested have similar physical characteristics to the aspirin products which have been previously exempted. In addition, a review of human experience data collected by the National Clearinghouse for Poison Control Centers (NCPCC) shows that there has not been a history of serious illness or serious injury associated with the effervescent acetaminophen product that is currently on the market in granular form. (The NCPCC data for the period from 1972 through 1976 revealed 12 ingestions of effervescent acetaminophen products, 2 of which resulted in symptoms. One case, in which the symptom was reported as lethargy, resulted in hospitalization.) For these reasons, it preliminary appears to the Commission that for effervescent acetaminophen products, the special packaging requirement is not necessary to protect children from serious personal injury or serious illness, subject to the conditions applicable to the exemption for effervescent aspirin products.

Exemption for acetaminophen products in powder form. Block Drug Company Inc. commented that it generally agrees with the proposed requirement, but requested that powdered acetaminophen preparations be exempt. Block stated that there should not be a problem with ingestion by children of this form of the product because of its unpleasant taste and because the child is likely to spill much of it before it can be ingested. The company contends that this product is analogous to the powdered aspirin products that have been previously exempted by the Commission from the special packaging requirement for aspirin. See 42 FR 20291, April 19, 1977, and 43 FR 17330, April 21, 1978 (16 CFR 1700.14(a)(1)(ii)).

The exemption for aspirin powders is restricted to unflavored powders other than those intended for pediatric use that are packaged in unit doses providing not more than 13 grains of aspirin per unit dose.

The specific level of 13 grains of acetaminophen per unit dose was requested by the commenter, and 13 grain powdered aspirin products have been previously exempted from the child-resistant packaging requirements for aspirin products. The 13 grain level is less than the 1 gram level that is regulated under the rule.

The Commission is not aware of any powdered acetaminophen preparation currently on the market. However, a review of NCPCC data for *aspirin* powders demonstrates a lack of child ingestion problems with this dosage form. The physical characteristics of the powdered acetaminophen preparations are similar to those of the aspirin products that have been previously exempted. Therefore, it preliminarily appears to the Commission that in the case of powdered acetaminophen products, the special packaging requirement is not necessary to protect

children from serious personal injury or serious illness caused by unflavored acetaminophen preparations in powder form (other than those intended for pediatric use) that are packaged in unit doses containing not more than 13 grains of acetaminophen per dose.

Conclusion

After considering the requests that powdered and effervescent preparations be exempted from the requirement for special packaging of acetaminophen preparations and all the data available to it, the Commission has decided to propose the requested exemptions.

Accordingly, pursuant to provisions of the Poison Prevention Packaging Act of 1970 (Pub. L. 91–601, secs. 2(4), 3, 5, 84 Stat. 1670–1672; 15 U.S.C. 1471(4), 1472, 1474) and under the authority vested in the Commission by the Consumer Product Safety Act (Pub. L. 92–573, sec. 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission proposes to replace the period (".") at the end of 16 CFR 1700.14(a)(16) with a comma and to add the following to the end of paragraph (a)(16):

(a) * * *

(16) * * * except the following—

(i) effervescent tablets or granules containing acetaminophen, provided the dry tablet or granules contain less than 10 percent acetaminophen, the tablet or granules have an oral LD–50 of greater than 5 grams per kilogram of body weight, and the measured dosage of the product, when placed in water, releases at least 85 milliliters of carbon dioxide per grain of acetaminophen in the dry form when measured stoichiometrically at standard conditions (0°C, 760 mm mercury) and that contain no other substance subject to the provisions of this section.

(ii) Unflavored acetaminophen-containing preparations in powder form (other than those intended for pediatric use) that are packaged in unit doses providing not more than 13 grains of acetaminophen per unit dose and that contain no other substance subject to the provisions of this section."

(Secs. 2, 3, 5, Pub. L. 91–601, 84 Stat. 1670–1672; (15 U.S.C. 1471, 1472, 1474)).

August 27, 1979.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 79-27225 Filed 8-30-79; 8:45 am]

BILLING CODE 6355-01-M

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Part 145]

Petitions for Confidential Treatment; Proposed Rule

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule.

SUMMARY: The Commission is proposing to amend its rule regarding petitions for confidential treatment of sensitive information so that the rule will specify the offices of the Commission with which these petitions are to be filed. The Commission proposes to take this action to eliminate the delays that sometimes result from the failure to file these petitions with appropriate Commission offices.

DATES: Written comments on the proposal are to be received on or before October 1, 1979. Proposed effective date: not yet determined.

ADDRESS: Written comments on the proposal should be sent to: Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, Attention: Secretariat.

FOR FURTHER INFORMATION CONTACT: Mark N. Rae, Office of the General Counsel, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, telephone (202) 254–7285.

SUPPLEMENTARY INFORMATION: Commission rule 145.9, 17 CFR 145.9 (1978), permits persons who submit information to the Commission which they deem to be sensitive to petition the Commission for confidential treatment of that information. The rule also provides that when a request is made, pursuant to Commission rule 145.7, 17 CFR 145.7 (1978), for access under the Freedom of Information Act to information for which confidential treatment has been sought, the Director of the Commission's Office of Public Information is to determine within five business days whether confidential treatment will be accorded that information.

In the past, petitions for confidential treatment have not always been filed with the Office of Public Information. As a result, decisions on petitions for confidential treatment, and responses to public requests for information, have not been made as promptly as otherwise would have been the case. The Office of Public Information has had, at times, to request divisions and offices of the Commission to search their records in order to determine whether a petition for confidential treatment had in fact been filed with the Commission.

To correct this problem, the Commission proposes to amend paragraph (b)(1) of § 145.9 to specify that a petition for confidential treatment is to be filed with the Director of the Office of Public Information and that a copy of the petition is to be filed with the division or office of the Commission to which the information subject to the petition has been submitted. The copy is to accompany the information submitted.

In consideration of the foregoing, the Commission, pursuant to the authority contained in section 2(a)(11) of the Commodity Exchange Act, 7 U.S.C. 4a(j) (1976), and 5 U.S.C. § 552 (1976), proposes to amend § 145.9(b)(1) of Part 145 of Chapter I of Title 17 of the Code of Federal Regulations by adding three new sentences at the end as follows:

§ 145.9 Petition for confidential treatment of certain information submitted to the Commission.

* * * * *

(b)(1) A petition for confidential treatment shall contain a concise statement of the reasons why the information should be accepted or retained in confidence, shall state the length of time for which confidential treatment is required, and may state on what basis, if any, the petition itself should be afforded confidential treatment. The petition shall also set forth an address at which the petitioner may promptly be reached by telegram and by mail, and it shall be the obligation of the petitioner to advise the Commission of any change in its address. The petition shall be filed with the Director of the Office of Public Information. A copy of the petition shall also be filed with the division or office of the Commission to which the information subject to the petition is submitted. The copy of the petition shall be attached to the information submitted.

* * * * *

Issued in Washington, D.C., on August 27, 1979, by the Commission.

Jane K. Stuckey,

Secretary of the Commission.

[FR Doc. 79-27219 Filed 8-30-79; 8:45 am]

BILLING CODE 6351-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Chapter I, Subchapter B]

[Docket No. 79N–0200]

Lead in Food; Advance Notice of Proposed Rulemaking: Request for Data

AGENCY: Food and Drug Administration.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: This document describes the sources of lead in the food supply, the health concerns arising from the presence of lead in the food supply, and the plans of the Food and Drug Administration (FDA) to determine whether lead is prior sanctioned and to establish action levels to reduce the level of lead intake from lead-soldered food cans. The agency requests information and data on the prior sanction status of lead and the problem of lead in food.

DATE: Comments, information, and data by November 29, 1979.

ADDRESS: Written submissions to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857; submissions containing confidential or trade secret information may be sent to the Division of Food and Color Additives, Petitions Control Branch (HFF–334), 200 C St. SW., Washington, DC 20204.

FOR FURTHER INFORMATION CONTACT: Carl L. Giannetta, Bureau of Foods (HFF–334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Humans are exposed to lead from a variety of sources. Lead is found in the air we breathe, in the food we eat, and in the water we drink. Lead is widely recognized as a toxic substance, and has been a matter of concern to FDA and other public health regulatory agencies for some time.

The concern about lead is especially acute with respect to children. Although the margin of safety for adults from lead poisoning from dietary intake is adequate, the margin of safety for children is small. FDA intends to expand its current programs designed to monitor and reduce the lead levels in the food supply. The objective of this effort is to reduce consumers' lead exposure to the lowest level that can be practicably attained. FDA's program will encompass all lead in the food supply, although the initial focus will be on added (as opposed to background) lead, especially that migrating into food from lead-soldered cans, and on lead in foods consumed entirely or largely by infants and young children.

The initial goal of this effort will be to reduce by at least 50 percent within the next 5 years the contribution of lead intake from lead-soldered cans. The long-range goal of FDA in conjunction with other Federal regulatory agencies is to reduce lead intake from all sources—air, water, and food—to less than 100 micrograms per day (μg/day) for children 1 to 5 years old. Achievement of this goal will require continued cooperation among several regulatory agencies and between them and the affected industries. FDA's effort will be closely coordinated with the activities of the other interested agencies, especially the Environmental Protection Agency (EPA).

I. Sources of Lead in Food

There are essentially three sources of lead in food. First is the natural background level. This background is present because the ubiquitous distribution of lead in the environment (soil and water) results in its being incorporated into all living organisms, although it has not been established that lead is an essential nutrient for any organism. The remainder of the lead in food is present as a result of human activities, which can be subdivided into (a) pollution of the environment with lead and (b) food processing activities involving the use of lead.

In environmental pollution, lead dust fallout from automobile exhaust or lead smelting operations or lead in runoff water from mining operations may cause additional lead to enter food and feed crops in certain geographical areas. The use of pesticides that contain lead may also increase levels of lead in certain fruits and vegetables; and, in addition, where the use of such pesticides has been long established, increased levels of lead in the soil may cause further increases of lead in such crops.

The most important source of additional lead in the food supply from food processing is the method of packaging and holding food. Foremost among these sources of added lead is the popular "sanitary" or tin can, which is used to package 10 to 15 percent of all food in this country. Thirty-three billion tin cans are used each year to package food, and approximately 25 billion more are used annually to package carbonated beverages. The source of the added lead is not the can itself, but the lead solder used in can seams. It is estimated that about 20 percent of the lead in the average daily diet of persons more than 1 year old is from canned food, of which about two-thirds is from the solder, and the remainder from the food itself prior to canning. Thus, lead from the tin can solder contributes about 14 percent of the total lead ingested by humans and is an important, though not the predominant, source of ingested lead.

Other less significant sources of added lead in food include migration of lead under normal conditions of use from ceramic glazes, silver plated hollowware, porcelain pots and pans, pewter, and fine leaded crystal. Misuse of glazed ceramic ware by storage of acid foods or drinks for prolonged periods, however, can result in the leaching of relatively large amounts of lead into the food.

Drinking water, and hence water used to prepare foods, also contains very low levels of lead. Under § 141.11 of the EPA regulations (40 CFR 141.11), the maximum permissible level of lead in drinking water is 50 micrograms per liter (μg/L), although this level may be exceeded in certain localities. In some communities, the problem of elevated lead levels in water is associated with the use of lead plumbing. In soft water areas, this problem can be corrected by adjusting the pH of the water. Other areas appear to have naturally high background levels of lead in water.

Very small amounts of lead in food can be traced to food additives and color additives that contain low but generally unavoidable levels of lead. The levels of lead and other heavy metals in food additives and color additives are subject to specifications for acceptable food ingredients, such as those published in the "Food Chemicals Codex."

II. Health Aspects

A. Lead Toxicity

This section discusses the adverse health effects of lead. Although lead poisoning is known to affect a number of essential body functions, these effects have been best documented for the hematopoietic (blood producing), renal, and nervous systems. The severity of clinical manifestations of lead toxicity depends on both the duration and intensity of exposure.

One of the earliest signs of chronic lead poisoning is the occurrence, especially among children, of a microcytic, hypochromic, mildly hemolytic anemia, a type of anemia characterized by abnormally small red blood cells containing reduced hemoglobin content. This type of anemia

results from the interference of lead in specific enzyme systems involved in heme synthesis (production of the iron-containing component of hemoglobin). The development of acute anemia is preceded by increased blood concentrations and urinary excretion of the metabolic precursors of heme (i.e., protoporphyrins, δ-aminolevulinic acid). When the body burden of lead is increased, this increase is generally reflected by a concomitant rise in whole blood lead concentration.

Renal damage resulting from acute lead toxicity includes degeneration of the cell lining of the proximal tubules, varying degrees of cellular necrosis (cell death), and decreased reabsorption of amino acids, glucose, and phosphates. Long-term exposure of the renal system to lead produces a condition known as chronic lead nephropathy, which is characterized by a slow progressive degeneration of renal tissue with a concomitant decrease in renal function. Chronic nephropathy is occasionally fatal as a result of renal failure.

The most severe form of overt lead toxicity, acute encephalopathy, involves the central nervous system and is characterized by the sudden onset of massive cerebral edema (accumulation of intercellular fluid in the brain), convulsions, coma, and death as a result of cardiopulmonary arrest. Although the incidence of fatal encephalopathy has decreased markedly over the past 20 years, due to both earlier detection and chelation therapy, in nonfatal cases there are a number of long-lasting neurological effects. These include gross mental retardation, recurrent seizures, cerebral palsy, behavioral abnormalities such as increased irritability, impaired concept formation, and hyperactivity, and occasionally blindness, aphasia (a loss of power of expression and/or comprehension of language), and hemiparesis (muscular weakness usually affecting one side of the body). Reduced motor function is the primary effect of lead on the peripheral nervous system, but other symptoms, including loss of feeling in the extremities, have also been noted.

The clinical effects of lead poisoning in infants and children are well known. However, there is also considerable interest in the subclinical effects of exposure to lead in these groups. Needleman et al. (Ref. 1) have suggested that neurophysiological effects (behavioral and performance defects) may occur in children exposed to lead levels below those required to produce clinical effects. The level of exposure to lead that will produce neurophysiological effects is not yet clearly defined. In this case, Needleman et al. have suggested that dentine lead levels may be a more useful index of exposure to lead than blood levels because dentine lead levels will reflect long-term integrated lead exposure, whereas blood lead levels will reflect only recent exposure to lead.

It is now recognized that infants and young children are at substantially greater risk than adults to lead exposure for the following reasons: (1) dyscrasias (pathological conditions of the blood) and neurologic effects of lead occur at lower threshold levels in children; (2) due to a greater metabolic rate than adults, children eat and breathe in more lead per unit of body weight and hence are exposed to relatively more lead; (3) at comparable levels of lead intake, infants and young children absorb appreciably greater proportions of lead than do adults; (4) the acute toxic effects of lead in children affect the central nervous system, while in adults the effect is primarily on the peripheral nervous system; (5) on account of pica (compulsive ingestion of things other than normal food), infants and children frequently ingest high levels of lead from nonfood sources (i.e., soil, paint chips, plaster, newsprint, etc.); and (6) there is an increased probability that many children do not receive adequate amounts of dietary calcium and iron, and that this nutritional deficiency results in an increased absorption of lead.

FDA concurs with the Surgeon General that a blood lead level greater than 40 micrograms per deciliter (μg/dL) is evidence of undue lead exposure for adults or children (Ref. 2). In its proposed national ambient air standard for lead (Ref. 3), EPA regarded a mean blood lead value of 15 μg/dL as the target "no-effect" level for children aged 1 to 5 years. On a log-normal distribution, this value translates to an upper limit of 30 μg/dL. This latter value is consistent with the maximum acceptable blood lead level set by the Center for Disease Control (CDC) (Ref. 4) and with the FDA estimate of 40 μg/dL.

There is some, albeit limited, knowledge of the quantities of lead that will produce various physiologic effects in children. An ad hoc committee of experts in pediatric lead poisoning suggested in 1971 (Ref. 5) that 300 μg/day of lead be considered the maximum daily permissible intake from all sources for children between 1 and 3 years of age. More recently (Ref. 6) it has been recommended that, for infants under 6 months of age and for children aged 6 months to 2 years, total lead intake from all sources should not exceed 100 and 150 μg/day, respectively. At these levels of intake, alterations in heme synthesis, considered to be the most sensitive indicator of lead toxicity, are unlikely to occur in healthy, well-nourished children. However, such a tolerable intake represents a maximum continued level of exposure. To stay below this maximum, the mean daily intake of lead needs to be far lower (id.).

For more detailed discussion of the toxicological effects of lead in humans, interested parties are referred to three excellent reviews on the subject. These are the EPA Document, "National Ambient Air Quality Standard for Lead—Final Rules and Proposed Rulemaking" (Ref. 3), the 1977 report from the World Health Organization, "Environmental Health Criteria 3-Lead" (Ref. 7), and the Department of Labor Document, "Occupational Exposure to Lead—Final Standard" (Ref. 8).

B. Carcinogenicity

The carcinogenicity of lead is a perplexing issue. As the following discussion explains, there is a substantial body of literature, dating from the early 1960's, establishing that lead is an animal carcinogen. Ordinarily, such a finding would warrant an inference that lead poses a human cancer risk, yet neither a consensus of the scientific community nor the regulatory agencies that have acted with respect to lead appear to have drawn that inference.

Possible scientific reasons for declining to draw the inference that lead presents a human cancer risk are explored in the following discussion. It is one of the central purposes of this advance notice of proposed rulemaking to ask the scientific community and others interested in the problems resulting from human exposure to lead to focus on the issue of the human cancer risk from lead and to submit views on that issue. Among the questions the agency would like to answer are: (1) Does lead pose a human cancer risk? Can an inference of human cancer risk properly be drawn from the animal studies? (2) If not, what distinguishes these animal studies from studies of other substances that do warrant an inference of human cancer risk? (3) What type of further research, if any, is needed on the issue of human cancer risk from lead? The agency has also discussed its interest in these questions in the FDA proposal regarding the use of lead acetate in hair dyes, published in the **Federal Register** of March 6, 1979 (44 FR 12205). In that document, FDA stated that public comment would be solicited and

evaluated on whether the animal feeding studies showing that lead is an animal carcinogen are appropriate for evaluating the safety of lead to humans when lead is used as a component of hair dye and other products subject to regulation under the Federal Food, Drug, and Cosmetic Act.

1. *Experimental animal studies.* A number of studies have definitely shown that lead is an animal carcinogen. Zollinger (Ref. 9), as cited by Mao and Molnar (Ref. 10), was the first to report the induction of renal adenomas and carcinomas in the rat following a prolonged period (16 months) of injections with lead phosphate. Renal tumors were observed in 66 of the rats that survived for 10 months or more from the start of the study. Total doses of lead received by those rats that developed tumors varied from 120 to 680 milligrams (mg). Comparable results were observed by Roe et al. (Ref. 11).

Induction of renal neoplasms following oral administration of lead salts in the rat has been demonstrated frequently. In a study by Boyland et al. (Ref. 12) twenty 10-week-old Wistar rats were fed a semipurified diet containing 1.0 percent lead acetate for 1 year. Of the 16 surviving animals, 15 were found to have either renal adenomas or adenocarcinomas. Van Esch et al. (Ref. 13) subjected rats to diets containing 0.1 percent basic lead acetate during a 29-month period and observed renal neoplasms in 11 of 32 animals receiving the 0.1 percent diet and in 13 of 24 rats in the 1.0 percent treatment. Chronic 2-year studies with Swiss mice and golden hamsters given basic lead acetate were conducted by Van Esch and Kroes (Ref. 14). Renal tumors were found in 9 of 50 mice offered 0.1 percent lead acetate but in only 1 of 50 animals in the 1.0/0.5 percent diet group. No renal tumors or early stage tumorogenesis was observed in the hamsters. It should be noted that at the higher levels of dietary lead acetate (1.0/0.5 percent, mice; 0.5 percent, hamsters), considerable animal mortality occurred. The renal changes in these particuar treatment groups were typical of acute lead toxicity. In a 23-month feeding study in which rats received a diet containing 1.0 percent basic lead acetate, Mao and Molnar (Ref. 10) found renal epithelial tumors in 31 of 40 rats. The incidence of such tumors showed an excellent correlation with the duration of the lead feeding and, according to the investigators, most of the tumors showed "a striking similarity to human cortical adenomas forming papillary and acinar structures."

In addition to renal tumors, other neoplastic changes induced by a number of lead salts have been reported by several investigators. The reports are summarized in the following table.

Induced Neoplastic Changes in Kidneys and Other Tissues/Organs of Experimental Animals

Species and No.	Dosage and route of administration	Tumor sites and reference
Wistar rats: 94 male, 34 female	Lead acetate in diet, 3 mg/rat/day for 2 months followed by 4 mg/rat/day for next 16 months.	Benign and malignant in kidneys, testes, adrenals, thyroid, pituitary, and prostate (Ref. 16).
Wistar and Sprage-Dawley rats:		
17 male	Lead acetate (1%) in diet fed 12 to 17 months.	Tumors of renal cortex found in 13/17 rats, cerebral gliomas found in 2/17 rats (Ref. 17).
41 male	Lead acetate (1%) plus indol. (1.6%) in diet fed 12 to 17 months.	Tumors of renal cortex found in 25/41 rats; cerebral gliomas found in 3/41 rats (Ref. 17).
Sprague-Dawley rats > 1000	Lead subacetate (1%) in diet or via I.P or subcutaneous, injection (90-week study).	Renal cortical adenomas in > 60% of rats and renal cortical carcinomas in > 30% of rats after 90 weeks; Thyroid adenomas in 20% of animals between 60 to 90 weeks; Cerebral gliomas in 7% of rats between 60 to 90 weeks. Sarcomas in approximately 30% of rats at site of I.M subcutaneous, injections found within 10 to 40 weeks (Ref. 18).
Strain A/Strong mice (both male and female):	Lead subacetate given via 15 I.P. injections 3/week during 30 weeks:	
20	150 mg/kg	Pulmonary tumors found in—11 of 15, 5 of 12, and 6 of 17 surviving mice (Ref. 19).
20	75 mg/kg	
20	30 mg/kg	
Fischer 344 rats: 25 male, 25 female.	Lead chromate; 72 mg/rat given in 9 I.M. injections (8 mg/month for 9 months).	Malignant tumors at injection sites in 64% of all treated rats (40% in males; 88% in females); Renal tumors found in 3 of the female animals (Ref. 20).

If a food-related substance has been shown to produce positive results in a single adequately designed and conducted animal carcinogenicity test, and no other data are available, it must be assumed that the substance poses a risk of cancer to humans (see the March 6, 1979 proposal, 44 FR 12205).

Although the carcinogenic effect of lead compounds administered to test animals has been clearly established, the significance of these findings to the human situation has been questioned on the basis that the doses of lead given to test animals are well above those that would be acutely toxic to humans. The lowest level at which lead is known to induce animal cancers is 200 times the acutely toxic level in humans. Van Esch et al. (Ref. 13) determined that a human subject would have to consume, daily, 810 mg basic lead acetate (550 mg lead) to equal the dose level (0.1 percent in the diet) given to rats during chronic (1- to 2-year) feeding studies in which induction of renal tumors has been documented. Ingestion of such high levels of lead by humans would unquestionably result in the rapid and total onset of acute lead toxicity. This point is further exemplified in the study of Kehoe (Ref. 15), in which accidental ingestion of 5 to 10 mg lead per day for approximately 30 days resulted in the development of overt symptoms of lead intoxication in two male subjects.

The issue raised is not the general one about the validity of high dose animal studies. Such studies provide a scientifically valid basis for inferring human cancer risks, as FDA has explained in the March 6, 1979 proposal concerning lead acetate. Rather, the issue arises from the fact that scientific knowledge about how humans and rats metabolize lead suggests that the two species may metabolize lead very differently. Rats tolerate vastly greater quantities of lead without acute effects than humans do (Ref. 13). The implication may be that, just as humans are more vulnerable than rats to the acute effects of lead, humans may also be more vulnerable than rats to the chronic effects of lead. Alternatively, the implication may be that the extreme human sensitivity to the acute effects of lead somehow ensures that humans are not chronically exposed to quantities that pose any cancer risk, or perhaps that any actual cancer risk is so low as to be negligible. The agency seeks comment on this point.

2. *Epidemiological studies.* The principal epidemiological studies of lead exposure have focused on occupational exposure. In these studies, however, it has been very difficult to identify the effects of lead and distinguish them from the effects of other substances present in the working environment.

V4417179A 3179 UMI

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

Virtually all epidemiological studies of exposure to suspect carcinogens are subject to some inherent limitations and uncertainties (Ref. 24). These difficulties are reduced in the case of studies of occupational exposure, but even in that setting there are uncertainties concerning the prior exposure of the workers to the substance in question and possibly large variations in exposure among workers supposedly performing the same tasks under the same working conditions. Moreover, in studies that focused on the relation between occupational exposure to lead and lung cancer, it was not possible to correct for the effects of smoking in the study population.

In most of the studies of occupational exposure to lead in which an excess of deaths has been reported, the excess has been associated with respiratory cancer, although cancers at other sites have also been reported. For example, Rencher et al. (Ref. 21) noted an excess of deaths due to lung cancer in smelter workers. Blot and Fraumeni (Ref. 22) reported that average mortality rates from lung cancer increased in counties where smelters were located. Finklea (Ref. 23) reported an apparant but small excess of respiratory cancer in lead chromate workers. Berg and Burbank (Ref. 24) observed that the lead concentration in water basins correlated with kidney cancer mortality, death from lymphomas, and all forms of leukemia.

Other authors have reported negative results. In studies on smelter and battery plant workers, Cooper (Refs. 25, 26) reported a slight excess of lung cancer, which was not statistically significant. Dingwall-Fordyce and Lane (Ref. 27) concluded from a study of English workers occupationally exposed to lead that there was no evidence to suggest that malignant disease was associated with lead absorption. Elwood et al. (Ref. 28) found no evidence to support an association between lead in drinking water and mortality from cancer in deaths occurring in residents of homes in northwest Wales. Malcolm (Ref. 29) reported further observation of the same population studied by Dingwall-Fordyce and Lane. He stated that deaths of pensioners from cancer totalled 19 where 27 were expected, and that in employed workers there were 33 where 34 were expected. No mention was made of the types of tumor that were observed, and detailed data were not presented.

The contradictions among these studies require that there be some reservations about reliance upon them to demonstrate the risk or lack of a risk of cancer in humans. In most, if not all, of the studies described above, exposure to a variety of substances other than lead occurred in the working environment. Smelter workers may have been exposed to arsenic, sulfurdioxide, and cadmium. Battery plant workers may have been exposed to arsenic, antimony, and sulfuric acid. Consequently, it is not now possible to draw a firm conclusion, based on epidemiological data, about the possibility of increased risk of cancer associated with human exposure to lead.

3. *Views of other regulatory agencies.* No other Federal health protection agency has thus far taken regulatory action on the basis of a finding that lead presents a human cancer risk.

EPA issued its final national ambient air quality standard without mentioning cancer among the health risks presented by lead (see the **Federal Register** of October 5, 1978 (43 FR 46246)). In its water quality criteria document published in the **Federal Register** of March 15, 1979 (44 FR 15926), EPA referred inconclusively to the issue of the carcinogenic effects of lead (see 43 FR 15958).

The Occupational Safety and Health Administration (OSHA) has issued a final standard for occupational exposure to lead (43 FR 52952, November 14, 1978; 43 FR 54354, November 21, 1978). The preamble to the standard contains an extensive discussion of the adverse effects of lead on human health. The discussion covers many pages, but the only reference to a human cancer risk is one made in passing in a short paragraph at 43 FR 54399. OSHA has tentatively classified lead as a Category I Confirmed Carcinogen under its proposed cancer policy (42 FR 54148, November 21 1977), but that classification was based solely on the fact that two positive animal studies exist. The tentative classification was not based on any evaluation of the studies or any consideration of the issues raised in this document, and it has not been the basis for any regulatory action by OSHA.

III. Previous FDA Actions Concerning Lead

In the 1930's, before the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) (FFDC Act) was enacted, FDA (then the enforcement agency in the Department of Agriculture for the Food and Drugs Act of 1906) used much of its reserach and regulatory resources to control lead residues resulting from the spraying of lead-containing pesticides on fruits and vegetables. Some analytical research work was done in 1934, however, to investigate the "Effect of Storage on Lead Content of Evaporated Milk" (Food Control Statement No. 37, June-August 1934, p. 5). The analyst concluded that "there is little likelihood of an increase of lead during the prolonged storage of evaporated milk, even when there is a relatively large amount of solder exposed to attack." This work has been cited from time to time in official correspondence issued by FDA officials when asked to comment on the safety of food packed in tin cans (see, for example, the February 19, 1964 letter from George P. Larrick to National Sanitation Foundation (Ref. 30)).

Also during this period, FDA, although setting no formal tolerance for lead in food products, used administrative guidelines for pesticidal lead residues on fresh fruits. Walter G. Campbell, at the time Chief of the Food and Drug Administration, wrote on January 31, 1938: "In the case of food products in general we have consistently been guided by the figure of 0.014 grain of lead per pound of food, solid or liquid."

Methods for the determination of lead in foods were also developed in 1934 and 1935 (*Journal of the Association of Official Analytical Chemists*, 17.108, 1934, and 18.315, 1935). In the conclusion of the 1935 paper (p. 326), the authors state: "The quantities of lead added were equivalent to 1–10 ppm. Very few canned foods exceed the upper limit: most of them are at or below the lower figure, which from a regulatory standpoint is no longer of interest."

In 1940, the Public Health Service was directed by Congress to investigate the tolerances for arsenic and lead spray residues. On the recommendation of the Public Health Service, these tolerances were raised by FDA from 0.01 to 0.025 grain per pound for arsenic and from 0.025 to 0.05 grain per pound for lead (3.5 to 7 parts per million (ppm)). There are indications in the correspondence issued after 1940 that these tolerances became the FDA guidelines for the permissible lead content of canned foods.

Due to the shortage of tin during World War II, the War Production Board generated considerable research to develop a lead-tin solder than would be both functional and safe with the least amount of tin content. The formula for the lead-solder alloy changed from 63 percent lead/37 percent tin to 98 percent lead/2 percent tin. The National Academy of Sciences/National Research Council/War Metallurgy Committee played an important role in the studies done with respect to the functionality and safety of the lead solders. These studies showed that a solder consisting of 98 percent lead and 2 percent tin was safe for use in soldering tin-plated can for food packaging. These studies were cited in official correspondence of the FDA issued before and after the Food Additives Amendment of 1958 (Pub. L. 85–929; 72 Stat. 1784–1789) as a basis for concluding that the use of lead-tin solders was safe for use in tin cans for food and in food processing equipment if good manufacturing practices were observed.

Since approximately 1970, FDA has instituted a number of programs to monitor and reduce the amount of lead in the food supply. Owing to concern about the level of lead to which infants and young children may be exposed, these programs have had as their primary goal the reduction of the lead level in canned food produced for infants and young children, including some food intended primarily for adults but likely to be eaten in substantial amounts by children. Other identified sources of lead have been included in the programs.

The first of EDA's recent programs concerning lead contamination of food began after FDA became aware, in the late 1960's, of a potential problem involving lead migration into food from pottery glazes. In February 1970, FDA conducted a limited survey of imported pottery and found high levels of lead migration. On the basis of the results of this initial survey, the sampling program was expanded, and in calendar year 1970 FDA denied entry to over 400 lots of imported pottery that were shown to leach excessive amounts of lead from the glazes. In FDA's view, this excessive leaching could have been avoided by the proper "firing" of the glazes and by the use of proper glaze formulations.

In May 1971, FDA initiated a formal compliance program for foreign and domestic pottery. The program was designed to enforce a limit of 7 ppm on lead migration into a special leaching solution. Under this compliance program, which is still in effect, FDA has inspected factories and analyzed samples from every major domestic manufacturer of ceramic dinnerware. The rate of violation of the 7 ppm limit has been relatively low. The agency has also examined approximately 2,000 samples of ceramic ware imported each year; the violation rate has been somewhat higher than that for domestic items. All items exceeding the 7 ppm limit have been denied entry into the United States.

FDA later identified problems with enamelware and pewter, and the existing program was expanded to subject those items to the same 7 ppm migration limit. In the early 1970's, FDA also worked with the domestic and foreign ceramic industries to educate them about the lead problem and to assist them in initiating self-surveillance programs to limit lead migration.

Most recently, FDA has discovered a lead problem with silver-plated hollowware and has included it in the same compliance program. Also, FDA has a lower action level of 0.5 ppm leachable lead for silver-plated cups intended for use by infants, due to the special concern discussed above about high lead intake by infants.

The second major focus of recent FDA activities has been the tin can. There are essentially two varieties of tin can that concern FDA, the "vent hole" can and the ordinary "sanitary" can.

Domestic manufacturers of evaporated milk use the "vent hole" can exclusively. Prior to 1973, sampling of evaporated milk had frequently disclosed excessive lead levels. In 1973, FDA initiated a quality assurance program with the evaporated milk industry to ensure compliance with a 0.5 ppm limit on lead in the milk. Largely as a result of these efforts, the average lead level in evaporated milk declined from 0.52 ppm in 1972, to 0.10 ppm currently. In the **Federal Register** of December 6, 1974 (39 FR 42740), FDA proposed to establish a tolerance under section 406 of the FFDC Act (21 U.S.C. 346) of 0.3 ppm for lead in evaporated milk. For the reasons discussed below, FDA intends to withdraw the December 1974 proposal.

Most other canned foods used in this country are packed in the "sanitary" can, which is the type of can most people think of as a "tin can." Infant juices have been packed in such cans, and FDA has for some time been urging the manufacturers of infant juices to lower the lead levels in these juices. The lead levels in canned juices have been reduced from an average of 0.30 ppm in 1973 to about 0.05 ppm currently. Similarly, the average lead level in canned infant formula concentrate has been reduced from 0.10 ppm to about 0.06 ppm. Recently, all infant juice manufacturers have voluntarily switched form tin cans to glass jars. The average lead content in glass-packed infant food has been reduced; the reduction reflects the effects of stricter control over raw materials and improvements in food processing.

FDA has held discussions with representatives of the infant food industry to work toward a voluntary quality assurance program for canned infant food similar to the program in effect in the evaporated milk industry. The canning industry and the can manufacturers are also working, with FDA encouragement, to improve the quality control procedures used by the industry. If successful, these efforts will further reduce the lead levels in all canned food.

Finally, FDA has a program to monitor the lead levels in food generally. In its heavy metals survey, FDA obtains representative samples of a variety of foods and analyzes them for levels of heavy metals, including lead. The survey enables FDA to follow trends in the levels of lead in food and to assess the effect of control measures.

IV. Other Government Agency Regulations and Positions on Lead

As discussed above, no other Federal agency has taken regulatory action based on a finding that lead presents a human cancer risk. Several agencies have taken action with respect to lead to deal with other health problems it presents. These Federal actions are described below.

A. Environmental Protection Agency (EPA)

In the **Federal Register** of October 5, 1978 (43 FR 46246), EPA established a national ambient air quality standard for lead. The standard is 1.5 micrograms lead per cubic meter ($\mu g/m^3$) (monthly average). The EPA standard is noteworthy because it is based on a goal for total lead exposure that is compatible with targets previously advocated by other Federal agencies (see part II, A of this notice). The standard is based on EPA's judgments about the impact of lead exposure on young children, the lowest levels of lead associated with adverse effects on health, and the relative importance of airborne lead as a source of lead exposure. The standard is also based on EPA's conclusion that there is a positive relationship between air and blood lead levels. Considering the danger from all sources of lead exposure, EPA estimated the percentage of exposure from the air and used blood lead levels as an indicator of total exposure.

In 1975, EPA promulgated national interim primary drinking water regulations for lead (40 CFR 141.11). The standard was aimed at protecting children from undue lead exposure, and it limited lead content to 0.05mg/L (50 $\mu g/L$), considered to be the lowest practicable level. In 1977, the National Academy of Sciences (NAS) evaluated the interim drinking water standards and concluded that the level was too high. EPA is currently considering the need to revise the interim drinking water standard for lead.

EPA has also proposed water quality criteria for a number of pollutants,

including lead in the March 15, 1979 **Federal Register** (44 FR 15926, 15956).

EPA has issued regulations to reduce the hazard associated with lead arsenate pesticides (40 CFR 180.194). Recently, EPA also published a "Notice of Rebuttable Presumption Against Registration (RPAR) and Continued Registration of Pesticide Products Containing Inorganic Arsenic" (43 FR 48267, October 18, 1978). Lead arsenate is included in this group of inorganic arsenicals, and EPA states that it will conduct a separate evaluation of the possible adverse effects due to lead itself in the future.

Finally, EPA also is considering lead levels in gasoline (40 CFR 80.20).

B. Occupational Safety and Health Administration (OSHA)

In the **Federal Register** of November 14, 1978 (43 FR 52952, OSHA issued a final standard for occupational exposure to lead of 50 $\mu g/m^3$ of air per 8-hour period.

C. Department of Housing and Urban Development (HUD)

In the **Federal Register** of July 13, 1976 (41 FR 28876), HUD issued requirements for reducing human exposure to lead through the prevention of lead poisoning from the ingestion of paint from buildings, especially residential dwellings.

D. Consumer Product Safety Commission (CPSC)

In the **Federal Register** of September 1, 1977 (42 FR 44193), CPSC issued regulations that ban 1) paint and similar surface coating materials that contain more than 0.06 percent lead; (2) toys and other articles intended for use by children bearing paint or other similar surface-coating materials that contain more than 0.06 percent lead; and (3) furniture coated with materials that contain more than 0.06 percent lead.

E. Center for Disease Control (CDC)

CDC concluded in 1975 (Ref. 3) that undue or increased lead absorption exists when a child has confirmed blood lead levels of 30 to 70 $\mu g/dL$ or an elevation in erythrocyte protoporphyrin in the blood of 60 to 189 $\mu g/dL$, unless the increase is caused by iron deficiency. CDC's guideline is generally accepted in the scientific community, but is currently being reevaluated on the basis of recent data.

V. The Can Manufacturing Industry

Approximately 33 billion cans per year are used for foods in the United States. Their products have a market value of about $2 billion. About half the food cans are made by the food companies that use the cans. These food companies make all their own cans, and most sell some cans to others. Evaporated milk manufacturers commonly make all their own cans.

The principal manufacturing material for both sanitary and vent hole cans is tinplate. Tinplate today is at least 99 percent steel; often, steel is the only metal. Even in the days before World War II, when tinplate was made by dipping steel sheets in a bath of molten tin, the maximum amount of tin in tinplate was 2½ percent. In the early 1940's, electrolytic deposition of tin was developed commercially; the uniformity of distribution of tin on the steel sheet enabled the steel industry to use much less tin, a metal that was in critically short supply and that came largely from the Malay Peninsula. Today, as then, virtually all tin used in the United States is imported.

The metal can, as we know it, has been in continuous use since 1810, when King George III of England granted a patent to Peter Durand for the use of "vessels of glass, pottery, tin, or other metals of fit materials," originally called "cannisters," to preserve food. The earlier invention by Nicolas Appert of a system for preserving food in glass jars through the process that we now call canning laid the ground work for the patent.

The pioneer U.S. canner is believed to have been Mr. William Underwood. He established himself in the business of preserving foods in glass containers at Boston in 1819. He was closely followed by Thomas Kensett, who canned oysters, meats, fruits, and vegetables in a New York City waterfront plant in 1819, and who received a patent for the use of "vessels of tin" for that purpose from President James Monroe on January 19, 1825.

Before 1900, tin containers used commercially for foods were of either the hand-soldered open-top or the hole-and-cap style. The latter containers were supplied to the canner, together with the caps, in the center of which was a small hole or vent. Food was placed in the can and the cap sealed on by a special soldering iron. The vent hole was then closed or tipped with solder and the can processed and cooled.

A similar type of can is used exclusively for packaging evaporated milk and is referred to as a "vent-hole" can. This is a three-piece can with a soldered side seam and with ends that are affixed by a simple soldered overlap. The vent-hole can is assembled prior to filling, and the milk is injected through a small hole in the top of the can, which is then sealed with a lead solder plug. This type of can is currently used only by the evaporated milk industry.

Steady improvements took place over the years in methods of manufacturing and sealing metal cans. In 1904, almost 100 years after the original invention, a very notable advance occurred: the patenting, by the Sanitary Can Company, of a can sealed by crimping the lid on mechanically instead of soldering it on. This made possible rapid automatic closing operations. The side seam of the "sanitary" can is still sealed with solder.

Lead contamination of canned food results from this process primarily because of the use of solder to seal the side seam. The can body, with its side seam only crimped together mechanically, passes over a pot of molten solder, where a rotating roll transfers solder to the seam; the excess solder is wiped from the can, and the can is cooled to set the solder before further handling. Solder is not applied to the inside of the can, but some solder must be bled through the ends (laps) of the side seam to make a strong, leakproof can. The minute amount of solder that bleeds through the laps is one source of the lead that gets into the canned food. Another is the solder dust in the vicinity of the solder pot and wiping station. "Splashes" sometimes occur at the wiping station. These latter two sources can be minimized, but not eliminated, by good mechanical design of equipment and by good housekeeping. In recent years the industry has made considerable progress in this respect.

Until the early 1940's, the composition of the solder used in tin cans was 37 percent tin and 63 percent lead. During World War II, because of the shortage of tin, the War Production Board urged and then directed that solder composed of 2 percent tin and 98 percent lead be used. The industry has stayed with the 98 percent lead solder because (1) the side seam is much stronger than with 37/63 solder, and (2) production speeds are higher. The 98 percent lead solder is also cheaper, but the other two factors are overriding.

Aluminum is used for food cans only to a limited extent because it lacks the strength and the corrosion resistance required for most canned foods. A great deal of effort has been expended in recent years to overcome the corrosion deficiency, and it is believed by some that the problem may soon be resolved. However, the deficiency in strength would still limit the use of aluminum to small cans unless special closing techniques are developed. Aluminum is also very energy-intensive and relatively

expensive to produce. It therefore may not be a uniformly attractive substitute for the tin can.

A regulatory program resulting in severe restrictions on the tin can may induce some manufacturers to switch to alternative packaging materials, such as non-lead soldered metal cans, glass jars or the retortable pouch (a relatively new packaging device—a hermatically sealed, flexible, laminated pouch in which food may be thermally sealed and sterilized).

In making the decision to proceed with this Advance Notice of Proposed Rulemaking, the agency also prepared and considered an economic analysis of the actions being considered. A copy of this analysis is on public file with the Hearing Clerk (Ref. 31).

VI. Legal Issues

From its inception, FDA has considered lead in food to be a "poisonous or deleterious substance" as that term is used in section 402 of the FFDC Act (21 U.S.C. 342). Early on, FDA established tolerances for the lead in spray residues used on fresh fruits and vegetables. These tolerances were also used as guidelines to regulate the amount of lead permitted in food generally, including lead migrating to canned food from the can seam or the vent hole in an evaporated milk can. Under the law as it existed until 1958, regulation of lead as a poisonous or deleterious substance was the only practical approach available to FDA.

In 1958, Congress enacted the Food Additives Amendment to the FFDC Act. The amendment established a premarket review system for most food additives, including those that may reasonably be expected to become a component of food because of their use in food-contact articles, e.g., food packaging. Under the general definition of "food additive" in section 201(s) of the FFDC Act (21 U.S.C. 321(s)), the lead that gets into food because it migrates from the can seam would be a food additive if not exempted from the definition. Residues of lead that are in food in excess of established pesticide tolerances because of the improper use of lead-based pesticides or from environmental pollution (e.g., lead in the air from automobile exhaust) would not be considered a food additive and would continue to be regulated as a poisonous or deleterious substance.

Notwithstanding in the change in the law in 1958, FDA did not apply the food additive provisions to lead, but continued to regulate lead in food as a poisonous or deleterious substance. This approach is attributable to the fact that lead in food is from multiple sources, only one of which is possibly a "food additive" source. From an enforcement viewpoint, though lead can be detected in food, its source except in a few cases cannot be definitively determined. Furthermore, the focus of the agency's attention in the years after 1958 was implementing the new amendment with respect to substances that previously had not been subject to any regulation. Additionally, in the first 15 or so years after the amendment was enacted, there was no evidence that the levels of lead in the food supply presented any hazard to the health of the public. There was, therefore, no impetus to focus precisely on the legal basis on which lead was being regulated.

In the **Federal Register** of December 6, 1974 (39 FR 42742), FDA began a rulemaking proceeding to attempt to reconcile various provisions of the FFDC Act that apply to poisonous or deleterious substances, food additives, and other constitutents of food. In that same issue of the **Federal Register** (39 FR 42740), FDA proposed to establish a tolerance under section 406 of the FFDC Act for lead in evaporated milk and evaporated skim milk. In the latter document, the agency concluded that the lead in evaporated milk and skim milk was an added poisonous or deleterious substance. The 1974 proposal did not distinguish, for purposes of regulatory action, between the lead in evaporated milk that is due to migration from the can seams or vent hole in that which occurs from other sources. In the **Federal Resgister** of September 30, 1977 (42 FR 52814), a final rule was issued adopting procedural regulations for the treatment of poisonous or deleterious substances. The 1974 proposal to adopt a tolerance under section 406 for lead in evaporated milk and skim milk has not been made final.

The 1974 proposal to adopt procedural regulations for the treatment of poisonous or deleterious substances stated that "lead cannot be the subject of a food additive regulation under section 409 of the act even at trivial levels because if serves no functional purpose" (39 FR 42744). Since the 1974 proposal was issued, FDA has reconsidered this statement and is withdrawing it as incorrect. Lead from the solder seam that may migrate to food should be treated in the same way so other components of food packaging material that may migrate to food and that have been regulated as "indirect" food additives unless the lead from the solder seam is exempt from other reasons. The appropriate inquiry into the functionality of such substances is whether they have a purpose in the food-contact article (in the case of lead in tin cans, the purpose is to serve as a component of the solder), not whether they have a purpose or a function in the food. An indirect food additive is, by definition, not added to food directly. It therefore cannot be expected ordinarily to perform a technical function in the food, nor does the FFDC Act require that it do so in order for it to be considered a food additive.

When Congress enacted the Food Additives Amendment of 1958, it exempted from the definition of "food additive" in section 201(s) substances that have a prior sanction." A substance has a prior sanction for a particular use if it was approved by either FDA or the United States Department of Agriculture (USDA) for that us under the FFDC Act, the Federal Meat Inspection Act, or the Poultry Products Inspection Act before September 6, 1958. A use of a substance that is covered by a prior sanction is exempt from the definition of "food additive" and from the application of section 409 of the FFDC Act (21 U.S.C. 348). Under the FFDC Act and § 181.1 of the agency's regulations (21 CFR 181.1), however, the prior-sanctioned use is still subject to the provisions of the law that apply to added poisonous or deleterious substances. A substance may be regulated as both a food additive and a prior-sanctioned substance if, for example, it was approved for some uses or in some products before September 6, 1958, and for other uses in other products after September 6, 1958.

Prior sanctions were not ordinarily issued as regulations by FDA. Rather, less formal means of stating approval of particular substances were generally employed. Most often what are now considered prior sanctions were letters issued by responsible agency employees in response to inquiries from manufacturers. Detailed records of these informal approvals were not kept during the decades before 1958. Thus, when a question of the status of a substance that has a long history of use in a food product is raised, the answer can only be determined by searching through FDA records and those of affected food companies to decide whether a prior sanction exists.

The burden to establish that a prior sanction exists rests with the person who desires to rely on this exemption from the food additive definition. Under § 181.5(a) of the agency's regulations (21 CFR 181.5(a)), a prior sanction "shall exist only for a specific use(s) of a substance in food, i.e., the level(s), condition(s), product(s), etc., for which there was explicit approval" by either

V 4 4 / 1 7 1

FDA or USDA before September 6, 1958. This strict interpretation of the prior sanction exemption is consistent with the overall policy of the Food Additives Amendment of 1958, i.e., to subject food ingredients to premarket testing and to impose on the proponents of their use the burden of establishing their safety.

FDA has reviewed some of the old letters, literature, and other materials in its files bearing on the question of whether a prior sanction for any of the various uses of lead was ever issued. It is clear from the materials reviewed thus far that the safety of the use of lead solder in cans was among the earliest areas of interest to FDA and its predecessor agency, the Bureau of Chemistry of USDA. The materials indicate that virtually from the enactment of the Pure Food and Drug Act of 1906, FDA advised that it was acceptable to use lead in the solder in cans if good manufacturing practice was adhered to, and if the amount of lead exposed to the can's contents was minimal. These materials also indicate that FDA advised against the use of lead-containing materials as food-contact surfaces inside food-processing and storage tanks, and against the use of lead-bearing steels where the data showed a definite lead uptake from the steel when in contact with food-simulating solvents.

The agency intends to continue to review the records in its possession that bear on the prior sanction question. The records FDA has gathered thus far on this issue have been placed on file with the FDA Hearing Clerk (address below). This material consists of letters and other records for the period from 1934 to 1967 dealing with the use of lead solder in cans.

To resolve the prior sanction issue, the agency encourages persons who intend to assert that a prior sanction exists for certain uses of lead and who believe that they have evidence of such a sanction(s) to review the evidence on file with the Hearing Clerk and to submit for filing copies of any additional pertinent documents. The agency intends, as part of any proposal issued with respect to lead to address the prior sanction issue specifically and, if appropriate, to propose to recognize the existence of a sanction by proposing to adopt a regulation in Part 181 of its regulations (21 CFR Part 181). In addition, FDA may also establish limits on the prior-sanctioned uses of lead if current limits are not currently considered to be safe. Those limits might also be included in a regulation under Part 181 or an action level under Part 109 (21 CFR Part 109) and would be based on sections 402 and 406 of the FFDC Act.

FDA emphasizes that, if the agency believes it appropriate, it may establish action levels for bringing enforcement action directly in court with respect to levels of lead in various foods without issuing a proposed rule or awaiting a resolution of the issues addressed in this document. The procedures for issuing action levels are described in §§ 109.4 and 109.6 (21 CFR 109.4, 109.6). In any enforcement action, in the absence of a tolerance established by rule, the validity of the agency action will be established in the judicial proceeding, and no issues will be foreclosed by the existence of this rulemaking proceeding.

Any uses of lead that are "prior sanctioned" are subject to regulatory action by FDA under sections 402 and 406 of the FFDC Act to the extent the food contains an added poisonous or deleterious substance that may be injurious to health, or that is not in accord with a tolerance established under section 406. The presence of lead in food can be considered poisonous or deleterious on account of the risks discussed above. Tolerances can be established for added substances, which are not food additives, if the substance is required in production or cannot be avoided by good manufacturing processes. The use of lead is necessary as a solder in the production of the tin can, but the amount of lead used should not exceed what is required or what is unavoidable under good manufacturing practices. Action levels rather than tolerances may be established in accordance with the provisions of §§ 109.4, 109.6, and 181.1 when technological changes that might affect the tolerance are foreseeable in the near future. The action level specifies the level above which FDA will bring enforcement action directly in court under section 402 of the FFDC Act.

The agency believes that in establishing any action levels and tolerances for lead, it should consider various factors, including the extent to which the use of lead can be avoided and minimized in the manufacturing process, the potential for disruption of the food supply, the level of risk posed, and the ubiquitous distribution of the substance. Feasible alternatives for the current uses of the lead-soldered tin can are not generally available, and the distribution of the food supply would be disrupted if its use were precipitately curtailed. In view of the ubiquity of lead, food in other types of packaging may also contain some background lead and pose some degree of risk from this substance. Furthermore, in view of the seriousness of the risks to infants and children from lead, it is important that the resources and efforts of the agency and the food industry be directed initially at reducing the level of lead in food likely to be consumed by them.

Accordingly, FDA intends to treat the lead that may occur in food as a result of migration from the solder seam or vent hole of cans as a food additive unless covered by a prior sanction. The lead that is in food from other sources, including any prior-sanctioned use, will continue to be treated under the provisions of the FFDC Act that apply to added poisonous or deleterious substances.

As with all portions of this notice, FDA solicits comments on the rationale and legal basis for its regulatory approach to the lead problem, discussed above.

VII. Tentative Plan to Reduce Lead Levels in Food

As the next step toward further reducing the amount of lead in food as quickly and as reasonably as possible, FDA intends to publish in the near future notices of proposed rulemaking and/or announcements of action levels that will impose more stringent restrictions on the amount of lead that may be present in food, particularly in those foods produced for infants and young children, but also including those foods intended primarily for adults but likely to be eaten in substantial amounts by children. As part of this program, the agency intends to publish documents that will—

(a) Withdraw the December 6, 1974 notice of proposed rulemaking proposing to establish a tolerance for lead in evaporated milk and evaporated skim milk (39 FR 42740), and announce an appropriate action level for these products that takes into account improvements in the ability to reduce the amounts of lead in these foods.

(b) Announce action levels for lead in canned infant formulas, canned infant fruit and vegetable juices, and glass-packed infant foods.

(c) Request information and data from manufacturers of articles used in the household in connection with food. FDA will seek information on the lead content of such articles and will proceed with its review of the proposal to revoke the "housewares exemption," which was published in the **Federal Register** of April 12, 1974 (39 FR 13285).

(d) Announce action levels for lead in other food products not previously covered (i) when data become available on the degree to which lead is required or cannot be avoided in production without causing disruption of the distribution of the nation's food supply, and (ii) when consistent with giving priority to reducing lead levels in foods for infants and children, and in foods having the highest lead levels.

FDA will also consider whether the scheduling of public hearings would be an expeditious and useful way to accumulate information and views with respect to the problem of lead in food products.

VIII. Request for Information and Data

Although FDA has in its files extensive information concerning lead, additional and current information on the following matters will greatly assist development of a reasonable and effective regulatory program:

1. Copies of documents pertaining to the prior sanction question.
2. Description of good manufacturing practices in the application of solder to cans, and in minimizing addition of lead to canned food products.
3. Composition of solder and fluxes being used.
4. Composition of can bodies, including information on tin plating if used.
5. Chemical identity of the side seam stripe and can coatings, if used.
6. Identity of sealing compounds used in affixing ends to cans.
7. Validated analytical methods for lead in food commodities, including information on sample size and methods of sample preparation.
8. Lead levels in food commodities prior to canning.
9. Amount of lead present in canned foods, by commodities on a progressive basis per production run, i.e., 1 week after canning and each month thereafter for 6 months.
10. Extent to which lead migration from cans has been and can be reduced or eliminated.
11. Progress on developing alternatives to cans containing lead solder.
12. Data of the bioavailability of solder-derived lead.
13. Information on whether lead poses a human cancer risk, and whether any inference of a human cancer risk can be drawn from the animal studies, and data on any difference in metabolism between humans and test animals or other basis for believing that humans would respond differently than test animals to the carcinogenic effect of lead.
14. Any data documenting any other reasons for distinguishing the animal studies on lead from other animal studies that do warrant an inference of human cancer risk, and any data that explain the apparent absence of widespread concern in the scientific community that lead presents a human cancer risk.
15. Information on what type of further research, if any, is needed on the issue of human cancer risk from lead.
16. Progress toward developing additional toxicity data on lead, especially on its effects on infants and children.
17. Data on the degree of risk posed by lead in various food products similar to that used to assess the risk from aflatoxins in peanuts, published in the **Federal Register** of March 3, 1978 (43 FR 8808).
18. Numerical values for lowest achievable levels for lead in canned evaporated skim milk, canned infant formulas, canned infant formula concentrates, canned infant fruit and vegetable juices, and glass-packed infant foods, with data showing the resultant total dietary intake of lead.
19. Production figures for canned products, and consumption figures by age groups.
20. Potential health, economic, and environmental impacts associated with the manufacture and use of packaging systems that would replace lead soldered cans.
21. Energy requirements associated with replacement packaging systems, as compared to those associated with lead-soldered cans.

This information will be used to define the scope of the problem of lead in food better and to establish appropriate and reasonable regulatory control mechanisms for leachable lead in canned food products in an attempt to ensure that the public is not exposed to excessive levels of lead that may be ingested.

FDA will consider whether public hearings would be an expeditious and useful way, as a supplement to the receipt of written comments, to gather information and views regarding the problem of lead in food products.

BILLING CODE 4110–03–M

[21 CFR Part 203]

[Docket No. 79N–0186]

Prescription Drug Products; Patient Labeling Requirements

Correction

In FR Doc. 79–20796 appearing on page 40016 in the issue of Friday, July 6, 1979, make the following corrections:

(1) In the center column of page 40022, third full paragraph, the 9th through the 13th lines should have read as follows: "* * * this issue. Long range effects of patient labeling will also be measured. The agency also invites other interested parties to fund and conduct * * *".

(2) In the third column of page 40022, third full paragraph, 12th line, "* * * to give products * * *" should have read "* * * to give drug products * * *".

(3) In the middle column of page 40023, 18th line from the top, "* * * they were not more likely * * *" should have read "* * * they were more likely * * *".

[EE–163–78]

Transitional Rules for Acts of Self-Dealing Involving Private Foundations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to transitional rules for acts of self-dealing between private foundations and disqualified persons. Changes to the applicable tax law were made by the Tax Reform Act of 1976. The regulations would affect all private foundations.

DATES: Written comments and requests for a public hearing must be delivered or mailed by October 30, 1979.

The amendments are proposed to be effective with respect to certain dispositions of property by private foundations after October 4, 1976.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention CC:LR:T (EE–163–78), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Margie Glass of the Employee Plans and Exempt Organizations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, (Attention: CC:LR:T) (202–566–3544, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 507, 508 and 537 of the Internal Revenue Code of 1954, and to the Regulations on Foundation Excise Taxes (26 CFR Part 53) under section 4941 of the Code. These amendments are proposed to conform the regulations to sections 1301 and 1309 of the Tax Reform Act of 1976 (90 Stat. 1713, 1729) ("the Act") and are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Explanation of Provisions

Section 101(l)(2) of the Tax Reform Act of 1969 (83 Stat. 533) created special transitional rules that exempted certain transactions between private foundations and disqualified persons from the definition of self-dealing. These rules permitted private foundations to sell, exchange, or otherwise dispose of certain "nonexcess" business holdings to disqualified persons before January 1, 1975. There was no transitional rule that permitted the disposition of property leased by a private foundation to a disqualified person. Section 1309 of the Tax Reform Act of 1976 extended the rule permitting disposition of "nonexcess" business holdings to dispositions made after October 4, 1976, and before January 1, 1977. Section 1301 of the Act generally permitted a foundation to sell, exchange, or otherwise dispose of certain property to a disqualified person if the property is being leased to the disqualified person pursuant to a binding contract in effect on October 9, 1969, and if the foundation receives no less than fair market value for the property. This provision applies to dispositions made after October 4, 1976, and before January 1, 1978.

Comments and Requests For a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commisstoner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Margie G. Glass of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Proposed amendments to the regulations

The proposed amendments to 26 CFR Parts 1 and 53 are as follows:

Income Tax Regulations (26 CFR Part 1)

Paragraph 1. The Income Tax Regulations, 26 CFR Part 1, are amended by revising paragraph (a)(8)(ii)(*c*) of § 1.507–3 to read as follows:

§ 1.507–3 Special rules; transferee foundations.

(a) *General rule.* * * *

(8) * * *

(ii) * * *

(*c*) Section 101 (l)(2) of the Tax Reform Act of 1969 (83 Stat. 533), as amended by sections 1301 and 1309 of the Tax Reform Act of 1976 (90 Stat. 1713, 1729), with respect to the provisions of section 4941.

* * * * *

Par. 2. The Income Tax Regulations are further amended by revising paragraph (b)(3) of § 1.508–3 to read as follows:

§ 1.508–3 Governing instruments.

* * * * *

(b) *Effect and nature of governing instrument.* * * *

(3) *Savings provisions.* For purposes of section 508(d)(2)(A) and (e), a governing instrument need not include any provision which is inconsistent with section 101(l)(2), (3), (4) or (5) of the Tax Reform Act of 1969 (83 Stat. 533), as amended by sections 1301 and 1309 of the Tax Reform Act of 1976 (90 Stat. 1713, 1729), with respect to the organization. Accordingly, a governing instrument complying with the requirements of subparagraph (1) of this paragraph may incorporate any savings provision contained in section 101(l)(2), (3), (4) or (5) of the Tax Reform Act of 1969, as amended by sections 1301 and 1309 of the Tax Reform Act of 1976, as a specific exception to the general provisions of paragraph (a) of this section. In addition, in the absence of any express provisions to the contrary, the exceptions contained in such savings provisions will generally be regarded as contained in a governing instrument meeting the requirements of subparagraph (1) of this paragraph.

* * * * *

Par. 3. The Income Tax Regulations are further amended by revising paragraph (d)(1)(iii) of § 1.537–1 to read as follows:

§ 1.537–1 Reasonable needs of the business.

* * * * *

(d) *Excess business holdings redemption needs.* (1) * * *

(iii) Constituted stock redemption of which before January 1, 1975, or after October 4, 1976, and before January 1, 1977, is, by reason of section 101 (l)(2)(B) of the Tax Reform Act of 1969, as amended by section 1309 of the Tax Reform Act of 1976, and § 53.4941 (d)–4 (b), permitted without imposition of tax under section 4941, but only to the extent such stock is to be redeemed before January 1, 1975 or after October 4, 1976, and before January 1, 1977, or is to be redeemed thereafter pursuant to the terms of a binding contract entered into on or before such date to redeem all of the stock of the corporation held by the private foundation on such date.

* * * * *

Foundation Excise Tax Regulations (26 CFR Part 53)

Par. 4. The Foundation Excise Tax Regulations, 26 CFR Part 53, are amended by revising the last sentence of paragraph (b)(1) of § 53.4941(d)–4 and by adding a new paragraph (f) to that section. These revised and added provisions read as follows:

§ 53.4941 (d)–4 Transitional rules.

* * * * *

(b) *Disposition of certain business holdings*—(1) *In general.* * * * For purposes of applying this paragraph in the case of a disposition completed before January 1, 1975, or after October 4, 1976, and before January 1, 1977, the amount of excess business holdings is determined under section 4943 (c) without taking subsection (c)(4) into account.

* * * * *

(f) *Disposition of leased property*—(1) *In general.* Under section 101(l)(2)(F) of the Tax Reform Act of 1969, as amended by the Tax Reform Act of 1976 (90 Stat. 1713), the sale, exchange or other disposition (other than by lease) to a disqualified person of property being leased to the disqualified person by a private foundation is not an act of self-dealing if—

(i) The private foundation is leasing substantially all of the property to the disqualified person under a lease to which paragraph (c) of this section applies;

(ii) The disposition occurs after October 4, 1976, and before January 1, 1978; and

(iii) The disposition satisfies the requirements of paragraph (f)(2) of this section.

(2) *Terms of disposition.* Paragraph (f)(1) of this section applies only if—

(i) The private foundation receives an amount that equals or exceeds the fair market value of the property either at the time of the disposition or at the time (after June 30, 1976) the contract for such disposition was executed;

(ii) In computing the fair market value of the property, no diminution of that value results from the fact that the property is subject to any lease to disqualified persons; and

(iii) At the time with respect to which paragraph (f)(2)(i) of this section is applied, the transaction would not have constituted a prohibited transaction within the meaning of section 503 (b) or the corresponding provisions of prior

law if those provisions had been applied at the time of the transaction.

Jerome Kurtz,

Commissioner of Internal Revenue.

[FR Doc. 79-27285 Filed 8-30-79; 8:45 am]

BILLING CODE 4830-01

FEDERAL EMERGENCY MANAGEMENT AGENCY

[44 CFR Part 67]

[Docket No FI-5688]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Richard W. Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872 (In Alaska and Hawaii call Toll Free Line (800) 424-9080), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.4 (a)).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

National Flood Insurance Progam; Proposed Flood Elevation Determinations

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Correction to proposed rule for the City of Tempe, Maricopa County, Arizona.

SUMMARY: Due to a recent engineering analysis, it has been determined that the correct elevation for the Upstream Corporate Limits should be 1,188 feet. This revision is in the area along the Salt River between mile stations 26.25 to 26.86 and is necessary to insure agreement with contigous studies.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, Assistant Administrator, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii call Toll Free Line (800) 424–9080), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority of Federal Insurance Administrator 44 FR 20963).

Issued: August 9, 1979.

[Docket No. FI-5325]

Revision of Proposed Flood Elevation Determinations for the City of Morgan Hill, Santa Clara County, Calif., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Morgan Hill, Santa Clara County, California.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 44 FR 20451 on April 5, 1979, and in the *San Jose Mercury*, published on or about April 5, 1979, and April 12, 1979, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, 17555 Peak Avenue, Morgan Hill, California.

Send comments to: Honorable Wayne Wengert, Mayor, City of Morgan Hill, City Hall, 17555 Peak Avenue, Morgan Hill, California 95037.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the City of Morgan Hill, California, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Coyote Creek	Boys Ranch Private Drive—100 feet upstream from centerline.	*390
Llagas Creek	1st Corporate Limits—at centerline.	*315
	2nd Corporate Limits—at centerline.	*327
West Little Llagas Creek.	1st Corporate Limits—at centerline.	*310
	Monterey Highway—150 feet upstream from centerline.	*316
	Wastsonville Road—75 feet upstream from centerline.	*318

BILLING CODE 4210-23-M

[44 CFR Part 67]

[Docket No. FI-5038]

Revision of Proposed Flood Elevation Determinations for the Town of Rocky Hill, Hartford County, Connecticut Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Rocky Hill, Hartford County, Connecticut.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 44 FR 6446 on February 1, 1979, and in the Hartford Courant, published on or about January 31, 1979, and February 7, 1979, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood prone areas and the proposed flood elevations are available for review at Town Hall, 699 Old Main Street, Rocky Hill, Connecticut.

Send comments to: Honorable Paul T. Daukas, Mayor, Town of Rocky Hill, Town Hall, 699 Old Main Street, Rocky Hill, Connecticut 06067.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or toll free line (800) 424–8872, room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the Town of Rocky Hill, Connecticut, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations are:

Source of flooding	Location	Elevation in feet, (metropolitan distnct) datum
Connecticut River	Confluence with Dividend Brook.	29
	Upstream Corporate Limits	29
Dividend Brook	Confluence with Connecticut River.	29
	Conrail Culvert—50 feet downstream from centerline.	29
	Conrail Culvert—50 feet upstream from centerline.	38
	Dividend Pond Dam—120 feet downstream from centerline.	38
	Dividend Pond Dam—25 feet upstream from centerline.	50
	Swamp Dam—50 feet downstream from centerline.	72
	Swamp Dam—75 feet upstream from centerline.	81
	Main Street Culvert—25 feet downstream from outlet.	105
	Main Street Culvert—50 feet upstream from inlet.	114
	Brook Street—150 feet downstream of centerline.	116
	Brook Street—100 feet upstream from centerline.	122

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963).

Issued: August 13, 1979.

Gloria M. Jimenez,
Federal Insurance Administrator.

[Gen. Docket No. 79-188; RM-3247; FCC 79-464]

Allocating Spectrum for, and To Establish Other Rules and Policies Pertaining to, the Use of Radio in Digital Termination Systems for the Provision of Common Carrier Digital Telecommunications Services

AGENCY: Federal Communications Commission.

ACTION: A Notice of Proposed Rule Making and Inquiry is adopted.

SUMMARY: In response to a petition filed by the Xerox Corporation, the Commission is proposing the re-allocation of frequencies in portions of the 10.55–10.68 GHz band for Digital Termination Systems. This Notice also proposes rules and policies, and makes an Inquiry as to the merits of these and other rules considered appropriate, for the establishment and operation of a new common carrier radio service utilizing such system.

DATES: Comments must be received on or before November 14, 1979, and reply comments must be received on or before December 14, 1979.

ADDRESSES: Federal Communications Commission, 1919 M Street, NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION, CONTACT:

J. Berton Withers, Jr., Spectrum Allocation Division, Office of Science and Technology, 2025 M Street, NW., Washington, D.C. 20554, (202) 632-6350—Room 7310.

James K. Smith, Esq., Common Carrier Bureau, 1919 M Street, NW., Washington, D.C. 20554, (202) 632-6910—Room 500.

In the matter of amendment of Parts 2, 21, 87 and 90 of the Commission's rules to allocate spectrum for, and to establish other rules and policies pertaining to, the use of radio in digital termination systems[1] for the provision of common carrier digital telecommunications services.

Adopted: August 1, 1979.

Released: August 29, 1979.

[1] In the remainder of this Notice, we will use the term Digital Termination Systems to refer to the two-way transmission links between the subscribers' premises and the local collection/distribution points in systems such as proposed by Xerox.

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

By the Commission: Commissioner Lee absent; Commissioner Fogarty issuing a separate statement.

I. Introduction

1. On November 16, 1978, the above numbered petition was filed with the Commission by the Xerox Corporation (hereinafter "Xerox"), requesting the re-allocation of the 130 MHz of spectrum between 10.55 and 10.68 GHz and the adoption of other rules and policies as may be necessary to permit the establishment of common carrier nationwide telecommunications networks for the high-speed, end-to-end, two-way transmission of digitally encoded information for such purposes as document distribution, computer data transfer and teleconferencing. Xerox calls the service it would provide over such a network "Electronic Message Service". The principal subscribers to such service, according to Xerox, would be widely dispersed business and governmental organizations requiring intra-company communications between offices located in major U.S. cities.

2. For intercity transmission, the proposed network would utilize terrestrial microwave and satellite facilities presently provided for in the Commission's rules. The most innovative aspect of the network would be for the use of terrestrial microwave radio to provide the final transmission link directly to subscribers' premises. The Xerox Telecommunications Network (XTEN), Xerox's intended design, would employ a "cellular" configuration of omni-directional transmitting and receiving stations (called "local nodes" by the petitioner) located throughout a metropolitan area to provide direct two-way communication with transceivers located at subscribers' premises. The local node stations would be linked to a city-wide collection/distribution station called a "city node" using conventional narrow beam microwave radio circuits. A drawing by the petitioner depicting the proposed network is contained in Appendix A to this notice.

3. It is to provide for these two segments—the communication links between the subscribers and the local node, and those between the local node and city node—of its proposed nationwide transmission network that Xerox proposes the re-allocation of spectrum. Specifically, Xerox proposes that 100 MHz be allocated for what we are calling the Digital Termination System (i.e., the links between subscribers and local nodes), and 30 MHz for the internodal transmission links. Xerox proposes that the spectrum for these facilities be obtained by re-allocating the band 10.55–10.68 GHz, which is now allocated to the mobile service (see § 2.106 of the rules). Xerox also proposes specific technical and licensing regulations pertaining to the use of the proposed spectrum including a limitation on eligibility for frequency assignment which would accept only those applicants willing and able to construct networks serving the top 100 U.S. cities within 84 months after receipt of section 214 authorization, with substantial construction to be performed in the early years.

4. Comments on the petition were received from twelve parties, and three parties filed reply comments. Most comments supported the Xerox proposed service and radio system concepts, but several parties were opposed to specific proposals in the petition. These comments and replies are summarized in Appendix B and have been taken into account in developing this notice. Based upon information submitted in response to the Xerox petition and analysis done by our staff, we are proposing in this notice the re-allocation of a portion of the spectrum requested by Xerox, because it tentatively appears that such a re-allocation would be consistent with the public interest; we are proposing technical standards pertaining to channelization, modulation, interference, etc., and other aspects of spectrum utilization; and we are addressing policies pertaining to entry eligibility, interconnection and other regulatory matters.

II. Basis for Commission Action and Organization of this Notice

5. Under the provisions of the Communications Act of 1934, as amended, 47 U.S.C. 151 et seq., the Commission is given broad responsibility and authority for the management of the radio spectrum (Title III of the Act) and for the regulation of interstate common carrier communications by wire and radio (Title II). The touchstone of our decision-making in this proceeding is embodied in two particular sections of the Communications Act. First, in section 1 (in Title I) we are required to adopt regulatory policies

> so as to make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges, for the purpose of the national defense, for the purpose of promoting safety of life and property through the use of wire and radio communication . . .

Second, in Title III, section 303(g) we are required to allocate spectrum in a manner which:

> . . . generally encourage[s] the larger and more effective use of radio in the public interest; . . .

The Xerox petition raises important issues regarding our discharge of these responsibilities, and it is the purpose of this proceeding to deal with those issues and to adopt rules and policies as may be appropriate to serve the public interest.

6. Our treatment of the issues in this Notice is organized into two major sections: the first dealing with spectrum management issues; the second with common carrier issues. Where we feel that our understanding of a particular issue is sufficient, and where appropriate, we will propose specific rules. Where a clear choice between alternative solutions is not apparent, we will discuss the alternatives and request comments. As the title states, this Notice is both a proposed rulemaking and an inquiry. However, we have attempted to identify and discuss all issues, and we intend, if justified by the record developed in response to this Notice, to resolve all issues and adopt appropriate rules and policies without requesting further public comment. For this reason, more time than usual is being provided for the preparation of comments and replies, and respondents are asked to address each issue of interest as factually and fully as possible.

III. Spectrum Management Issues

7. The Commission's responsibilities under Title III of the Communications Act of 1934, as amended, require it to allocate [2] the radio spectrum among the various non-Federal uses (radio services) and to adopt technical regulations to ensure efficient utilization of the spectrum and prevent interference between licensees. No non-Federal use of the spectrum is authorized in the United States (except by special rule waiver) unless specifically provided for in the Commission's Rules and Regulations, including in most cases an allocation of spectrum, as specified in § 2.106 of the rules. Thus, when a new use of radio is to be accommodated, the Commission must amend its rules to provide for that use in a manner consistent with proper management of the spectrum.

8. Because virtually the entire usable portion of the radio spectrum is, and has been for some time, allocated (planned) for presently defined radio services, any new use [3] which is to be accommodated requires that some portion of the spectrum be re-allocated. In other words, new services can be satisfied only by reducing [4] the amount of spectrum available to existing services. Thus public interest dictates that any such re-allocation be preceded by a finding that the new service is of higher potential benefit [5] to society than the service(s) it is displacing in the spectrum. Also, as there may be other potential new uses of a given band, each must be evaluated and weighed against each other and existing uses before decisions can be made concerning any re-allocation. Desirably, the final allocation decision adopted will represent the most valuable combination of all possible uses. We say "desirably" because the determination and comparison of potential value of radio services is, at best, an inexact process. This is especially true if projections far into the future are involved, and for this reason we normally attempt to plan domestic allocations based on requirements expected no more than about a decade in the future.

9. With the foregoing in mind, the logical first step in dealing with an allocation proposal such as that advanced by Xerox, is to evaluate the potential benefits of the proposed service to society and the dependency of those benefits on the use of radio. If it can thus be reasonably established that an allocation of spectrum is justified, we must then estimate the amount of spectrum needed for the proposed use over approximately the next decade, and select an appropriate band for reallocation. In evaluating candidate bands, the comparative benefits of other potential uses must, of course, be weighed (and it may be found that the new use cannot be fully satisfied). Finally, appropriate technical regulations must be developed which will insure efficient use of the new allocation. Before proceeding with the above analysis, however, it is well to consider whether an allocation is needed or whether the proposed service can be satisfied within existing allocations. This leads us to state the following issue:

Is a New Allocation Necessary for the Service Proposed by Xerox?

10. As mentioned above, the Xerox proposal actually involves two somewhat different uses of radio for which allocations are proposed in the petition: 100 MHz for a two-way termination system between subscribers and the so-called "local nodes"; and 30 MHz for two-way transmission between local nodes and city nodes. The latter function, although important to the system proposed by Xerox, does not appear to be a new use in terms of allocations, as it could presently be authorized in existing common carrier, terrestrial fixed point-to-point bands. Although Xerox requests 30 MHz of additional shared spectrum for this function, it does not show why presently allocated bands cannot be used. Most notable are the bands at 4, 6, 11 and 18 GHz. A check of the Commission's assignment records indicates relatively heavy use of the 4 and 6 GHz bands, but lighter use of 11 GHz and practically no use of 18 GHz. Although the lesser used bands are higher in the spectrum than that proposed by Xerox, there is no clear justification in the petition for a special allocation for this particular point-to-point function. However, we invite further comments from Xerox and others on this question.

11. We turn now to the two-way transmission links from local nodes to subscribers in the proposed Xerox network. The distinguishing aspect of this part of the network as exemplified by XTEN is the wide-angle (typically ≥ 90°) horizontal coverage of the local node transmitters. All of the existing common carrier bands mentioned above are set up for use in highly directional point-to-point systems. [6] The mixing of narrow and wide beam transmission systems in the same band is not considered desirable spectrum management practice and would lead to inefficiencies in the coordination and assignment of frequencies within a given area. Thus, it would appear that, if this portion of a network such as Xerox proposes is to be authorized, a new allocation would be required. Alternatively, a portion of one of the existing common carrier point-to-point bands could be redesignated for this point-to-multipoint use. Although this latter approach would not be a re-allocation, *per se*, (rather a re-structuring of an already-allocated common carrier band), it would have a similar effect, i.e., a reduction in the spectrum available for the presently planned use of the band, which in this case is point-to-point common carrier fixed service. Thus, before proceeding with either approach (and both will be considered in more detail below), the potential benefits in the use of radio as opposed to other transmission media for Digital Termination Systems for the service proposed by Xerox must be established.

Is the Use of Radio for Digital Termination Systems [7] Justified?

12. In its petition, Xerox claims the use of radio in lieu or wirelines for what we are calling Digital Termination Systems will result in communication services which are faster, less expensive, more reliable and of higher quality. This will be possible, according to Xerox, because radio provides wider available information bandwidth; can be optimized for digital transmission; and makes more efficient use of capital facilities.

13. Attempting at this stage to compare quantitatively the relative cost of various transmission media which are, or might be, used in Digital Termination Systems, including telephone lines, coaxial cable, optical fiber and satellites is difficult. Based on what information we have, however, it would seem that the capital costs of installing highspeed digital radio transmission links in urban areas would be substantially less than the capital costs of installing any new hard-conductor transmission system for the kind of area-wide coverage proposed by Xerox. At a minimum, Xerox's proposal offers the potential for faster, more reliable, and higher quality service. [8] Existing telephone lines are now being used for digital transmission to subscribers at apparently attractive costs, but are presently limited in available bandwidth. Even under the proposed ACS (Advanced Communications Service) offering by the Bell System, dial-up lines would be

---

[2] While the procedure used herein for allocating the spectrum is based purely on administrative decision making, comments are also invited on Appendix C to this notice which contains a discussion of market alternatives which might be used in the future to improve this process. As we point out in paragraph 32, these market forces could also aid in promoting the use of spectrally efficient radio system designs and equipment. However, our decisions on the issues raised by the petition are in no way dependent on resolution of questions on the use of the market to aid our regulatory decision making.

[3] Except for low power (Rule Part 15) and experimental (Part 5) uses which do not normally involve allocations.

[4] Even band sharing, as opposed to outright re-allocation, involves a reduction in spectrum availability for existing services.

[5] Only those benefits attributable to use of the spectrum are relevant. Thus, alternative means of accomplishing all or part of the objectives of a proposed service, but not requiring use of the spectrum, must also be evaluated.

[6] The one exception is the band 2150–2162 MHz used for one-way, Multipoint Distribution Service which also employs wide-angle transmission paths to subscribers. However, for reasons discussed in footnote [18] below, this band is not considered suitable for the uses proposed by Xerox.

[7] See footnote 1, above, for the definition used herein.

[8] For a discussion of the relative capabilities of alternative systems for providing this kind of service, see official docket file for OST working paper, "An Analysis of Alternative Systems for Digital Electronic Message System", dated May 25, 1979.

limited to 4.8 kb/s (thousand bits per second) data rate, although dedicated high-speed lines with up to 56 kb/s would also be available. Data speeds comparable to that proposed by Xerox (256 kb/s) are not now proposed for wireline users, although we are aware of experimentation being done in wireline speeds as high as 200 kb/s.[9]

14. As an alternative to either wirelines or the terrestrial radio system proposed by Xerox, users requiring highspeed information transfer could be accommodated by installing a domestic satellite earth terminal directly on their premises. However, the high capital cost of earth stations would appear to make the approach uneconomic for small-volume users. On the other hand, a terrestrial radio Digital Termination System, such as Xerox proposes, would enable many small users throughout a city to time-share a single earth station without, at the same time, being restricted to the slower transmission speeds of wirelines. Since all of the terrestrial radio facilities except the relatively inexpensive subscriber stations would also be time-shared, this approach would seem particularly beneficial for low-volume users. It would appear, therefore, that the use of radio for Digital Termination Systems would serve the public interest. This leads to the next issue.

How Much Spectrum Should be Allocated for Digital Termination Systems?

15. Xerox's procedure for determining the amount of spectrum required for Digital Termination Systems involves the following steps: (1) estimate, through market analysis, the anticipated rate of information transfer to be transmitted by all such systems in the geographical area of highest demand during the peak hour of use in a typical day, in 1990 and (2) convert that projected peak information rate into a peak spectrum bandwidth requirement based on the spectral efficiency of the radio transmission system.

16. The foregoing procedure would appear to be a reasonable method of calculating peak spectrum need and is, in fact representative of the method we normally use. If the resultant amount of spectrum were to be allocated, and the market forecasts are correct, there should be no shortage of spectrum for the new systems over the ensuing decade. However, it is not always possible to allocate according to peak requirements because of other demands for spectrum. Also, any market forecasting is subject to large error leaving considerable room for judgment in deciding how much spectrum would be required. If the potential benefits of a new radio system appear great and unanticipated uses of the system appear probable, we may tend toward generosity in the allocation, particularly in a part of the spectrum where the overall demand is light. In more crowded bands, we may allocate less spectrum than indicated by such market forecasts. In all cases, we must recognize the uncertainties in the allocation process and, through prudent planning, retain as much flexibility as possible to allow for future needs as they evolve. With these caveats thus in mind, we can proceed with our analysis of this issue.

17. Because of the detail with which Xerox presents its market study, and its apparent reasonableness, we decided to base our estimates on an evaluation[10] of Xerox's market study rather than developing independent forecasts. Our conclusion is that, although the Xerox study leaves us with many questions and uncertainties it does appear to represent a reasonable, although rough, estimate of the potential demand for the proposed service. Also, several of the parties commenting on the petition indicated general agreement between their own market assessments and that of Xerox. We therefore are accepting the Xerox market forecast as a basis for calculating the required amount of spectrum for Digital Termination Systems.

18. The peak hour information rate derived in the Xerox market study for the New York SMSA (Standard Metropolitan Statistical Area) in the year 1990 is 104.6 Mb/s (million bits per second). Thus, applying a spectral efficiency standard of 1.0 bit per second per Hertz[11] this information rate would require 105 MHz of spectrum. However, this would assume no reuse of the spectrum within an area, whereas the Xerox proposal contemplates complete spectrum re-use many times within the same city. Thus, the actual amount of spectrum needed would correspond to the information transfer that would occur within the busiest cell rather than over the entire metropolitan area. Based on our own analysis of the geographical distribution of potential users within the New York SMSA,[12] we estimate that only approximately 60% of the total projected information rate for that city will exist within the busiest cell, even in the worst-case circumstance where no line-of-sight obstructions are assumed, where a cell 6 miles in radius is centered on Manhattan. Thus, it would appear that Xerox has overestimated the amount of spectrum needed, even assuming its market projections are valid.

19. Considering the above, we conclude that an allocation of 60 MHz for Digital Termination Systems will provide adequately for the services envisioned by Xerox. This is apparent even assuming no improvements in spectrum efficiency of these systems over the next 10 or so years. However, we note that a one-half reduction in cell size in the system proposed by Xerox would increase spectrum re-use by a factor of four.[13] Such techniques could be used, if necessary, to expand the capacity of the allocation, although the economics of such measures would have to be considered. On the other hand, if these systems experience dramatic growth far beyond today's expectations or become attractive for other uses, such as voice or video, a 60 MHz allocation may be inadequate even with more efficient use. For this reason, it would be desirable, if possible, to locate the proposed allocation in a region of the spectrum where additional spectrum could be temporarily reserved for possible future allocation if required. This brings us to the next issue.

Where Should the New Allocation Be Located in the Spectrum?

20. As discussed in the introduction to this section of the Notice, a new allocation almost inevitably means a reduction in spectrum for existing services. Also, any particular band which may be a candidate for re-allocation to a particular new service could also be re-allocated for other new uses. Moreover, in addition to considering existing and other possible uses (including those of the Federal Government) of candidate bands, we must take into account the technical suitability of different portions of the spectrum for the proposed use (namely propagation conditions and available bandwidth); technology (cost, performance, availability, etc.); and

[9] See "Digital Transmission Capability of the Loop Plant", Volume I, *ICC 1979 Conference Record.*

[10] See official docket file for OPP working paper, "An Assessment of the Market Potential for Xerox's XTEN Electronic Message Service", dated March 5, 1979.

[11] Xerox proposes 0.8 bit/sec/Hertz, but we feel the higher number is feasible and preferred, as discussed in paragraph 28, below. This analysis omits explicit consideration of "overhead".

[12] From data supplied by the U.S. Department of Commerce Bureau of Economic analysis. (See official docket file for OST working paper "Amount of Spectrum Needed for a Xerox-type System at 10.6 GHz", dated June 20, 1979.)

[13] This gain in spectrum efficiency in the termination system would be partially offset by the larger number of inter-nodal links required.

international allocation agreements (*e.g.*, the Radio Regulations of the International Telecommunications Union (ITU)).

21. The order in which we apply these band selection criteria in reducing options is also important as it affects the final choices that must be made. Because it would serve no purpose to allocate spectrum that was propagationally or otherwise unsuited to the application, we first define the absolute upper and lower spectrum limits beyond which the new use would not appear feasible. Second, because of the difficulty of using domestic allocations which are in derogation of the ITU allocation plan, we eliminate from consideration, at this stage, all bands which are not allocated in Region II [14] for Fixed Service. Third, because of the basic division of spectrum allocation authority between the FCC and the Executive Branch, we eliminate bands presently designated domestically for Federal uses. The candidate bands thus remaining are then ranked in order of preference according to existing occupancy, the lesser occupied bands being most preferred. The final band selection is made from the preferred bands on the basis of a combination of several factors, including available technology and the relative merit of other potential uses of candidate bands.

22. Applying these criteria in the present case [15] quickly narrowed the preferred choices to two bands: 10.55–10.68 GHz and 17.7–19.7 GHz. [16] A closer analysis of these two possibilities [17] leads to the following conclusions: either band could be used, with little cost or performance difference in areas of low rainfall rates, but 18 GHz systems could be more expensive in areas of high rainfall; present utilization of both bands is light and not a basis for preference; technology (equipment) appears more readily available and proven at 10 than at 18 GHz. Thus, it appears that 10.6 GHz would be the preferred band even considering that it is in a part of the spectrum which is now generally more in demand than 18 GHz. We are therefore proposing an allocation in the 10 GHz range. However, we are not ruling out the possibility of using 18 GHz, and comments on both alternatives are invited.

23. Looking more specifically at the 10.55–10.68 GHz band we find that several potential new uses, in addition to Xerox's proposal, were brought to the forefront during our preparation for the upcoming 1979 World Administrative Radio Conference (WARC). The final U.S. proposals [18] for this band, if adopted by the WARC, would provide additional domestic allocation choices for this band. Specifically, we are referring to maritime services in the 10.55–10.6 GHz band and passive space sensors in the 10.6–10.68 GHz band. To what extent these new services may be implemented domestically, if provided for by the WARC, will be decided through subsequent domestic allocation proceedings. However, the fact that these services were included in the U.S. proposals indicates at least a tentative judgment that some future domestic allocation provision is anticipated. We would not wish, therefore, to foreclose such future choices at this time unless clearly necessary to satisfy other higher priority domestic needs of an urgent nature. Such does not appear to be the case here. The available spectrum in this band, if properly planned and shared, should be adequate to meet all of the envisioned needs.[19]

24. Our proposed allocation plan for this band is set forth in Appendix D to this Notice. It should be noted that the plan provides an immediate allocation of 60 MHz for Digital Termination Systems of the kind proposed by Xerox. The plan is also arranged in such a way as to provide future flexibility if we decide at a later date to implement other services which the U.S. has proposed to WARC. For example, by placing the subscriber transmitters in the upper end of the band, we minimize potential interference to possible future passive sensor operations.[20] Also, by placing the proposed new allocation above 10.57 GHz, we retain the option of implementing maritime safety services between 10.55 and 10.57 GHz, for which services the U.S. proposes that priority be given in this band. Finally, two fixed service "reserve" bands are being proposed adjacent to the proposed new allocations to provide future allocation flexibility to meet what may be a more expansive growth in the use of Digital Termination Systems than now envisioned on the basis of present market forces (see paragraph 19 above). The remaining portions of the band will remain as presently allocated, at least until after the WARC results are known. As a final point, the two bands proposed to be allocated for Digital Termination Systems as well as the two reserve bands are arranged in the table so that a uniform separation of 65 MHz can be provided between the subscriber and local node frequencies. This spacing, proposed by Xerox, will facilitate duplex operation of the system and also allows for an efficient arrangement of the allocations within the band. To insure efficiency of use of the allocation, technical standards must then be adopted—which leads to the final allocation issue.

What Technical Standards Need to be Adopted to Insure Efficient Use of the Spectrum?

25. To respond fully to the petition Xerox has filed, the Commission must analyze the major technical proposals which Xerox recommends the Commission adopt. The following section discusses these major parameters and requests comments regarding the merits of adopting each standard. We strongly urge members of the public to address the technical parameters in detail in their comments so that the Commission will have the best information on which to make a final determination. The technical standards which will be addressed are: (1) the advisibility of adopting a standard which requires that licensees of Digital Termination Systems use a cellular design; (2) what an appropriate channel width might be for these systems; (3) what modulation spectral efficiency should be employed; (4) what power levels and antenna types and sizes are appropriate; and (5) what

[14] As defined in the ITU Regulations, geographical Region II includes all of the U.S. and the rest of North and South America.

[15] See official docket file OCE working papers "Spectrum Availability for EMS" dated December 22, 1978 and "Spectrum Availability for DEMS" January 9, 1979.

[16] The 2150–2162 MHz band presently allocated for multipoint distribution systems was eliminated due to its small bandwidth, its limitation to one-way transmission, and its present level of utilization. This band was mentioned in several of the comments to the petition.

[17] See official docket file for OST working paper "Analysis of the 10 and 18 GHz bands for Digital Electronic Message Service" dated July 12, 1979.

[18] Forwarded by the U.S. State Department to the ITU, and incorporated into ITU Document 45, "Proposal for Allocation Table in the Bands 1215 MHz–40 GHz," dated January 31, 1979.

[19] This would not be possible if, as proposed by Litton in its petition (RM–2788), and in its comment in Docket 20271 (Notice of Inquiry on preparations for WARC) and on the Xerox Petition, this band were allocated for microwave cooking. The basic electromagnetic incompatibility of such use with the other proposed services would preclude effective spectrum sharing and result in inefficient use of this band. (See official docket file for OCE working paper, "Electromagnetic Compatibility Analyses for Microwave Ovens, NASA Passive Sensors, Radio Astronomy, and Xerox—proposed Common Carrier Electronic Message service in the 10.55 to 10.68 GHz band" dated March 12, 1979.) For this reason, the U.S. did not include the Litton proposal for this band in its proposals to the WARC. Because a domestic provision for consumer devices such as microwave ovens in derogation of the ITU allocation table would not be feasible, we are not considering such devices as a potential domestic use of this band. However, we will not dispose of the Litton petition until the final results of the WARC are known.

[20] See OCE working paper referenced in footnote 19.

V 4 4 / 1 7 1

frequency coordination procedures should be required.

26. Xerox has developed a system design (XTEN) [21] which uses the cellular concept of frequency reuse. This design uses vertical and horizontal polarization discrimination between the same frequencies in adjoining cells as well as sectorized radiating antennas at the nodal stations to provide for complete reuse of frequencies in each cell throughout the entire SMSA. Estimates for reuse efficiency of other cellular systems, such as in land mobile applications, appear to be less than the Xerox approach. We therefore seek comments on the technical feasibility of Xerox's design. Also, while we are proposing that Digital Termination Systems be required to employ the cellular reuse concept, if a more efficient systems concept exists or if this one could be improved, we would appreciate the presentation of that information in the comments.

27. In regard to assignment bandwidth, we are concerned that the proposed assignment of wideband channels—Xerox proposes 5 MHz—may initially result in a relatively inefficient use of the spectrum by Digital Termination System licensees. We therefore ask comments on the technical/economic feasibility of assigning smaller increments of bandwidth, say 2.5 or 1.0 MHz, which would tend to avoid the lengthy periods of time of non-use of portions of the wider assignments; would provide for more system operators; and would reduce the probability of comparative hearings. [22]

28. Our investigation of the modulation technique to be used by Xerox indicates to us that a basic 250 kHz channel, in lieu of 277 kHz as is contemplated for use by XTEN, could easily accommodate a 256 kb/s bit rate. From our investigation on what is sometimes called Fast Frequency Shift Keying (FFSK), deviation ratios as low as 0.5 seem feasible. Xerox proposes to use a deviation ratio of 1.0. However, the work of Pelchat, [23] indicates that a ratio of around 0.7 may be more efficient. If the pelchat figure were used, a channel width of less than 250 kHz could accommodate the 256 kb/s bit rate. Additionally, such a reduction of the deviation ratio would have the proposed systems conform to the 1.0 bit per second per Hertz efficiency standard presently in the Rules. [24] Therefore, we are proposing to adopt a standard channel width of 250 kHz. We recognize that some channel widths other than 250 kHz may be more appropriate if bit rates other than 265 kb/s are required. Therefore, we are specifically requesting comment on the optimum bit rate and channel width for the proposed systems. Alternatively, we ask for comment on the feasibility of a flexible policy which would allow system designers to choose the channel width that would be optimum for their particular designs as long as the 1.0 bit per second per Hertz efficiency standard is met.

29. We realize, of course, that while the number of bits per second per Hertz is a technical measure of spectral efficiency, it is not the sole determinant of the overall transmission efficiency of a communications system in using its assigned bandwidth. The amount of useful customer data transferred per unit of spectrum under actual operating conditions is perhaps a more meaningful measure of such efficiency. Hence, the percentage of potential channel capacity consumed by "overhead" functions such as addressing, error detection and correction, retransmission, reservation of channels, etc., is also important. We therefore desire comments on the entire range of issues affecting the overall efficiency of a system in using the spectrum. In particular we expect proponents of specific system designs to detail the expected information throughput of their systems per unit of spectrum over a given geographical area under actual operating conditions.

30. Xerox has also proposed certain standards for transmitter power and antenna size. Our analysis indicates that the power levels proposed by Xerox appear reasonable for cellular-type Digital Termination Systems. These levels are 0.5 watt for the local node stations and 0.04 watt for the subscriber stations. The proposed use of standard B antennas, instead of the standard A antennas presently required by the Rules, [25] likewise appears to be a reasonable trade-off between performance and cost. Additionally, most of the potential interference problems which might be related to either of these two parameters—power level or antenna size—would be principally intrasystem problems under the control of the system operator and may not be a major regulatory concern.

31. The proposal to amend the present coordination rules, however, could cause problems between systems. The present rules prohibit harmful interference being caused to an existing licensee. [26] Xerox has proposed that licensees make "exceptional efforts to avoid harmful interference". We do not believe that Xerox has presented sufficient information for the Commission to propose this change in the Rules. Digital Termination System operators will have a considerable investment of capital in their systems and could be significantly harmed if interference occurred. Therefore, the present requirement that harmful interference will not be caused, is to be maintained.

32. Many of these questions relating to system design might not arise if users were charged the fair-market value for spectrum use. Each user would be faced with making appropriate trade-offs between implementation of a radio service consuming costly spectrum and use of high-cost spectrally efficient equipment (achieving high data rates in narrower bandwidths, for example). Market prices for specrum use could lead to economically-efficient choices among alternative spectrum utilizations and system designs, and at the same time, save the administrative costs which are incurred in trying to approximate these efficient choices through rulemakings. As stated in footnote 2 above, however, none of our decisional responses on matters directly relevant to Xerox's petition for rulemaking are subject to resolution of questions on the use of market alternatives. Nevertheless, we invite comment on how the Commission might implement a system for charging for the use of spectrum assuming we had the legal authority to do so.

33. In summary, we believe that use of radio spectrum for systems to provide for and foster new and innovative services is consistent with the Act. In accord with our mandate in Section 1 (partially quoted in paragraph 5, above), to the extent that "rapid" and "efficient" digital communication services are not currently available to "all the people of the United States", spectrum to support systems providing such services would appear to be an "effective use of radio in the public interest". Therefore, we have proposed an allocation of 10.6 GHz of 60 MHz for Digital Termination Systems of the type proposed by Zerox plus an additional 30 MHz in reserve for possible allocation to such systems in the future. Additionally, we have

[21] Note that XTEN is Xerox's intended system implementation, and whether it would be authorized is a matter of a separate licensing procedure for the service Xerox proposes.

[22] See more on the comparative hearing issue at paragraph 40 C (4) below.

[23] Pelchat, M. G., *IEEE Transactions of Space Electronics and Telemetry*. Volume one, SET–10, March, 1964.

[24] Rule § 21.122(a)(1).

[25] Rule § 21.100(c) states that antennas meeting performance standard A small be employed, except in areas not subject to frequency congestion, where standard B antennas may be used.

[26] Rule § 21.100(d) states a licensee "will avoid harmful interference to other users."

concluded tentatively that the cellular design for Digital Termination Systems appears most spectrally efficient, and have discussed certain technical standards regarding channel assignment, modulation efficiency, power levels, antenna size and coordination procedures. The proposed allocation changes are contained in Appendix D, and the other proposals have been discussed in the text of this Notice. The public is invited to comment on each of these proposals.

IV. Common Carrier Regulatory Issues

34. The foregoing sections address the allocation of spectrum for Digital Termination Systems which would constitute essential links in a nationwide high-speed digital transmission system. In proposing that such spectrum and facilities be used to support a high speed interstate digital electronic message service, the Xerox proposal reflects current developments in electronics and market applications of computer processing technology. In this regard, computers and data processing have created demand for high speed communications channels, and these channels have increasingly been made available. The Commission has encouraged both of these interdependent activities by allowing for private development of microwave communications systems, [27] by encouraging new entry by competitive providers of common carrier microwave communications, [28] and by encouraging competitive entry in provision of satellite communications. [29] These decisions were in part intended to assure that adequate communications capability would be available to support integrated computer communications and data processing.

35. Xerox's proposal for establishment of a new type of service is consistent with this trend. Xerox is proposing that computer-driven technological developments be used to allow electronic means to aid in dissemination of documents which at present are largely distributed manually. The technology for this is presently available; however, communications channels of sufficient bandwidth are not. The existing limitation which has prevented such service offerings has been the bandwidth of channels which are available at customers' premises to connect terminal devices. Ordinary terrestrial wire channels are either of voice bandwidth or specialized private line channels with up to about 56 KB/s data transmission rates. [30] Domestic satellite channels have the capability of providing high bandwidth channels at customers' premises, if each customer is willing to sustain the expense of constructing an earth station at its premises—an economic constraint which has tended to limit use of such earth stations to only the largest of users. Moreover, such specialized and private line high bandwidth channels are currently not "public" networks in the sense that a given customer cannot generally use them to communicate with another customer of the offering carrier; they are "private" and used only for communications among the same customer's locations.

36. Xerox, and virtually all of the parties who have commented in this proceeding are urging that we allocate spectrum to support services which could be available to the public today, given the existing terminal technology, but for a lack of communications channels of sufficient bandwidth universally available at customers' premises. Through our regulatory authority over interstate and foreign communications channels, be they wire or radio, we largely control the availability of such a capability. For this reason, we regard our decisional responses to the issues of this proceeding as important, and as defining and shaping the future availability of digital transmission services to the public. Our decisions herein on spectrum allocation, licensing policies, and technical operation of these digital systems will have broad impact on growth of new services, and must, of necessity, weigh in broad public interest considerations.

37. The Commission has traditionally encouraged open entry in communications on the premise that such regulatory policies would redound to the benefit of the public. For example, in *Specialized Common Carriers*, we found that specialized markets were largely undeveloped, and that authorization of new entry would meet an increasing and widespread public demand for availability of diverse and flexible means for meeting specialized communications requirements. [31] Here, too, we believe there is a need to adopt regulatory policies allowing entry for various high-speed digital transmission services.

38. Also, it has been this Commission's consistent policy to adopt regulatory policies which encourage and promote availability of new and innovative communications offerings and services to the public, and we view our proposed allocation action as consistent with this history. However, Xerox has put forth a specific proposal which addresses various technical and regulatory parameters which go beyond the question of spectrum allocation. In this regard, we do not believe it appropriate at this time for us to define precisely the contours of the new services, nor to set forth specific regulatory policies affecting the market structure and potential entrants, nor to establish the nature and degree of regulation to be exercised in this area. Xerox's proposal raises substantial regulatory considerations in these areas. For example, concern is expressed that Xerox's proposed entry requirements and the uses to which such digital transmission systems may be put are too limiting. Moreover, various other regulatory concerns arise which need addressing before a comprehensive determination can be made with respect to procedural and operational rules governing use of such systems. We are, therefore, soliciting comments on these and related issues. It is our intent and desire to be in a position to formulate the necessary rules at the conclusion of the comment period such that those end-to-end digital services permitted over Digital Termination Systems could be provided on a nationwide basis without the need for futher proceedings. Accordingly, in addition to other matters raised in this proceeding, we specifically seek comment on the following issues relative to establishing appropriate Commission policies and rules governing the proposed spectrum allocation and the provision of common carrier services over such systems.

39. *Industry Structure Issues*

A. Xerox has proposed specific language to amend Part 2 of the FCC's Rules (frequency allocations), which would define the usage to which these systems may be placed. [32] Will this

[30] AT&T offers a 1.5 Mb/s specialized digital private line DDS offering, but this is not generally available for public use. Indeed, the only present user of this service is government.

[31] *Specialized Common Carriers*, *supra*, at 905–10.

[32] Xerox has proposed Section 2.1 of the Commission's Rules be amended to add:

Electronic Message Service. A two-way domestic public radio service rendered on specifically allocated microwave frequencies between a fixed common carrier receiving and transmitting station (possibly transmitting in an omni-directional or sector pattern) and customer premises transceivers

Footnotes continued on next page

A G 3 1 7 9 UMI

definition adequately define the systems' new uses in a manner which promotes the objectives of the Communications Act (*e.g.*, Sections 1, 214, 303, 309, 313, and 314 of the Act)? What alternative definition would better promote these objectives? What alternative definition would better serve the dual objectives of encouraging development of new and innovative common carrier service offerings and of assuring that spectrally inefficient uses do not proliferate over these systems?

B. In light of comments submitted in A, above, what is the appropriate market definition and what public interest factors should be considered in establishing the structure under which digital services would be provided over theses systems (*e.g.* entry barriers imposed through licensee qualification standards, limitations on relationships with non-carrier or affilitated entities, limitations on conduct, etc.)?

C. Xerox is proposing that entry be limited to entities which are willing and able to commit themselves to operating in the top 100 SMSAs within 84 months of receipt of Section 214 authorization, with substantial construction to be performed in the early years:

(1) Is there a reasonable economic justification for this requirement for entry?

(2) In light of your comments on the frequency assignment policies we should follow in licensing these systems, what would be the effect of such policies on the structure of the industry in both the short term and the long term?

(3) Xerox justifies its proposed entry barriers in part by claiming that the nature of the services which it proposes requires a single entity to assure compatibility of otherwise disparate portions of end-to-end communications paths. What is the validity of this argument for services provided over these systems? What should the FCC do to assure end-to-end service and development of a "Nationwide . . . communications service" (Section 1 of the Act)?

(4) Xerox also justifies its proposed entry qualifications by claiming that they will avoid a necessity for time-consuming mutually-exclusive licensing proceedings. Since available spectrum and nationwide licensing policies would only support a limited number of entrants, there are other measures short of an entry limitation that could be used to avoid a necessity for mutually-exclusive licensing proceedings:

a. Without addressing the question of our legal authority to adopt at this time such an approach,[33] would some form of auction of the spectrum available or the use of spectrum fees avoid a necessity for mutually-exclusive licensing proceedings? Please comment on the public benefits (and detriments) of a licensing-by-auction or fees policy for spectrum to support this service; any preliminary findings of legal, technical and financial qualifications which might be required; how either type of system might be implemented; and alternative licensing policies which might be adopted for some, but not all of the spectrum to promote other governmental objectives.

b. Alternately, we invite any specific proposals to simplify comparative consideration of mutually exclusive applications. For example, we request comment on whether the Commission could establish certain threshold qualifications for competing applicants such that it could then reasonably conclude further comparative evaluation would be unnecessary or unlikely to reveal significant differences among applicants. Could the Commission then rely on some form of random selection from a pool of qualified applicants? Please comment also on any proposals by which the Commission might rank applicants individually or by categories ranging from those most qualified to least qualified. In the event it is decided that a number of applicants fall within the most qualified category, could the final selection be made by random selection? Please comment on the public benefits (and detriments) of such an approach to assigning spectrum for this proposed service; any preliminary findings of legal, technical and financial qualifications which might be required; and whether such "pool" of applicants from which licensees are to be selected should be national, regional, or something less than regional.

c. Considering the reserve bands proposed in the preceding section, would there be merit in a policy which would allow for the assignment of channels in the reserve bands in areas where mutually-exclusive applications are filed?

d. The technical/economic feasibility of smaller bandwidth assignments (e.g., 5 MHz, 2 MHz, 1 MHz, etc.) is addressed in paragraph 27, above. Taking such feasibility into account, would there be merit in a flexible spectrum assignment policy which would, within certain maximum and minimum limits, divide the allocated spectrum into assigned bandwidths according to the initial number of applicants within a given city? For example, given a 60 MHz allocation, the assigned bandwidth per applicant in a city having 10 applicants would be 6 MHz; in a city with 20 applicants, the assigned bandwidth would be 3 MHz; etc. There would probably be a lower bandwidth limit, perhaps 1 MHz, below which a cellular type system such as XTEN would be uneconomic or inefficient due to interference between a large number of small adjacent systems. It may also be desirable to limit the maximum assigned bandwidth to any applicant for the reason mentioned in paragraph 27, above.

(5) Assuming we were to require applicants to offer nationwide service through our licensing policies, to what extent, if any, might smaller entities be permitted to engage in associative or joint ventures and be licensed this service?

(6) What would be the public benefits and detriments of licensing schemes based on (a) regional rather than nationwide licensing (as proposed by Xerox) or (b) less than a regional scheme based on mandatory interconnection and technical compatability? Does the experience of 1500 interconnected local telephone companies providing interconnected nationwide service suggest the viability of something less than a nationwide licensing policy?

D. To what extent, if any, and under what constraints or conditions, may existing communications common carriers be authorized to operate digital transmission systems? Are diffferent standards required for different classes of common carriers (*e.g.*, carriers with monopoly revenue bases, carriers engaged solely in competitive markets, etc.)?

E. What relationship is desirable between the licensees of satellite systems and the licensees of terrestrial microwave facilities or Digital Termination Systems?

(1) Is there any reason to bar these entities from being one and the same?

(2) If these entities are not identical, should they be required to order their relationship by tariff (as is currently required), or would efficiency be promoted by allowing such a relationship to be ordered by private contract?

F. What regulatory constraints or safeguards, if any, should we adopt to assure that carriers operating the proposed systems fully and vigorously compete with one another, and with other technologies and means of communications?

G. What resale, sharing, or interconnection obligations or restrictions, if any, should be imposed with respect to carriers providing services over these systems?

H. Are there, or should there be, any restrictions on interconnection by carriers or users of these systems with international communications channels provided by international communications common carriers?

40. *Jurisdiction*

A. Of what relevance, if any, are Sections 2(b) and 221(b) of the Communications Act to services provided over digital transmission systems?

(1) Will such systems be used for intrastate communication? Should they be? If so, do such systems introduce state regulation of aspects of the system or services provided over such systems?

(2) Is it likely that intrastate use of this service will be so *de minimis* as to justify preemption of state regulation on the ground that any intrastate communications will be only ancillary to an interstate communications service? (*See, e.g., TWX*, 38 F.C.C. 1127 (1965).)

(3) If we were to adopt comprehensive federal regulatory policies in favor of competition in providing these services over these systems, would such a policy serve to preempt inconsistent state regulation?

B. Since all communications in this service will be using radio, are such communications wholly interstate under Section 301 of the Communications Act?

C. Does the Congressional purpose of the Communications Act creating the FCC for the purpose of making available "so far as possible, to all the people of the United States, a rapid, efficient, Nationwide . . . communications service . . ." (Section 1) provide an independent basis for preemption of inconsistent state regulatory policies over this service? (*See also*, Sections 2(a) and 3(b).)

41. *Technical Limitations, Restrictions, or Requirements over Facilities Used for this Service*

A. To what extent, if any, should nationwide technical standards be adopted to promote the availability of nationwide service:

(1) Governing interconnection of authorized services among carriers who offer them?

(2) Governing interconnection of these services with communications offerings of other common carriers, or with other offerings of carriers who offer these services?

(3) Governing connection of these services with their users; terminal equipment?

B. Should licensees be required to make available to the public necessary interface information?

C. In view of the likelihood that these facilities will be used for communications which are private or sensitive:

(1) To what extent, if any, is Commission action required to assure secrecy of communications and to promote the objectives of Section 605 of the Communications Act?

(2) Will the marketplace adequately assure that required security measures are undertaken in the absence of regulatory constraints?

D. What other technical standards or requirements, if any, are needed to assure users' rights to make reasonable use of carrier-furnished services and facilities in ways which are privately beneficial without being publicly harmful?

E. Will the licensing actions emanating from this proceeding cause sufficient environmental impact to require the filing of environmental impact statements? [34]

42. *Voice Uses of this Spectrum*

A. The Commission has established a policy of allowing users of communications common carrier facilities to seek to optimize their uses of these facilities by removing unnecessary restrictions on their use. See, *Hush-a-Phone*, 22 F.C.C. 112 (1957); *Carterfone*, 13 F.C.C. 2d 423 (1968) and 14 F.C.C. 2d 571 (1968); *Interstate MTS and WATS*, 56 F.C.C. 2d 593 (1975); *Resale and Shared Use*, 60 F.C.C. 2d 261 (1976) and 62 F.C.C. 2d 588 (1977); *AT&T* ("Piece Out"), 60 F.C.C. 2d 939 (1976). In view of these established Commission policies, and in view of the spectrum which might be made available for common carrier communications as a result of this proceeding:

(1) Would use of the systems at issue herein for voice services promote, be of no effect on, or be inconsistent with the statutory requirement of Section 303(g) of the Act that we make regulations which generally encourage the larger and more effective use of radio?

(2) Would use of the systems at issue herein for voice communications by multiple vendors be consistent with or contrary to FCC policies on competition for intercity communications?

B. To what extent and under what conditions could voice communications over these systems provide an alternative to local distribution facilities now provided by (monopoly) local telephone companies to specialized common carriers and domestic satellite carriers? Should such uses be authorized in this proceeding?

C. What resale, sharing and interconnection obligations and restrictions, if any, should be imposed and authorized, respectively, for carriers offering voice communications over these systems?

D. What impact, if any, would use of these systems for voice communications have on competition and diversity of supply in the communications equipment market(s) for:

(1) Equipment used by service vendors?

(2) Equipment employed by users of the service?

43. *Common Carrier Requirements*

A. *Tariffs.* What degree of specificity in tariffs will be required to satisfy Section 203 of the Communications Act in view of the market structure which may develop in this service? Would the public interest be served by a partial or complete relaxation of the requirements of our rules implementing Section 203 of the Act?

B. *Facilities Certification.* In view of the extent of competition that may exist in this service, would the public interest be served by a modification or elimination of detailed Section 214 certification requirements?

C. *Accounting.* The present Uniform System of Accounts was constructed for telephone companies and telegraph companies, and may not be efficient for interstate common carriers using solely radio facilities.

(1) Does Section 220 of the Communications Act give the Commission discretion to waive accounting requirements for carriers providing service over the proposed systems (contrast Sections 220(a) with (b))? If so, should we so waive?

(2) Are the accounting systems within our rules (for telephone and telegraph carriers) in whole or in part applicable to carriers providing this service? Should they be?

(3) To what extent are accounting safeguards required for carriers providing this service, given your views of the degree of competition that could exist in this market?

(4) In view of your comments on the foregoing, what changes should be made to existing accounting rules, and what

---

Footnotes continued from last page

(transmitting in a point-to-point pattern) for the delivery or acceptance of communications to or from subscribers to intercity common carrier communications service.

The issues raised in this document are not limited to services covered by this definition, but apply to any service which may be authorized over the proposed digital transmission systems.

[33] We note that under pending legislation (S.611) the Commission would be permitted to use auctions, fees, and/or lotteries to assign licenses as a means of avoiding protracted mutually-exclusive licensing proceedings. In the event that such legislation is adopted, or that the existing statute is construed as authorizing such an approach to licensing, we wish to have compiled a record on such matters. A final decision is in no way dependent on authorization of such an approach to licensing.

[34] See 42 U.S.C. 4332.

UMI

V 4 4 / 1 7 1

new accounting rules should be adopted, for carriers providing this service?

(5) Are different accounting requirements warranted for carriers:

a. with monopoly revenue bases;

b. engaged solely in competitive markets;

assuming that such existing communications carriers will be licensed to operate these systems?

44. In the foregoing paragraphs we have attempted to identify issues which may be relevant in adopting appropriate policies and rules for entities providing authorized services over the proposed digital transmission systems. We also seek comment on any other issues which have not been raised, but which may be relevant to such determinations. It is our hope that parties will give these issues serious consideration such that a thorough and complete record can be developed. Assuming a sufficient record to make the requisite public interest determinations, we may be in a position to adopt the underlying procedural and operational rules necessary to implement service over the proposed digital transmission systems.

45. For further information concerning procedures to follow with respect to this rulemaking proceeding, contact J. Bertron Withers, Jr. (202) 632-6350. However, members of the public should note that from the time a Notice of Proposed Rulemaking is issued until the matter is no longer subject to Commission consideration or court review, *ex parte* contacts made to the Commission in proceedings such as this one will be disclosed in the public docket file. An *ex parte* contact is a message (spoken or written) concerning the merits of the pending rulemaking made to a Commissioner, a Commissioner's assistant, or other FCC staff members, other than comments officially filed at the Commission or oral presentations requested by the Commission with all parties present. A summary of the Commission's procedures governing *ex parte* contacts in informal rulemaking [35] is available from the Commission's Consumer Assistance Office, FCC, Washington, D.C. 20554, (202) 632-2700.

46. Authority for this proceeding is contained in Sections 4(i), 303, and 403 of the Communications Act of 1934, as amended. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's rules and regulations, interested parties may file on or before November 14, 1979, and reply comments on or before December 14, 1979. All relevant and timely comments, reply comments, and any other relevant information in the record established in this docket will be taken into account prior to the Commission's taking any final action in this proceeding.

47. In accordance with the provisions of Section 1.419 of the Commission's rules, an original and 5 copies of all comments, replies, statements, briefs or other documents shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Public Reference Room at its Headquarters in Washington, D.C.

Federal Communications Commission.[36]

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-C

Appendix B

Comments

Twelve sets of comments were received, submitted by: Visions, Ltd. (Visions); the Southern Pacific Communications Company (SPCC); Satellite Business Systems (SBS); the Rochester Telephone Corporation (Rochester Telephone); Microband Corporation of America (Microband) [1]; Litton Microwave Cooking Products, Inc. (Litton); GTE Service Corporation (GTE); the Computer and Business Equipment Manufacturers Association (CBEMA); the Common Carrier Association for Telecommunications (CCAT); the American Telephone and Telegraph Company (AT&T); the American Satellite Corporation (ASC); and the Central Committee on Telecommunications of the American Petroleum Institute (API). Reply comments were received from Xerox, CCAT, and Visions.

Support

Generally, a re-allocation of spectrum for EMS [2] is supported by the commenters on the Xerox petition for rulemaking. While expressing clear opposition to the allocation, Litton has no objection in principle to the institution of an EMS. The Multipoint Distribution Service (MDS) interests, represented by CCAT, Microband, and Visions, while raising pointed areas of concern on the institution of EMS, do not directly oppose the reallocation of spectrum for the new service. However, in its reply comments, Visions calls for flexibility in the rules ultimately established, because it is contended that the future demand for such a service is not presently clear. AT&T, while questioning the need for the entire band to be exclusively allocated to the new service, supports Xerox's contention that a nationwide network to provide EMS-like services would serve the public interest.

The specialized carriers, ASC, SBS, and SPCC, all basically support the allocation for the newly proposed service. SPCC particularly points to a continuing need for new inter-city carriers to have alternate means of local distribution because the established carriers have used their "monopoly status" to act anti-competively toward new inter-city entrants.

Opposition

Litton and the MDS interests do oppose, or seriously question the re-allocation of the 10.6 GHz band to the new EMS service. Litton argues for Xerox to make a full engineering showing as to whether alternative frequency bands are available, and whether the full 100 MHz proposed is required to satisfy the public interest. CCAT agrees with Litton in that, as expressed in CCAT's reply comments, Xerox gives no detailed explanation of why 8–14 GHz is optimum for EMS. Also, Litton maintains that the Commission should concurrently consider its rulemaking petition RM–2788 for the operation of microwave ovens. Xerox questions in its reply comments whether additional frequencies for microwave ovens should be allowed to undermine the prospect for advancements in communications services like an EMS. Xerox recommends that the Litton petition be denied.

CCAT, an MDS industry association, contends that the proposed EMS is really MDS with return channels, and that such configuration utilizing a greater amount of spectrum would be anti-competitive. CCAT urges the Commission to allow for the concurrent use of 2150–2162 MHz for EMS. As an alternative, CCAT suggests that the 2 GHz frequencies could be used in conjunction with the 10 GHz frequencies as return channels—which Xerox, in its reply comments, asserts would not achieve any of the cited advantages, nor allow for frequency reuse. While the MDS interests attest to the existence of the nationwide market identified by Xerox, they contend that they should not be unfairly prevented from having the same opportunity to satisfy this market that EMS operators would have. The MDS industry points out that the Commission in authorizing MDS [3] expressly contemplated the carriage of the various forms of communications traffic that the proposed EMS would carry.

Barriers To Entry

Despite general support for the re-allocation of spectrum to the proposed EMS, many of the specifics of the Xerox proposal are vigorously challenged. Several of the parties contend that the proposed criteria for qualifying as an EMS carrier could serve as barriers to entry. The comments focus on the proposed requirements that an EMS carrier serve a minimum of 100 Standard Metropolitan Statistical Areas (SMSA), and that it have the financial muscle necessary to construct such a national system within 84 months. In this regard, several commenters contend that interconnection of smaller, local or regional carriers could provide the desired nationwide service. Representative of the tone of the comments on alleged barriers to entry is that of Rochester Telephone which characterizes "Xerox's proposal (as) replete with anti-competitive requirements. . .".

Choice of Band

Commenting parties other than Litton and the MDS interests also address various aspects of the appropriateness of the 10.6 GHz band for EMS, and whether Xerox's proposals could result in an efficient utilization of the band. API fears that because of the U.S. proposal to the WARC to have satellites share portions of the 12.2–12.7 GHz band with the currently allocated Operational Fixed stations, "a loss of utility of the 12 GHz band" could result. Should this occur, API contends that the 10.55–10.68 GHz band could serve as highly desirable relief spectrum for these private fixed stations. The Commission is requested by API to re-allocate only a minimal portion of the band, pending development of the EMS and the expected frequency congestion of the Operational Fixed stations. Only after examining these developments, API advises, should the Commission make an additional allocation to EMS. AT&T points to 38.6–40.0 GHz as a frequency band the Commission contemplated being used for local distribution. By implication, it challenges the Xerox assertion that frequencies above 14 GHz, like 39 GHz, are not optimal for EMS. AT&T also questions, along with SBS and Visions, whether an allocation for the entire 10.55–10.68 GHz band should not accommodate other common carrier services than that proposed by Xerox. These questions also relate to dissatisfaction expressed by SBS, AT&T and SPCC with the proposed definitions for DEMS and its constituent parts. Xerox's reply is that its definition of EMS is to preclude there not being sufficient spectrum to accommodate the new service along with services which are already provided for at other frequencies. More generally, Rochester Telephone reminds the Commission that it should consider alternatives uses of the band making a social cost-benefit analysis for all of the competing uses for the 10.55–10.68 GHz band.

Technical Standards

SPCC and SBS contend that Xerox's proposal to reduce the spectral efficiency to 0.8 bit per second per Hertz from that mandated by our Rules [4] raises the question of whether the proposal is consistent with the Commission's objective of mandating adequate spectral efficiency. Xerox argues in reply that the spectrum efficiency achieved in a metropolitan area, considering frequency reuse within different radio cells, would exceed the Rule requirement of 1.0 bit per second per Hertz. Xerox suggests that its proposed system should not be required to achieve spectral efficiency standards more appropriately applied to wide bandwidth channels. SBS also maintains that the Xerox-proposed 5 MHz channel width assigned to each carrier in a given market is inconsistent with the transmission rates of 1.544 Mb/s and 6.312 Mb/s, standard for wideband digital transmission in the U.S. Xerox minimizes this concern in its reply comments saying that it is not aware of a market requirement for end-use at these speeds. Xerox does recognize these transmission rates as being internal to the Bell System, and suggests that a given EMS carrier could obtain the 6.312 Mb/s rate in a 5 MHz channel by employing altered modulation parameters.

The petitioner responds to contention that its proposed frequency coordination requirements are inadequate by focusing on its proposed XTEN implementation, and asserting that any interference would be "unlikely" or "rare". Xerox also replies to comments that its proposal for Standard B subscriber antennas would increase the interference potential in a given service area. The petitioner emphasizes that the nature of its proposed system in which no channel (in a given service area) would be shared with another licensee would make higher-gain Standard A antennas with better discrimination "unnecessary".

Scope of Inquiry

GTE concludes in its comments that the Commission should approve a developmental phase for the EMS Xerox proposes, under Part 5 of the Rules. In the alternative, GTE proposes that a Notice of Inquiry be instituted to investigate the many issues attendant to the petition. Rochester Telephone, in pointing out the identity of issues which may be raised relating to the MTS/WATS Inquiry [5] and to the reopened Computer Inquiry [6] suggests that the Commission carefully consider these issues while not stepping outside of its legal jurisdictiion. In this connection, Rochester Telephone advises that the Commission should be mindful of the advantages to the consuming public of full competition. Xerox, in its reply comments, contends that since EMS traffic will be "primarily non-voice", and transmission will be digital rather than analog, the market for voice will be small in comparison to the MTS/WATS market. Therefore, Xerox opposes consideration of these questions as "issues of remote relevance" which could only "prolong and complicate" our consideration of the rulemaking petition.

Appendix C

Economic Alternatives for Spectrum Allocation and Management

The discussion in the text of this Notice indicates many of the factors involved in spectrum allocation under the present administrative process. That process is, in essence, a centralized pre-planning of the use of the electromagnetic spectrum at the national level. Such pre-planning is intended to accomplish certain objectives including properly rationing scarce spectrum among alternative radio services; minimizing harmful interference between radio services; promoting technically efficient use of the spectrum; and ensuring compliance with international treaties. Over the years, this centralized allocation process has resulted in an orderly development of the utilization of the spectrum, with direct administrative costs which have been quite small compared to the enormous value of radiocommunications to the nation.

Nevertheless, the administrative process has often been criticized as inflexible and inefficient. In the future as the spectrum becomes increasingly scarce, we can certainly expect this process to become more complex and expensive to administer. Also, large investments in equipment based upon existing allocations will make it more difficult to re-allocate spectrum to higher valued uses administratively. Not only will direct administrative costs increase, but the built-in inertia against change will create significant indirect costs in terms of lost opportunities for the development of new communications services.

As an alternative to a centralized administrative process, reliance on market forces to allocate spectrum would provide a more direct means of determining the highest economically valued uses for spectrum, a determination that, at best, we can only hope to approximate under our current allocation procedures. If users were charged the fair market value for the use of the spectrum, only those uses for which the value of using the spectrum exceeds the cost would be implemented. A system of rationing by price would ensure that spectrum is allocated to its most economically valuable uses. Users would have an incentive to seek substitutes for spectrum when it is less costly to do so; to use only as much spectrum as they are willing to pay for; to share spectrum, and to develop new spectrum-saving technologies.

Because no method has thus far been been developed to define freemarket property rights that can be transferred and enforced at reasonable cost, the Commission is still compelled to use the administrative process described. However, even within the administrative process, reliance on market forces to the maximum feasible extent would provide additional information on the value of the spectrum in alternative uses, which would greatly assist in deciding the best allocation of the spectrum among services.

We introduce this discussion here in the hope that it will enhance public understanding of the spectrum allocation process and how that process might be improved through greater reliance on the marketplace. We have noted elsewhere in the text of this Notice how the use of market mechanisms might reduce the need for administrative involvement in other aspects of spectrum management. We welcome comments on any of these general discussions, in addition to the specific policies and regulatory issues developed in this proceeding. However, we do not intend that our final decision on the specific allocation or other issues of immediate concern, discussed in the body of this Notice, would depend on a resolution of the merits of using economic alternatives or the question of our statutory authority to apply such alternatives.

Appendix D

It is proposed that Part 2 of Chapter I of Title 47 of the Code of Federal Regulations be amended as follows:

1. In § 2.1 a new definition be added in alphabetical order as follows:

[1] Additional informal comments were received from Microband on February 8, 1979, subsequent to the comment period deadlines (comments were due January 8, 1979; reply comments, January 30, 1979). These informal comments are not specifically addressed in this Notice, but because of the appropriateness of the issues raised therein, will be made a part of, and considered in further proceedings in this docket. Microband, of course, may submit, as it sees fit, formal comments in this proceeding.

[2] This term is used only as the petitioner proposes it, and as to which the commenters replied. We have chosen (in the body of this document) to focus our allocation discussion on the facilities (which we call Digital Termination Systems) which would be used to provide an EMS.

[3] Report and Order, *Multipoint Distribution Service*, 45 F.C.C. 2d 616 (1974).

[4] Rule Section 21.122(a)(1) requires that microwave digital modulation employed below 15 GHz be capable of a bit rate at least equal to the bandwidth in Hertz required to accommodate that bit rate, i.e. 1.0 bit per second per Hertz.

[5] 67 F.C.C. 2d 757 (1978).

[6] 64 F.C.C. 2d 771 (1977); 61 F.C.C. 2d 103 (1976).

V 4 4 / 1 7 1
A G 3 1 7 9
UMI

§ 2.1 Definitions.

* * * * *

Digital termination nodal station. A radio station providing two-way communications directly with subscriber stations in a digital termination system.

Digital termination subscriber station. Any one of the radio transceiving stations located at subscribers' premises lying within the coverage area of a nodal station in a digital termination system.

Digital termination systems. A fixed point-to-multipoint common carrier radio system providing two-way digital communications between subscriber stations and the local node stations arranged in a cellular pattern.

* * * * *

2. In § 2.106, the band 10.55–10.68 GHz in columns 7 through 11 be amended as follows:

§ 2.106 Table of frequency allocations.[1]

* * * * * * *

Band (GHz)	Service	Class of station	Frequency (GHz)	Nature of services of stations
7	8	9	10	11
* * * * * * *				
10.55–10.57	Mobile	Operational fixed		
		Operational mobile		
10.57–10.6	Fixed	Fixed		Digital termination nodal stations.
10.6–10.615	Fixed			Reserve.
10.615–10.635	Mobile	Operational fixed		
		Operational mobile		
10.635–10.665	Fixed	Fixed		Digital termination subscriber stations.
10.665–10.68	Fixed			Reserve.
* * * * * * *				

[1] As part of the U.S. proposals to the WARC, the 10.55–10.6 GHz band is to be shared on a primary basis between maritime and fixed services. Additionally, priority is proposed to be given maritime safety operations within 10.55–10.57 GHz. This priority is provided for by proposed Footnote 3782A to the international Table of Frequency Allocations. The U.S. also proposes that terrestrial fixed and mobile services operating within 10.6–10.7 GHz (and 18.6–18.8 GHz) shall be limited to a maximum equivalent radiated power of +35 dBW, with the power delivered to the antenna not to exceed −3 dBW. These limits are provided for by proposed Footnote 3783B to the Table.

SEPARATE STATEMENT OF COMMISSIONER JOSEPH R. FOGARTY

In Re: Amendment of Parts 2, 21, 87, and 90 of the Rules to Allocate Spectrum for, and to Establish Other Rules and Policies Pertaining to, the Use of Radio in Digital Termination Systems for the Provision of Common Carrier Digital Telecommunications Services—Notice of Proposed Rule Making and Inquiry.

Xerox Corporation is to be commended for its proposed commitment to the establishment and operation of new common carrier nationwide digital communications service networks. We at the Commission are largely confined to talk about telecommunications competition and its benefits; it is up to the private sector and innovative entrepreneurs like Xerox to put their investment and technological talent where our theory and mouth are.

Because the proposed end-to-end, high-speed, digital information transfer system offers unique and substantial benefits to the telecommunications consumer, the Commission has wisely decided to issue a Notice of Proposed Rule Making covering all issues which must be determined before operational system applications may be accepted. While the technical and regulatory questions to be decided are neither simple nor easy, it is the Commission's stated intention to resolve all issues and adopt appropriate rules and policies without requesting further comment, if that course of action is supported by the record developed in response to this Notice. I trust that interested parties will take us at our word and submit full and complete comments in timely fashion.

BILLING CODE 6712-01-M

[47 CFR Part 90]

[PR Docket No. 79-107]

Multiple Licensing of Land Mobile Radio Systems ("Community Repeaters") in the Bands 806–812 and 851–866 MHz

AGENCY: Federal Communications Commission.

ACTION: Order extending time for filing comments.

SUMMARY: The Chief, Private Radio Bureau, has extended the time for filing comments and replies in this rule making proceeding at the request of two parties who urged that additional time was warranted. The comment and reply dates have been extended by 60 days.

DATES: Comments must be received on or before October 23, 1979 and Reply Comments must be received on or before December 5, 1979.

ADDRESSES: Federal Communications Commission, 2025 M Street, NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Lewis H. Goldman, Private Radio Bureau Rules Division, Washington, D.C. 20554 (202) 632–6497.

In the matter of an inquiry concerning the multiple licensing of land mobile radio systems ("community repeaters") in the bands 806–812 and 851–866 MHz, PR Docket No. 79–107, 44 FR 30135, May 24, 1979.

Order

Adopted: August 17, 1979.

Released: August 21, 1979.

1. The Chief, Private Radio Bureau has before him for consideration an August 10, 1979, motion of Motorola, Inc. (Motorola) for a 60 day extension of time in which to file comments and replies in the above-captioned proceeding. Also before the Bureau are comments submitted by the General Electric Company (General Electric) in support of Motorola's motion and a partial opposition to the motion filed by California Mobile Radio Association (CMRA).

2. Motorola points to the scope and complexity of the issues raised in the Notice of Inquiry as the basis for the additional time it seeks in which to respond. General Electric urges that we grant an extension of not less than 30 days because key personnel of that compnay whose consultation is necessary to the preparation of General Electric comments are not available, largely due to a plant shutdown. CMRA, on the other hand, alleges that the requested extension of time is excessive and that any delay beyond the 15 day extension which it deems appropriate would prejudice its interests in a prompt resolution of certain abuses relating to multiple licensing of land mobile radio facilities.

3. We do not find merit in CMRA's objections. The instant proceeding was initiated by a Notice of Inquiry, and there are no specific rule making proposals before the public the adoption of which would be delayed by a grant of the requested extension. Moreover, the issues raised in the Notice are indeed broad and complex. We thus believe that the public interest will be best served by giving the parties the fullest opportunity to provide the Commission with the most comprehensive comments on the issues raised in the Notice.

4. Accordingly, Motorola's motion is granted. The filing dates for comments and replies in the above-captioned proceeding are hereby extended to October 23, and December 5, 1979, respectively.

Federal Communications Commission.

Carlos V. Roberts,

Chief, Private Radio Bureau.

Notices

Federal Register
Vol. 44, No. 171
Friday, August 31, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

Chemical and Gas Storage Building, Ames, Iowa; Issuance of Negative Declaration

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of Availability of Environmental Analysis and Negative Declaration.

SUMMARY: This gives notice that the Animal and Plant Health Inspection Service is not preparing an environmental impact statement concerning the construction of a chemical and gas storage building for the Pathology, Toxicology and Parasitology Laboratory, a division of the National Veterinary Services Laboratories, located in Ames, Iowa. The environmental assessment of this action indicates that the proposed structure of the subject facility will not cause significant adverse local, regional, or national impacts on the environment in the future. As a result of these findings, it has been determined that the preparation and review of an environmental impact statement is not needed for this action.

ADDRESSES: Request for copies of the environmental analysis should be directed to the Energy and Environmental Staff, Architectural Engineering, Administrative Services Division, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 271, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

Copies are available for public inspection during regular working hours at the following locations: The Office, Pathology, Toxicology and Parasitology Laboratory, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, 711 East Lincoln Way, Ames, IA 50010 and the Director's Office, National Veterinary Services Laboratories, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, 13th Street and Dayton Avenue, Ames, IA 50010.

FOR FURTHER INFORMATION: Contact John H. Green, Energy and Environmental Staff, Area Code (301) 436–8237.

SUPPLEMENTAL INFORMATION: The proposed storage facility would be erected to the rear of the laboratory facility now occupying 711 East Lincoln Way. Chemicals and gas cylinders are presently stored throughout the laboratory under recommended storage conditions; however, the laboratory building is not fire resistant and a potential accident could cause serious injury and/or death and property damage. The purpose of this proposed fire resistant facility is to add an additional margin of safety for the protection of laboratory personnel and property.

Various safety features are designed into this proposed storage facility to achieve this purpose. This negative declaration has been filed with the U.S. Environmental Protection Agency and with various Federal, State and local agencies.

No administrative action will be taken until 15 days after the date of this publication.

This notice has been reviewed under the U.S. Department of Agriculture criteria established to implement EO 12044, "Improving Government Regulations." A determination has been made that this notice should not be classified significant under those criteria. The environmental assesment referred to in the notice meets the requirements of EO 12044 and Secretary's Memorandum 1955 for an impact analysis statement. The environmental analysis is available from the Energy Environmental Staff, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Hyattsville, MD 20782.

Done at Washington, D.C., this 24th day of August 1979.

M. T. Goff,
Acting Administrator, Animal and Plant Health Inspection Service.

Food Safety and Quality Service

Solicitation of Information; Net Weight Labeling

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Notice and solicitation of information.

SUMMARY: This notice announces the completion and availability of a staff report entitled "Assessment of Proposed Net Weight Labeling Regulations," prepared by USDA's Economics, Statistics, and Cooperatives Service (ESCS) for the Food Safety and Quality Service. As a result of the report, the Department is soliciting the views of consumers, industry, State and local weights and measures officials, and other interested parties on the need for and the nature of any modifications to an earlier proposal on this subject.

DATE: All comments must be received on or before October 30, 1979. Any comments received after that date will not be considered.

ADDRESS: Written comments to Executive Secretariat, Attn: Annie Johnson, Room 3807, South Agriculture Building, Food Safety and Quality Service, U.S. Department of Agrilcuture, Washington, D.C. 20250. Oral comments to Dr. William Dubbert (202/447-7470).

FOR FURTHER INFORMATION CONTACT: Dr. William Dubbert, Acting Director of Staffs, Technical Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202/447-7470).

SUPPLEMENTARY INFORMATION:

Comments

Interested persons are invited to submit comments concerning this notice. Written comments must be sent in duplicate to the office of the Executive Secretariat. Comments should bear reference to the date and page number of this issue of the **Federal Register.** Any person desiring opportunity for oral presentation of views concerning this notice must make such request to Dr. Dubbert so that arrangements may be made for such views to be presented. A transcript shall be made of all views orally presented. All comments submitted pursuant to this notice will be made available for public inspection in the office of the Executive Secretariat during regular hours of business.

Background

Under the authority of the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*) the Food Safety and Quality Service (FSQS), United States Department of Agriculture proposed new net weight regulations for meat and poultry products on December 2, 1977 (42 FR 61279-84). The Economics, Statistics, and Cooperatives Service (ESCS) of USDA was later asked to independently review the proposal and its impact in light of all available evidence. The ESCS report has now been received by FSQS. The following is the Executive Summary of the ESCS report:

Executive Summary

"The regulations proposed in response to the petition have two objectives: (1) to insure that the weight of usable meat and poultry purchased by consumers is at least equal to the weight stated on the package, and (2) to enable States to enforce strict net weight standards at retail.

The principal features of the proposal are:

1. Free liquids as well as juices, fats, and solids absorbed by the packaging material would be excluded from a product's net weight. Net weight would, therefore, equal drained weight.
2. The allowance for moisture loss due to evaporation would be eliminated. The average weight for products from the same lot would be required to equal or exceed the labeled net weight. Single packages, however, would be permitted actual weights below the labeled weight by a specified amount.
3. Federal net weight standards would be established for bulk shipments or wholesale sized packages.
4. An FSQS approved net weight quality control program would be required at most Federally-inspected meat and poultry plants.

After the proposal appeared in the Federal Register, public comments were received. There was widespread disagreement concerning both the need for the proposal and its economic impact.

FSQS awarded a contract to the Consumer Federation of America to provide an analysis of the proposal. Following submission of that study report, USDA's Economics, Statistics, and Cooperatives Service was asked to review the available evidence and provide its own assessment of the need for the proposal and the potential economic impact.

The [ESCS] study concludes that the proposal would succeed in achieving the two objectives defined by FSQS—consumers could be assured that the weight of usable meat and poultry purchased is equal to the labeled weight and States would be able to enforce a more strict net weight standard at retail. However, the study also concludes that the second objective (enforceable regulations for the States) could probably be accomplished as effectively under a system that allows free liquid as part of the product's net weight.

With respect to the definition of tare and current industry practices, the study concludes:

1. There is a high degree of compliance with the present net weight regulations and survey results indicate no evidence of consistent economic adulteration by any firm.
2. Local rules and enforcement procedures *do* influence the amount of drained weight now in product packages. Products tested in those localities using dry tare consistently have a lower average tare as a percent of gross weight.
3. The type and time of packaging does influence the amount of drained weight in product packages. Air-chilled pre-pack chicken and in-store packages have significantly less average drain as a percent of labeled net weight.

The study also concludes that the effects of the proposed rule change have been grossly misunderstood by both consumers and producers. Consumers have argued that, without a drained weight rule, they must pay "chicken prices for water". Producers, on the other hand, have argued that the proposal will add to their costs because more product will have to be packed in each consumer package. Neither assessment is accurate since the amount of drained weight meat available for sale is constant regardless of the net weight rule in effect.

Consumers cannot expect the reported price per pound of product to remain unchanged if free liquids are excluded from labeled product weights as a result of a drained weight rule. The price per pound on the label can be expected to increase and increase most for those products with relatively more free liquid. However, the cost to consumers for *usable* product would remain unchanged. In the case of random weight products (such as whole chickens), the labeled price per pound would increase, but the labeled weight would decrease by an offsetting amount. However, what consumers pay for usable product would remain unchanged. In the case of fixed weight products (such as bacon), some packers may have to add product to make certain the weight, at time of purchase, equals the fixed weight (1 lb., 2 lbs., etc.) on the label. The per package costs to consumers would be higher. However, because consumers would be receiving more usable product, the real price per pound would remain unchanged.

Contrary to contentions of many producers, actual producer costs are not increased because of the change in tare.

For random weight packages, the weight and price per pound will simply be adjusted to remove the weight of the free liquid; there is no "overfill" and processing costs per drained weight pound are unaffected. In the case of fixed weight packages some processors will admittedly need to add more product to each package. But, because the amount of drained weight meat is not affected by a labeling rule, there will be fewer fixed weight packages processed. Again, processing costs per drained weight pound are unaffected.

The main benefit of a drained weight system would be to increase the accuracy of the information available in the marketplace for *all* meat and poultry products. Consumers would be better able to make per pound price comparisons. And producers would not be competitively disadvantaged by those who use techniques that result in a higher proportion of free liquid to usable product (immersion chilled vs. air chilled). Producers of products having relatively less free liquid would no longer be placed at a competitive disadvantage by net weight rules which allow counting drained liquids as part of the product weight. Finally, the buyers of bulk packed products will have a clearer standard for checking weights of the shipments they receive. Such a standard will be helpful mainly to small buyers who may now be reluctant to adjust invoices to correct for short-weight shipments (a common practice among large volume buyers).

Predicting the *net effect* of the proposed changes on total consumer expenditures for meat and poultry products is complicated since consumer responses to the change in product information being provided are uncertain. If consumers have been appropriately discounting the free liquid, there should be no net effect. However, if the reported price per pound under current net weight rules has been accepted as an accurate reflection of relative product value, some consumers may shift to products that appear to become relatively less expensive as a result of the proposed change. If this second result is argued as the "most likely" the argument for a rule change becomes more compelling.

The quality control requirements of the proposed rule would increase industry costs $59 million to $116 million, mostly because additional personnel would be hired. The upper end of the estimate is based on the assumption that each of the 5,680 plants affected by the proposal would hire one additional full-time employee at $20,000 per year. The low end also assumes that many smaller plants would do some new hiring but also would be able to utilize existing personnel. It also assumes a less frequent rate of sampling at all plants. Assuming all the quality-control costs (potentially $116 million) are passed on to consumers, the increase in price per pound would be less than one-half of one cent ($116 million divided by 34 billion pounds equals 0.3 cents).

The major additional cost to State and local governments would be about $421,000 in new equipment to enforce the drained weight inspection procedure. There also may be some additional costs resulting for the need to purchase more pre-packed packages for weighing (under the drained weight system, packages are opened and the product drained before weighing). In addition, State and local governments might need to increase the number of inspectors in order to obtain the same coverage. The proposed net weight checking procedures are considerably more time consuming than under a dry tare standard. Most State and local officials surveyed said they believed that these additional costs would have to be absorbed by current budgets. About 10% felt their States might appropriate new funds for net weight inspection.

There may also be additional costs to some retailers resulting from the drained weight sampling procedures. Retailers may, in some areas, incur the expense of rewrapping products that have been opened and weighed, or they may have to absorb the cost of products that cannot be repackaged and are not purchased by the government inspectors."

Availability

Copies of the full report are available without charge from the Office of Information, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250 and from the following regional information offices:

Connie Crunkleton, Regional Director, Information Division, USDA, Room 206, 1718 Peachtree Street, NW., Atlanta, GA 30309, (404) 257–4154.

Herb C. Jackson, Regional Director, Information Division, USDA, Room 936, 536 South Clark Street, Chicago, IL 60605, (312) 353–3631.

Harold C. Bryson, Regional Director, Information Division, USDA, Room 5040, 1100 Commerce Street, Dallas, TX 75242, (214) 749–3331.

Brian Killikelly, Regional Director, Information Division, USDA, Room 1653, 26 Federal Plaza, New York, NY 10007, (212) 264–1145.

Comments

The Department encourages consumers, industry, State and local agencies and other interested groups to review the report and submit comments within 60 days regarding its overall content, thoroughness and quality, as well as comments regarding the specific recommendations contained therein. More specifically, the Department is interested in obtaining views on the following questions as an aid in determining the proper course of action by the Department.

State and Local Enforcement

1. Given the evidence in the ESCS study of the rate of compliance with State and local net weight standards at retail, why should FSQS establish a new regulation? Or why should it not establish a new regulation?

2. What is the evidence that contradicts or modifies the ESCS findings on compliance?

3. If the ESCS findings are accurate, what would account for an apparently high rate of compliance with State and local standards?

Type of Tare

4. In light of the ESCS findings, if a new Federal net weight standard is established, should it be based on dry tare, wet tare, or drained weight?

5. How valuable to consumers is the additional information provided by a drained weight method?

6. To what extent do consumers now take into account that the weight of products includes free liquid, and that some products contain more free liquid than others?

7. How much significance should FSQS give to the ESCS finding that a drained weight system would result in a "perceived" price per lb. increase for meat and poultry products, and would have an upward effect on the Consumer Price Index? (A drained weight system is one in which free liquid would not be counted as part of a product's labeled net weight.)

Moisture Loss Due to Evaporation

8. What evidence runs counter to the ESCS conclusion that most meat and poultry products, as presently package, lose only a negligible amount of moisture due to evaporation (shrinkage)? If the ESCS conclusion is correct, why do we need allowances for moisture loss?

Quality Control

9. Are the mandatory quality control provisions of the proposed regulation necessary in order to achieve accurate net weights at retail (under a dry tare system, a wet tare system, or a drained weight system)?

10. Do the ESCS estimates of the costs to industry of quality control represent reasonable projections? If not, what additional information should be taken into account?

The Department will carefully consider comments to these and all other issues raised in the report in considering the alternatives for further regulatory action in this area.

Done in Washington, D.C., on August 27, 1979.

Donald L. Houston,

Administrator, Food Safety and Quality Service.

BILLING CODE 3410-37-M

Rural Electrification Administration

KAMO Electric Cooperative, Vinita, Okla.; Proposed Loan Guarantee

Under the authority of Pub. L. 93–32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 20–22 (Guarantee of Loans for Bulk Power Supply Facilities), notice is hereby given that the Administrator of REA will consider (a) providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $6,111,000 to KAMO Electric Cooperative of Vinita, Oklahoma, and (b) supplementing such a loan with an insured REA loan at 5 percent interest in the approximate amount of $9,166,000 to this cooperative. These loan funds will be used to finance approximately 111 miles of 69 kV transmission line and related facilities.

Legally organized lending agencies capable of making, holding and servicing the loan proposed to be guaranteed may obtain information on the proposed project, including the engineering and economic feasibility studies and the proposed schedule for the advances to the borrower of the guaranteed loan funds from Mr. B. Dean Sanger, Manager, KAMO Electric Cooperative, P.O. Box 577, Vinita, Oklahoma 74301.

In order to be considered, proposals must be submitted on or before October 1, 1979, to Mr. Sanger. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as KAMO Electric and REA deem appropriate. Prospective lenders are advised that the guaranteed financing for this project is available from the Federal Financing Bank under a standing agreement with the Rural Electrification Administration.

Copies of REA Bulletin 20–22 are available from the Director, Office of Information and Public Affairs, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 23rd day of August 1979.

Robert W. Feragen,

Administrator, Rural Electrification Administration.

BILLING CODE 3410-15-M

Environmental Impact Statement; Availability of Final Statement Colstrip Project

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, and Section 69–6504 R.C.M. 1947 of the Montana Environmental Policy Act of 1971, the Department of the Interior, in cooperation with the Bonneville Power Administration, has completed the final environmental impact statement (EIS) on the proposed construction and operation of the Colstrip generating units 3 and 4 in Rosebud County, Montana, and the associated coal mine and electric power transmission system (proposed Colstrip Project). The Rural Electrification Administration (REA) has participated in the preparation of this EIS as Cooperating Agency No. USDA–REA–EIS (ADM 79–8–F), pursuant to § 1501.6 of the Council on Environmental Quality (CEQ) Regulations, and intends to use it to fulfill its requirements under the National Environmental Policy Act. In this case, REA's anticipated potential actions are those of guaranteeing loans for two power generation and transmission (G&T) cooperatives, Central Montana Electric G&T Cooperative, Inc., and Upper Missouri G&T Electric Cooperative, Inc.; the first proposes to own 7 percent of the Colstrip Project, and the latter proposes to own 3 percent.

The final EIS consists of three volumes (Volumes 1, 2 and 3). Volume 1 and 2 were originally distributed in January 1979, as the draft EIS. Volume 3 is a supplement to Volumes 1 and 2. It contains changes to Volumes 1 and 2 in the form of revisions, additions, deletions or corrections. It also responds to the public and agency comments received during the public review period. The draft EIS was issued on January 5, 1979, and the public comment period ended on March 17, 1979.

During the review time, letters commenting on the draft EIS were received at the Colstrip EIS Manager's Office, P.O. Box 758, Kalispell, Montana 59901. Also, public meetings were held on February 26, 1979, in Butte, Montana; February 27, 1979, in Helena, Montana; February 28, 1979, in Missoula, Montana; March 1, 1979, in Billings, Montana; and March 3, 1979, in Forsyth, Montana. The transcripts from these public meetings are available for review at the Colstrip EIS Manager's Office at the above address, and the Public Information Office, Bonneville Power Administration, 1002 North East Holladay Street, Portland, Oregon 97208.

In addition to the designated federal offices and public libraries listed in the Geological Survey's **Federal Register** Notice of August 3, 1979, at which copies of the Colstrip Project Final EIS are available, additional copies will be available for public inspection at the offices of REA in the South Agriculture Building, 12th and Independence Avenue, SW., Washington, D.C., Room 1268, at the offices of Central Montana Electric G&T Cooperative, Inc., 928 Broadwater Street, Billings, Montana 59102, and at the offices of Upper Missouri G&T Electric Cooperative, Inc., Sidney, Montana 59270.

Comments concerning the environmental impact of the proposed construction should be addressed to Mr. Steve A. Onisko, Colstrip EIS Team Leader, Route SH, P.O. Box 3621, Portland, Oregon 97208. Comments must be received within 30 days of this Notice to be considered in connection with the proposed action.

Final REA action, with respect to this matter (including any release of funds), may be taken only after REA has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 27th day of August, 1979.

Robert W. Feragen,

Administrator, Rural Electrification Administration.

BILLING CODE 3410-15-M

CIVIL AERONAUTICS BOARD

[Order 79–8–133; Docket 36447]

Northwest Alaska Bush Route Proceeding; Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 24th day of August, 1979.

We decided, in the Northwest Alaska Service Investigation, Order 79–8–132, to

lift the suspension of Alaska Airlines (ASA) authority and to certify Great Northern Airlines' (GNA) over the mainline routes in Northwest Alaska.

In that proceeding, the United States Postal Service expressed a concern that additional costs would be required to perform the mail service to certain Alaska bush points currently handled by Wien Air Alaska (Wien), the incumbent air carrier, through subcontracting arrangements with air taxis.[1]

In order to promote the efficient administration of the mail carriage system in Northwest Alaska, this show cause proceeding is being instituted to propose authority to those certificated carriers to carry mail to those bush points.

We tentatively find that this grant of authority to the bush points to GNA and ASA will give them and the Postal Service maximum flexibility to restructure, as needed, the existing system of mail service to Northwest Alaska, and to respond quickly and adequately to changing conditions in the future. This additional grant of authority is not predicated on any present intention of the two airlines to commence service to these bush points nor do we find that these isolated communities can support competitive services at this time.

Rather, competitive awards in the northwest Alaska mainline markets coupled with a grant of additional authority to carry mail to the bush points is an approach that best promotes a sound and stable air transportation system in the area. Competition on the mailine routes will improve existing services and provide other benefits to Alaskan passengers. Vital mail service to the bush points [2] will be advanced by giving USPS additional options for developing a more efficient mail carriage system.

To insure that the public convenience and necessity is best served, we intend to defer the effectiveness of this new authority, assuming that we make final our tentative conclusions, until December 1, 1979. This temporary delay will allow the Postal Service and the incumbent air carrier sufficient time to make internal adjustments, as necessary. The impact on the incumbent and the Postal Service will be lessened and the two competitors will be able to establish new services as warranted.

In brief, this proposed grant of authority has the potential for some significant public service contribution by expanding the options for service in the Northwest Alaskan market.

Accordingly, 1. We direct all interested persons to show cause why we should not issue an order making final the tentative findings and conclusions stated above, amending the certificate of public convenience and necessity of Great Northern Airlines for Route #208 and Alaska Airlines for Route #124, so as to authorize them to engage in the air transportation of mail after December 1, 1979, to the bush points served between Nome and Kotzebue, on the one hand, and Shismaref, Wales, Tin City, Brevig, Teller, Gambell, Savoonga, Solomon, Galovin, Council, White Mountain, Elm, Koyuk, Shaktoulik, Cape Lisburne, Point Hope, Kivaline, Noatak, Ambler, Kabuk, Shungnak, Noorvid, Selawik, Buckland, Candle, Kiana, and Deering, on the other;

2. We direct any interested persons having objections to the issuance of an order making final any of the proposed findings, conclusions, or certificate amendments set forth here, to file with us and serve upon all persons listed in paragraph 5, no later than 30 days from the service date of this order, a statement of objections, together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections; answers shall be due no later than 10 days thereafter;

3. If timely and properly supported objections are filed, we will accord full consideration to the matters and issues raised by the objections before we take further action;

4. In the event no objections are filed, we will deem all further procedural steps to have been waived and we may proceed to enter an order in accordance with the tentative findings and conclusions set forth here; and

5. This order shall be served upon all persons named in the service list of Docket 31571.

We will publish this order in the Federal Register.

By the Civil Aeronautics Board:
Phyllis T. Kaylor,
Secretary.

USAir, et al.; Nonstop Authority Between Denver and Minneapolis

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause (79-8-123)

SUMMARY: The Board is proposing to award nonstop authority between Denver and Minneapolis to USAir (Allegheny Airlines), Hughes Airwest, Northwest Airlines, Ozark Air Lines, Trans World Airlines, and United Air Lines, and to any other fit, willing, and able carrier the fitness of which can be established by officially noticeable material.

The complete text of this order is available as noted below.

DATES: All interested persons having objections to the Board issuing an order making final the tentative findings and conclusions shall file, by October 1, 1979, a statement of objections, together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections. Such filings shall be served upon all parties listed below.

Additional Data: All further applicants are directed to file applications, motions to consolidate, illustrative service proposals, environmental evaluations, and estimates of fuel to be consumed in the first year no later than September 14, 1979.

ADDRESSES: Objections to the issuance of a final order, or additional data as described above, should be filed in Docket 36440, which we have entitled the *Denver-Minneapolis Show-Cause Proceeding*. They should be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

In addition, copies of such filings should be served on USAir (Allegheny Airlines); Hughes Airwest; Northwest Airlines; Ozark Air Lines; Trans World Airlines; United Air Lines; Western Air Lines; Minneapolis-Saint Paul Metropolitan Airports Commission; and the City of Denver.

FOR FURTHER INFORMATION CONTACT: Anne W. Stockvis, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C., 20428, (202) 673-5354.

SUPPLEMENTARY INFORMATION: The complete text of Order 79-8-123 is available from the Distribution Section, Room 516, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 79-8-123 to that address.

By the Civil Aeronautics Board: August 23, 1979.
Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits

Notice is hereby given that, during the week ended August 24, 1979 CAB has received the applications listed below, which request the issuance, amendment, or renewal of certificates of public convenience and necessity or foreign air carrier permits under Subpart Q of 14 CFR 302.

Answers to foreign permit applications are due 28 days after the application is filed. Answers to certificate applications requesting restriction removal are due within 14 days of the filing of the application. Answers to conforming applications in a restriction removal proceeding are due 28 days after the filing of the original application. Answers to certificate applications (other than restriction removals) are due 28 days after the filing of the application. Answers to conforming applications or those filed in conjunction with a motion to modify scope are due within 42 days after the original application was filed. If you are in doubt as to the type of application which has been filed, contact the applicant, the Bureau of Pricing and Domestic Aviation (in interstate and overseas cases) or the Bureau of International Aviation (in foreign air transportation cases).

Subpart Q Applications

Date filed	Docket No.	Description
Aug. 22, 1979	36436	Alia—The Royal Jordanian Airlines Corporation, c/o Robert N. Meiser, P.C., 1300 Connecticut Avenue, N.W., Suite 307, Washington, D.C. 20036. Application of Alia—The Royal Jordanian Airlines Corporation for an amended foreign air carrier permit pursuant to Section 402 of the Act seeking removal of the closed door restrictions to the West, proposing the addition of Amsterdam and Vienna as intermediates on its joint service route. Answers due September 19, 1979.
Aug. 23, 1979	36442	Ozark Air Lines, Inc., Lambert-St. Louis International Airport, St. Louis, Missouri 63145. Application of Ozark Air Lines, Inc. pursuant to section 401 of the Act requesting the Board to amend its certificate of public convenience and necessity for Route 107 so as to eliminate the requirement that Ozark serve at least one intermediate point on flights operating between Chicago, Illinois, and Madison, Wisconsin. Conforming applications and answers are due September 6, 1979.
Aug. 24, 1979	36453	Trans World Airlines, Inc., 605 Third Avenue, New York, New York 10016. Application of Trans World Airlines, Inc. pursuant to Section 401(e)(7)(B) of the Act requesting that its certificate of public convenience and necessity for Route No. 2 be amended by removing the one-stop restriction imposed by Order 79-8-81, August 15, 1979, between Kansas City, Missouri and Tulsa, Oklahoma. Conforming applications and answers are due September 7, 1979.

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

Economic Development Administration

Executive Orders 11988 "Floodplain Management" and 11990 "Protection of Wetlands"; Agency Implementation program

AGENCY: Economic Development Administration (EDA), Department of Commerce.

ACTION: Notice of publication in final form of EDA procedures implement Executive Orders 11988 "Floodplain Management" and 11990 "Protection of Wetlands".

SUMMARY: These final procedures, EDA Directive 17.04, implement the subject executive orders in EDA projects and activities. Directive 17.04 fulfills agency responsibilities under the executive orders and Department of Commerce Administrative Order 216-11 to develop specific procedures to ensure proper consideration of impacts on wetlands and floodplains in Agency actions. This final publication of the Directive reflects changes made as a result of the public comment and review process.

SUPPLEMENTARY INFORMATION:

Background

In the April 5, 1979 **Federal Register** (44 FR 20471), EDA made available for public comment its procedures, in addition to Department of Commerce Administrative Order 216-11 (43 FR 45284, September 29, 1978), for compliance with the subject executive orders in EDA program and activities. At that time, EDA announced a thirty day public comment period on these procedures. In response to requests, EDA extended the comment period until June 7, 1979 (44 FR 29134; May 18, 1979).

Summary of Major Comments Received and EDA Responses

Comments were received from four parties and dealt with the following topics.

1. There were some concern as to why EDA was promulgating another set of federal regulations. As explained in Section I, "Introduction", this Directive has been promulgated in order to comply with the instructions contained in the executive orders and the department administrative order.

2. One commentor questioned the need to create another layer of bureaucracy within EDA by establishing the positions of Regional Environmentalist and Special Assistant for the Environment. Although those positions are provided important responsibilities by the Directive, they are not new positions. They have existed since the early 1970's and were created to implement the various environmental laws and regulations which apply to the actions of federal agencies.

3. One commentor believed that the Directive placed too much emphasis on non-structural flood protection methods almost to the point that structural flood protection methods seemed unacceptable. The Directive does place a priority on non-structural methods because of their ability to meet the twin goals of the executive orders, protection of human health and safety and preservation of the natural values and functions of floodplains and wetlands. However, structural methods are not unacceptable or ineligible for funding. Structural methods will be considered when no practicable non-structural mitigation methods exist. Section III, "Policy", has been revised to state this position more clearly.

4. Two commentors felt that the Directive went too far and can be interpreted to mean that EDA will fund no development in floodplains. This is not correct. Clearly, the purpose of the executive orders is to prevent and restrict unnecessary development in floodplains and wetlands. To do this, a search for practicable alternatives to such development must be accomplished as part of the federal review process. Applicants for federal funds must in turn consider early in their project planning processes alternatives

for avoiding or mitigating impacts to floodplains/wetlands. The content, detail and exhaustiveness of this alternative planning and federal review process will certainly vary with the type of project under consideration. For example, the location of a housing development in the floodplain would raise a much more different set of issues than the proposed location of a project which is functionally dependent upon a water location, such as port improvements.

5. One commentor believed that the Directive's definition of a wetland was more stringent than the executive orders because EDA included areas separated from their natural supply of water as a result of activities such as the construction of structural flood protection measures or solid-fill road beds, mineral extraction and navigation improvements. This language is included in order to provide an example of what Executive Order 11990 refers to in its definition as those areas which "under normal circumstances does or *would* support a prevalence of vegetative or aquatic life that requries saturated or seasonally saturated soil conditions for growth and reproduction" (emphasis added). The Directive's definition of wetland (section II) has been revised to repeat the language of the executive order with respect to the examples which were of concern to the commentor. These areas, then, are only considered to be wetlands when the test or criteria of the executive order language is met.

6. One commentor provided suggestions with respect to further guidance on assessing wetland/floodplain impacts. This guidance will be provided to our Regional Environmentalists in future guidance memoranda.

EXHIBIT A—Form Letter.

I. Introduction

A. Purpose

This Directive establishes the Economic Development Administration policy and procedures for implementing Executive Orders 11988 and 11990.

B. Scope

On May 24, 1977, the President issued Executive Orders 11988 "Floodplain Management" and 11990, "Protection of Wetlands," (attached as Appendix A). These Orders direct Federal Agencies to avoid, to the extent possible, all actions associated with the modification or destruction of floodplains and wetlands or actions that may increase the risk of loss of life or property resulting from flood or storm damage.

C. Natural Values and Functions of Floodplains and Wetlands

EDA recognizes floodplains and wetlands as unique and vital natural resources. Both ecological systems, or ecosystems, possess many natural values and carry on numerous functions that are of great benefit to man. Because wetlands frequently lie within the margins of the floodplain, the two ecosystems share many of these natural values and functions.

Floodplains and wetlands provide valuable protective barriers against flooding and storm damage by acting as buffers which dissipate the energy of flood waters, wave attack and storm surge and lessen the effects of storm-related erosion along streambanks and shorelines. Both areas possess natural capabilities to temporarily store and hold flood and storm waters and serve to lessen the magnitude and intensity of flood and storm events. Wetlands, and to a somewhat lesser degree, floodplains contribute to improve water quality by virtue of their abilities to remove and trap suspended solids and absorb organic and mineral pollutants from the water column. Both areas can constitute important aquifer recharge areas and as such may be substantial contributors to the replenishment of ground water supplies.

Floodplains and wetlands furnish a significant portion of the habitat requirements for such diverse species of wildlife as reptiles, amphibians and mammals, including many game species (e.g., deer, moose and bear). Additionally, many threatened and endangered species depend upon these areas for habitat and/or cover. Both areas provide open space and constitute valuable recreational and aesthetic resources. Frequently, these areas are of archeologic, historic and cultural significance as a result of their early and continued habitation and utilization by man. In addition to the natural values and functions shared by both ecosystems there are several that are unique to wetlands.

Wetlands occupy the transition zone between open water or aquatic ecosystems and upland or terrestrial ecosystems. This unique position provides a continuum of environments which furnish essential food supplies and provide crucial habitats for numerous, diverse organisms. As a result, wetlands rank among the most productive of ecosystems. Intertidal wetlands, for example, can be up to seven times more productive than the best prime agricultural lands. These wetlands are vital spawning, nursery and feeding areas for many of the economically important species of coastal and marine fin and shell fishes. Freshwater wetlands provide spawning areas and habitat for large numbers of non-marine fish, many of which are important commercial or game species. In addition to fish and shellfish, wetlands produce a wide variety of cash crops, some of which are important to local and regional economies. Products such as timber, cranberries, fur and wild rice are examples. Additionally, wetlands are the major providers of nesting, migrating and winter habitat for most species of waterfowl. A variety of birds other than water fowl are also closely dependent upon wetlands for nesting and breeding sites and cover.

D. Degradation of Natural Values and Functions

The degradation of floodplain and wetland natural values and functions contributes greatly to the pollution of the Nation's rivers, lakes, bays and coasts; diminishes the abundance and diversity of wildlife and vegetation; increases the costs and hazards associated with flooding and coastal storms; accelerates erosion along stream banks and shorelines and increases the loss of lands productive to the economy and important to the well-being of the people. Man's continued alteration of the presence within the floodplain result in property damages in excess of three billion dollars annually. The accompanying costs of disaster relief and rehabilitation often exceed one billion dollars annually. These damages continue to occur despite substantial expenditures on structural flood control methods. Activities which debase floodplain and wetland values and functions result in increased costs to consumers, increased tax burdens on the public and a generally lowered quality of life for the American people. Wetlands, in addition to being highly productive and efficient ecosystems, are extremely fragile and easily perturbed. The critical balance maintained in nature between the water and the land and the import and export of materials is far too often upset or destroyed by the activities of man. Usually, those activities which (1) alter the water budgets of wetlands, (2) cause quantities of sediment or other pollutants to be discharged into wetlands in sufficient quantities to choke or kill the filtering mechanisms, (3) remove materials by dredging or (4) add materials by filling result in the destruction of many of the important wetland values and functions. Estimates indicate that over 40 percent of the wetland ecosystems originally present within the contiguous 48 States have been destroyed as a result of man's past activities. Today, only about 3½ percent of the total land area of the continental United States remains as wetlands.

II. Definitions

Flood or flooding. A general and temporary condition of partial or complete inundation of land areas from the overflow of inland and/or tidal waters, and/or the rapid accumulation or runoff of surface waters from any source.

• *1 percent chance flood or base flood.* A flood of a magnitude that occurs once every one hundred years on the average. Within any one year period there is one chance in one hundred of the occurrence of such a flood. Most importantly, however, the cumulative risk of flooding increases with time. Statistically, there is about one chance in five that a flood of this magnitude will occur within a 20 year period, the length of time commonly defined as the useful life of a facility. Over a 30 year period, the life of a typical mortgage, the probability of such a flood occurring increases to greater than one chance in four.

• *0.2 percent chance flood.* A flood of a magnitude that occurs once every five hundred years on the average. (Within any one year period there is one chance in 500 of the occurrence of such a flood.) As with the one percent chance flood, the cumulative risk of this flood occurring also increases with time.

Floodway. The channel of a river or other watercourse and adjacent land areas that must be reserved in an open manner, i.e., unconfined or unobstructed either horizontally or vertically, to provide for the discharge of the base flood.

Flood fringe. That portion of the floodplain outside the floodway (often referred to as "floodway fringe").

Floodplains. Floodplains are lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands. At a minimum, floodplains consist of those areas subject to a one percent or greater chance of flooding in any given year. The term floodplain shall be taken to mean the *base floodplain* unless the action involves a critical action in which case the *critical action floodplain* is the minimum floodplain of concern.

1. *Base Floodplain (or 100-year Floodplain)* The area subject ot inundation from a flood of a magnitude that occurs once every one hundred years on the average (the flood having a 1 percent chance of being equalled or exceeded in any given year).

2. *Critical Action Floodplain (or 500 year Floodplain)* The area subject to inundation from a flood of a magnitude that occurs once every five hundred years on the average (the flood having a 0.2 percent chance of being equalled or exceeded in any given year).

Wetlands. Wetlands are those areas which are inundated or saturated by surface or ground water with a frequency sufficient to support, or that under normal hydrologic conditions does or would support, a prevalence of vegetation or aquatic life typically adapted for life in saturated or seasonally saturated soil conditions. Examples of wetlands include, but are not limited to: swamps, fresh and salt water marshes, estuaries, bogs, beaches, wet meadows, sloughs, potholes, mud flats, river overflows, and other similar areas. This definition includes those wetland areas which are separated from their natural supply of water as a result of activities such as the construction of structural flood protection methods or solid-fill road beds, mineral extraction and navigation improvements and which would under normal hydrologic conditions support a prevalance of vegetation or aquatic life typically adapted for life in saturated or seasonally saturated soil conditions. This definition is intended to be consistent with that of the U.S. Fish and Wildlife Service in the publication entitled *Classification of Wetlands and Deep Water Habitats of the United States* (Cowardin, et. al., 1977).

Coastal high hazard area. A coastal high hazard area is any low-lying, relatively unprotected coastal area subject to flooding by wind-driven tides, coastal storms, or tsunamis. Examples of such areas include, but are not limited to, barrier islands, beaches, beach dunes, overwash areas and tidal wetlands.

Action. An action is any form of EDA financial assistance including, but not limited to, grants, loans, contracts and guarantees and all amendments to such forms of financial assistance that involve a change in project design, scope or location or a change in participating private parties.

Critical action. A critical action is an action which, if located or carried out within a floodplain, poses a greater than normal risk for flood-caused loss of life or property. The minimum floodplain of concern for critical actions is the 500-year floodplain, i.e., critical action floodplain. Critical actions include, but are not limited to, actions which create or extend the useful life of facilities:

a. Which produce, use or store highly volatile, flammable, explosive, toxic or water-reactive materials;

b. Such as schools, hospitals and nursing homes, which are likely to contain occupants who may not be sufficiently mobile to avoid the loss of life or injury during flood and storm events; and

c. Such as emergency operation centers, or data storage centers, which contain records or services that may become lost or inoperative during flood and storm events.

Related activities. Related activities are those undertakings that are interdependent parts of a Federal action. Such undertakings are considered interdependent parts whenever they either make possible or support an action, or are themselves induced or supported by an action or related activities. Related activities may or may not be Federally permitted or assisted.

Impacts. Impacts are changes in floodplain or wetland values and functions caused or induced by an action or related activity. Impacts are *caused* whenever these natural values and functions are affected as a direct result of an action. An action which would result in the discharge of polluted storm waters into a floodplain or a wetland, for example, would directly affect their natural values and functions. Construction-related activities, such as dredging and filling operations within the floodplain or a wetland, would be another example of impacts caused by an action.

Impacts may also occur as an indirect result of an action whenever the action *induces* or makes possible related activities which affect the natural values and functions of floodplains or wetlands. Such impacts, frequently referred to as indirect or secondary effects, occur whenever these values and functions are potentially affected, either in the short or long term, as a result of undertaking an action.

The following example illustrates this concept. The EDA-assisted construction of water or sewer line (the "action") *not* located within the floodplain or a wetland would impact a nearby floodplain or wetland in several ways. First, as a result of ground disturbing activities, the action could directly affect natural values and functions through siltation from soil erosion at the construction site. Second, the action could induce or support development within the floodplain or wetland. Third, the action could induce or make possible related activities located outside the floodplain or wetland that would impact these areas. In either of the latter two cases, the indirect result of the EDA action is to produce an effect on the natural values and functions of a floodplain or a wetland.

Alternatives. Alternatives are all substitutes to the proposed action. Alternatives consist of:

a. Locating the action at a site that either eliminates or minimizes the impact on floodplain and wetland values and functions (alternative sites);

b. Utilizing other actions, plans, designs or concepts with similar economic development objectives that either eliminate or minimize the impact on floodplain and wetland values and functions (alternative actions);

c. Taking no action (no action alternative).

The following example illustrates these concepts. Alternatives to the expansion of a port facility into a wetland area could be (1) relocation of the proposed expansion outside the wetland, (2) redesign of or scaling down the proposed expansion to eliminate that portion or portions which impact the wetlands, (3) redesign or reorientation of the exising facility to accommodate more berthing space without requiring any expansion, or (4) rehabilitation or modernization of the new equipment to handle containerized cargo and eliminate the need for expansion. Additionally, dissimilar actions with similar economic development objectives such as the construction of an industrial park or a downtown convention center are alternatives. Finally, the possibility of taking no action is also an alternative.

Minimize. Minimize means to reduce to the smallest amount or degree practicable.

Mitigation measures. Mitigation measures are all steps necessary to minimize the impacts of the proposed action on a floodplain or wetland, including those steps necessary to preserve and, wherever practicable, restore natural values and functions. Examples of mitigation measures include, but are not limited to, (a) requiring an adequate soil erosion/sedimentation plan to control runoff during land disturbing activities associated with an action, (b) the collection and treatment of runoff resulting from an action prior to its discharge into the

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

floodplain or a wetland, (c) the establishment of vegetative buffer zones between the site of a proposed action and adjacent floodplains or wetlands, (d) the dedication of sites as permanent natural areas, or (e) floodplain or wetland habitat restoration.

Practicable. Practicable means capable of attainment within the confines of relevant constraints. The test of practicability, therefore, depends upon the particulars of the situation under consideration and those constraints imposed by environmental, economic, legal and technological parameters. This test, however, is *not* limited by the temporary unavailability of sufficient financial resources to implement either alternatives to a proposed action or those mitigation measures necessary to minimize its impacts. That is, alternatives or mitigation measures shall not be rejected as "impracticable" solely on the basis of increased costs associated with an undertaking. Rather, the Agency recognizes that the preservation and protection of floodplains and wetlands will make some actions more expensive. EDA shall make every effort to assist potential applicants in their search for the additional resources necessary to eliminate or minimize impacts on floodplains and wetlands.

The following example illustrates the concept embodied in the term "practicable." The proposed action in its example is the construction of a combination port facility and industrial park located in a coastal community which would, if constructed as proposed, impact both floodplain and wetland values and functions. Some possible alternatives to this proposal are: (1) renovate and modernize an existing nearby port facility; (2) locate the docking and cargo handling facility in the floodplain but position the warehousing and industrial park facilities on an upland site. The facilities would be linked together by a transportation corridor elevated on stilts across the floodplain; (3) construct the facility within the floodplain but elevate it on stilts above the level of the base of critical action floodplain, as appropriate, and protect the wetland areas by establishing wide buffer areas adjacent to the facility and placing the wetlands in public ownership as a nature preserve; (4) locate the entire facility offshore as a "floating" industrial park linked to a terminal facility on an upland site by a transportation corridor elevated on stilts across the floodplain; (5) build a different type of economic development project that will not impact floodplain or wetland values and functions; and (6) take no action.

In all cases, the alternatives listed above are technologically feasible. For the sake of this example, let us establish that title to the lands required to establish suitable buffer areas and the nature preserve necessary to carry out alternative 3 have been in litigation for several years and that no resolution of the issues is expected in the foreseeable future. Also, let us assume the cost of constructing alternative 4 is on the order of 10 times that of the next most expensive alternative and the economic analysis indicates that such a facility could not operate profitably at rates competitive with other similar facilities in that area. Further, let us suppose that there is a great deal of public opposition to the proposed action on environmental grounds, and EDA's initial assessment indicates that serious environmental problems exist with respect to the proposal. We shall also assume that alternative 1 is more costly to implement than alternative 2 but that both alternatives could be constructed and operated profitably at rates competitive with other similar facilities. Finally, assume that it has been established that there is no clear overriding economic benefit of this proposal relative to other dissimilar proposals which do not impact floodplain or wetland values and functions.

In this example, then, we can choose the practicable alternatives based on the assumed constraints given above. Alternative 4 can clearly be rejected on economic grounds since it is both very expensive to construct and would not generate sufficient revenue to be profitable. Similarly, alternative 3 can be rejected due to legal constraints that render it unattainable within any reasonable time frame. Since there are no constraints imposed by environmental, economic, legal or technological factors on alternatives 1, 2, 5, or 6, these are the practicable alternatives to the proposed action. The proposed action in this example would be rejected from consideration since environmental constraints render it undesirable and practicable alternatives to the proposal exist.

It is important to note that neither alternative 1 nor 2 can be rejected as a practicable alternative on the basis that the initial cost exceeds that of the proposed action. Since either facility could operate profitably, the increased cost is not a relevant consideration and is insufficient grounds for the rejection of either from consideration. Similarly, the fact that the costs associated with alternative 1 exceed that of alternative 2 is irrelevant to its consideration as a practicable alternative.

Structural flood protection methods. Structural flood protection methods are those physical measures utilized to modify the natural hydrologic response of a waterbody to flood and storm events. Such measures are employed to protect human life and property and to enhance the value of the floodplain for human use and habitation. Structural methods are intended to: (a) confine flood waters to the waterbody and to inhibit their entry into adjacent low-lying areas; (b) speed up or redirect the discharge of flood and storm waters; or (c) drain and fill in low-lying areas. Examples of structural flood protection methods include, but are not limited to, damming, diking, leveeing, dredging, channelizing, constructing sea walls, draining and/or filling low-lying areas, elevating structures in flood prone areas on fill, and constructing conduits to rapidly remove storm waters.

Nonstructural flood protection methods. Nonstructural flood protection methods are those measures that either eliminate or reduce the need for structural alteration of waterbodies or their associated floodplains and wetlands. Nonstructural methods are intended to preserve, restore or imitate natural hydrologic conditions. Such methods may be either physical or managerial in character. Nonstructural flood protection methods are measures which:

a. Control the uses and occupancy of floodplains and wetlands, e.g., floodplain zoning, subdivision regulation;

b. Preserve floodplain and wetland values and functions through public ownership, e.g., fee title, easements, development rights;

c. Restore the natural values and functions of floodplains and wetlands, e.g., move existing structures out of the floodplains;

d. Delay or reduce the amount of runoff from paved surfaces and roofed structures discharged into a floodway, e.g., construction of detention basins, use of flow restricting barriers on roofs;

e. Maintain natural rates of infiltration in developed or developing areas, e.g., construction of seepage or recharge basins, minimization of paved areas;

f. Protect streambanks and shorelines with vegetative and other natural cover, e.g., use of aquatic and water loving woody plants;

g. Restore and preserve floodplain and wetland values and functions and protect life and property through regulation, e.g., flood-proofing building codes which require all structures and installations to be elevated on stilts above the level of the base flood.

h. Control soil erosion and sedimentation, e.g., construction of sediment basins, stabilization of exposed soils with sod, minimization of exposed soil.

Emergency flood protection methods. Emergency flood protection methods are those measures employed to protect human life and, to a limited extent, portable property during flood and storm events. Such measures are normally applied to existing facilities located in flood prone areas as a means of protection for the occupants. Flood forecasting, flood warning systems, temporary flood evacuation and other emergency planning activities are examples.

Preserve. Preserve means to prevent alterations to natural conditions and to maintain the values and functions which operate on floodplains or wetlands in their natural states.

Restore. Restore means to re-establish a setting or environment in which the natural values and functions of the floodplain or wetland can operate.

III. Policy

Effective immediately, it shall be the policy of EDA to:

- Avoid, to the extent practicable, the long and short term impacts associated with the modification and occupancy of floodplains and wetlands;
- Avoid, to the extent practicable, direct and indirect impacts on floodplain and wetland values and functions;
- Promote the use of non-structural flood protection methods to reduce the risk of flood loss;
- Minimize the impact of floods on human health, safety and welfare;
- Restore and preserve the natural and beneficial values and functions of floodplains and wetlands;
- Provide the public with early and continued opportunity for involvement in the decision making process concerning flood plains and wetlands; and

- Incorporate the Unified National Program for Floodplain Management into its decision-making process.

In carrying out this policy, EDA shall not participate, either partially or wholly, in any action that would impact a floodplain or wetland unless the Agency determines that no practicable alternative exists to the action. In its search for practicable alternatives, the Agency shall give primary emphasis to locating actions outside the floodplain or a wetland. The Agency shall explicitly consider the no action alternative before arriving at a decision that no practicable alternative exists to impacting a floodplain or a wetland. Where the no action alternative is rejected and no practicable alternative exists, EDA shall require the formulation and consideration of non-structural flood protection methods as mitigation measures. Priority is given to non-structural methods because of their ability to meet the twin goals of the Executive Orders, protection of human health and safety and preservation of the natural values and functions of floodplains and wetlands. However, structural solutions will be considered when no practicable, non-structural mitigation methods exist.

Prior to authorizing any application for assistance, EDA shall insure that the proposed action is the practicable alternative which minimizes impacts on the natural values and functions of floodplains and wetlands *and* that all practicable mitigation measures are incorporated into the action which (a) minimize the risk of loss of life and property due to flood and storm damage and (b) minimize the impacts on floodplain and wetland values and functions.

Whenever EDA participates in an action that impacts floodplain or wetland values and functions, it shall continuously monitor the action to ensure that the action and its mitigation measures are carried out in accordance with the Agency's findings and recommendations. Any action which fails to adhere to the design, scope, location and purpose of the action and to the requirements of the mitigation measures shall be subject to termination for cause.

Whenever an action cannot be practically located except in proximity to a water body, EDA shall require the potential applicant to locate the proposed action within the floodplain in such a manner so as to not impact a wetland. That is, it shall be EDA's policy to remove such proposed actions from within wetland areas, whenever practicable, and place them within the floodplain.

Prior to the authorization of any application for assistance to which the procedures contained herein apply, EDA shall make a separate set of findings for both floodplains and wetlands as contained in Section VII of these procedures. The Regional Director shall ensure that no application for assistance is authorized until these procedures have been fully carried out and he or she has made the required formal findings.

The selection of practicable alternatives by EDA shall take into account environmental, technical, economic and legal considerations and shall be a continuous process. That is, as alternatives are identified in carrying out the procedures contained herein, EDA shall identify each as practicable or impracticable. In conducting its analysis of the economic considerations related to the various alternatives that may be proposed, EDA shall follow the guidance provided by the Water Resources Council's Principles and Standards. The lack of sufficient financial resources shall not preclude the identification of alternatives or mitigation measures. Further, the temporary unavailability of sufficient financial resources shall not limit the consideration or implementation of either practicable alternatives to a proposed action or those practicable mitigation measures necessary to minimize impacts of the proposed action. Rather, in such instances, the Agency shall make every effort to assist potential applicants in their search for the required financial resources. If the necessary resources are unavailable, the proposed action shall be restructed to fit the existing resources and to avoid, to the extent practicable, impacts on wetland and floodplain values and functions. If such a restructuring is not possible, EDA shall consider the proposal not "ripe" for assistance and return the proposal to the prospective applicant.

Since many actions affecting either floodplains or wetlands have demonstrated significant effects on the quality of the human environment, consideration of such proposed actions will often necessitate the preparation of an Environmental Impact Statement under Section 102(2)(C) of NEPA.

IV. Role of the Special Assistant for the Environment

The general responsibilities of the Special Assistant for the Environment, hereafter called the Special Assistant shall be to:

A. Serve as the principal advisor to the Assistant Secretary in implementing the duties and responsibilities required by Executive Orders 11988 and 11990.

B. Develop Agency procedures for compliance with Executive Orders 11988 and 11990.

C. Review, as necessary, the Agency's activities and program involvements with respect to Executive Orders 11988 and 11990.

D. Mediate all disputes, those within the Agency as well as those arising from outside sources, concerning findings made under Executive Orders 11988 and 11990.

E. Provide policy guidance and training for the Regional Office staff in carrying out its responsibilities under the procedures contained herein.

F. Provide, whenever requested, technical assistance on a project by project basis to the Regional Environmentalist in order to adequately implement these procedures.

G. Monitor and audit the Agency's actions to ensure that the requirements of the Executive Orders are met.

H. Coordinate the Agency's implementation of this Directive with other Federal agencies having jurisdiction over or expertise in this area, as well as with the environmental programs of local, State and Federal agencies which become involved with EDA projects.

I. Recommend approval, disapproval, or modification by the Assistant Secretary for centralized projects.

V. Role of the Regional Environmentalist

The general responsibilities of the Regional Environmentalist shall be to:

A. Implement and carry out the duties and procedures required under the Authority of Executive Orders 11988 and 11990.

B. Solicit, whenever necessary, the expert advice and assistance of other professional staff members within the Regional Office in order to adequately implement these procedures.

C. Provide training to Regional Office staff, including EDRs on the requirements imposed by these procedures.

D. Monitor those actions approved by the Regional Office for compliance with this Directive and the Executive Orders 11988 and 11990.

VI. Processing Procedures

The processing procedures contained in subsections A throught D shall apply to all Public Works grants and loans and Title IX Implementation grants. Additionally, these procedures shall apply to all Title IX Development grants, Technical Assistance and Research grants and contracts that have the potential to produce physical effects and to all Business Development actions except financial assistance provided solely for the purpose of (a) working capital or (b) purchasing machinery, equipment, furniture or fixtures that will be utilized totally within the confines of existing structures and that does not, or will not, create a change in either the types or amounts of waste produced by the facility (e.g., changing the nature of the product produced or the production process often creates a corresponding change in waste production). This exception does not apply to those proposed actions that involve improvements which exceed 50 percent of the pre-improvement market value of the structure or facility.

The processing procedures contained in subsections A through C and subsection E shall apply to those excepted Business Development actions. Procedures pertaining to all other forms of EDA assistance, such as Planning grants, are contained in Section IX of this Directive.

A. *General Applicability to EDA Actions*

The following procedures shall be effective immediately and apply to all proposed actions as specified in Section X. There is, however, one exemption provided for by Executive Order 11990, "Protection of Wetlands." This exemption is not provided for in Executive Order 11988, "Floodplain Management" and, consequently, the exemption applies only to actions affecting wetlands not located with floodplains. Since there are few wetlands in this category, this exemption is extremely limited.

The following proposed actions that impact wetlands not located within the floodplain are exempt from these procedures: (a) Federally assisted or permitted projects under construction prior to the effective date of this policy, or (b) projects for which a Federal draft or final Environmental Impact Statement (EIS) which adequately analyzes the EDA action has been filed prior to October 1, 1977. Those actions impacting a wetland where the EIS only generally covers

the proposed action, is devoted largely to related activities, or that treat the project area or program without specific analysis of the proposed action are not exempt from this policy. Adequate documentation (e.g., a copy of the EIS) shall be included in the official project file and as part of the Environmental File for every action declared exempt from this policy under these criteria.

B. *Responsibilities of Economic Development Representatives (EDRs)*

The EDR shall be responsible for informing all prospective applicants of EDA's policy with respect to actions affecting floodplain and wetland values and functions. EDRs shall encourage prospective applicants to avoid all actions which could potentially affect these natural values and functions. The EDR shall direct all prospective applicants to determine the location of the floodplain in relation to the proposed action and its area of impact using the Water Resources Council "Guidance for Determining a Floodplain Location" (see 42 FR 190, pp. 52590–52598, Sept. 30, 1977 and Appendix B). Whenever a prospective applicant is unsure of the potential of the proposed action to impact a wetland, the EDR shall additionally direct the prospective applicant to contact the Regional Environmentalist for assistance.

If this information indicates that the prospective applicant has under consideration an action which has the potential to impact either a floodplain or a wetland area, or if the prospective applicant or EDR is unsure as to whether either of these areas could be impacted by the proposed action, the EDR shall inform the Regional Environmentalist of the proposal as soon as possible. The EDR shall also direct the prospective applicant to submit the materials listed in the first paragraph of subsection C (below) as early in the planning process as possible, but in any case no later than the submission of the Early Information Systems Profile, Form 1100T, or any other pre-application materials submitted for Agency consideration. It shall be the responsibility of the EDR to inform all prospective applicants that the procedures contained therein must be completed prior to the authorization of their application for EDA assistance.

The EDR shall note, also, the effect of the proposed action on floodplains and wetlands in the EDR Assessment and relay this Assessment to the Regional Environmentalist as early as possible but in no case later than the submission of the EDA Profile or other pre-application materials.

C. *Responsibilities of the Prospective Applicant*

EDA expects each prospective applicant to avoid, whenever practicable, all actions that have the potential to impact floodplain or wetland values and functions. For every proposed action submitted, the prospective applicant will be required to provide the following information directly to EDA: (1) all appropriate floodplain maps and related data in accordance with the Water Resources Council's "Guidance for Floodplain Management" (42 FR 190, p. 52590—52598); (2) a 15 minute series (7½ minute series if available) USGS topographic map with the project area clearly delineated; (3) site photographs; and (4) whenever possible, aerial photographs of the site and surrounding areas.

In addition, for all proposed actions that could impact a floodplain or wetland, upon request by the Regional Office, the prospective applicant shall provide the following information directly to the Agency's Regional Environmentalist.

1. Identification of the economic development objectives to be derived from the proposed action.

2. Identification of the alternative actions, plans, concepts, designs and locations to the proposed action which have been considered in meeting the objective in (1) above and the reasons for rejecting each alternative.

3. Complete information on the proposed action and surrounding area. This shall include, at a minimum, any previous environmental analysis done for the proposed site of the proposed action, a copy of the land use documents (zoning maps, master plans, etc.) which relate to the area, the engineering plans for the proposed action and a specific, detailed project description.

Prospective applicants shall ensure that all required materials are adequate and complete and are submitted directly to the Regional Environmentalist as soon as possible. Incomplete materials or delayed submittals may seriously jeopardize consideration of a proposed action by EDA.

Projects which would impact floodplain or wetland values and functions shall require completion of the environmental analysis of the proposal and its alternatives prior to the authorization of the application for EDA assistance. To ensure that this process is completed quickly and efficiently, the applicant shall be required to cooperate fully in the submission of the material noted above and other related information as required by the Agency in carrying out these procedures. Applicants shall be required to also provide public notification and fully cooperate in holding public information meetings as described herein.

D. *Responsibilities of the Regional Office*

As part of the Agency's initial review of all proposed actions to which the procedures contained herein apply, the Regional Environmentalist shall be provided a copy of all related pre-application materials. It shall be the responsibility of the program office to ensure that the Regional Environmentalist receives a copy of these materials along with the appropriate floodplain maps and associated data, topographic maps and photographs as specified in the first paragraph of subsection C (above).

1. *Examination of Pre-application Materials.* The Regional Environmentalist shall examine every proposed action to determine whether the appropriate floodplain maps and associated data, topographic maps and photographs as specified previously have been included in pre-application materials and are sufficient for making a determination of the potential to impact floodplain and wetland values and functions. If the Regional Environmentalist determines that the information presented by the prospective applicant is insufficient for a preliminary review of the proposed action, he shall note the deficiencies and return the pre-application materials to the program office. In addition, for all proposed actions that have the potential to impact a floodplain or wetland or where the impact on such areas is uncertain and the proposed action appears to have sufficient economic development benefits to warrant further Agency consideration, the program office shall notify the prospective applicant to submit the information specified in the second paragraph of subsection C above. It shall be the responsibility of the program office to ensure that the necessary materials are obtained. Only when the Regional Environmentalist determines that the materials supplied by the prospective applicant are sufficient and complete shall he/she undertake a review of the proposed action in order to assess its potential to impact floodplain or wetland natural values and functions.

2. *Assessment of Floodplain Impact.* a. *Determine if it is a critical action.*—If the proposed action is a critical action, the minimum area of concern becomes the critical floodplain; if not, the base floodplain is the minimum area of concern.

b. *Determine if any portion of the proposed action or related activities lies within the floodplain.* In making this determination, the Regional Environmentalist shall consult with the EDA Engineering staff and the following two pamphlets: HUD–FIA–149, "How to Read Flood Hazard Boundary Maps" and HUD–FIA–252, "How to Read a Flood Insurance Rate Map". In those instances where HUD maps have not been published, the Regional Environmentalist shall follow the procedures established by the WRC (see also Appendix A).

c. *Determine the potential to impact floodplain values and functions. If, on the basis of the HUD maps or the information gathered by following the procedures established by the WRC, any portion of the proposed action or related activities lies within the floodplain, the proposal will impact a floodplain and the procedures established by this Directive shall apply. The only exception to this statement is when the Regional Environmentalist determines that the locational impact is minor to the extent that floodplain values and functions, as further discussed below, are not affected.*

If no portion of the proposed action or related activities lies within the floodplain, the proposal and any related activities shall be examined for the potential to impact floodplain values and functions. Some key quetions in making this determination are:

(i) Will the proposed action or related activities discharge, or cause to be discharged, any substances or materials into the floodplain?

(ii) Will hydrologic flow rates within the floodplain be affected? That is, will there be increases or decreases in flow velocities; elimination of peak hydrologic flows; or alterations in the normal seasonal patterns of flow resulting from the proposed action or related actiyity?

(iii) Will the water level within the floodplain be affected? That is, will the water level increase or decrease; or will the normal seasonal pattern of water level functions be altered as a result of the action or related activities?

(iv) Does the proposed action or related activity have the potential to make possible future developments which could impact floodplain values and functions?

(v) Will the proposed action affect an aquifer recharge area? That is, will the proposed action reduce the rate of infiltration (e.g., by covering the area with impervious surfaces) or create the potential for contamination of the aquifer (e.g., discharge of polluted runoff from parking lots into an aquifer recharge area).

(vi) Will potentially hazardous materials or substances be stored in or near the floodplain that could effect the natural values and functions should an accidental release occur?

3. *Assessment of Wetland Impact.* In order to adequately determine the potential to impact the natural values and functions of a wetland, the Regional Environmentalist shall review the data, maps and photographs submitted by the prospective applicant in order to determine the proposed action's potential to impact wetlands. Where this information is insufficient for this review, the Regional Environmentalist shall return these materials to the program office and stop his review until this information has been submitted directly to him by the prospective applicant.

Additionally, the Regional Environmentalist shall consult the publication *Existing State and Local Wetlands Surveys 1965–1975* and the appropriate Regional Coordinator, National Wetlands Inventory, U.S. Fish and Wildlife Service (USFWS) to determine if a wetlands survey for the project area has been conducted (see Appendix C for further guidance). If a survey has been conducted for the project area, the Regional Environmentalist shall obtain a copy of the survey for use in determining the impact of the proposed action on wetland values and functions.

As the National Wetlands Inventory is completed by the USFWS, the Special Assistant shall obtain and make available copies of the Inventory for the Regional Environmentalist's use.

a. *No potential exists of impacting floodplain values and functions.* Where the preceding review indicates that there is no potential to impact floodplains this will, in many cases, indicate that there will be no potential to impact wetlands, since most wetlands are located within the floodplain. The Regional Environmentalist is cautioned, however, that instances may arise where a floodplain will not be impacted but a proposed action or related activity could impact a wetland. For those cases where a wetland is likely to be impacted despite the fact that no floodplain is involved (e.g., mountain meadows, potholes, etc.), the Regional Environmentalist shall follow the steps outlined in (c) below.

b. *Potential of impacts to floodplain values and functions.* Where the previous review indicates that there is a potential to impact floodplains, the Regional Environmentalist shall review the materials cited in subsection D.3. above in order to determine the potential to impact wetlands.

c. *Determine the potential to impact wetland values and functions.* If on the basis of the Regional Environmentalist's examination of materials supplied by the prospective applicant or as a result of information contained in a National, State or local wetlands survey or inventory, any portion of the proposed activity or related activities lies within a wetland, the proposal will impact a wetland and the procedures established by this Directive shall apply.

If no portion of the proposed action or related activities lies within a wetland, the proposal and all related activities shall be examined for their potential to impact a wetland. The same key questions indicated in D2c, i–vi of this Directive shall be examined in making this determination.

4. *Potential to Impact Natural Values and Functions Determination.* a. *No potential to impact either floodplain or wetland values and functions.*—Whenever a proposed action is judged by the Regional Environmentalist to have no potential to impact either a floodplain or a wetland, he shall inform the Regional Director that his review under these procedures is complete and recommend that the appropriate findings contained in Section VII be made. Once these findings have been made by the Regional Director and documented for the Environmental file, the requirements imposed by this Directive are complete.

b. *Potential to impact floodplains (or wetlands) values and functions.* In those cases where a determination has been made that there is a potential to impact either floodplain or wetland values and functions, the Regional Environmentalist shall:

(i) Inform the Regional Director of this determination and the necessity to comply with the directives established by Executive Orders 11988 and 11990 and this Directive.

(ii) Reemphasize to the potential applicant EDA's policy and procedures regarding projects which impact floodplains and/or wetlands and the prospective applicant's responsibilities thereunder.

(iii) Consult with all Federal, State and local Agencies with environmental expertise in or jurisdiction over the proposed action or its impacts. In order to fully accomplish this consultation process, insure that the prospective applicant has provided copies of all pre-application materials to the State and Areawide Clearinghouses for their review.

(iv) Consult with all public and private parties with an environmental interest in the proposed action or its effects on floodplains or wetlands.

The purpose of the consultation specified in (iii) and (iv) are to assist the Regional Environmentalist in learning more about the magnitude of the potential impacts to floodplain and wetland values and functions and the nature of the resource involved, as well as possible alternatives to the proposed action. Such consultations shall be documented and become part of the Environmental File.

c. *Regional Director Does Not Concur With Determination Made Under This Section.* The Regional Director shall be responsible for making the final decision on whether or not a project has the potential to impact a floodplain or wetland. It is expected that where there is substantial controversy, the Regional Director will consult with the Deputy Assistant Secretary for Economic Development.

5. *Floodplain and/or Wetland Impact: Initial Review.* a. *Pre-application conference.*—For every proposed action that the Regional Environmentalist determines has the potential to impact either floodplain or wetland values and functions and that the Agency wishes to consider further, the Regional Office shall hold a pre-application conference, but only after the Regional Environmentalist has completed the preceding procedures.

One major purpose of the pre-application conference is to initiate the Agency's process of identifying and evaluating practicable alternatives to impacting a floodplain or wetland (or both). Alternatives to be considered include, but are not limited to: carrying out the proposed action at a location that would not impact a floodplain or wetland (alternative sites); other means or methods which accomplish a similar economic development objective (alternative actions); and not undertaking an action (no action alternative).

For *all* proposed actions that will be physically located within a floodplain or a wetland, special emphasis will be given to the search for alternative sites that would remove the proposal from the areas.

b. *Review and materials.* If, as a result of the pre-application conference, one or more practicable alternatives to the proposed action with lesser impacts are identified, the pre-application materials shall be returned to the prospective applicant for restructuring. However, if the proposal's objectives the prospective applicant's examination of alternatives appear reasonable; the prospective applicant demonstrates adequate consideration of EDA's policy as established by this Directive; *and* the Regional Environmentalist has identified no other, practicable alternatives to the proposal, the Regional Office may continue its review in accordance with this Directive. If the proposal fails any of these tests, the pre-application materials shall be returned to the prospective applicant.

c. *Finding of no impacts on wetlands or floodplains values and functions.* Where, either as a result of the pre-application conference or as a result of the restructuring of the proposed action and the receipt of pre-application materials modified accordingly, the Regional Environmentalist determines that the proposed action has no potential to impact either floodplains or wetlands, he shall inform the Regional Director that his review under these procedures is complete. He shall also recommend to the Regional Director that the appropriate findings as specified in Section VIII should be made. Once these findings have been made and documented for the Environmental file, the requirements imposed by this Directive and Executive Orders 11988 and 11990 are complete.

d. *Finding of impacts on either floodplains or wetlands.* Where, as a result of the pre-application conference, the Agency believes that the proposed action may be the practical alternative which minimizes impacts to

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

floodplains and wetlands, the Regional Office shall:

(i) Inform the prospective applicant that until the procedures contained herein are complete and the findings required by the Executive Orders are made, the Agency cannot authorize an application.

(ii) Notify the Special Assistant, in writing, of the intent of the Regional Office to continue its review of the proposed action.

(iii) Carry out the remaining procedures contained in this Directive.

6. *Floodplain and/or Wetland Impact: Analysis of Impacts.* a. *Public Notification Requirement.*—The Regional Environmentalist shall require the prospective applicant to publish a notice to the effect that EDA is considering assistance for the proposed action. This notice shall be published in the newspaper of greatest circulation in the vicinity of the proposed action and in any local or community-oriented newspapers within the proposed action's area of impact. This notice shall appear for at least three consecutive days and shall include a physical description of the location of the proposed action and the surrounding area (to include a map when necessary for clarification), the nature and extent of proposed action and the name, address, and phone number of the Regional Environmentalist. The prospective applicant shall send a copy of this notice to the appropriate State and Areawide Clearinghouses and to all parties expressing an interest in the proposed action or those parties that the Regional Environmentalist has indentified to be so notified. The prospective applicant shall provide EDA with a copy of this notice, the dates the notice was published and a list of all parties receiving an individual notice. EDA shall allow at least 30 days from the last date of publication for receipt of comments.

b. *Private Party Notification Requirements.* For all Business Development actions or amendments to such actions in which a change in the participating private party or parties is involved, it shall be the responsibility of the Regional Director or, in the case of centralized projects, the Director of Business Development in coordination with the Special Assistant, to inform all private parties participating in the transaction (e.g., financial institutions) of the hazards of conducting activities within the floodplain (see Exhibit A for example letter).

c. *Assessment of Impacts.* The Regional Environmentalist shall analyze the probable impacts of the proposed action and its alternatives on the natural values and functions of floodplains and/or wetlands. This analysis shall include an examination of impacts on the:

(i) Public health and safety: including the effects of the proposed action on: water supplies, both the quantitative and qualitative aspects; ground water recharge capability, water pollution, including siltation and sedimentation effects; and flooding and storm hazards. In evaluating the effects of the proposal on flooding and storm hazards the following factors shall be considered:

Is the proposed action located in the floodway portion of a riverine floodplain, or a coastal high hazard area?

Is the proposed action in a flood-fringe area such as the backwater areas of a coastal floodplain?

Is the flood hazard aggravated by the presence of, or potential for, destructive velocity flows, flood-related erosion, subsidence or sinkholes, or other special problems?

Is there a combination of flood sources present which may flood simultaneously in the area (e.g., river and ocean, or shallow overland runoff and river, etc.)?

(ii) Preservation of natural systems; including the effect of the proposed action on: maintenance of species and habitat diversity and stability; maintenance of long term ecosystem productivity; and protection of flora and fauna indigenous to floodplains and wetlands. In conducting this assessment, the Regional Environmentalist shall, at a minimum, consider whether the proposed action or related activities could result in:

Direct removal of vegetation;

Direct removal of topsoil;

Habitat destruction by dumping or filling, i.e., landfill from construction activities, dumping of dredge spoil, leveeing, etc.;

Habitat destruction by digging; i.e., ditching, mining, etc.;

Habitat modification through alternation of water levels; i.e., modification of the water edge habitat by raising or lowering water levels or alteration of normal seasonal patterns of water level fluctuation; modification of flow rates either by increasing or decreasing velocity of flow or by alteration of normal seasonal pattern of flow, or modification of the soil water table;

Habitat modification resulting from: erosion and loss of nutrients; chemical modification through leaching, spillage, motor vehicle or industrial sources; or introduction of exotic vegetation;

Limitation on species mobility, i.e., inhibiting upstream migration or downstream drift;

(iii) Public welfare: including the effects on historic and cultural resources; land use patterns; aesthetics; and existing or future uses in the public interest such as recreation, education and scientific uses and the extent that the proposed action interferes with such uses or potential uses;

(iv) Cultivated resource values; the effects on agriculture, aquaculture and forestry; and

(v) Cumulative impacts resulting from other actions or related activities under consideration, planned or underway.

In conducting this assessment, the Regional Environmentalist should consult the reference works cited in Appendix D.

7. *Floodplain or Wetland Impact: EIS Requirement.* a. *Determination of Significant Actions.*— One purpose of the analysis undertaken in the preceding subsection is to determine the significance of the proposed action and any identified practicable alternatives relative to Section 102(2)(C) of the National Environmental Policy Act (NEPA). Because several floodplain and wetland values and functions are of critical importance to man and since these areas are often extremely sensitive to man-induced disturbances, an Environmental Impact Statement (EIS) shall be prepared for a proposed action whenever:

(i) The public health and safety are identifiably affected. That is, whenever the proposed action may potentially result in a change in stream classification or affect any standards promulgated under the Safe Drinking Water Act (42 USC 300 f–j–9), the proposed action shall be considered significant and an EIS prepared. Additionally, should the proposed action or related activity present flood and storm hazards that could endanger life or property, an EIS shall be prepared for the proposal.

(ii) the preservation of natural systems are identifiably affected. Any proposed action or related activities that have the potential to create or induce changes in the exisitng habitat that may affect species diversity and stability (both for flora and fauna and over the short and long term) or affect ecosystem productivity over the long term, are signification actions.

(iii) The proposed action involves any construction within a wetland.

(iv) The proposed action involves the construction of a critical action within the boundaries of the critical action floodplain.

(v) The cumulative effects on floodplain or wetland values and functions of the proposed action and related activities are of sufficient intensity to be declared a significant action under NEPA (see EDA Directive 17.02–2, Appendix B).

(vi) The proposed action is controversial for environmental reasons.

b. *Proposed Action Not Significant.* Regional Environmentalist shall, in addition to the requirements of this Directive, complete the normal environmental review process as specified in Appendix D of EDA Directive 17.02–2, *Regional Office Assessment.*

c. *Proposed Action Significant*—(i) Where an EIS is necessary, the remainder of these procedures shall be carried out in conjunction with the EIS process as outlined in Appendix E of EDA Directive 17.02–2, *Guidelines for Preparation of Environmental Impact Statements.*

(ii) Where the proposed action falls into one of the categories of significant actions listed under subsection 7a and the Regional Environmentalist believes that, despite the nature of the proposed action, it is not a significant action affecting the quality of the human environment, he/she shall demonstrate this fact to the satisfaction of the Special Assistant. The Special Assistant shall be provided with a copy of the Regional Office file (including the Environmental File and copies of correspondence), the pre-application materials submitted for the proposed action, and a copy of the Regional Environmentalist's justification for not conducting an EIS. The Special Assistant shall review these materials and determine the significance of the action.

8. *Floodplain or Wetland Impact: Solicitation and Review of Comments.* a. *Comments From Other Governmental Agencies.*—The Regional Environmentalist shall request, in writing, the comments of other Federal, State or local agencies having jurisdiction over or expertise in actions involving floodplains and/or wetlands concerning the proposed action and alternatives. This shall include, but not be limited to, U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, Environmental Protection Agency, U.S. Soil Conservation Service, National Oceanic and Atmospheric Administration's Office of Coastal Zone Management, and State and local agencies with jurisdiction over wetland areas or activities affecting wetlands. (such as State fish and game bureaus, environmental protection divisions). If the Regional Environmentalist considers the potential impact to be very minimal, comments from the above agencies may be obtained verbally and documented for the Environmental file. If these verbal consultations indicate the environmental potential for more than minimal impact, the requirement for written comments shall apply.

b. *Public Information Meeting Requirement.* Upon receipt of a written request, or where EDA independently makes such a determination, the Regional Environmentalist shall require the prospective applicant to arrange a public information meeting to be chaired by the EDA Regional Environmentalist. The applicant shall precede such meetings with at least two notices published in the newspaper having the greatest circulation in the vicinity of the proposed action *and* in any local or community oriented newspapers within the proposed action's area of impact. The first of the required notices shall be from 15 to 20 days prior to the meeting date, and the second notice 2 to 4 days before the meeting. Such notice shall include the location, date and time of the meeting, a map depicting the location of the proposed action, physical description of the proposal's location and the surrounding area, a brief description of the proposed action under consideration, the EDA Regional Environmentalist's name, address and phone number and whether an EIS will be prepared. In addition, the potential applicant shall mail copies of the notices to appropriate local, State and Federal Agencies, including the State and Area-wide Clearinghouses, public interest groups or individuals which have expressed an interest in the matter or who may be specified by EDA. If such a meeting is held concerning a proposal for which an EIS will be prepared, it shall not be held until at least 30 days have elapsed since the publication of the draft EIS. The potential applicant shall record the meeting, prepared a complete written transcript and supply a copy of these materials to EDA as soon as possible.

c. *Review Comments Received.* The Regional Environmentalist shall review any comments from the public concerning the proposed action and its alternatives, as well as responses to those comments solicited under (a) above. One purpose of this review is to determine the degree of controversy surrounding the proposed action.

The degree of controversy will be an important consideration in determining the need for an EIS. Comments shall also be reviewed for their substantive content and will be considered in the evaluation process where appropriate. Copies of all comments received shall be attached to the Environmental File or EIS prepared for the proposed action.

9. *Floodplain or Wetland Impact: Examination of Alternatives.* a. *Review of all Materials.*—(i) The Regional Environmentalist shall review all pre-application materials submitted by the prospective applicant, the comments received by other Federal, State and local agencies and those of concerned citizens and the Environmental File in light of the requirements imposed by this Directive and the requirements of Executive Orders 11988 and 11990 in order the determine if the proposed action is the practicable alternative which minimizes the impact on floodplains or wetlands. If, based on this evaluation, the Regional Environmentalist determines that the proposed action is not the practicable alternative which minimizes the impacts on floodplains or wetlands, he/she shall inform the Regional Director. The Regional Director shall return the pre-application materials to the propective applicant for restructing before considering the propsed action further. Should the Regional Director disagree with the need for restructing, he/she may exercise the responsibilities contained in item 11.d below.

(ii) Upon receipt of a restructured proposal, the Regional Envoronmentalist shall review the pre-application material to ensure that it contains the identified practicable alternative with the lesser impact on the floodplains or wetlands. Should the prospective applicant have improperly restructured the proposal, it shall be returned with the deficiencies noted. Before the proposal may be again considered by EDA these deficiencies must be corrected.

b. *Site Changes.* If the practicable alternative with lesser impacts involves a site change, i.e., a site removed from the previous site and the new site still impacts floodplains and wetlands, then these procedures starting with subsection 6 shall be repeated, unless the new site has been fully considered in the EIS and publicly presented for review and comment.

10. *Floodplain or Wetland Impact: Mitigation Measures.* Where the Regional Environmentalist determines that the proposed action is the practicable alternative which minimizes impacts on floodplain and wetland values and functions, he/she shall:

Formalize practicable mitigation measures to the proposed action through consultation with the prospective applicant and those parties that have expressed an interest in the proposed action. Practicable mitigation measures shall include measures to restore and preserve natural values and functions. A listing of some possible measures is contained in Appendix E and further guidance are provided in the references section (Appendix D).

Whenever a meeting is held as part of this process, all concerned parties shall be invited to attend. Such a meeting will be chaired by the Regional Environmentalist and a record shall be kept to all mitigation measures proposed. This record shall become part of the Environmental File.

11. *Final Review.* a. *Reevaluate Practicable Alternative.*—The Regional Environmentalist shall, upon formulation of mitigation measures, reevaluate the alternative under consideration to ensure that it is still the practicable alternative that minimizes the impacts on floodplain and wetlands values and functions. If this revaluation indicates that another practicable alternative exists to the proposed action with a smaller degree of impact than the preferred alternative, the appropriate procedures contained in this Directive shall be reinstituted and the new alternative(s) examined.

b. *Examination for Significant Action.* Throughout the review process of a proposed action for which an EIS has not been prepared, the Regional Environmentalist shall periodically examine the proposed action in order to determine whether, in light of additional information or as the result of modifications to the proposed action, the action is significant. This examination is especially important at this stage since the practical alternative has been selected and mitigation measures formulated. Should a proposed action be determined significant, all further processing shall stop and a decision made as to the need to prepare an EIS in accordance with DAO 216–6.

c. *Publish Final Notice.* Where all practicable mitigation measures have been identified and agreed to by the prospective applicant and, if applicable, the EIS process completed, the prospective applicant shall be required to publish final notice of the proposed action. This notice shall be published in the newspaper of greatest circulation in the vicinity of the proposed action and in any local or community-oriented newspaper within the proposed action's area of impact for at least three consecutive days and shall include a physical description of the location of the proposed action and the surrounding area (to include a map when necessary for clarification), a detailed description of the proposal including the nature and extent of the proposed action, the mechanisms utilized to mitigate the impacts of the proposal, projected date of project start and completion and the EDA Regional Environmentalist's name, address and phone number.

This notice shall additionally contain the following information:

- A statement of why the proposed action must be located in a floodplain or a wetland;
- A description of all significant facts considered in making this determination;
- A statement indicating whether the actions conform to applicable state or local floodplain protection standards;
- A statement indicating how the action affects the natural values of floodplains and/or wetlands;
- A statement listing other involved agencies and individuals.

The propsective applicant shall send a copy of this notice to the appropriate State and Areawide Clearinghouses and to all parties expressing an interest in the proposed action or those parties that the Regional Environmentalist has identified to be so notified. The prospective applicant shall provide EDA with a copy of this notice, the dates the notice was published and a list of all parties receiving an individual notice.

Subsequent to the final notice, EDA shall wait at least 15 days for comments before accepting an application. Where the response to the notification raises environmental concerns not previously considered, EDA shall reinstate the appropriate portions of this Directive. For example, the applicant may be

V 4 4 / 1 7 1

required to organize a public information meeting where one was not held during the previous review of the proposed action.

d. *Regional Environmentalist's Findings.* Upon completion of the environmental review process and the requirements of this Directive, the Regional Environmentalist shall make a determination as to whether or not the proposal is both the practicable alternative with the least impact on floodplains or wetlands, and whether the proposal incorporates all practicable mitigation measures necessary to (a) minimize the risk of loss of life and property due to flood and storm damage and (b) minimize the impact on floodplain and wetland values and functions. If the Regional Environmentalist finds that these criteria have been met, he/she shall inform the Regional Director that the application may be authorized should the Agency concur in his/her finding with respect to the project's impact on floodplains or wetlands. Should the Regional Environmentalist find that the proposal fails any of the above tests, he/she shall inform the Regional Director of these findings. The Regional Director shall be responsible for making the final decision on the findings required by Executive Orders 11988 and 11990, and the application shall not be authorized until he/she makes such findings. It is expected that where there is substantial controversy, the Regional Director will consult with the Deputy Assistant Secretary for Economic Development.

e. *Responsibilities of the Regional Office; Special Classes of Business Development Actions.* Because of the special nature of certain Business Development actions which provide financial assistance solely for the purpose of working capital or to purchase machinery, equipment, furniture or fixtures for utilization totally within the confines of existing structures and which do not involve construction or demolition of any portion of these structures nor any change in the types or quantities of waste produced by the facility, EDA has devised a more streamlined approach to their review under the directives imposed by Executive Orders 11988 and 11990. The Agency believes that both the purpose and intent of these Executive Orders can be better served by the substitution of the following procedure for those contained in subsection D of this section.

Working capital loans and guarantees are provided to businesses in need of cash to meet their day-to-day operational needs. Typically, this form of assistance is provided to meet a business' current obligations; wages and salaries, rents, taxes, utility charges, interest on debts, short-term debt principal, and the purchase of raw materials. The alternatives to providing a working capital loan or guarantee will almost always be limited to the no action alternative. Further, the analysis of mitigation measures for such actions is not a relevant consideration unless the action includes the purchase of raw material inventories. The case of raw material inventories is discussed below.

Similarly, alternatives to actions involving the purchase of equipment or machinery that involve no construction or demolition of structures or no change in the waste produced by a facility will generally be limited to the no action alternative. Only in those instances where the value of the improvements to a structure or facility exceeds 50 percent of the pre-improvement market value of the structure or facility will other alternatives come into play. Consequently, the abbreviated review process does not apply where this is true. Unlike most actions involving working capital loans or guarantees, however, mitigation will often be a relevant consideration in the review process of a fixed asset loan or guarantee for the purposes cited above.

1. *Examination of the Proposed Action.* The Regional Environmentalist shall carry out the procedures contained in subsection D. 1 and 2 in conducting his/her review of the proposal. In addition, the Regional Environmentalist shall ensure that a listing of the types and amounts of raw material and the location of their storage is included in the pre-approval documents for all working capital loans and guarantees. Further, for those actions involving the purchase of equipment, machinery, furniture or fixtures, the Regional Environmentalist shall ensure that the pre-improvement market value of the structure or facility and the total cost of the improvements are included in the pre-approval documents. Where such information is absent or insufficient, the Regional Environmentalist shall note the deficiencies and return the documents to the Office of Business Development for correction.

2. *Determine the Location of the Proposed Action Relative to Floodplains and Wetlands.* If, on the basis of the HUD floodplain maps or information gathered following the guidance provided by the WRC; the materials submitted by the prospective applicant as required in subsection C; or any National, State or local wetland survey that may have been prepared, any portion of the business activity lies within a floodplain or a wetland (including the storage of inventories of raw materials), the proposal will impact a floodplain or a wetland and the procedures contained in this subsection shall apply.

If the examination of the aforementioned materials do not indicate that any portion of the business activity lies within a floodplain or a wetland, the Regional Environmentalist shall inform the Regional Director that the proposed action will not impact floodplain or wetland values and functions and recommend that the appropriate findings as specified in Section VII of this Directive should be made. Once the Regional Director has made these findings, the requirements imposed by this Directive and the requirements of Executive Orders 11988 and 11990 are complete.

3. *Floodplain and/or Wetland Impact.* a. *Working Capital Loans and Guarantees.*— For all such proposed actions located within a floodplain or a wetland, the Agency shall examine the no action alternative. If the no action alternative is not practicable and the proposal involves the purchase of raw material inventories, the Regional Environmentalist shall examine the nature and proposed method of storage of these materials. Generally, mitigation will be necessary if the proposal involves the storage of raw material inventories within the boundaries of a floodplain or a wetland.

Materials that are subject to damage should they become wet must be stored above the level of the base flood, if practicable. Materials, such as water reactive substances, that fall within the definition of critical actions must, if practicable, be stored above the level of the 500 year flood. In all such cases, the Agency shall give special emphasis to the storage of such raw material inventories outside of wetlands and outside the appropriate floodplain of concern. Additionally, where this cannot be practicably accomplished for critical actions located within the critical action floodplain, the Regional Environmentalist shall examine the proposal under the guidance provided in subsection D.7. the purpose of the examination is to determine whether the proposed action has significant environmental impacts within the meaning of Section 102(2)(C) of NEPA.

Upon the establishment of the practicable mitigation measure(s) that minimizes the impact on floodplain and wetland values and functions, or in those cases where the proposed action does not involve the purchase of raw materials, the Regional Environmentalist shall inform the Regional Director of the results of this review and recommend that the appropriate findings as specified in Section VII should be made. The Regional Director or, in the case of centralized proposals, the Director of OBD in consultation with the Special Assistant shall inform all private parties participating in the transaction (e.g., a bank) of the hazards associated with the location of facilities in floodplains or wetland areas. The form letter contained in Exhibit A shall be used for this purpose.

Additionally, for all amendments to such forms of assistance that involve a change in the private party participation in the action, the Regional Director or Director of OBD shall notify all such private parties via the form letter contained in Exhibit A.

b. *Purchase of Equipment, Machinery, Furniture or Fixtures.* For all proposed actions located in a floodplain or wetland, the Regional Environmentalist shall examine the pre-application materials to ascertain the ratio of the costs associated with the improvements to the structure or facility and its pre-market value. If this ratio exceeds 50 percent, the proposed action is subject to the full review procedures contained in subsection D of this Section and shall not be reviewed under this subsection.

The review of proposals having a ratio below the 50 percent level, including mitigation measures, generally follows those steps outlined in 3(a) above. Amendments to such actions that involve a change in participating private parties also shall be subject to the notification requirements outlined in 3(a) above.

VII. Findings

As part of the Regional Office Environmental File, the Regional Director shall make a finding for both floodplains and wetlands prior to authorization of any application:

The Agency's policy with respect to Executive Order 11990 (Protection of Wetlands) has been met since:

- The proposed action will not impact wetland values and functions.
- There is no practicable alternative to the proposed action which avoids impacting a wetlands; however, (a) the proposed action is the practicable alternative which minimizes the impact on wetlands *and* (b) all practicable mitigation measures which minimize the impact on wetland natural values and functions and minimize the risk of loss of life and property due to flood and storm damage have been incorporated in the proposed action.

The Agency's policy with respect to Executive Order 11988 (Floodplain Management) has been met since:

- The proposed action will not impact floodplain values and functions.
- There is no practicable alternative to the proposed action which avoids impacting a floodplain; however, (a) the proposed action is the practicable alternative which minimizes the impact on floodplains *and* (b) all practicable mitigation measures which minimize the impacts on floodplain natural values and functions and minimize the risk of loss of life and property due to flood and storm damage have been incorporated in the proposed action.

VIII. Reporting Requirements

1. It shall be the responsibility of the Regional Office to keep complete and accurate records on all proposed actions to which the procedures contained herein apply. These records shall be kept current and record the following information.

a. For every action or related activity that was determined to have the potential to impact either floodplain or wetland values and functions:

(i) The location and nature of the action;

(ii) The number of acres of floodplains and/or wetlands impacted by the proposed action;

(iii) The number of acres of floodplains and/or wetlands impacted by related activities; and

(iv) A general description of impacts.

b. A listing of those actions, where as a result of these procedures the impacts were successfully eliminated and a description of how these impacts were eliminated.

c. A list of actions, where as a result of these procedures practicable alternatives which minimized the impact on floodplains and/or wetlands were substituted for the original proposal.

d. A listing of those actions, where as a result of these procedures, no practicable alternative to impacting a floodplain and/or a wetland could be found and the Agency chose the no action alternative.

2. A copy of these reports shall be supplied to the Special Assistant for the preparation of EDA's annual report to the Council on Environmental Quality. The date of the required submission of these reports shall be specified by the Special Assistant.

IX. Planning Related Programs

The following procedures shall apply to all Planning, Technical Assistance and Title IX adjustment strategy programs.

A. *Planning.* It shall be the responsibility of the appropriate planning division to inform its grantees of the intent of Executive Orders 11988 and 11990 and EDA's policy as stated within this Directive.

B. *Technical Assistance and Title IX adjustment strategy.* It shall be the responsibility of the appropriate program office to inform its grantees of EDA's policy with respect to Executive Orders 11988 and 11990.

C. *All programs.* EDA shall encourage each Grantee receiving assistance under these programs to initiate a process to identify floodplains and wetlands within its planning jurisdiction or study area. For all new assistance granted subsequent to the effective date of the Directive, the program office shall condition the grant to require all grantees to identify the location and extent of floodplains and wetlands within the planning area based on published data in order to initiate a data base and to consider the impacts of the plan on floodplain and wetland values and functions. For any study undertaken which indicates that a floodplain or a wetland could be impacted, a thorough examination of alternatives shall be incorporated in the study and justification given for rejecting those alternatives not selected.

Planning appraisals shall address the grantee's ability to incorporate the considerations addressed in this Directive into local plans. These reviews shall also consider the impact of the economic goals and activities espoused by the grantee on the natural values and functions of floodplains and wetlands. Should potential impacts to floodplain or wetland values and functions be identified during the appraisal, the Regional Environmentalist shall be notified.

X. Applicability to Projects

This Directive is effective upon signing for all Title I projects for which a profile (ED–101P or Early Information System Profile 1100T) has not been filed. It is effective upon signing for all other covered actions for which an application has not been authorized.

All Title I actions which have progressed beyond the filing of a profile and all other covered actions which have progressed beyond the authorization of an application must meet the requirements of the Executive Orders through implementation, by the Regional Offices, of the provisions of Department Administrative Order 216–11, "Floodplain Management and Protection of Wetlands."

XI. Effect on Other Directives

This Directive supersedes those portions of EDA Directive 10.03–5, "Requirements for Projects Involving Flood Hazards," applicable to Executive Order 11296.

Robert Hall,

Assistant Secretary for Economic Development.

Appendix A—Executive Orders 11988 and 11990

Appendix B—Procedures for Determining Floodplain Location

This Appendix summarizes information contained in the Water Resources Council's "Guidance for Floodplain Management" as published on Friday, September 30, 1977, in the **Federal Register** (42 FR 190, p. 52591–52598). This information is presented to aid persons familiar with the published "Guidance" in making determinations of floodplain location. This Appendix is not intended to substitute for the materials contained in the "Guidance for Floodplain Management."

Guidance for Determining Whether a Proposed Action is Located in a Floodplain

Summary of Search Procedure for Obtaining Necessary Information (Proceed through steps only as far as needed)

Given the location of a proposed action—

In areas of predominantly Federal land ownership or in areas of predominantly private land ownership:

Step 1. Seek flood insurance rate map and/or flood insurance study report (Provides detailed information adequate for making determination).

Step 2. Seek flood hazard boundary map (Provides approximate information and may require technical assistance for making determination).

Step 3. Seek technical assistance from a Federal or State agency (May provide detailed information and interpretation or develop new information as needed to make determination).

Step 4. Seek technical assistance from an experienced consulting engineer (Data should be of comparable quality to that required for Flood Insurance Study Report).

Areas of Predominantly Private Land Ownership. If a decision involves a publicly or privately-owned site within an area of predominantly private ownership, a map showing the flood hazard areas will usually be available from the National Flood Insurance Program administered by the Federal Insurance Administration (FIA), HUD. Detailed maps showing the elevations and boundaries of the "100-Year" (Zones A and V) and "500-year (Zone B) floodplains are known as "Flood Insurance Rate Maps" (FIRM).

Many of the communities which have a FIRM also have a Flood Insurance Study (FIS) Report containing detailed flood information. Some 13,000 less detailed maps showing the approximate area of the 100-year (Zone A) floodplain are available for most of the communities for which FIRMs have not been completed. These are called "Flood Hazard Boundary Maps" (FHBM).

The search for information shall follow the sequence outlined below (Refer to the preceding summary program). The detailed map (FIRM) of the Flood Insurance Study (FIS) should be consulted first.

A G 3 1 7 9 UMI

V 4 4 / 1 7 1

If a detailed map (FIRM) is not available—obtain an approximate boundary map (FHBM). If the proposed site is at or near the 100-year flood boundary, or if data on flood elevations are needed, or if the map does not delineate the flood hazard boundaries in the vicinity of the proposed site—seek detailed information and assistance from the agencies listed. (There are additional agencies with professional competence not listed which can perform their own floodplain studies when needed.)

If an approximate boundary map (FHBM) is not available or if the map does not delineate the flood hazard boundaries in the vicinity of the proposed site—seek detailed information and assistance from the agencies listed below.

If the agencies do not have or know of detailed information and are unable to assist in determining the location of the floodplain—seek the services of a licensed consulting engineer experienced in this type of work. The quality of information obtained from the consulting engineer must be comparable to that required of flood insurance study contractors for the FIA.

Two cautions must be recognized in utilizing flood insurance maps: (1) Flood insurance maps generally do not delineate portions of the floodplain less than 200 feet wide and (2) possible adverse consequences from future development are difficult to infer from the maps. Thus, technical assistance may be desirable for interpreting flood insurance maps.

Specific and detailed information concerning FIRMs is contained in the FIA publication, "How to Read a Flood Insurance Rate Map." Similarly, the publication, "How to Read a Flood Hazard Boundary Map" contains information concerning FHBMs.

Areas of Predominantly Federal and State Land Holdings

If a decision involves an area or location within extensive Federal or State holdings, it is unlikely that FIS reports and FIRM or FHBM maps would be available. In this event, information should be sought from the land administering agency before information and/or assistance is sought from the agencies listed below. If none of these agencies have information or can provide assistance, the services of an experienced consulting engineer shall be sought as described above.

Agencies Offering Floodplain Services

Information and service (agency)	Floodplain (maps and profiles)		Technical assistance services
	Riverine	Coastal	
Dept. of Agriculture: Soil Conservation Service	x	x	x
Dept. of the Army: Corps of Engineers	x	x	x
Dept. of Commerce: National Oceanic and Atmospheric Administration			x

States and Regional agencies		Varies from State to State.	

Appendix C—Procedures for Determining a Wetland Location

The procedures contained herein shall be used in determining the location of a wetland.

Guidance for Determining Whether a Proposed Action Is Located in a Wetland

Summary of Search Procedure for Obtaining the Necessary Information

Given the location of a proposed action—

Step 1. Examine applicant supplied materials (Topographic Map, Site and Aerial Photographs) for Evidence of Wetland Areas.

Step 2. Consult local, State or Federal Wetland survey or inventory.

Step 3. Seek technical assistance from Federal or State Agencies.

Review of Topographic Maps, Site and Aerial Photographs. These materials shall be examined for evidence of wetland areas. Topographic maps prepared by the USGS often depict the general existence of wetlands within a given area. Photographic documentation must be examined for evidence of vegetation typically associated with wetland areas within the proposal's area of potential impact.

Consult Local, State or Federal Wetland Surveys or Inventories. The Publication, *Existing State and Local Wetland Surveys* (USFWS, 1976) shall be used to identify the existence of surveys in the area of the proposed action. If a survey has been conducted for the area, the Regional Environmentalist shall obtain a copy for use in making this determination. As the National Wetlands Inventory is completed, copies will be supplied for the use of the Regional Environmentalist. In areas where the Inventory is complete, the Agency may use this information instead of the *Existing State and Local Wetlands Surveys* publication in making the determination of whether a wetland exists within the proposed action's area of impact.

Assistance from State and Federal Agencies. Many State agencies can provide information concerning the existence of wetlands within a project area. Most agencies involved in such activities can be identified by consulting the aforementioned publication, *Existing State and Local Wetlands Surveys.*

Several Federal agencies can also provide information concerning the existence of wetlands surveys or the location of wetland areas within a given area. These are listed below.

Department of Interior, Fish and Wildlife Service

The U.S. Fish and Wildlife Service is presently preparing the National Wetlands Inventory. Each Regional Office of the USFWS has, as a member of the staff, a Wetland Coordinator. These individuals can provide updated information concerning existing State and local wetland surveys and Federal inventories. These individuals are listed below by USFWS Regional Office and area of responsibility.

USFWS Region I

Regional Director (ARDE), Region I, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 N.E. Mautnomah Street, Portland, OR 97232, FTS 429–6154, Telecopier 429–6116, Commercial 503–231–6116, Attn: *Dennis Peters,* Regional Wetland Coordinator.

Areas covered: California, Hawaii, Idaho, Nevada, Oregon, Washington, U.S. Pacific Trust, Territories and Possessions.

USFWS Region II

Regional Director (ARDE), Region II, U.S. Fish & Wildlife Service, P.O. Box 1306, Albuquerque, NM 87103, FTS 474–2914, Telecopier 474–2289, Commercial (505) 766–2914, attn: *Warren Hagenbuck,* Regional Wetland Coordinator.

Areas covered: Arizona, Oklahoma, New Mexico, Texas.

USFWS Region III

Regional Director (ARDE), Region III, U.S. Fish & Wildlife Service, Fed. Bldg., Ft. Snelling (AS/BSP), Twin Cities, MN 55111, FTS 725–3593, Telecopier 725–3508, Commercial (612) 725–3510, attn: *Ron Erickson,* Regional Wetland Coordinator.

Areas covered: Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin.

USFWS Region IV

Regional Director (ARDE), Region IV, U.S. Fish & Wildlife Service, P.O. Box 95067, Atlanta, GA 30347, FTS 257–4781, Telecopier 257–4249, Commercial (404) 881–4781, attn: *John Hefner,* Regional Wetland Coordinator.

Areas covered: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Panama Canal Zone, Puerto Rico, South Carolina, Tennessee, Virgin Islands.

USFWS Region V

Regional Director (ARDE), Region V, U.S. Fish & Wildlife Service, 1 Gateway Center, Suite 700, Newton Corner, MA 02158, FTS 829–9217, Commercial (617) 965–5100, ext. 217, attn: *Ralph Tiner,* Regional Wetland Coordinator.

Areas covered: Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

USFWS Region VI

Regional Director (ARDE), Region VI, U.S. Fish and Wildlife Service, P.O. 2548 Denver Federal Center, Denver, CO 80225, FTS 234–5586, Telecopier 234–4607, Commercial (303) 234–5586, attn: *Eugene Hansmann,* Regional Wetlands Coordinator.

Areas covered: Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Utah, Wyoming.

Alaska Area Office

Regional Director (ARDE), Alaska Area Office of U.S. Fish & Wildlife Service, 1011 E. Tudor Road, Anchorage, AK 99503, FTS 8–300–0150 and ask for 907–276–3800, ext. 412, attn: *Art Laperriere,* Regional Wetlands Coordinator.

National Wetlands Inventory

Project Leader, National Wetland Inventory Project, U.S. Fish and Wildlife Service, Suite 217, Dade Building, 9620 Executive Center Drive, St. Petersburg, FL 33702, FTS 8–826–3624, Commercial (813) 893–3624.

Department of Agriculture, Soil Conservation Service (SCS)

If the State or field office address is not known, contact:

Chief, Floodplain Management and Special Projects Branch, River Basins Division, Soil Conservation Service, P.O. Box 2890, Washington, D.C. 20013, telephone: 202/447–7697.

Department of the Army, Corps of Engineers (COE)

If field office address is not known contact:

Chief, Floodplain Management Services, U.S. Army and Independence Avenue, SW, Washington, DC 20314, telephone 202–693–1691.

Department of Commerce, Office of Coastal Zone Management (OCZM)

Assistance may be obtained regarding individual State Coastal Zone Management Plans by contacting:

Chief, Environmental Assessment and Sanctuaries Staff, OCZM, 3300 Whitehaven Street, NW, Washington, DC 20235, telephone 202–632–5231.

Appendix D

I. Materials Which Aid in Identifying Floodplains and Wetlands

The following listed materials should be consulted throughout the required "Determination of Floodplain or Wetland Impact" sections of this Directive. These sources generally expand on the guidance provided in the Directive. These materials will be most helpful in those situations where the potential to impact floodplains or wetlands is uncertain or unknown.

Cowardin, L. M., et. al. 1977. *Classification of Wetlands and Deepwater Habitats of the United States.* Washington, DC: U.S. Department of Interior, Fish and Wildlife Service.

Federal Insurance Administration. 1977. "How to Read Flood Hazard Boundary Maps." Washington, DC: U.S. Department of Housing and Urban Development. Publication Number: HUD–FIA–149.

Federal Insurance Administration. 1977. How to Read a Flood Insurance Rate Map," Washington, DC: U.S. Department of Housing and Urban Development. Publication Number HUD–FIA–252.

Office of Biological Services. 1976. *Existing State and Local Wetland Surveys 1965–1975.* St. Petersburg, FL: U.S. Department of Interior, Fish and Wildlife Service. NTIS Code: PB–278427.

II. Materials Describing Natural Values and Functions

Clark, John. 1977. *Coastal Ecosystems,* Washington DC. The Conservation Foundation.

Jaworski, E. and Raphael, C. N. 1978. *Fish, Wildlife and Recreational Values of Michigan's Coastal Wetlands.* Ypsilanti, Michigan: Eastern Michigan University, Department of Geography-Geology.

Jaworski, E., et. al. 1977. *General Functions and Values of Freshwater Wetlands in the Glaciated Midwest.* Ypsilanti, Michigan: Eastern Michigan University, Department of Geography-Geology.

Larson, J. S. 1973. *Guide to Important Characteristics and Values of Freshwater Wetlands in the Northeast.* Water Resources Research Publication No. 31. Amherst, MA: University of Massachusetts.

Odum, H. T., et. al. eds. 1974. *Coastal Ecological Systems of the U.S.* Washington, DC: The Conservation Foundation Soil Conservation Service. *Gulf Coast Wetlands Handbook.* Alexandria, LA: U.S. Department of Agriculture.

III. Assessment of Impact, Development of Mitigation Measures and Non-Structural Flood Protection Methods

The following list of references provide an excellent source of general information concerning floodplains and wetlands and the impacts that can be expected from undertaking various activities. These works should be consulted frequently in carrying out any analysis called for in this Directive.

Darnell, Rezneat M., et. al. 1976. *Impacts of construction Activities in Wetlands of the United States.* Corvallis, WA: U.S. EPA, Office of Research and Development. Publication Number: EPA–600/3/76–045

This work deals not only with wetland impacts but also with floodplain and water bottom impacts of construction activities. It is an excellent document and should always be consulted in carrying out reviews and assessments under this Directive.

Engineering Division, Soil Conservation Service, 1975. *Urban Hydrology for Small Watersheds.* Washington, DC: U.S. Department of Agriculture Technical Release No. 55.

Tourbier, Joachim and Richard Westmacott. 1974. *Water Resources Protection Measures in Land Development—A Handbook,* Final Report Prepared for U.S. DOI, Office of Water Resources Research. Newark, DE: Water Resources Center, University of Delaware.

This work is especially useful as a guide for the development of mitigation measures and non-structural flood protection methods.

Office of Biological Services. 1977. *Habitat and Population Improvement Measures Accompanying Water Resource Development Projects.* Washington, DC: U.S. Department of Interior, Fish and Wildlife Service. Publication Number FWS/OBS–77/30.

IV. Miscellaneous

The following list of references provide more detailed information on specific impacts or generalized information that supplement the information contained in the works cited in III above.

Amy, Gary, et. al. 1974. *Water Quality Management Planning for Urban Runoff.* Washington, DC. U.S. EPA, EPA Publication No. EPA 440/9–75–004.

Bhutani, J., et. al. 1975. *Impact of Hydrologic Modifications on Water Quality.* McLean, VA: Mitre Corporation, Mitre Tech. Report NTR–6887.

Carstea, D., et. al., 1975. *Guidelines for the Analysis of Cumulative Environmental Effects of Small Projects in Navigable Waters.* McLean, VA: Mitre Corporation, Mitre Technical Report MTR–6939.

Good, R. E., et. al., eds. 1978. *Freshwater Wetlands.* New York: Academic Press.

Office of Air and Water Programs, 1973. *Methods for Identifying and Evaluating the Nature and Extent of Nonpoint Sources of Pollutants.* Washington, DC: U.S. EPA, Publication No. EPA–430/9–73–014.

Office of Water and Hazardous Materials, 1976. *A manual of Laws, Regulations and Institutions for Control of Ground Water Pollution.* Washington, DC: U.S. EPA.

Office of Water Planning and Standards, 1976. *Methods to Control Fine-Grained Sediments Resulting from Construction Activity.* Washington, DC: U.S. EPA.

Ortolano, Leonard, ed. 1973. *Analyzing the Environmental Impacts of Water Projects,* A report submitted to the U.S. Army Engineer Institute for Water Resources, Stanford, CA: Stanford University, Department of Civil Engineering, AD–766 286.

U.S. EPA, 1973. *The Control of Pollution from Hydrographic Modifications.* Washington, DC.

U.S. EPA. *Inter-relations of Land Use Planning and Control to Water Quality Management Planning.* Washington, D.C. Environments for Tomorrow, Contract No. 68–01–0750.

Appendix E—Methods To Minimize, Restore and Preserve

Methods To Minimize, Restore and Preserve

A wide range of methods have been developed over time to minimize harm to lives and property from flood hazards. In the recent past, other methods directed toward minimizing harm to natural and beneficial environmental values, including those associated with the floodplain, have also been developed. The technology and

A G 3 1 7 9 UMI

V 4 4 / 1 7 1

methodologies for achieving restoration and preservation are not well documented nor understood, but currently are receiving increased attention. The tools and approaches, which are directed toward attaining these three goals of the Order, shall be considered and applied at all stages of a proposed action, as appropriate, e.g., during the planning, design, construction, operation and maintenance of a proposed project. References concerning specific implementation of these measures are contained in Appendix D.

Natural Moderation of Floods

- Minimize floodplain fills and actions that require fills such as construction of dwellings, factories, highways, etc.
- Require that structures and facilities constructed in floodplains and wetlands provide for adequate hydrologic flow and circulation.
- Use minimum grading requirements and avoid compaction of soils on the site to the extent possible.
- Relocate nonconforming structures and facilities out of floodplains or wetlands.
- Return site to natural contours.
- Preserve free and natural drainage when designing and constructing bridges, roads, and pipeline crossings.
- Prevent intrusion on and destruction of beach and estaurine ecosystems and restore damaged dunes and vegetation.
- Revegetate the site with native floodplain or wetland plant species.

Water Quality

- Maintain wetland and floodplain vegetation buffers to reduce sedimentation and pollution of the water body.
- Control agricultural activities to minimize nutrient inflow into water bodies.
- Control urban runoff, other storm water, and point and nonpoint discharges.
- Control methods used for grading, filling, soil removal and replacement, etc., to minimize erosion and sedimentation during construction.
- Prohibit the location of potential pathogenic and toxic sources on the floodplain, such as sanitary land fills and septic tank, etc.

Groundwater Recharge

- Require the use of pervious surfaces wherever practicable.
- Design construction projects for runoff detention, both during the construction and operational phase.
- Dispose of spoils and waste materials so as not to contaminate ground or surface water or change land contours.

Living Resources

- Identify and protect wildlife habitat and other vital ecologically sensitive areas from disruption.
- Require topsoil protection programs during construction.
- Avoid wetland drainage, channelization, and water withdrawal.
- Reestablish damaged floodplain ecosystems.
- Minimize tree cutting and other vegetation removal.
- Design floodgates and seawalls to allow natural tidal activity and estuarine flow.

Cultural Resources

- Provide public access to and along the waterfront for recreation, scientific study, educational instruction, etc.
- Locate and preserve from harm historical cultural resources; consult with appropriate government agency or private group.

Agricultural Resources

- Minimize soil erosion on cropped areas within floodplains.
- Control use of pesticides, herbicides, and fertilizer.
- Limit the size of fields, promote fence rows, shelter belts and strip-cropping.
- Strengthen water bank and soil bank type programs to be consistent with alternate demands for the use of agricultural land.
- Minimize irrigation return flows and excessive applications of water.

Aquacultural Resources

- Construct impoundments to minimize any alteration in natural drainage and flood flow. Existing natural impoundments such as oxbow lakes and sloughs could be utilized under proper management.
- Limit the use of exotic species, both plant and animal, to those organisms already common to the area or those known not to compete unfavorably with existing natural populations.
- Discourage mechanized operations. Machinery such as dredges, weeders, and large-scale harvesting equipment may lead to environmental problems such as sediment loading in adjacent watercourses.

Forestry Resources

- Control the practice of clear-cutting, depending upon the species harvested, topography, and location.
- Complement State law governing other aspects of harvest operations; proximity to watercourses, limits on roadbuilding, equipment intrusions, etc.
- Require erosion control plans on all, roads and skidways.

Appendix D—Selected References, by Topic

Exhibit A—Form Letter for Notifying Private Parties Participating in an EDA Action

Private parties which participate in EDA Business Development actions impacting either floodplain or wetland values and functions shall be notified in writing of the hazards associated with activities so located. The form letter provided below should be used for this purpose.

(Date)
(Name and Address)
(of Private Party)

Dear (Name of Responsible Official):

As a party involved in providing financial assistance to (Name of Applicant), it is our responsibility under Executive Orders 11988, "Floodplain Management" and 11990, "Protection of Wetlands," to inform the (Name of Private Party) that (Name of Applicant) located at (Location or Locations of Facilities or Structures Involved) are located within a floodplain and/or a wetland.

Also, it is our responsibility to inform you of the hazards associated with conducting activities within a floodplain and/or a wetland. These include:

a. Increased occurrence of flooding;
b. Increased severity of flooding;
c. Increased risk to public health and safety; and
d. Increased risk of property losses.

If you have any questions or desire further information on this matter, please do not hesitate to contact us.

Sincerely,
(Name)
Regional Director
(or OBD Director if a Headquarters Project)

Dated: August 24, 1979.

Robert Hall,

Assistant Secretary for Economic Development.

BILLING CODE 3510-24-M

Petitions by Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions have been accepted for filing from eighteen firms: (1) Bonders, Inc., 200 Bonders Drive, Dunn, North Carolina 28334, a producer of women's coats (accepted August 15, 1979); (2) United States Stove Company, P.O. Box 151, South Pittsburg, Tennessee 37380, a producer of heaters and stoves (accepted August 15, 1979); (3) Marshall Ray Corporation, 701 Rover Street, Troy, New York 12180, a producer of men's sportcoats (accepted August 15, 1979); (4) Hahn, Inc., 1625 N. Garvin, Evansville, Indiana 47711, a producer of lawn mowers, garden tillers and other equipment (accepted August 16, 1979); (5) Inland Shoe Manufacturing Company, 1020 Anglum Drive, Hazelwood, Missouri 63042, a producer of men's, women's and children's shoes (accepted August 16, 1979); (6) Pearse Leather Products, Inc., 7 Kershaw Avenue, Hampton, New Hampshire 03842, a producer of leather belts, billfolds and cases (accepted August 16, 1979); (7) National Coated Fabrics, 7575 Northwest 74th Street, Miami, Florida 33166, a producer of coated fabrics (accepted August 17, 1979); (8) Cohoes Fabrics Printers, Inc., 1 Ontario Street, Cohoes, New York 12047, a producer of printed fabric (accepted August 17, 1979); (9) Sapolin Paints, Inc., 100 Saw Mill Road, Danbury, Connecticut 06810, a producer of paints and coatings (accepted August 17, 1979); (10) Brady Cline Coal Company, P.O. Box 208, Summersville, West Virginia 26651, a producer of coal (accepted August 17, 1979); (11) Claremont Beef Company, Inc., P.O. Box 532, Airport Road, Claremont, New Hampshire 03743, a processor of meat (accepted August 17, 1979); (12) Bel-Mor Knitwear, Inc., 1885 New Highway, Farmingdale, New York 11735, a producer of women's sweaters and tops (accepted August 20, 1979); (13) Penn Garment Company, Inc., 2000 Mill Lane, Williamsport, Pennsylvania 17701, a producer of apparel braid and trim; and uniforms (accepted August 20, 1979); (14) Town Talk Coat Company, Inc., 512 7th Avenue, New York, New York 10018, a producer of women's coats (accepted August 20, 1979); (15) Recreational Electronics, Inc., 4111 West 47th Street, Chicago, Illinois 60632, a producer of electronic resistors, rheostats, potentiometers, switches, and circuit boards (accepted August 20, 1979); (16) West Coast Knitting Mills, Inc., 420 West Avenue 33, Los Angeles, California 90031, a producer of men's and women's sweaters and shirts (accepted August 21, 1979); (17) Ralph Edwards Sportswear, Inc., 334 N. Broadview Street, Cape Girardeau, Missouri 63701, a producer of men's leather jackets (accepted August 21, 1979); and (18) Leather Classics, Inc., 125 First Street, La Follette, Tennessee 37766, a producer of men's and women's jackets and coats (accepted August 22, 1979).

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States or articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business September 10, 1979.

Jack W. Osburn Jr.,

Chief, Trade Act Certification Division, Office of Eligibility and Industry Studies.

Industry and Trade Administration

Export Promotion Working Group of the President's Export Council; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976) notice is hereby given that a meeting of the Export Promotion Working Group of the President's Export Council will be held on Wednesday, September 19, at 10:00 a.m. in the Department of Commerce, Room 4830, 14th and Constitution Avenue, NW., Washington, D.C. The Council was initially established by Executive Order 11753 of December 20, 1973, subsequently extended by Executive Order 11827 of January 4, 1975, Executive Order 11948 of December 20, 1976, and Executive Order 12100 of December 28, 1978. The Council was reconstituted by Executive Order 12131 of May 4, 1979, to advise the President on matters relating to United States export trade, including the implementation of the President's National Export Policy. The Working Group has been formed to make recommendations to the Council regarding programs to promote U.S. exports and to create greater export awareness in the U.S. The Working Group is composed solely of members of the Council.

The agenda for the meeting will be as follows:

Introductory remarks by the Working Group Chairman
Report on progress of the public relations campaign
Report on progress of the multiplier program
Report on progress on the trade intermediary project
Discussion
Other organizational business, announcements, and plans for next meeting.

A limited number of seats at the meeting will be available to the public on a first-come basis. The public may file written statements with the subcommittee before or after each meeting. Oral statements may be presented at the end of the meeting to the extent that time is available.

Copies of the minutes of the meeting will be made available on written request addressed to the Freedom of Information Officer, Industry and Trade Administration, Records Inspection Facility, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Further information concerning the President's Export Council may be obtained from Ms. Wendy Haimes, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-5719.

Dated: August 27, 1979.

Peter G. Gould,

Deputy Assistant Secretary for Export Development.

BILLING CODE 3510-25-M

President's Export Council; Meeting

Pursuant to section 10(a) (2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the President's Export Council will be held on Thursday, September 20, at 8:15 a.m. in Room 2200 of the Rayburn House Office Building, Washington, D.C. The President's Export Council was initially established by Executive Order 11753 of December 20, 1973, subsequently extended by Executive Order 11827 of January 4, 1975, Executive Order 11948 of December 20, 1976, and Executive Order 12110 of December 28, 1978. The President's Export Council was reconstituted by Executive Order 12131 of May 4, 1979, to advise the President on matters relating to United States export trade, including advice on the implementation of the President's National Export Policy.

The agenda for the meeting will be as follows:

Welcoming remarks and brief introduction
Remarks by Cabinet level attendees, Senators and Congressmen
Reports from the Chairmen of the Subcommittees on:
GATT and the MTN
East-West Trade
Export Promotion
Export Expansion
Export Administration
Agriculture
Discussion
Other organizational business, announcements and plans for next meeting.

A limited number of seats at the meeting will be available to the public on a first-come basis. The public may file written statements with the subcommittee before or after each meeting. Oral statements may be presented at the end of the meeting to the extent that time is available.

Copies of the minutes of the meeting will be made available on written request addressed to the Freedom of Information Officer, Industry and Trade Administration, Records Inspection Facility, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Further information concerning the President's Export Council may be obtained from Ms. Wendy Haimes, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-5719.

BILLING CODE 3510-25-M

Subcommittee on Agriculture of the President's Export Council; Meeting

Pursuant to Section 10(a) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976) notice is hereby given that a meeting of the Subcommittee on Agriculture of the President's Export Council will be held on Tuesday, September 18 at 10:00 a.m. in Room 218-A of the U.S. Department of Agriculture's Administration Building, Fourteenth and Independence Avenue, SW., Washington, D.C. 20250. The Council was initially established by Executive Order 11753 of December 20, 1973, subsequently extended by Executive Order 11827 of January 4, 1975, Executive Order 11948 of December 20, 1976, and Executive Order 12100 of December 28, 1978. The Council was reconstituted by Executive Order 12131 of May 4, 1979, to advise the President on matters relating to United States export trade, including the implementation of the President's National Export Policy. The Subcommittee on Agricultural has been formed to deal with all aspects of U.S. governmental policies, GATT rules, the Tokyo Round trade agreements, or other domestic or foreign developments that affect U.S. agricultural exports. The Subcommittee on Agriculture is composed solely of members of the Council.

The purpose of the meeting is to allow the Department of Agriculture to brief the Subcommittee on the agricultural export situation and for the Subcommittee to decide on its plan of work. The agenda is as follows:

Welcome by Secretary Bergland
Opening remarks by the Chairman and introduction of the Subcommittee members
USDA's role in international affairs
Panel on the involvement of USDA agencies (other than FAS/OGSM) in programs concerned with agricultural exports and problems encountered
FAS/OGSM organization and market development program
Subcommittee discussion on plan of work
Other business.

A limited number of seats at the meeting will be available to the public on a first-come basis. The public may file written statements with the subcommittee before or after each meeting. Oral statements may be presented at the end of the meeting to the extent that time is available.

Copies of the minutes of the meeting well be made available on written request addressed to the Freedom of International Officer, Industry and Trade Administration, Records Inspection Facility, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Further information concerning the Subcommittee on Agriculture may be obtained from Ms. Wendy Haimes, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-5719.

Dated: August 27, 1979.

Peter G. Gould,

Deputy Assistant Secretary for Export Development.

BILLING CODE 1505-01-M

National Oceanic and Atmospheric Administration

Pacific Fishery Management Council and its Scientific and Statistical Committee; Public Meeting With Partially Closed Session

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Pacific Fishery Management Council and its Scientific and Statistical Committee will conduct a series of meetings.

DATES: October 10-12, 1979.

ADDRESS: The meetings will take place at the North Shore Motor Hotel and Convention Center, North Shore Plaza, Couer d'Alene, Idaho.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S. W. Mill Street, Second Floor, Portland, Oregon 97201, Telephone: (503) 221-6352.

SUPPLEMENTARY INFORMATION: The Pacific Fishery Management Council was established by Section 302 of the Fishery Conservation and Management Act of 1976 (Public Law 94-265), and the Council has established a Scientific and Statistical Committee to assist in carrying out its responsibilities. Meeting Agendas follow:

Scientific and Statistical Committee (SSC) (open meeting) (October 10-11, 1979) (1 p.m. to 5 p.m. on Wednesday, October 10; 10 a.m. to 5 p.m. on Thursday, October 11).

Agenda: Discuss fishery management plans (FMP's) under development, conduct a public comment period beginning at 3:30 p.m. on October 10, and conduct other Committee business.

Council (open meeting) (October 11-12, 1979), (10 a.m. to 5 p.m. on October 11; 8 a.m. to 5 p.m. on October 12).

Agenda: Open Session—Review of FMP's; conduct other fishery management business, and conduct a public comment period beginning at 4 p.m. on October 11.

Council (closed meeting) (October 11, 1979) (8 a.m. to 10 a.m.).

Agenda: Closed Session—Discuss the status of current maritime boundary and resource negotiations between the U.S. and Canada and discuss personnel matters concerning appointments to vacancies on subpanels and teams. Only those Council members, Scientific and Statistical Committee members, and related staff having security clearance will be allowed to attend this closed session.

The Assistant Secretary for Administration of the Department of Commerce with the concurrence of its General Counsel, formally determined

on June 20, 1979, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the agenda items covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein, because items will be concerned with matters that are within the purview of 5 U.S.C. 552(c) (1) and (6), as information which is properly classified pursuant to Executive Order. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 5317, Department of Commerce.

Dated: August 27, 1979.

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

[FR Doc. 79-27347 Filed 8-30-79; 8:45 am]

BILLING CODE 3510-22-M

Pacific Fishery Management Council's Anchovy/Jack Mackerel Advisory Subpanel; Amended Meeting Notice

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Pacific Fishery Management Council's Anchovy/Jack Mackerel Advisory Subpanel has changed its meeting date from Tuesday, September 28, 1979 (**Federal Register**, Volume 44, No. 151, dated August 3, 1979, page 45658) to Tuesday, September 11, 1979, from 10 a.m., to approximately 5 p.m.

ADDRESS: The meeting will take place at the California Fish and Game Office, 350 South Golden Shores, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Second Floor, Portland, Oregon 97201, Telephone: (503) 221-6352.

Dated: August 28, 1979.

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1979; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1979 commodities to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: August 31, 1979.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On April 6, 1979 and May 18, 1979 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (44 FR 20737 and 44 FR 29136) of proposed additions to Procurement List 1979, November 15, 1978 (43 FR 53151).

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

Accordingly, the following commodities are hereby added to Procurement List 1979:

Class 8415

Hood, Spray Painter's Protective 8415-00-NSH-0001
Requirements for Pearl Harbor Naval Shipyard, Hawaii only.

Class 7530

Folder, File (Pressboard) 7530-00-286-6924 (For GSA Regions 3, 9, 10)
Folder Set, File (Pressboard) 7530-00-286-6923 (For GSA Regions 4, 5, 6, 7 8, 9, 10)

C. W. Fletcher,

Executive Director.

CONSUMER PRODUCT SAFETY COMMISSION

Sterned Knitting Mills, Inc. and Alfred Stern; Provisional Acceptance of Consent Agreement

AGENCY: Consumer Product Safety Commission.

ACTION: Provisional Acceptance of Consent Agreement.

SUMMARY: The Commission has provisionally accepted a consent agreement containing a cease and desist order jointly offered by the Commission Staff and Sterned Knitting Mills, Inc., a New York corporation, and Alfred Stern, individually and as an officer of that corporation, both of New York, New York 10001, in which they agree to manufacture and sell fabrics that conform to the Flammable Fabrics Act, all applicable regulations issued thereunder, and the Standard for the Flammability of Clothing Textiles (CS 191-53); to issue guaranties based on reasonable and representative testing; to process into conformance or destroy certain sweat shirt fabric of style #3810-18; and to maintain certain records and to file requested reports. If finally accepted, this consent agreement will settle allegations of the Commission staff that Sterned Knitting Mills and Alfred Stern have violated provisions of the Flammable Fabrics Act.

DATE: Written comments on the provisionally accepted consent agreement must be received by the Commission by September 17, 1979.

ADDRESS: Written coments should be submitted to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Copies of the agreement may be seen in, or obtained from, the Office of the Secretary, Consumer Product Safety Commission, 3rd Floor, 1111 18th Street, NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Gwendolyn B. Crockett, Directorate for Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. (Phone 301-492-6632).

Dated: August 27, 1979.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

COUNCIL ON ENVIRONMENTAL QUALITY

Update of Second Progress Report on Agency Implementing Procedures Under the National Environmental Policy Act

AGENCY: Council on Environmental Quality, Executive Office of the President.

ACTION: Information Only: Publication of Update on Second Progress Report or Agency Implementing Procedures Under the National Environmental Policy Act.

SUMMARY: In response to President Carter's Executive Order 11991, on November 29, 1978, the Council on Environmental Quality issued regulations implementing the procedural provisions of the National Environmental Policy Act ("NEPA") (43 FR 55978-56007; 40 CFR 1500-08). Section 1507.3 of the regulations provides that each agency of the Federal Government shall adopt procedures to supplement the regulations. The Council has indicated to Federal agencies its intention to publish progress reports on agency efforts to develop implementing procedures under the NEPA regulations.

The following list is a partial update of the Council's second progress report, published July 23, 1979 (44 FR 43037–43038). It includes those agencies whose final or proposed procedures have appeared in the **Federal Register** from July 23, 1979 through August 23, 1979.

FOR FURTHER INFORMATION CONTACT: Nicholas C. Yost, General Counsel, Council on Environmental Quality, 722 Jackson Place, NW., Washington, D.C. 20006; Phone (202) 395–5750.

Update of Second Progress Report on Agency Implementing Procedures under the National Environmental Policy Act

At the direction of President Carter (Executive Order 11991), on November 29, 1978, the Council on Environmental Quality issued regulations implementing the procedural provisions of the National Environmental Policy Act ("NEPA"). These regulations appear at Volume 43 of the **Federal Register**, pages 55978–48007 and Volume 40 of the Code of Federal Regulations, Sections 1500–1508. Their purpose is to reduce paperwork and delay associated with the environmental review process and to foster environmental quality through better decisions under NEPA.

Section 1507.3 of the NEPA regulations provides that each agency of the Federal government shall adopt procedures to supplement the regulations. The purpose of agency "implementing procedures," as they are called, is to translate the broad standards of the Counsel's regulations into practical action in Federal planning and decisionmaking. Agency procedures will provide government personnel with additional, more specific direction for implementing the procedural provisions of NEPA, and will inform the public and State and local officials of how the NEPA regulations will be applied to individual Federal programs and activities.

In the course of developing implementing procedures, agencies are required to consult with the Council and to publish proposed procedures in the **Federal Register** for public review and comment. Proposed procedures must be revised as necessary to respond to the ideas and suggestions made during the comment period. Thereafter, agencies are required to submit the proposed final version of their procedures for 30 days review by the Council for conformity with the Act and the NEPA regulations. After making such changes as are indicated by the Council's review, agencies were required to promulgate their final procedures by July 30.

The Council published its first progress report on agency implementing procedures on May 7, 1979, 44 FR 26781–82, and its second progress report on July 23, 1979, 44 FR 43037–38. The list that appears below supplements the second progress report by identifying those agencies that have published their final or proposed implementing procedures from July 23, 1979 through August 23, 1979. The Council hopes that concerned members of the public will review and comment upon agency procedures to insure that the reforms required by President Carter and by the Council's regulations are implemented.

Agencies That Have Published Final Implementation Procedures

Central Intelligence Agency, 44 FR 45431 (August 2).

Department of Agriculture, 44 FR 44802 (July 30).

Forest Service, 44 FR 44718 (July 30);

Department of Defense, 44 FR 46841 (August 9);

Department of Energy, 44 FR 45918 (August 6);

International Communication Agency, 44 FR 45489 (August 2);

National Aeronautics & Space Administration, 44 FR 44485 (July 30).

Agencies That Have Published Proposed Implementation Procedures

Civil Aeronautics Board, 44 FR 45637 (August 3).

Department of Agriculture: Agricultural Stabilization & Conservation Service, 44 FR 44167 (July 27).

Department of Defense: Department of the Air force, 44 FR 44118 (July 26).

Department of the Interior:

Bureau of Land Management, 44 FR 47627 (August 14);

Heritage Conservation & Recreation Service, 44 FR 49553 (August 23).

Department of Justice, 44 FR 43751 (July 26);

Marine Mammal Commission, 44 FR 44916 (July 31), 44 FR 45654 (August 3);

National Science Foundation, 44 FR 46901 (August 9);

Pennsylvania Avenue Development Corporation, 44 FR 45925 (August 6);

Small Business Administration, 44 FR 45002 (July 31);

Veterans' Administration, 44 FR 48261 (August 17);

Water Resources Council, 44 FR 43749 (July 26).

The development of agency implementing procedures is a critical stage in Federal efforts to reform the NEPA process.

These procedures must, of course, be consistent with the Council's regulations and provide the means for reducing paperwork and delay and producing better decisions in agency planning and decisionmaking.

Interested persons will have the opportunity to make their suggestions for improving agency procedures when they are published in the **Federal Register** in proposed form. Broad public participation at this crucial juncture could go a long way toward ensuring that the goals of the NEPA regulations are widely implemented in the day-to-day activities of government.

Nicholas C. Yost,
General Counsel.

BILLING CODE 3125-01-M

DEPARTMENT OF DEFENSE

Armed Forces Epidemiological Board; Open Meeting

1. In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) announcement is made of the following committee meeting:

Name of committee: Armed Forces Epidemiological Board.
Date of meeting: 27–28 September 1979.
Time: 0900–1700 27 September; 0830–1500 28 September.
Place: Conference Room 3092, Walter Reed Army Institute of Research, Walter Reed Army Medical Center, Washington, D.C.
Proposed agenda: Agenda items for the meeting include Reports on the preventive medicine activities of the Army, Navy and Air Force, Ad hoc Subcommittee Reports and a Report on the OUSDRE Topical Review on Malaria.

2. This meeting will be open to the public, but limited by space accommodations. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should contact the Executive Secretary, DASG–AFEB, Room 1B472 Pentagon, Washington, D.C. 20310 (Telephone 695–9115).

Dated: August 27, 1979.

Charles W. Halverson,
CDR, MSC, USN, Executive Secretary.

Department of the Air Force

Coal-Fired Heating Plant: Intent To Prepare an Environmental Impact Statement and Scoping Meeting; Environmental Impact Analysis Process

The U.S. Air Force will be preparing an environmental impact statement on the modification of an existing steam heating plant at Fairchild Air Force Base near Spokane, Washington. This modification will convert fuel combustion for three (3) boilers presently burning natural gas/oil to coal as the primary fuel source. The statement will consider other fuel alternatives and no action alternative.

One public scoping meeting will be held to identify what are and what are not significant issues. Additionally an overview of preliminary findings of an air quality study will be presented. The meeting will be at 7:00 pm on 18 September 1979 at Spokane County Health Department Center, Room 140, West 11101 College, Spokane, Washington.

Interested parties that cannot attend the meeting are encouraged to submit comments and recommendations in writing.

For information concerning the proposed action and the environmental impact statement, contact Mr. Phillip E. Lammi, U.S. Air Force Regional Civil Engineer/Western Region, Chief Environmental Planning Division, 630 Sansome Street, Rm 1316, San Francisco, California 94111, (Telephone 415–556–6439).

DEPARTMENT OF ENERGY

Microbiological Conference

Notice is hereby given that a conference to discuss the current state-of-the-art and technology and to delineate logical steps in the construction of a program of microbiological research in Enhanced Oil Recovery useful in fulfilling the mission of Fossil Fuel Extraction Division will be held August 30–31, 1979, at the Halfmoon Inn, San Diego, California. The conference will be open to the public and begin at 8:00 a.m.

The Chairman is Dr. Herman L. Finke, Department of Energy, Fossil Energy, Fossil Fuel Extraction Division, Washington, DC. The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business. For further information, you may contact Dr. Finke on (301) 353–2716.

Seating will be made available on a first-come, first-served basis.

Copies of the proceedings of the conference will be made available following their certification by the Chairman and Program Director/Fossil Energy at the Department of Energy's Freedom of Information Reading Room, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, upon payment of appropriate charges.

Issued in Washington, DC on August 23, 1979.

Charles E. Williams,
Acting Assistant Secretary for Energy Technology.

Uranium Hexafluoride; Separative Work Charges and Base Charges for Natural Uranium

The Department of Energy (DOE) hereby announces revisions to the Notice entitled "Uranium Hexafluoride: Separative Work Charges, and Base Charges for Natural Uranium" published in the **Federal Register** on September 29, 1977 (42 FR 51636), as amended by 43 FR 49831 on October 25, 1978, hereinafter referred to as the Notice.

Paragraph 1 of the Notice is deleted and the following paragraph 1 is inserted in lieu thereof:

1. *Separative Work Charges.* (a) The charge per separative work unit furnished pursuant to Requirements-type contracts is $98.30 or the ceiling charge computed in accordance with the provisions of such contracts, whichever is the lesser charge. Effective February 29, 1980 the charge per separative work unit furnished pursuant to Requirements-type contracts will be $110.75 or the ceiling charge computed in accordance with the provisions of such contracts, whichever is the lesser charge.

(b) The charge per separative work unit furnished pursuant to Adjustable Fixed-Commitment contracts is $88.65. Effective December 31, 1979 the charge per separative work unit furnished pursuant to Adjustable Fixed-Commitment contracts will be $98.95.

(c) The charge per separative work unit furnished pursuant to other than Requirements-type and Adjustable Fixed-Commitment contracts is $88.65. Effective October 31, 1979 the charge per separative work unit furnished pursuant to other than Requirements type and Adjustable Fixed-Commitment contracts will be $98.95.

Effective date: This notice is effective August 31, 1979.

Dated at Washington, D.C., this 28th day of August.

George S. McIsaac,
Assistant Secretary for Resource Applications.

Objection to Proposed Remedial Orders Filed Week of June 25 through June 29, 1979

Notice is hereby given that during the week of June 25 through June 29, 1979, the Notices of Objection to Proposed Remedial Orders listed in the Appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

On or before September 20, 1979, any person who wishes to participate in the proceeding which the Department of Energy will conduct concerning the Proposed Remedial Orders described in the Appendix to this notice must file a request to participate pursuant to 10 CFR 205.194 [44 FR 7926, February 7, 1979). Within 30 days of the publication of this notice, the Office of Hearings and Appeals will determine those persons who may participate on an active basis in this proceeding, and will prepare an official service list which it will mail to all persons who filed request to participate. Persons may also be placed on the official service list as non-participants for good cause shown. All requests regarding this proceeding shall be filed with the office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461. Issued in Washington, D.C.

Melvin Goldstein,
Director, Office of Hearings and Appeals.

August 27, 1979.

Hughes & Hughes Oil & Gas, Beeville, Texas, DRO–0243, crude oil

On June 27, 1979, Oasis Oil, Inc., c/o Canty, Hanger, Gooch, Munn, Collins, 1800 First National Bank Building, Fort Worth, Texas 76102, filed a Notice of Objection to a Proposed Remedial Order which the DOE Economic Regulatory Administration issued to Hughes & Hughes Oil and Gas on June 5, 1979. In the Proposed Remedial Order, the ERA found that Hughes & Hughes improperly terminated its supplier/purchaser relationship with Sun Petroleum Products Company on April 1, 1979 in violation of CFR 211.63 (b). The Proposed Remedial Order orders Hughes & Hughes to reinstate the supplier/purchaser relationship with Sun, and to begin immediately the delivery of gas condensate.

The Maurice L. Brown Oil Co., Kansas City Mo. DRO–0240, crude oil

On June 26, 1979, the Maurice L. Brown Oil Company, Kansas City, Missouri, filed a Notice of Objections to a Proposed Remedial Order which the DOE Central Enforcement District issued to the firm on May 31, 1979. In the Proposed Remedial Order, the Enforcement District found that during the period from September 1973 through December 1975, Brown committed pricing violations in the States of Kansas, Oklahoma, Louisiana, and Texas in connection with the sales of crude oil. According to the Proposed Remedial Order, Brown's violations resulted in overcharges of $968,043.38.

Clark Oil & Refining Corp., Milwaukee, Wis., DRO–0235, crude oil

On June 25, 1979, Clark Oil & Refining Corporation, 8530 West National Avenue, P.O. Box 1994, Milwaukee, Wisconsin 53201, filed a Notice of Objection to a Proposed Remedial Order which the DOE Office of Special Counsel issued to the firm on April 30, 1979. In the Proposed Remedial Order, the Office of Special Counsel found that during the period October 23, 1973 through December 31, 1973, Clark committed pricing violations by failing to reduce its costs of crude oil by the amounts of cash differentials received from certain foreign-domestic crude oil sale and exchange transactions with Texaco, Inc. The Proposed Remedial Order directs Clark to treat these cash differentials as a reduction in its costs of crude oil and to submit revised Forms FEO–96 and FEA P–110–M–1 reflecting the recalculation of crude oil costs and indicating any excess revenue realized by Clark in its crude oil transactions.

Cone, J. R., Lubbock, Tx., DRO–0247, crude oil.

On June 28, 1979, J. R. Cone, P.O. Box 871, Lubbock, Texas 79408, filed a Notice of Objection to a Proposed Remedial Order that the DOE Southwest District Office of Enforcement issued to him on May 31, 1979. The Proposed Remedial Order found that during calendar years 1973 through 1977, Cone committed pricing violations of $1,670,403.11 in connection with the production and sale of crude oil in Lea County, New Mexico, and directed Cone to refund that amount, plus interest, to the purchaser of the crude oil.

United Oil Co., Hillside, N.J., DRO–0241, fuel oil

On June 22, 1979, United Oil Company, 100 Central Avenue, Hillside, New Jersey 07250, filed a Notice of Objection in which its states that it will contest a Proposed Remedial Order that the Northeast District Office of Enforcement of the Department of Energy issued to the firm on May 17, 1979. In the Proposed Remedial Order, the Enforcement District found that during the period from November 1, 1973 through March 31, 1974, United committed pricing violations in connection with the sale of No. 4 fuel oil in the State of New Jersey. According to the Proposed Remedial Order, United's violations resulted in overcharges to its customers totaling $87,881.

BILLING CODE 6450–01–M

Objection to Proposed Remedial Orders Filed Week of June 29 through July 6, 1979

Notice is hereby given that during the week of June 29, through July 6, 1979, the Notices of Objection to Proposed Remedial Orders listed in the Appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

On or before September 20, 1979, any person who wishes to participate in the proceeding which the Department of Energy will conduct concerning the Proposed Remedial Orders described in the Appendix to this notice must file a request to participate pursuant to 10 CFR 205.194 (44 FR 7926, February 7, 1979). Within 30 days of the publication of this notice, the Office of Hearings and Appeals will determine those persons who may participate on an active basis in this proceeding, and will prepare an official service list which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests regarding this proceeding shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461. Issued in Washington, D.C.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

August 27, 1979.

Proposed Remedial Orders

Dean Miller Sunoco, Craftan, Penn., DRO–0256, motor gasoline

On July 15, 1979, Dean Miller Sunoco, 48 Crennett Avenue, Craftan, Pennsylvania 15205, filed a Notice of Objection to an Interim Remedial Order for Immediate Compliance (IROIC) that the DOE Northeat Enforcement District issued to it on June 26, 1979. In the IROIC, the Envorcement District found that Dean Miller was violating the DOE Price Regulations in connection with its sales of motor gasoline. In the Interim Remedial Order, Dean Miller was directed to reduce its prices to lawful levels.

Citadel Corp., Washingon, D.C., DRO–0258, DRO–0259, DRO–0260, motor gasoline

On July 6, 1979, Citadel Corporation (Citadel), 1631 Kalorama Road, N.W., Washington, D.C. filed a Notice of Objection to three Interim Remedial Orders for Immediate Compliance (IROIC) that the Office of Enforcement of the Department of Energy issued to the firm on June 29, 1979. In the IROIC's, the Office of Enforcement directed Citadel to reduce the selling price of motor gasoline at eleven retail service stations that Citadel owns and operates in the Washington, D.C. metropolitan area. The IROIC's were based upon a finding that the service stations were charging more than the maximum lawful price for the gasoline that they were selling.

Russell G. Estes, Midland, Tex., DRO–0251, crude oil

On June 29, 1979, Russell G. Estes, 306 Petroleum Building, Midland, Texas 79701, filed a Notice of Objection to a Proposed Remedial Order which the Southwest District Enforcement Office of the Department of Energy issued to him on May 31, 1979. In the Proposed Remedial Order, the Enforcement Office found that during the time period from January 1973 through June 1977, Russell G. Estes sold crude oil in the State of Texas at prices in excess of those allowed by 10 CFR, Part 212, Subpart D. According to the Proposed Remedial Order, Russell G. Estes pricing violations resulted in overcharges to his customers of $342,737.26.

Golden Gate Petroleum Co., San Francisco, Calif., DRO–0253, fuel oil

On July 3, 1979, Golden Gate Petroleum Company, 465 California Street, San Francisco, California 98104, filed a Notice of Objection to a Proposed Remedial Order which the DOE Western Enforcement District issued to it on June 8, 1979. In the Proposed Remedial Order, the Enforcement District found that during the period November 1, 1973 through August 31, 1975, Golden Gate committed pricing violations in connection with its sales of residual fuel oil. According to the Proposed Remedial Order, Golden Gate's violations resulted in overcharges to its customers of $965,727.

Henry Petroleum Corp., Midland, Tex., DRO–0250, crude oil

On June 29, 1979, Henry Petroleum Corporation, 801 Petroleum Building, Midland, Texas 79701, filed a Notice of Objection to a Proposed Remedial Order which the Southwest District Enforcement Office of the Department of Energy issued to the firm on May 29, 1979. In the Proposed Remedial Order, the Enforcement Office found that during the time period from December 1, 1973 through March 31, 1977, Henry Petroleum Corporation sold crude oil in the States of Texas and New Mexico at prices in excess of those permitted to 10 CFR, Part 212, Subpart D. According to the Proposed Remedial Order, Henry Petroleum Corporation's pricing violations resulted in overcharges to its customers of $138,056.41.

Polaris Production Corp., Midland, Tex., DRO–0252, crude oil

On July 2, 1979, Polaris Production Corporation, P.O. Box 1749, Midland, Texas 79702, filed a Notice of Objection to a Proposed Remedial Order that was issued to it on May 30, 1979, by the Southwest District Office of Enforcement of the Department of Energy. In the Proposed Remedial Order, the Office of Enforcement found that during the period from September 1, 1973 through April 30, 1977 Polaris committed pricing violations in connection with its first sale of domestic crude oil in the State of New Mexico. According to the Proposed Remedial Order, these pricing violations resulted in overcharges to its customers of $297,902.55.

Tipperary Oil & Gas Corp., Midland, Tex., DRO–0257, crude oil

On July 6, 1979, Tipperary Oil and Gas Corporation, 500 West Illinois, Midland, Texas 79701, filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest Enforcement District issued to the firm on May 31, 1979. In the Proposed Remedial Order, the Enforcement District found that from September 1, 1973 through September 30, 1976, Tipperary committed pricing violations in the State of New Mexico in connection with the production and sale of crude oil. According to the Proposed Remedial Order, Tipperary's violations resulted in overcharges of $427,575.11 to Western Crude Oil Inc. A July 5, 1979 Federal Register Notice erroneously stated that the Proposed Remedial Order was issued to Tipperary on June 5, 1979, and that the overcharges amounted to $436,039.30. *See* 44 FR 39244 (July 5, 1979).

Cases Filed Week of July 6, 1979 through July 13, 1979

Notice is hereby given that during the week of July 6 through July 13, 1979 the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

August 27, 1979.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

List of Cases Received by the Office of Hearings and Appeals

[Week of July 6, 1979 through July 13, 1979]

Date	Name and location of applicant	Case No.	Type of submission
July 6, 1979	Koch Industries, Inc., Dallas, Tex	DRT–0060	Request for temporary stay. If granted: Koch Industries, Incorporated would receive a Temporary Stay of the Interim Remedial Order for Immediate Compliance issued by the DOE Office of Special Counsel on July 3, 1979 regarding Koch Industries, Incorporated's supply obligations to Saturn Petroleum Co., Inc.
Do	Marathon Oil Co., Findlay, Ohio	DEA–0495, DEA–0496, DES–0495, DES–0496	Appeals of assignment orders; Request for stay. If granted: The June 21, 1979 Assignment Orders issued by the Economic Regulatory Administration Region V to Marathon Oil Co. regarding Marathon's supply obligations to Farmland Industries and Landmark, Inc. would be modified.
Do	Sun Oil Co. of Pennsylvania, Philadelphia, Pa	DES–0226, DST–0226	Request for stay and request for temporary stay. If granted: The Sun Oil Co. of Pennsylvania would receive a Stay and Temporary Stay of the Temporary Assignment Order issued by ERA regarding Sun Oil Co. of Pennsylvania's supply obligations to Landmark, Inc., pending final determination on an Appeal which the firm intends to file.
Do	Wilmer, Cutler & Pickering, Washington, D.C.	DEX–0189	Supplemental order. If granted: A Protective Order would be issued releasing Colonial Oil Co.'s confidential data to American Petrofina for limited use in conjunction with American Petrofina's comments opposing relief to Colonial Oil Co. (Case Nos. DEE–1461, DEN–1461, DEE–6865, DES–5733).
July 9, 1979	Acomi Corp., Marblehead, Mass.	DEX–0188	Supplemental order. If granted: A hearing would be convened to consider whether the relief previously granted to Acomi Corp. in Decision and Orders issued on March 7, 1979 (Case No. DST–0014) and on April 4, 1979 (Case No. DES–3465) directing the DOE Region I to assign a supply of gasoline to the firm should be revoked.
Do	Amoco Oil Co., Chicago, Ill	DEA–0499, DEA–0500	Appeal of assignment orders. If granted: The October 13, 1978 Assignment Orders (Mutual Termination Orders) regarding the assignment of Menut and Parks, Inc., an Amoco branded jobber, as supplier to Mr. Ned Dunbar would be rescinded.
Do	Cities Service Co., Tulsa, Okla	DEA–0501, DES–0501, DST–0501	Appeal of mutual termination order; request for stay; request for temporary stay. If granted: The Mutual Termination Order issued by the Economic Regulatory Administration Region I on May 18, 1979, regarding Cities Service Co.'s supply obligations to Champlin Oil Co. and Champlin Oil Co.'s supply obligations to Bruce Right would be modified. The Order would be stayed pending a final determination on the Appeal.
Do	Cliff Adams, Washington, Pa.	DRW–0021	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979 by ERA Region III would be issued to Cliff Adams as a Remedial Order by the Department of Energy.
Do	Cubbon Lumber Co., Oil City, Pa.	DRW–0029	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued June 1, 1979 by ERA Region III would be issued to Cubbon Lumber Co. as a Remedial Order by the Department of Energy.
Do	David Clark, Gibsonia, Pa.	DRW–0025	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979 by ERA Region III would be issued to David Clark as a Remedial Order by the Department of Energy.
Do	Donald Brown d/b/a Valley Drive Exxon, Sprague, W Va.	DRW–0020	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979 by ERA Region III would be issued to Donald Brown as a Remedial Order by the Department of Energy.
Do	Don Newman, New Martinsville, W. Va.	DRW–0024	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979 by ERA Region III would be issued to Don Newman as a Remedial Order by the Department of Energy.
Do	Donald P. Mullen, Las Vegas, Nev	DRA–0494	Appeal of information request denial. If granted: The June 7, 1979 Information Request Denial issued by the DOE Idaho Operations Office would be rescinded and Donald P. Mullen would receive access to certain documents regarding Reynolds Electrical and Engineering Co.
Do	Harry Martin, Meadville, Pa.	DRW–0028	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued June 1, 1979 by ERA Region III would be issued to Harry Martin as a Remedial Order by the Department of Energy.
Do	J. W. Miller and Associates, West Charleston, W Va.	DRW–0026	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979 by ERA Region III would be issued to J. W. Miller & Associates as a Remedial Order by the Department of Energy.
Do	J. R. Souza & Sons, Inc., Danvers, Mass.	DRW–0502	Appeal of mutual termination order. If granted: The May 2, 1979, Mutual Termination Order issued by Economic Regulatory Administration Region I to Advanced Petroleum Co., regarding the supply obligations of J. R. Souza & Sons, Inc. to Advanced Petroleum Co. would be rescinded.

List of Cases Received by the Office of Hearings and Appeals—Continued

[Week of July 6, 1979 through July 13, 1979]

Date	Name and location of applicant	Case No.	Type of submission
Do	John E. Burchard, Petersburg, W. Va.	DRW-0022	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979 by ERA Region III would be issued to John E. Burchard as a Remedial Order by the Department of Energy.
Do	John Kline, Paden City, W. Va.	DRW-0023	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979 by ERA Region III would be issued to John Kline as a Remedial Order by the Department of Energy.
Do	James V. Fulmer, Mechanicsburg, Pa.	DRW-0027	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued June 1, 1979 by ERA Region III would be issued to James V. Fulmer as a Remedial Order by the Department of Energy.
Do	Koch Industries, Inc., Dallas, Tex	DRS-0261	Request for stay. If granted: Koch Industries, Inc. would receive a Stay of the Interim Remedial Order for Immediate Compliance, issued to it on July 3,1979 by the DOE Office of Special Counsel.
Do	Mobil Oil Corp., New York, N.Y.	DES-0227, DST-0027	Request for stay; request for temporary stay. If granted: The June 14, 1979 Interim Decision and Order regarding Mobil Oil Corp.'s supply obligations to Publix Oil Co., Inc. would be stayed.
Do	Pauline Johnson, Nitro, W.V.	DRW-0030	Proposed remedial order for which no objections have been filed. If granted: The Proposed Remedial Order issued May 31, 1979, by ERA, Region III would be issued to Pauline Johnson as a Remedial Order by the Department of Energy.
Do	Texaco, Inc., White Plains, N.Y.	DXE-7166	Price exception (section 212.73) If granted: Texaco, Inc. would be permitted to continue to sell a portion of the crude oil from the A.S. Wisness Lease located in McKenzie County, N. Dak. at upper tier ceiling prices.
Do	Young Refining Corp., Washington, D.C.	DEX-0190	Supplemental order. If granted: The DOE would review the level of exception relief granted in a Proposed Decision and Order issued to Young Refining Corp. (Case No. DXE-1978) on December 6, 1978, to determine whether the relief accorded the firm during its 1979 fiscal year was appropriate.
July 10, 1979	Amoco Oil Co., Chicago, Ill.	DEE-7193	Price exception (section 212.83) If granted: Amoco Oil Co. would receive an exception to the provisions of 10 CFR 212.83 permitting the firm to pass through incremental expenses relating to the blending, storage, distribution, and marketing of gasohol.
Do	Finch Oil Co., Fayetteville, N.C.	DEE-7195	Allocation exception. If granted: Finch Oil Co., would receive an exception to the provisions of 10 CFR 211, permitting the firm to receive increased allocations of unleaded gasoline to be used in the blending of motohol (gasohol).
Do	National Helium Corp., Washington, D.C.	DFA-0503	Appeal of information request denial. If granted: The June 7, 1979 Information Request Denial issued by the DOE Office of FOI and Privacy Acts Activities would be rescinded and National Helium Corp. would receive access to certain DOE documents.
July 11, 1979	Belcher of New England, Inc., Revere, Mass	DRT-0061	Request for temporary stay. If granted: The July 6, 1979 Interim Remedial Order issued by the Economic Regulatory Administration Region I, regarding Belcher of New England, Inc.'s supply obligations to Acomi, Inc. would be stayed.
Do	Bob Mueller, Overland Park, Kans	DRS-0304	Request for stay. If granted: The June 29, 1979 Interim Remedial Order for Immediate Compliance issued by Economic Regulatory Administration Region VII, requiring Bob Mueller to reduce its retail selling prices of gasoline would be stayed.
Do	Logue & Patterson, Dallas, Tex	DEE-7371	Price exception (section 212.72) If granted: Logue & Patterson would be permitted to sell the crude oil produced from the T. T. Dalney lease located in Polk County, Tex. at upper tier ceiling prices.
July 12, 1979	American Motohol Supply Corp., Washington, D.C.	DEE-7203	Allocation exception. If granted: American Motohol Supply Corp. would receive an exception to the provision of 10 CFR 211, permitting the firm to receive increased allocations of unleaded gasoline to be used in the blending of motohol (gasohol).
Do	Amoco Oil Co., Chicago, Ill.	DEH-2179	Request for evidentiary hearing. If granted: An evidentiary hearing would be convened with respect to Amoco Oil Co.'s Statement of Objections submitted in response to the Proposed Decision and Order issued to American Agrifuels Corp. on May 9, 1979.
Do	Vincent J. Fuller, Washington, D.C.	DFA-0504	Appeal of information request denial. If granted: The DOE's June 25, 1979 Information Request Denial issued by the Office of Regulation and Emergency Planning of the Economic Regulatory Administration would be rescinded and Vincent J. Fuller would receive access to records regarding multi-tiered pricing and entitlements programs.
Do	Standard Oil Co. of Indiana, Chicago, Ill.	DRO-0198	Motion for discovery. If granted: Discovery would be granted to Standard Oil Co. of Indiana with respect to the Statement of Objections submitted in response to the Proposed Remedial Order (Case No. DRO-0198) issued to the firm by the DOE Office of Special Counsel on May 1, 1979.
July 13, 1979	Dobrovir, Oakes & Gebhardt, Washington, D.C.	DFA-0505	Appeal of information request denial. If granted: The June 11, 1979 Information Request Denail issued by the DOE Office of Inspector General would be rescinded, and Dobrovir, Oakes & Gebhardt would be granted access to certain DOE documents.
Do	J. C. Brown Oil Co., Inc., Schley, Va.	DEE-7392	Price exception. If granted: J. C. Brown Oil Co., Inc. would be permitted to increase its gross margin on sales of gasoline.
Do	Kern County Refinery, Inc., Bakersfield, Calif.	DEX-0195	Supplemental order. If granted: The DOE would review the level of exception relief granted in the June 7, 1979 Decision and Order (Case Number DXE-1904) issued to Kern County Refinery, Inc. to determine whether the relief accorded the firm was appropriate.

Objection To Proposed Remedial Orders Filed Week of July 9 through July 13, 1979

Notice is hereby given that during the week of July 9, through July 13, 1979, the Notices of Objection to Proposed Remedial Orders listed in the Appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

On or before September 20, 1979, any person who wishes to participate in the proceeding which the Department of Energy will conduct concerning the Proposed Remedial Orders described in the Appendix to this notice must file a request to participate pursuant to 10 CFR 205.194 (44 FR 7926, February 7, 1979). Within 30 days of the publication of this notice, the Office of Hearings and Appeals will determine those persons who may participate on an active basis in this proceeding, and will prepare an official service list which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests regarding this proceeding shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461. Issued in Washington, D.C.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

August 27, 1979.

Proposed Remedial Orders

Donald J. Bania d.b.a. Fisher Shell Station, Minneapolis, Minn., DRO–0263, motor gasoline

On July 9, 1979, Donald J. Bania d.b.a. Fisher Shell Station, 1022 Hennepin Avenue, Minneapolis, Minnesota 55403, filed a Notice of Objection to an Interim Remedial Order for Immediate Compliance (IROIC) which the Central Enforcement District of the Economic Regulatory Administration of the Department of Energy issued to the firm on June 27, 1979. In the IROIC, the Enforcement District found that Donald Bania was violating the DOE Price Regulations in connection with its sales of motor gasoline. The IROIC accordingly ordered Bania to lower his prices to levels established by a June 26, 1979 ERA audit, to post maximum lawful selling prices, and to keep records in accordance with 10 CFR, Part 212.

Ferguson Oil Co., Oklahoma City, Okla., DRO–0270, crude oil

On July 12, 1979, Ferguson Oil Company, 2700 Liberty Tower, Oklahoma City, Oklahoma, 73102, filed a Notice of Objection to a Proposed Remedial Order which the Southwest District Enforcement Office of the Department of Energy issued to the firm on June 20, 1979. In that Proposed Remedial Order, the Enforcement Office found that Ferguson had committed pricing violations in connection with its sales of crude oil from properties located in Hughes County, Osage County, Coal County and McClain County, Oklahoma. According to the Proposed Remedial Order, Ferguson's violations resulted in overcharges of $98,322.

George R. Brown, Houston, Tex., DRO–0266, crude oil

On July 9, 1979, George R. Brown, 800 San Jacinto Building, Houston, Texas 77002, filed a Notice of Objection to a Proposed Remedial Order which the Southwest District Enforcement Office of the Department of Energy issued to the firm on June 25, 1979. In the Proposed Remedial Order, the District Enforcement Office found that during the time period from September 1973 to November 1976 George R. Brown sold crude oil in the State of Louisiana, Oklahoma and Texas at prices in excess of those permitted by 10 CFR, Part 212, Subpart D. According to the Proposed Remedial Order, George R. Brown's pricing violations resulted in overcharges to its customers of $303,531.77.

In-N-Out Car Wash, New Orleans, La., DRO–0269, motor gasoline

On July 12, 1979, In-N-Out Car Wash, 1627 St. Mary Street, New Orleans, Louisiana, filed a Notice of Objection to an Interim Remedial Order for Immediate Compliance (IROIC) which the DOE Southwest Enforcement District issued to In-N-Out Car Wash on June 29, 1979. In the IROIC the Southwest Enforcement District found that In-N-Out Car Wash was requiring the purchase of a car wash in order to be permitted to purchase motor gasoline and that this was a change in business practices in violation of DOE regulations. The IROIC therefore ordered In-N-Out Car Wash to discontinue these "tie-in" sales immediately.

Inexco Oil Co., Houston, Tex., DRO–0264, crude oil

On July 9, 1979, True Oil Purchasing Company (True), P.O. Drawer 2360, Casper, Wyoming, 82602, filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest District Office of Enforcement issued to Inexco Oil Company on June 13, 1979. In the Proposed Remedial Order, the Enforcement District found that during the time period September 1, 1973 through December 31, 1975, Inexco had committed pricing violations in connection with the production and sale of crude oil. According to the Proposed Remedial Order, Inexco's violations resulted in overcharges to its customers of $98,576.14.

Inexco Oil Co., Houston, Tex., DRO–0264, crude oil

On July 9, 1979, Inexco Oil Company (Inexco), c/o Richard E. Powers, Jr., Esq., Butler, Binion, Rice, Cook & Knapp, 818 Connecticut Avenue, N.W., Washington, D.C. 20006, filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest District Office of Enforcement issued to the firm on June 13, 1979. In the Proposed Remedial Order, the Office of Enforcement found that during the time period September 1, 1979 through December 31, 1975 Inexco had committed pricing violations in connection with the production and sale of crude oil. According to the Proposed Remedial Order, Inexco's violations resulted in overcharges to its customers of $98,576.14.

Koch Industries, Inc., Wichita, Kans., DRO–0261, motor gasoline

On July 9, 1979, Koch Industries, Inc., P.O. Box 2256, Wichita, Kansas 67201, filed a Notice of Objection to an Interim Remedial Order for Immediate Compliance (IROIC) that was issued to the firm on July 5, 1979, by the Office of Special Counsel, Southwest Refiner District. Under the terms of the IROIC, Koch is required to make available to Saturn Petroleum Company, 30400 Telegraph Road, Birmingham, Michigan 48010, its motor gasoline allocation for May and June 1979, subject to payment terms of "net 10" and a credit line of $150,000, and to make available to Saturn its motor gasoline allocations for future months with full compliance with Parts 210, 211, and 212 of the DOE regulations.

Bob Mueller, Overland Park, Kans., DRO–0304, motor gasoline

On July 11, 1979, Bob Mueller (Mueller), d/b/a United Company, 9405 West 106th Street, Overland Park, Kansas 66212 filed a Notice of Objection to an Interim Remedial Order for Immediate Compliance (IROIC) which the DOE Office of Enforcement, Central District, issued to him on June 29, 1979. In the IROIC, the Office of Enforcement found that Mueller had charged prices in excess of his maximum allowable selling prices for motor gasoline at his retail outlet in Platte Woods, Missouri. The IROIC directs Mueller to lower his prices immediately to the maximum allowable price levels.

Texas Recovery Co., Palestine, Tex., DRO–0267, crude oil

On July 10, 1979, Texas Recovery Company (TRC), P.O. Box 424, Palestine, Texas, 75801, filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest Enforcement District issued to the firm on June 18, 1979. In the Proposed Remedial Order, the Enforcement District found that during the time period November 27, 1973 through December 31, 1974, TRC committed pricing violations in the State of Texas in connection with the production and sale of crude oil. According to the Proposed Remedial Order, TRC's violations resulted in overcharges to its customers, J and W Refining Company, of $669,512.43.

True Oil Co., Casper, Wyo., DRO–0268, crude oil

On July 12, 1979, True Oil Company, P.O. Drawer 2360, Casper, Wyoming 82602, filed a Notice of Objection to a Proposed Remedial Order which the DOE Rocky Mountain Enforcement District issued to the firm on June 8, 1979. In the Proposed Remedial Order, the Enforcement District found that during the period from September 1, 1973 through December 31, 1974, True committed pricing violations in connection with the production and sale of crude oil. According to the Proposed Remedial Order, True's violations resulted in overcharges to its customers of $379,662.86.

Economic Regulatory Administration

[ERA Case No. 52371-1571-04-77]

Potomac Electric Power Co. Chalk Point Unit No. 4

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Determination to Classify the Potomac Electric Power Company Chalk Point Unit No. 4 as an Existing Facility.

SUMMARY: On June 5, 1979, Potomac Electric Power Company (PEPCO) requested the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) to classify Chalk Point Unit No. 4 as an existing facility pursuant to Section 515.6 of the Revised Interim Rule to Permit Classification of Certain Powerplants and Installations as Existing Facilities (Revised Interim Rule) issued by ERA on March 15, 1979 (44 FR 17464), and pursuant to the provisions of the Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95–620 (FUA).

ERA has completed its analysis of PEPCO's request and has determined

that PEPCO has satisfactorily demonstrated that it would suffer a substantial financial penalty in excess of 25 percent of the total projected project cost as of November 9, 1978, within the meaning of § 515.6 of the Revised Interim Rule.

ERA has determined that PEPCO's Chalk Point Unit No. 4 is an "existing" facility and is now subject to the provisions of Title III of FUA.

FOR FURTHER INFORMATION CONTACT:

William L. Webb (Office of Public Information), Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W., Room B–110, Washington, D.C. 20461, Phone: (202) 634–2170.

James H. Heffernan (Office of the General Counsel), Department of Energy, 12th and Pennsylvania Avenue, N.W., Room 7134, Washington, D.C. 20461, Phone: (202) 633–8814.

Robert L. Davies, Acting Assistant Administrator, Office of Fuels Conversion, Economic Regulatory Administration, 2000 M Street, N.W., Room 3128L, Washington, D.C. 20461, Phone: (202) 254–7442.

SUPPLEMENTARY INFORMATION: (1) On June 5, 1979, pursuant to ERA's Revised Interim Rule to Permit Classification of Certain Powerplants and Installations as Existing Facilities (Revised Interim Rule) issued by ERA on March 15, 1979, PEPCO requested that ERA classify PEPCO's Chalk Point Unit No. 4 as an "existing" facility. On July 19, 1979, ERA published a summary of PEPCO's request for classification in the **Federal Register** and requested comments by interested persons on or before August 9, 1979.

(2) A copy of ERA's Summary of Analysis dated August 8, 1979, is available for examination in the Office of Public Information, at the above address.

Issued in Washington, D.C., August 23, 1979.

[ERA Case No. 52053-2594-06-77]

Niagara Mohawk Power Corp. Oswego Unit No. 6

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Determination to Classify the Niagara Mohawk Power Corporation Oswego Unit No. 6 as an Existing Facility.

SUMMARY: On June 4, 1979, Niagara Mohawk Power Corporation (Niagara Mohawk) requested the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) to classify Oswego Unit No. 6 as an existing facility pursuant to Section 515.6 of the Revised Interim Rule to Permit Classification of Certain Powerplants and Installations as Existing Facilities (Revised Interim Rule) issued by ERA on March 15, 1979 (44 FR 17464), and pursuant to the provisions of the Powerplant and Industrial Fuel Use Act of 1978, P.L. 95–620 (FUA).

ERA has completed its analysis of Niagara Mohawk's request and has determined that Niagara Mohawk has satisfactorily demonstrated that it would suffer a substantial financial penalty in excess of 25 percent of the total projected cost as of November 9, 1978, within the meaning of Section 515.6 of the Revised Interim Rule.

ERA has determined that Niagara Mohawk's Oswego Unit No. 6 is an "existing" facility and is now subject to the provisions of Title III of FUA.

BILLING CODE 6450-01-M

[Docket No. ERA–APS–78–2]

Application of Archer Daniels Midland Co. for Designation as a Producer of Petroleum Substitute in the Domestic Crude Oil Allocation Program for Alcohol; Decision and Order

I. Introduction

On February 6, 1979, Archer Daniels Midland Company (ADM), Box 1470, Decatur, Illinois 62525, submitted to the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) an application for designation as a producer of a petroleum substitute pursuant to 10 CFR 211.67(a)(5). The application was received by the ERA on February 9, 1979, and supplemental information was submitted by ADM on March 27, 1979 which ERA received on March 29, 1979 and on May 11, 1979 which ERA received on May 17, 1979.

ERA is issuing this Decision and Order pursuant to 10 CFR Part 205, Subpart G of DOE's Administrative Procedures and Sanctions, and Section 211.67(a)(5) to Subpart C of 10 CFR Part 211, the Mandatory Petroleum Allocation Regulations.

II. Regulatory Authorities

Section 211.62 of the Mandatory Petroleum Allocation Regulations provides that upon application, the ERA may designate liquid synthetic fuels as petroleum substitutes if it is found that the liquid synthetic fuels are derived from domestic sources of biomass, coal, oil shale, solid waste or tar sands, and used as a feedstock to a refinery, a blending feedstock or as a boiler fuel in a refinery or elsewhere. The ERA may deny the petroleum substitute designation if it finds that process by which the liquid synthetic fuel is produced does not result in a new energy gain and does not result in a higher-valued fuel when the quantity and type of fuels consumed in the process are considered, especially if a substantial amount of a relatively scarce fuel is consumed.

The ERA may designate the producer, marketer, or consumer as the party to receive the benefitrs of the Entitlements Program. The producer will in many cases be the designated recipient although not in all cases.

III. Analysis of ADM's Petroleum Substitute Application

The Archer Daniels Midland Company (ADM) submitted their initial application on February 6, 1979, and submitted additional data to the application on March 27, 1979 and May 11, 1979. ADM is producing approximately 60,000 gallons per day of ethanol for use in blending with gasoline to produce a 10% ethyl alcohol (ethanol) and 90% gasoline blend commonly known as gasohol.

The ethanol for gasohol is produced by ADM by the wet corn milling process. This process includes:

(1) Steeping to loosen various parts of the corn kernel;

(2) Grinding to break the corn kernel apart;

(3) Germ separation to recover the corn oil and corn germ meal;

(4) Fine grinding to separate the starch and gluten fractions;

(5) Removal of fiber for corn gluten feed which is 21% protein;

(6) Removal of protein for corn gluten meal which is 60% protein;

(7) Concentrating the starch by removing the excess water;

(8) Cooking the starch in the presence of the liquifying enzymes which convert the starch chains to dextrins;

(9) Cooling and adding saccharifying enzymes to convert dextrins to glucose;

(10) Yeast is then added to convert the glucose to ethyl alcohol and carbon dioxide;

(11) The alcohol (10% in the fermenter) is distilled to a concentration of 96.0% to 96.5% pure;

(12) The purified alcohol is then re-distilled to 99.75% to 100% pure (i.e., anhydrous alcohol), and

(13) The anhydrous alcohol is denatured according to government specifications for industrial alcohol for blending into gasohol.

The anhydrous alcohol that the wet corn milling process yields will be used to replace gasoline (a petroleum product). The petroleum substitute is the anhydrous alcohol and not the gasohol, thus any entitlements benefit would be for the anhydrous alcohol, not the gasohol.

The wet corn milling process used by ADM, produces anhydrous alcohol (ethanol) which is a liquid. The source of the corn used for extraction of starch to produce the ethanol is from the elevators and farms around Decatur, Illinois. The only use for which ADM is currently producing ethanol, is for the blending with unleaded gasoline to make gasohol.

The process by which ADM produces ethanol is fueled by natural gas and coal (electricity). According to the addendum to their application dated March 27, 1979, the BTUs, percentage and volume breakouts for ADM's 24,000 bushel/62,400 gallon anhydrous alcohol production facility are as follows:

	BTU	Percentage	Volume
Natural Gas	4,496,037,710.4	96.54	4,496,038 cu. ft.
Coal (Electricity)	161,138,389.6	3.46	14,649 lb.
Total	4,657,176,000.0	100.00	

The following computations based on the above figures demonstrate the net energy gain determination of the facility to be of a positive nature. The facility consumes 4,657,176,000 BTUs per day in producing 62,400 gallons per day of ethanol from an input of 24,000 bushels of corn per day (2.6 gallons per bushel). The following summarizes the computations.

(1) Total BTUs input per day = 4,657,176,000 BTUs.

(2) Total BTUs output (ethanol) per day:

= 62,400 gallons/day at 84,000 BTU/gal.
= 5,241,600,000 BTUs/day.

(3) Net energy gain:

= (2) − (1).
= 584,424,000 BTUs/day.

Therefore, the ADM facility is determined to meet the criteria that the facility and process be a net energy gain and/or a higher-valued fuel.

The environmental impact of this Decision and Order for ADM to make ethanol for gasohol has been reviewed by the Assistant Secretary for the Environment (EV) of the DOE. The determination made by EV is that this Decision and Order does not constitute a major federal action and that this Decision and Order will not cause any action by ADM which will affect the quality of the environment.

ADM has applied for the benefits of the entitlements program as the producer of the ethanol for gasohol. It is the ERA's determination that due to the nature of the distribution system, of the marketing, and blending operations; it is in the best interest of all parties both producer, marketers, and consumers that in this instance the producer (ADM) receive the entitlement benefits.

The level of benefits to be received by ADM is based upon an 84,000 BTU gallon of alcohol, as compared to a 42 gallon, 5.7 million BTU barrel of crude. The result is as follows:

(4) 84,000 BTU/gal * 42 gal/bbl. = 3,528,000 BTU/bbl.

(5) Fractional benefit (FB)

$$FB = \frac{3{,}528{,}000\ \text{BTU/bbl.}}{5{,}700{,}000\ \text{BTU/bbl.}} = .6189$$

In summary, ADM is operating an ethanol for gasohol plant which:

(a) Produces a liquid petroleum substitute (ethanol for gasoline);

(b) Produces it from domestic sources of biomass (Illinois corn);

(c) Markets a fuel blendstock (ethanol for gasohol);

(d) Is a net energy gain process and results in a higher-valued fuel (ethanol), and

(e) Will be the recipient of entitlement benefits.

IV. Decision

In consideration of the foregoing, the ERA hereby approves the application of Archer Daniels Midland Company for designation as a producer of a petroleum substitute, under 10 CFR 211.67(a)(5). ADM is designated to receive .6189 of an entitlement benefit for each 42 gallon barrel of alcohol containing 84,000 BTUs per gallon which it produces and sells such that it is blended into gasohol and replaces gasoline.

The effective date of this decision is March 1, 1979, and all volumes of ethanol produced since that date will be granted entitlement benefits through the standards entitlement correction process. The March 1, 1979 effective date is to provide ADM with any entitlement benefits due them beginning with the first full month after their application was filed.

In accordance with the provisions of 10 CFR, Part 205, any aggrieved party may file an appeal from this Decision and Order with the Office of Hearings and Appeals of the Department of Energy. The provisions of 10 CFR Part 205, Subpart H, set forth procedures and criteria which govern the filing and determination of any such appeal.

This decision is based upon the presumed validity of statements, allegations, and documentary material submitted by the applicant. It may be revoked or modified at any time upon a

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

determination that the factual basis underlying the application is incorrect.

Issued in Washington, D.C., on August 23, 1979.

Doris J. Dewton,

Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

[ERA Case No. 51209-3459-05-77]

Gulf States Utilities Co. Sabine Station Unit No. 5

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Determination to Classify the Gulf States Utilities Company Sabine Station Unit No. 5 as an Existing Facility.

SUMMARY: On June 1, 1979, Gulf States Utilities Company (Gulf States) requested the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) to classify Sabine Station Unit No. 5 (Sabine 5) as an existing facility pursuant to Section 515.6 of the Revised Interim Rule to Permit Classification of Certain Powerplants and Installations as Existing Facilities (Revised Interim Rule) issued by ERA on March 15, 1979 (44 FR 17464), and pursuant to the provisions of the Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620 (FUA). ERA has completed its analysis of Gulf States' request and has determined that Gulf States has satisfactorily demonstrated that it would suffer a substantial financial penalty in excess of 25 percent of the total projected project cost as of November 9, 1978, within the meaning of § 515.6 of the Revised Interim Rule. ERA has determined that Gulf States' Sabine 5 is an "existing" facility and is now subject to the provisions of Title III of FUA.

Action Taken on Consent Orders

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Action Taken on Consent Orders.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Consent Orders were entered into between the Office of Enforcement, ERA, and the firms listed below during the month of July 1979. The Consent Orders represent resolutions of outstanding compliance investigations or proceedings by the DOE and the firms which involve a sum of less than $500,000 in the aggregate, excluding penalties and interest. For Consent Orders involving sums of $500,000 or more, Notice will be separately published in the **Federal Register.** These Consent Orders are concerned exclusively with payment of the refunded amounts to injured parties for alleged overcharges made by the specified companies during the time periods indicated below through direct refunds or rollbacks of prices.

For further information regarding these Consent Orders, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215) 597-3870.

Firm name and address	Refund amount	Product	Period covered	Recipients of refund

Action Taken on Consent Orders

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Action Taken on Consent Orders.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Consent Orders were entered into between the Office of Enforcement, ERA, and the firms listed below during the month of July 1979. These Consent Orders concern prices charged by retail motor gasoline dealers allegedly in excess of the maximum lawful selling price for motor gasoline. The purpose and effect of these Consent Orders is to bring the consenting firms into present compliance with the Mandatory Petroleum Allocation and Price Regulations and they do not address or limit any liability with respect to the consenting firms' prior compliance or possible violation of the aforementioned regulations. Pursuant to the Consent Orders, the consenting firms agree to the following actions:

1. Reduce prices for each grade of gasoline to no more than the maximum lawful selling price;

2. Post the maximum lawful selling price for each grade of gasoline on the face of each pump in numbers and letters not less than one-half inch in height; and

3. Properly maintain records required under the aforementioned regulations.

For further information regarding these Consent Orders, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215) 597-3870.

Aminoil USA, Inc.; Issuance of Final Decision and Order

On May 17, 1979, we issued a Proposed Decision and Order to Aminoil USA, Inc., that would permit, pursuant to the provisions of 10 CFR 212.78, market prices for the incremental crude oil produced from Aminoil's 392 Lower Main Zone Project in the Huntington Beach Field of Orange County, California, (44 FR 30406, May 25, 1979). One comment was received with respect to that Proposed Decision and Order. Aminoil requested that the Order be written so that it would not be foreclosed from adopting, for the unaffected portion of the property on which the 392 Lower Main Zone Project is located, the changed definition of the base production control level which became effective June 1, 1979, as defined in 10 CFR 212.72. We have adopted the technical change requested and have, accordingly, issued a Decision and Order that permits market prices for incremental crude oil from the 392 Lower Main Zone Alkaline Flood Project in the PRC 392.1 Lease of the Huntington Beach Oil Field.

A copy of the Decision and Order is available in the Public Docket Room, Room B-120, 2000 M Street, NW., Washington, D.C., between 1:00 p.m. and 5:00 p.m., Monday through Friday and in the Department of Energy Reading Room, Room, GA-152, James Forrestal Building, 1000 Independence Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

Issued in Washington, D.C., August 17, 1979.

Paul T. Burke,

Acting Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Issuance of Interim Remedial Orders for Immediate Compliance

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Interim Remedial Orders for Immediate Compliance (IROICs) were issued by the Office of Enforcement, ERA, to the firms listed below during the month of July 1979. These IROICs concern prices charged by retail motor gasoline dealers in excess of the maximum lawful selling prices for motor gasoline. To prevent further irreparable harm to the public interest which might result if these firms continued to charge prices the lawfulness of which could not be justified, these IROICs were issued in accordance with 10 CFR 205.199D and ordered the firms to come into compliance with legal requirements by taking the following actions:

1. Reduce prices for each grade of gasoline to no more than the maximum lawful selling price;

2. Post the maximum lawful selling price for each grade of gasoline on the face of each pump in numbers and letters not less than one-half inch in height; and

3. Properly maintain records required under the Mandatory Petroleum Allocation and Price Regulations, Title 10, Code of Federal Regulations.

In the alternative, these firms were ordered to come forth within five days with support for the lawfulness of the maximum selling prices they otherwide contend are appropriate.

For further information regarding these IROICs, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215)597-3870.

E. Dunlap, Jr.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to E. Dunlap, Jr. This Proposed Remedial Order charges Dunlap with pricing violations in the amount of $57,017.36, connected with the sale of crude oil and condensate at prices in excess of those permitted by 10 CFR Part 212, Subpart D during the time period September 1, 1973 through December 31, 1976, in the Sate of Oklahoma.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Wayne I. Tucker, District Manager, Southwest District Enforcement, Department of Energy, Economic Regulatory Administration, P. O. Box 35228, Dallas, Texas 75235, or by calling (214) 749-7626. On or before September 17, 1979, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 2000 M Street, NW, Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 21st day of August 1979.

Wayne I. Tucker,

District Manager, Southwest District Enforcement.

Issuance of Interim Remedial Orders for Immediate Compliance

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Interim Remedial Orders for Immediate Compliance (IROICs) were issued by the Office of Enforcement, ERA, to the firms listed below during the month of July 1979.

These IROICs concern the modifying of the normal business practices so as to result in the violation of the provisions of the Mandatory Petroleum Allocation and Price Regulations, Title 10, Code of Federal Regulations. To prevent further irreparable harm to the public interest which might result if these firms continued their course of conduct, these IRONIC's were issued in accordance with 10 CFR 205.199D and ordered the firms to come into compliance with legal requirements by taking the following actions:

1. Cease and desist from employing any form of discriminatory practices as set forth in 10 CFR 210.62(b); and

2. Conform its business practices to those practices followed by the firm during its base period.

In the alternative, these firms were ordered to come forth within five days with support for the lawfulness of the practices they otherwise contend are appropriate.

For further information regarding these IRONICs, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215)597-3870.

Thomas J. DeLany; Proposed Remedial Order

Pursuant to 10 CFR 205.192(e), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Thomas J. DeLany, Post Office Box 43, Blue Bell, Pennsylvania 19422. This Proposed Remedial Order charges DeLany with pricing violations in the amount of $943,197.00, connected with the sale of fuel oil during the period from October 1, 1973 through June 30, 1975.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Herbert M. Heitzer, District Manager of Enforcement, (215) 597-3870. Within 15 days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 2000 M Street, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Philadelphia, Pennsylvania on the 15th of August, 1979.

Herbert M. Heitzer,

District Manager of Enforcement.

BILLING CODE 6450-01-M

[ERA Docket No. 79-CERT-077]

Harbison-Walker Refractories; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Take notice that on August 2, 1979, Harbison-Walker Refractories (Harbison-Walker), Division of Dresser Industries, Inc., 2 Gateway Center, Pittsburgh, Pennsylvania, 15222, filed an application for certification of an eligible use of natural gas to displace fuel oil at its plants in Fulton and Vandalia, Missouri, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979), all as more fully set forth in the application on file with the Economic Regulatory Administration (ERA) and open to public inspection at the ERA, Docket Room 4126-A, 2000 M Street, N.W., Washington, D.C., 20461, from 8:30 a.m.-4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Harbison-Walker states that the volume of natural gas for which it requests certification is approximately 621,000 Mcf for the period from September 1, 1979, to June 1, 1980, and the eligible seller is Michigan Consolidated Gas Company, One Woodward Avenue, Detroit, Michigan, 48226. This natural gas will displace the combined use of approximately 4,433,940 gallons of No. 2 fuel oil (.3% sulfur) for the period from September 1, 1979, to June 1, 1980, at the Fulton and Vandalia plants. The gas will be transported by Panhandle Eastern Pipeline Company, 3000 Bissonet Avenue, Houston, Texas, 77005.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Room 4126-A, 2000 M Street, N.W., Washington, D.C. 20461,

Attention: Mr. Finn K. Neilsen, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to Harbison-Walker and any persons filing comments, and published in the **Federal Register.**

Issued in Washington, D.C., on August 27, 1979.

Doris J. Dewton,

Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. G-2602, et al.]

Marathon Oil Co., et al.; Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

August 23, 1979.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 31, 1979 file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket Nos. CS79-476, et al.]

Page Petroleum Inc., et al.; Notice of Applications for "Small Producer" Certificates[1]

August 23, 1979.

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protests with reference to said application should on or before August 31, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission in its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of February 26 through March 2, 1979

Notice is hereby given that during the week of February 26 through March 2, 1979, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Hearings and Appeals and the basis for the dismissal.

Appeals

Energy Cooperative, Inc., East Chicago, Ind., DEA-0252, crude oil

Energy Cooperative, Inc. (ECI) filed an Appeal from the Entitlement Notice for August 1978. In its Appeal, ECI claimed that the August Notice was invalid to the extent that it incorporated a 21 cent entitlement cost advantage for domestic crude oil, as required by the provisions of Section 211.67(i)(4). ECI maintained that Section 211.67(i)(4) was procedurally invalid because it was promulgated in violation of the rulemaking requirements set forth in the Administrative Procedure Act, the Federal Energy Administration Act, and the Energy Policy and Conservation Act. ECI also maintained that the 21 cent cost advantage was arbitrary and capricious. In considering the ECI Appeal, the DOE first noted that if ECI's position were sustained, the current provisions of Section 211.67(i)(4) would be rescinded and an earlier version of that section would be reinstated. Since the prior regulation gave the Agency the discretion to determine the price of an entitlement, the DOE concluded that a grant of ECI's Appeal might not affect the current price of an entitlement. In addition, the DOE rejected ECI's challenge to the procedural validity of Section 211.67(i)(4), finding that the FEA had complied with the requirements of the APA, the FEAA, and the EPCA. Moreover, the DOE found that the record contained substantial evidence that the establishment of the 21 cent cost advantage for domestic oil was a valid exercise of agency discretion. Accordingly, the ECI Appeal was denied.

Petroleum Management, Inc., Laurel, Miss., DRA-0080, crude oil

Petroleum Management, Inc. (PMI) filed an Appeal from a Remedial Order which was issued to the firm by DOE Region IV on December 2, 1977. The Remedial Order found that PMI had sold crude oil at prices exceeding the ceiling prices set forth in 6 CFR 150.353 and 10 CFR 212.73. According to the Remedial Order, these overcharges resulted from PMI's erroneous determination that the base production control level for the property was zero. In considering the PMI Appeal, the DOE affirmed the Remedial Order's conclusion that a new property was not created when PMI extended an existing well in order to reach a new reservoir. The DOE also rejected PMI's contention that undercharges associated with an adjoining property should be offset against the overcharges relating to the property subject to the Remedial Order. The PMI Appeal was therefore denied. However, the DOE modified the method for calculating price rollbacks on the basis that PMI was already required under DOE regulations to sell the crude oil at the price specified in the Remedial Order.

Standard Systems, Inc., Grand River, Ohio, DRA-0041, No. 1 fuel oil

Standard Systems, Inc. filed an Appeal from a Remedial Order which ERA Region V issued to the firm on November 7, 1977. In the Remedial Order, the ERA found that during the period November 1, 1973 through April 30, 1975 Standard had sold No. 1 fuel oil at prices which exceeded the maximum permissible levels set forth in 6 CFR 150.359 and 10 CFR 212.93. The Remedial Order therefore directed Standard to refund $28,080.79, plus interest, to the customers who had been overcharged. In its Appeal, Standard did not contest the validity of the factual findings or legal conclusions contained in the Remedial Order. Instead, Standard claimed that it was not financially able to comply with the refund provisions of the Remedial Order. In considering this contention, the DOE concluded that the circumstances warranted consideration of an exception request in the context of an Appeal proceeding. The DOE further concluded that Standard would incur a severe and irreparable injury unless it were relieved of the obligation to refund the overcharges specified in the Remedial Order. On the basis of these considerations, the DOE denied the Standard Appeal but granted the firm retroactive exception relief for the period covered by the Remedial Order. Accordingly, the Remedial Order was rescinded.

Texaco, Inc., White Plains, N.Y., DFA-0302, freedom of information

Texaco, Inc. appealed from a denial of a Request for Information which the firm filed under the Freedom of Information Act (FOI Act). In its request, Texaco sought documents containing the criteria used by the DOE Office of Special Counsel in determining whether to compromise civil penalties. The Director of Freedom of Information and Privacy Acts Activities (the Director) identified two documents as responsive to Texaco's request, but determined that the documents should not be released because they fell within the scope of Exemption 5 of the FOI Act. In considering the Texaco Appeal, the DOE concluded that the Director had properly found that the two documents were predecisional and deliberative in nature and therefore within the scope of Exemption 5. However, the DOE further determined that the two documents identified by the Director did not sufficiently respond to Texaco's request since Texaco had sought the final criteria which were being used by the Office of Special Counsel, not deliberative discussions regarding those criteria. The DOE therefore ordered the Director to determine whether documents of the type requested by Texaco exist.

Virginia Electric & Power Co., Richmond, Va., DFA-0290, freedom of information

The Virginia Electric and Power Company (Vepco) appealed from a determinaiton which the DOE Director of Freedom of Information and Privacy Acts Activities (the Director) issued to the firm on December 12, 1978. Vepco had submitted a Request for Information in which it sought access to seven categories of documents regarding the DOE's evaluation of the environmental impact of coal conversion at the firm's Portsmouth Power Station. The Director identified four documents as responsive to Vepco's request but refused to disclose their contents on the grounds that they were exempt from mandatory disclosure under Exemption 5 of the Freedom of Information Act. In considering the Vepco Appeal, the DOE determined that one of the documents constituted the effective law or policy of the agency and therefore was not properly

V 4 4 / 1 7 1

withheld under Exemption 5. That document was therefore released to Vepco. The DOE upheld the Director's determination with respect to the remaining three documents.

Requests for Exception

Burdett Oxygen Co., Norristown, Pa., DEE–1023, propane

The Burdett Oxygen Company filed an Application for Exception from the provisions of 10 CFR 211.9. The exception request, if granted, would result in the termination of Burdett's base period supplier/purchaser relationship with Amerigas-Ugite Division (Ugite) and the assignment of a new base period supplier of propane to Burdett. In considering the exception request, the DOE determined that Burdett had failed to meet the standards for reassignment of a base period supplier. Specifically, the DOE found that (i) no judicial determination had been made that Burdett had been defrauded by Ugite and (ii) no court had entered a judgment which would lead the DOE to conclude that the relationship between Burdett and Ugite had deteriorated to the point where Burdett's business operations would be significantly disrupted if the supplier/purchaser relationship were maintained. The DOE also determined that Burdett failed to submit uncontradicted evidence of fraud on the part of Ugite or to demonstrate that there had been any adverse financial impact upon Burdett's marketing activities as a consequence of its supplier/purchaser relationship with Ugite. Finally, the DOE determined that Burdett had not indicated that it was currently experiencing any inordinate difficulty in obtaining surplus propane or that any difficulties which it might experience in the future could not be solved through alternative remedies. The Burdett Application for Exception was therefore denied.

Burk Royalty Co., Washington, D.C., DEE–1010, crude oil

Burk Royalty Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to charge upper tier ceiling prices for the crude oil to be produced from the Garden Island properties, located in Placquemines Parish, Louisiana. In considering the exception request, the DOE determined that in the absence of exception relief the firm would have no economic incentive to perform a proposed well workover and to invest in new equipment necessary to resume extraction operations. In accordance with precedents established in previous Decisions, the DOE determined that exception relief should be approved which would enable Burk to attain a 15 percent rate of return on the capital investments at the properties and thus provide the firm with an economic incentive to undertake the project. Accordingly, the DOE granted Burk exception relief which permits it to sell 15,315 barrels of crude oil produced from the Garden Island properties for the benefit of the working interest owners at upper tier ceiling prices

Chevron U.S.A., Inc., San Francisco, Calif., DEE–1289, crude oil

Chevron U.S.A., Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, in which it requested that it be permitted to sell the crude oil produced from the N–I–C Ranger Fault Block VI at upper tier ceiling prices. In considering the Chevron request, the DOE found that operating costs at Fault Block VI had increased to the point that Chevron no longer had an economic incentive the continue production of crude oil. On the basis of the criteria applied in previous Decisions, the DOE determined that Chevron should be permitted to sell at upper tier ceiling prices 42.88 percent of the crude oil produced from Fault Block VI during the period August 1, 1978 through March 31, 1979. This determination was set forth in a Proposed Decision and Order issued to Chevron on January 30, 1979, Edgington Oil Co., Inc. subsequently filed a Statement of Objections to that determination in which it argued that relief should not be granted on a retroactive basis to August 1, 1978, the date on which Chevron completed its submission of additional information. Edgington, the purchaser of the crude oil produced from Fault Block VI, maintained that the determination reached in the Proposed Decision would alter its position under the Entitlements Program on a retroactive basis and would require the DOE to revise the Entitlements Lists issued during the months of October 1978 through January 1979. In rejecting this contention, the DOE observed that the Entitlements Program is specifically structured so that retroactive recertifications of crude oil do not require the revision of earlier Entitlements Lists. Instead, a refiner is permitted to reflect such recertifications in its adjusted crude oil receipts which it reports in later months. Accordingly, the Proposed Decision and Order was issued in final form.

Florida Liquid Gas Co., Winter Park, Fla., DEO–0006, propane

Florida Liquid Gas Company (FLGC) filed an Application for Exception from the provisions of 10 CFR 212.93, which, if granted, would permit the firm to increase the prices which it may charge for propane. In its Application, FLGC contended that the requirement that May 15, 1973 be used as a base date for calculating maximum selling prices resulted in a gross inequity and a serious hardship to the firm. Specifically, FLGC contended that on the base date it was charging significantly lower prices than its competitors due to a promotional pricing program. In considering FLGC's request, the DOE found that the factors existing on May 15, 1973 were not anomalous but in fact were the result of a pricing policy that the firm had used since its incorporation. In addition, the DOE found that the firm's decline in profits and rate of return on invested capital were attributable to a decline in sales volume rather than to the DOE price regulations. Accordingly, the DOE denied the exception request.

Glenrock Refinery, Inc., Glenrock, Wyo., FEE–4853, crude oil

Glenrock Refinery, Inc. filed an Application for Exception from the provisions of 10 CFR 211.67(e)(2), which if granted, would result in the issuance of additional entitlements to the firm for crude oil which it intends to have processed for its account by other refiners. Glenrock claimed that such relief was necessary to enable it to proceed with a planned refinery expansion. On June 28, 1978, the DOE issued a Proposed Decision and Order denying the Glenrock exception request. In considering the Glenrock request and Statement of Objections to the Proposed Decision and Order, the DOE rejected the firm's contention that its economic viability had been jeopardized by a delay in the determination on the request. In this regard, the DOE noted that Glenrock did not even submit its Application for Exception until more than five months after it became aware that it would no longer qualify for bias entitlements under Section 211.67(e)(2). The DOE also determined that denial of the firm's exception request would not be contrary to Section 123 of the Energy Conservation and Production Act, which requires the DOE to foster refinery construction and expansion by small refiners and independent refiners. In this regard, the DOE noted that Congress did not intend the DOE to promote refinery expansion in an indiscriminate manner. The DOE also noted that the profitable operation of the proposed Glenrock refinery was apparently contingent upon the receipt of small refiner bias benefits. The DOE concluded that the public interest would generally not be served by proposed refinery expansion programs that are not economically viable in the absence of continued benefits under the Entitlements Program. Accordingly, the Glenrock Application for Exception was denied.

Gulf Oil Corp., Tulsa, Okla., DXE–2087, crude oil

Gulf Oil Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would extend the exception relief granted to the previous operator of the South Stanley Lease and thereby permit Gulf to continue to sell a portion of the crude oil produced from the property at upper tier ceiling prices. *Kewanee Oil Co.*, 2 DOE Par. 81,110 (1978). In considering the exception request, the DOE found that Gulf was incurring a high level of operating expenses and that in the absence of exception relief the firm would lack an economic incentive to continue its crude oil production activities. Accordingly, on the basis of recent operating data submitted by the firm, the DOE determined that Gulf should be permitted to sell at upper tier ceiling prices 55.50 percent of the crude oil produced from the property for the benefit of the working interests during the period February 1, 1979 through July 31, 1979.

Melvin Klotzman and Jess Pendleton d.b.a. Victoria Equipment and Supply Co., San Antonio, Tex., FEE–4122, crude oil

Melvin Klotzman and Jess Pendleton, d.b.a. Victoria Equipment and Supply Company (Victoria) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Victoria to retain the revenues which the firm obtained in sales of crude oil produced from the Keeran Ranch "D" Lease located in Victoria County, Texas, despite the FEA's prior determination in a Remedial Order that these sales were made at unlawful prices. In a Proposed Decision and Order concerning Victoria's request for retroactive relief, the DOE concluded that the firm was unlikely to experience a severe and irreparable injury if required to refund the specified overcharges. In considering the Statement of Objections which Victoria subsequently filed, the DOE held that Victoria should not be granted retroactive exception relief merely because it could have received prospective relief at an earlier date. The DOE found no basis in the record to support Victoria's claim that Congress had required that the same standards be applied to requests for retroactive exception relief as to prospective relief. Finally, the DOE rejected Victoria's contention that the fact that it would have incurred a loss at the Keeran Lease during the audit period if it had not violated the price regulations should warrant the approval of retroactive exception relief. Accordingly, the Application for Exception was denied.

Damson Oil Corp., Houston, Tex., DEE–0362, crude oil

Damson Oil Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would permit Damson to sell at upper tier ceiling prices a portion of the crude oil which it intends to produce from the L. A. 135 No. 2 well (the No. 2 well) located in Los Angeles County, California. In considering the exception request, the DOE found that Damson would be able to recover a substantial quantity of additional crude oil if it were to undertake a proposed capital investment project at the No. 2 well. The DOE further determined that the investment would be uneconomic if the additional crude oil produced were sold at the applicable ceiling prices. On the basis of these findings, the DOE issued a Proposed Decision and Order on November 2, 1978, in which it determined that Damson should be permitted to sell at upper tier ceiling prices a portion of the crude oil which it would produce from the No. 2 well, in order to provide the firm with a 15 percent internal rate of return on its investment. Damson subsequently filed a Statement of Objections, in which it contended that a 15 percent rate of return was inadequate. In considering the Damson objection, the DOE observed that subsequent to the issuance of the Proposed Decision and Order, the DOE issued an Interlocutory Order to the Phillips Petroleum Company, 2 DOE Par. 82,583 (1978), in which it concluded that an internal rate of return of 23 percent was generally warranted to encourage investments which would increase domestic crude oil production. The DOE concluded that the 23 percent rate of return generally should apply to all investments made after the *Phillips* Decision. Accordingly, the DOE approved exception relief which permitted Damson to sell at upper tier prices an amount of crude oil sufficient to realize a 23 percent rate of return on the investment.

Lago Petroleum Co., Houston, Tex., DEE–2008, crude oil

Lago Petroleum Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit Lago to sell a portion of the crude oil to be produced from the T. J. Felder No. 4 well, located in the South Wharton Field, Wharton County, Texas, at upper tier ceiling prices. According to Lago, exception relief was necessary to enable the firm to realize a sufficient rate of return on an investment to repair one of the wells on the tract. In considering the request, the DOE found that if Lago were required to sell the crude oil at the applicable ceiling prices, the working interest owners would lack an economic incentive to undertake the repairs. In view of this determination and on the basis of projected expenses and production data which Lago submitted, the DOE concluded that Lago should be permitted to sell at upper tier ceiling prices 187 barrels of crude oil produced from the lease for the benefit of the working interest owners.

The Maurice L. Brown Co., Kansas City, Mo., DEE–1448, crude oil

The Maurice L. Brown Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to sell the crude oil which it expects to produce from the State 19–1 Lease located in Lea County, New Mexico, at prices which exceed the applicable ceiling prices. In considering the Brown request, the DOE determined that a substantial quantity of additional crude oil may be recovered from the State 19–1 Lease if the investments necessary to repair the property's production equipment are made. The DOE also determined that if the firm were to sell the crude oil involved at lower tier ceiling price levels, it would not realize a positive return on its investment. In accordance with precedents involving similar factual circumstances, the DOE approved exception relief which will permit the firm to realize a 23 percent rate of return on its projected investment over a 10-year period.

Montara Petroleum Co., Palo Alto, Calif., DEE–0114, crude oil

Montara Petroleum Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to sell the crude oil produced from the DT–32X well, located in the Cat Canyon Field in Santa Barbara County, California, at prices which exceed the lower tier ceiling prices. In considering the Montara request, the DOE determined that a substantial quantity of additional crude oil may be recovered from the DT–32X well if the investments required to repair the well's production equipment are made. The DOE also determined that if the firm were to sell the crude oil involved at lower tier ceiling price levels it would not realize a positive return on its investment. In accordance with precedents involving similar factual circumstances, the DOE granted exception relief which will permit Montara to sell at market prices 100 percent of the crude oil produced from the DT–32X well for the benefit of the working interest owners over its remaining productive life.

Moran Pipe and Supply Co., Seminole, Okla., DXE–1992, crude oil

Moran Pipe and Supply Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to continue selling a portion of the crude oil produced from the Cozar Lease, located in Seminole County, Oklahoma, at upper tier ceiling prices. In considering the Moran request, the DOE found that Moran was incurring increased operating expenses at the Lease and that in the absence of exception relief the working interest owners would lack an economic incentive to continue production of crude oil from the property. In view of this determination and on the basis of the operating data which Moran submitted for the most recently completed fiscal period, the DOE concluded that further exception relief should be granted to permit Moran to sell 65.08 percent of the crude oil produced from the Cozar Lease for the benefit of the working interest owners at upper tier ceiling prices.

Mull Drilling Co., Inc., Wichita, Kans., DXE–1674, crude oil

Mull Drilling Company, Inc. filed an Application for Exception form the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the working interest owners to continue to sell certain quantities of crude oil produced from the Roth Lease located in Cheyenne County, Colorado, at upper tier ceiling prices. On September 5, 1978, the DOE issued a Proposed Decision and Order to Mull in which it determined that Mull had failed to demonstrate that exception relief was necessary to provide the working interest owners with an economic incentive to continue production. The DOE's conclusion was based on the finding that in the most recent six month period for which data was available, the firm would have earned a profit even if all the crude oil produced for the working interests were sold at the applicable lower tier ceiling price. In its Statement of Objections, Mull contended that the DOE had failed to consider the effect of depreciation and *ad valorem* taxes in its analysis. In addition, Mull claimed that in the absence of exception relief the firm would have no economic incentive to undertake necessary pump repairs when such repairs become necessary. In considering these objections, the DOE found that although *ad valorem* taxes are usually considered as an expense in this type of proceeding, Mull had not reported these expenses in its Application for Exception. The DOE also noted that since depreciation is a non-cash item which does not directly affect a producer's economic incentive, it is generally excluded as an expense. Finally, the DOE concluded that there was no basis to grant exception relief for anticipated repair costs. Accordingly, the Application for Exception was denied.

San Joaquin Refining Co., Newport Beach, Calif., DEE–1828;

Basin Petroleum, Inc., Long Beach, Calif., DEE–1948;

Coastal States Gas Corp., Houston, Tex., DEE–2045, fuel oil

The three firms named above requested exception relief through the Entitlements Program to facilitate the transportation of residual fuel oil from California to the East Coast market. In considering these requests, the DOE observed that it recently denied a request by the Charter Oil Company for similar relief. *Charter Oil Co.*, 3 DOE Par. — (February 16, 1979). Since all of the issues raised by these three firms were considered in the context of the *Charter* Decision, the

A G 3 1 7 9 UMI

V 4 4 / 1 7 1

DOE concluded that no purpose would be served by further consideration of those issues. However, the DOE also concluded that the three applicants should have an opportunity to review the *Charter* Decision and determine whether any additional factors exist which would support their requests. Accordingly, the three exception requests were dismissed without prejudice to a refiling at a later date.

Tesoro Petroleum Corp., San Antonio, Tex., DEE–0444, crude oil

Tesoro Petroleum Corporation filed an Application for Exception from the provisions of 10 CFR 211.67 (the Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements for its 1978 fiscal year. In considering the request, the DOE found that Tesoro was a net seller of entitlements during its 1978 fiscal year. Since Tesoro obtained significant benefits under the Entitlements Program, the DOE determined that the firm failed to substantiate its contention that the Program resulted in a serious hardship or a gross inequity. Accordingly, the Application for Exception was denied.

Texas Oil and Gas Corp., Corpus Christi, Tex., DEE–1830, crude oil

Texas Oil and Gas Corporation (TXO) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to sell the crude oil produced from the Pete Rydolph "A" Lease in Victoria County, Texas, at market prices. In considerating the exception request, the DOE found that the cost of producing crude oil from the property exceeded the revenues which the firm would realize from the sale of crude oil at lower tier ceiling prices. The DOE concluded that under these circumstances TXO does not have an economic incentive to continue producing crude oil from the Lease. On the basis of precedents involving similar factual situations, the DOE concluded that the exception request should be granted.

Remdial Orders

Ford Oil Co., Santa Rosa, Tex., DRO–0078, propane

Ford Oil Company filed a Statement of Objections to a Proposed Remedial Order (PRO) that DOE Region VI issued to the firm on June 27, 1978. In the PRO, Region VI found that during the period November 1, 1973 through January 31, 1975, Ford sold propane at prices that exceeded those permitted under the price regulations. In its Statement of Objections, Ford contended that six of the purchasers involved were new customers who represented a new market pursuant to 10 CFR 212.111(a)(2). According to Ford, these new customers were resellers, while the firm's customers on May 15, 1973 consisted of either retailers or end-users. Ford maintained that Region VI's calculations of the firm's maximum lawful selling prices were erroneous because the Region improperly determined that these customers were members of the firm's retail classes of purchaser. In considering Ford's Statement of Objections, the DOE determined that the primary operating level of new customers is a very important factor in determining a customer's level of distribution. The DOE found that the factual record was insufficient to establish that Ford's six new customers operated primarily at the retail level of distribution. However, the DOE also found that Ford had not provided evidence that its new customers operated at a new level of distribution. The DOE therefore remanded the matter to Region VI for further investigation and analysis. With respect to the portion of the overcharges that was not in dispute, the DOE issued the Proposed Remedial Order in final form after determining that Ford had not made a *prima facie* showing that the amount of the refund obligation resulting from those overcharges constituted a financial hardship to the firm.

Marine Fuel Supply and Towing, Inc., Tampa, Fla., DRO–0022, No. 2 diesel fuel

Marine Fuel Supply and Towing, Inc. filed a Statement of Objections to a Proposed Remedial Order issued to the firm by DOE Region IV. In the PRO, Region IV found that during the period November 1, 1973 through December 31, 1975, Marine sold No. 2 diesel fuel to its customers without computing its May 15, 1973 weighted average selling price in accordance with the Mandatory Petroleum Price Regulations. As a result of this omission, it alleged that Marine sold No. 2 diesel fuel at prices in excess of those permitted by 6 CFR 150.359 and 10 CFR 212.93. In its Statement of Objections, Marine contended that the DOE recordkeeping and allocation regulations were invalid as a matter of law. In considering Marine's Statement of Objections, the DOE found that the firm was charged with a violation of the DOE price regulations, not the DOE recordkeeping or allocation regulations, and that Marine's contentions concerning the validity of the recordkeeping and allocation regulations were therefor irrelevant to the present proceeding. In addition, the DOE found that the Marine had failed to satisfy the criteria for a stay of the Remedial Order pending resolution of a related judicial proceeding, especially in view of the strong public interest in securing timely compliance with the price regulations. Finally, the DOE found that Marine had not submitted any evidence to warrant consideration of its claim of gross inequity and serious hardship in the context of an Objection to the Proposed Remedial Order. Accordingly, the DOE issued the Proposed Remedial Order as a final order.

Request for Stay

Cities Service Co., Tulsa, Okla., DES–0154, crude oil

Cities Service Company filed an Application for Stay of an Order that was issued to it by the Acting Assistant Administrator for Fuels Regulation of the Economic Regulatory Administration (ERA). In that Order, the ERA directed Cities Service to sell a specified volume of suitable crude oil to the Sigmor Refining Company on an emergency basis under the Buy-Sell Program, 10 CFR 211.65. The Application for Stay, if granted, would temporarily relieve Cities Service of that obligation pending a determination on an Appeal of the Order. In support of its request for stay, Cities Service set forth a number of arguments which it maintained demonstrated that it was likely to succeed on the merits of its Appeal. Cities Service also alleged that the Order would result in irreparable injury to the firm. In considering the stay request, the DOE found that the issues which Cities Service had raised were significant and warranted serious consideration in the context of its Appeal. However, on the basis of the existing record, the DOE concluded that Cities Service had not shown that it was likely to succeed on the merits of its Appeal. As for Cities Service's allegation of irreparable injury in the absence of a stay, the DOE noted that Section 212.94 was recently amended to mitigate the effects which might occur as a result of increased world market prices for crude oil. Furthermore, the DOE concluded that the adverse impact on Sigmor if a stay were granted would greatly exceed the burdens that compliance with the ERA's Order would impose upon Cities Service. Based on these considerations, the Application for Stay was denied.

Motion for Evidentiary Hearing

Big Bend Truck Plaza, Tallahassee, Fla., DRH–0032, diesel fuel

Big Ben Truck Plaza filed a Motion for Evidentiary Hearing in connection with a Statement of Objections to a Proposed Remedial Order issued to it by DOE Region IV. According to the PRO, Big Bend violated the resellers and retailers price rule, 10 CFR 212.93, and thereby overcharged its customers by a total of $37,554.21 during the period November 1, 1973 through April 30, 1976. The Motion for Evidentiary Hearing, if granted, would permit Big Bend to present testimony with respect to disputed issues of fact. In considering the motion, the DOE determined that the issues raised by Big Bend relate to the firm's accounting practices and that these practices are relevant to the dispute between Big Bend and the Office of Enforcement. The DOE also observed that the testimony of the firm's officers with respect to alleged undercharges would be relevant and material to a determination as to whether a portion of the alleged overcharges should be offset. Finally, the DOE concluded that Big Bend should be permitted to present specific evidence concerning advice that was allegedly given to the firm by federal agents. Accordingly, the Motion for Evidentiary Hearing was granted.

Motion for Discovery

Lunday-Thagard Oil Co., Washington, D.C., DED–1936, crude oil

The Lunday-Thagard Oil Company filed a Motion for Discovery in which it requested the DOE to produce for inspection and copying four memoranda written by officials of the DOE and the FEA. Lunday-Thagard contended that the documents were necessary to enable it to effectively pursue a Statement of Objections which it filed to a Proposed Decision and Order issued to the firm on December 6, 1978. In considering the Motion, the DOE noted that in a recent case, *Quincy Oil, Inc.*, 2 DOE Par. 82,577 (1978), it determined that in the absence of extraordinary circumstances discovery of documents held by the DOE would not be granted in proceedings in which the DOE is not a party. The DOE found that the documents sought by the firm were not directly relevant to the present exception proceeding and that disclosure would not materially advance the proceeding. On the basis of these considerations, the DOE denied the Lunday-Thagard Motion for Discovery.

Supplemental Orders

Commonwealth Oil Refining Co., Inc., San Antonio, Tex., DEX–0143, crude oil

The present proceeding relates to a Supplemental Order which the DOE issued on January 16, 1979 to the Commonwealth Oil Refining Company, Inc. (Corco). That Order permitted the firm to sell an amount of crude oil entitlements if it certified that the bankruptcy court having jurisdiction over the Corco reorganization approved an order establishing certain procedures for the use of the funds realized from the sale of the entitlements. In the present proceeding, Corco submitted an order that the bankruptcy court had issued pursuant to the January 16 determination. After reviewing that bankruptcy order, the DOE concluded that Corco should be permitted to sell the entitlements involved, subject to the safeguards contained in the order of the bankruptcy court.

Navajo Refining Co., Washington, D.C., DEX–0006, crude oil

On various dates, the FEA issued Decisions and Orders to Navajo Refining Company granting the firm exceptions from the provisions of 10 CFR 211.67 (the Entitlements Program). These Decisions had the effect of relieving Navajo of a portion of its entitlement purchase obligations during the period June 1976 through November 1977. That exception relief was granted in accordance with the standards established in *Beacon Oil Co.*, 3 FEA Par. 83,209 (1976), and *Delta Refining Co.*, 2 FEA Par. 83,275 (1975), and applied primarily to the firm's fiscal year ended July 31, 1977. In those Orders, the FEA indicated that it would conduct a review of the exception relief which had been granted to Navajo at the completion of the firm's fiscal year to determine whether it had received either excessive or insufficient entitlements relief. On the basis of the actual data which the firm provided for its 1977 fiscal year, the DOE determined that Navajo had received an excessive amount of entitlements relief. Navajo was therefore required to purchase additional entitlements having a total value of $126,804 during the period March through May 1979.

Marine Fuel Supply & Towing, Inc., Tampa, Fla., DRO–0022, No. 2 diesel fuel

Marine Fuel Supply and Towing, Inc. filed a Statement of Objections to a Proposed Remedial Order issued to the firm by DOE Region IV. In the PRO, Region IV found that during the period November 1, 1973 through December 31, 1975, Marine sold No. 2 diesel fuel to its customers without computing its May 15, 1973 weighted average selling prices in accordance with the Mandatory Petroleum Price Regulations. As a result of this omission, it alleged that Marine sold No. 2 diesel fuel at prices in excess of those permitted by 6 CFR 150.359 and 10 CFR 212.93. In its Statement of Objections, Marine contended that the DOE recordkeeping and allocation regulations were invalid as a matter of law. Marine also contended that since a challenge to the validity of those regulations has been raised in a class action pending in Northern California, the DOE should not issue the Proposed Remedial Order as a final order. In considering Marine's Statement of Objections, the DOE found that the firm was charged with a violation of the DOE price regulations, not the DOE recordkeeping or allocation regulations, and that Marine's contentions concerning the validity of the recordkeeping and allocation regulations were therefore irrelevant to the present proceeding. In addition, the DOE found that Marine had failed to satisfy the criteria for a stay of the Remedial Order pending resolution of the California judiciary proceeding especially in view of the strong public interest in securing a timely compliance with the price regulations. Finally, the DOE found that Marine had not submitted any evidence to warrant consideration of its claim of gross inequity and serious hardship in the context of an Objection to a Proposed Remedial Order. Accordingly, the DOE issued the Proposed Remedial Order as a final order.

Dismissals

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Atlantic Richfield Company, Los Angeles, California, DEE–2164.
Basic Petroleum, Inc., Los Angeles, California, DEE–0933.
Continental Oil Company, Houston, Texas, DEE–1947.
Curtiss Wright Corporation, Woodridge, New Jersey, DEE–2150.
Demenno Resources, Los Angeles, California, DEE–0965.
Farmland Industries, Inc., Kansas City, Missouri, DES–2166; DEE–2166.
Shell Oil Company, Houston, Texas, DEE–2192; DES–2192; DST–2192.
Texaco, Inc., White Plains, New York, DEE–2193; DES–2193; DST–2193.
W. F. Snakard, Inc., Wellston, Oklahoma, DEE–0480.

The following submission was dismissed for failure to correct deficiencies in the firm's filing as required by the DOE Procedural Regulations:

Zenith Oil Company, Inc., Minneapolis, Minnesota, DEE–1994.

The following submission was dismissed on the grounds that the request is now moot:

Research Enterprises, Inc., New Orleans, Louisiana, DRO–0122; DRH–0122.

The following submissions were dismissed on the grounds that recent regulatory changes have eliminated the need for the exception relief requested:

Amoco Oil Company, Chicago, Illinois, DEE–2152; DES–2152; DST–2152.
Mobil Oil Company, New York, New York, DES–2163; DEE–2163.

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B–120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Correction

In FR Doc. 79–25076 appearing on page 47401 in the issue of Monday, August 13, 1979 make the following corrections:

On page 47402 in the first column, the third line should have read: "*Capacity:* 1,000 megawatts (MW) for". In the third column, the eighth line, the word "contract" should have read "contact".

On page 47403, in the first column, the second line from the bottom should have read "• Conservation and load management." In the second column, the seventh line should have read "• Gas turbines;".

BILLING CODE 1505–01–M

Office of Special Counsel for Compliance; Proposed Remedial Order to Getty Oil Co.

AGENCY: Department of Energy.

ACTION: Notice of Proposed Remedial Order to Getty Oil Company and of Opportunity for Objection.

Pursuant to 10 CFR § 205.192(c), the Special Counsel for Compliance, Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Getty Oil Company ("Getty"), 3810 Wilshire Blvd., Los Angeles, California 90010.

This Proposed Remedial Order sets forth findings of fact and conclusions of law concerning termination by Getty of a crude oil supplier/purchaser relationship between Getty and Phillips Petroleum Company ("Phillips") in violation of 10 CFR 211.63(b) of the Mandatory Petroleum Allocation Regulations. The crude oil involved was produced by Getty from the Alaskan Cook Inlet and sold to Phillips during the period April 1, 1976 through March 31, 1979. The unlawful termination of the

A G 3 1 7 9 UMI

V 4 4 / 1 7 1

supplier/purchaser relationship by Getty, according to the Proposed Remedial Order, occurred on April 1, 1979. As a result of such termination, Phillips was unable to supply the crude oil to Tosco Corporation (Tosco), which Phillips had contracted to supply for use at Tosco's Avon Refinery in California.

In accordance with 10 CFR § 205.192(c), any person may obtain a copy of the Proposed Remedial Order, with confidential information, if any, deleted, from the ERA.

On or before September 17, 1979, any aggrieved person may file a Notice of Objection in accordance with 10 CFR § 205.193. Such Notice should be filed with: Office of Hearings and Appeals, Department of Energy, Room 8014, 2000 M Street, N.W., Washington, D.C. 20461.

Copies of the Proposed Remedial Order may be obtained by written request addressed to: Milton Jordan, Director, Division of Freedom of Information and Privacy Act Activities, Forrestal Building, Room GB–145, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: George W. Young, Jr.

Copies of the Proposed Remedial Order may be obtained in person from: Office of Freedom of Information, Reading Room, Forrestal Building, Room GA–152, 1000 Independence Avenue, S.W., Washington, D.C. 20585.

Issued in Washington, D.C., August 24, 1979.

Paul L. Bloom,

Special Counsel for Compliance.

Control of Air Pollution from New Motor Vehicles and New Motor Vehicle Engines; Federal Certification Test Results for 1979 Model Year

Correction

In FR Doc. 79–22058, appearing at page 42444 in the issue of Thursday, July 19, 1979, the following changes should be made:

1. On page 42493, a note should appear below the entries for "Volvo-Evap-Emission Families," reading, "Note: This VEH generated evap emis as well as EXH test results; a complete listing of all test vehicles belonging to each evap emis family is provided in the evap emis family section below."

2. On page 42493, immediately following the above note, a heading should appear, reading, "1979 Model Year Light-Duty Trucks".

3. On page 42505, immediately following the entries for "Volkswagen—Evap-Emission Families," a heading should appear, reading "1979 Model Year Light-Duty Diesel Trucks".

Availability of Environmental Impact Statements

AGENCY: Office of Environmental Review, Environmental Protection Agency.

PURPOSE: This Notice lists the Environmental Impact Statements which have been officially filed with the EPA and distributed to Federal Agencies and interested groups, organizations and individuals for review pursuant to the Council on Environmental Quality's Regulations (40 CFR Part 1506.9).

PERIOD COVERED: This Notice includes EIS's filed during the week of August 20 to August 24, 1979.

REVIEW PERIODS: The 45-day review period for draft EIS's listed in this Notice is calculated from August 31, and will end on October 15, 1979. The 30-day wait period for final EIS's as calculated from August 31, 1979 will end on October 1, 1979.

EIS AVAILABILITY: To obtain a copy of an EIS listed in this Notice you should contact the Federal agency which prepared the EIS. This Notice will give a contact person for each Federal agency which has filed an EIS during the period covered by the Notice. If a Federal agency does not have the EIS available upon request you may contact the Office of Environmental Review, EPA for further information.

BACK COPIES OF EIS'S: Copies of EIS's previously filed with EPA or CEQ which are no longer available from the originating agency are available from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT: Kathi Weaver Wilson, Office of Environmental Review (A–104), Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460, (202) 245–3006.

SUMMARY OF NOTICE: On July 30, 1979, the CEQ Regulations became effective. Pursuant to § 1506.10(a), the 30 day wait period for final EIS's received during a given week will now be calculated from Friday of the following week. Therefore, for all final EIS's received during the week of August 20 through August 24, 1979, the 30 day wait period will be calculated from August 31, 1979. The wait period will end on October 1, 1979.

Appendix I sets forth a list of EIS's filed with EPA during the week of August 20 to August 24, 1979 the Federal agency filing the EIS, the name, address, and telephone number of the Federal agency contact for copies of the EIS, the filing status of the EIS, the actual date the EIS was filed with EPA, the title of the EIS, the State(s) and County(ies) of the proposed action and a brief summary of the proposed Federal action and the Federal agency EIS number if available. Commenting entities on draft EIS's are listed for final EIS's.

Appendix II sets forth the EIS's which agencies have granted an extended review period or a waiver from the prescribed review period. The Appendix II includes the Federal agency responsible for the EIS, the name, address, and telephone number of the Federal agency contact, the title, State(s) and County(ies) of the EIS, the date EPA announced availability of the EIS in the Federal Register and the extended date for comments.

Appendix III sets forth a list of EIS's which have been withdrawn by a Federal agency.

Appendix IV sets forth a list of EIS retractions concerning previous Notices of Availability which have been made because of procedural noncompliance with NEPA or the CEQ regulations by the originating Federal agencies.

Appendix V sets forth a list of reports or additional supplemental information on previously filed EIS's which have been made available to EPA by Federal agencies.

Appendix VI sets forth official corrections which have been called to EPA's attention.

Dated: August 28, 1979.

William N. Hedeman, Jr.,

Director, Office of Environmental Review.

Forest Service

Draft

Crooked River National Grassland, Ochoco National Forest, Jefferson County, Oreg., August 21: Proposed is a land management plan for the Crooked River National Grassland located in Ochoco National Forest, Jefferson County, Oreg. The preferred alternative includes: (1) Primary recreation for the areas around Haystack Reservoir, Lake Billy Chinook, and portions of the Squaw Creek and Deschutes River Canyons; (2) Primary riparian wildlife management; (3) primary wildlife/secondary range management of most of the Deschutes Canyon roadless area as well as the remainder of the west side of the grassland; (4) support of wildlife management through range management activities; and (5) management of canyon areas for dispersed recreation. (EIS Order No. 90902.)

Soil Conservation Service

Draft

Pepper Creek Flood Prevention and Drainage, Sussex County, Del., August 21: Proposed is the modification of about 30 miles of channel in the 43 mile Pepper Creek tax drainage measure for the purposes of reducing flooding and providing drainage for a total of 4,340 acres located in Sussex County, Delaware. The plan will include seeding for vegetation growth along the channel bank after construction. Under certain conditions, one side of the channel bank would be left undisturbed (USDA–SCS–EIS–RC&D–(ADM)–79–1–D–DE). (EIS Order No. 90895.)

Final

Bold Eagle 80, Joint Readiness Exercise, Santa Rosa, Okaloosa, and Walton counties, Fla., August 24: Proposed is the fifth annual large scale JCS coordinated joint readiness exercise, Bold Eagle 80, at Eglin AFB, located in Santa Rosa, Okaloosa, and Walton counties, Florida. Exercise elements will include approximately 20,000 troops, 390 aircraft (and helicopter), 3600 self-propelled wheeled vehicles and 195 tracked vehicles. The action is designed to exercise selected organizations in large unit deployment and in the procedures and tactics to be used as part of a joint force. A portion of the Blackwater River State Forest is also proposed for unconventional warfare activities. Comments made by: EPA, DOI, USDA, State and local agencies, groups. (EIS Order No. 90907.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Mr. John Hagan, Region IV, Environmental Protection Agency, 345 Courtland Street, NE, Atlanta, Georgia 30308, (404) 881–7458.

Final

Horsepen Creek Interceptor, Greensboro, Guilford county, N.C., August 21: Proposed is the awarding of grant funds to Guilford county, North Carolina for the purpose of developing a wastewater treatment system to service the Greensboro-Guilford county area of which the Horsepen Creek Interceptor is a part. The project consists of the necessary facilities to transport wastewater from the Horsepen Creek Basin to the city of Greensboro wastewater collection system for treatment. Six alternatives are considered (EPA–904/79–0042). Comments made by: COE, DOI, HEW, FERC, USDA, State, and local agencies, groups and individuals. (EIS Order No. 90901.)

GENERAL SERVICES ADMINISTRATION

Contact: Mr. Carl W. Penland, Acting Director, Environmental Affairs Division, General Services Administration, 18th and F Streets, N.W., Washington, D.C. 20405, (202) 566–1416.

Draft

IRS Midwest Service Center, Kansas City, Jackson county, Mo., Wyandotte county, Kans., August 22: Proposed is the construction of a replacement facility for the Internal Revenue Service-Midwest Service Center at one of four proposed sites in urban Kansas City, Jackson county, Missouri and Kansas City, Wyandotte county, Kansas. The facility will consist of a four-building complex with two sub-levels for parking and have an occupiable area of about 1,366,700 square feet. Of this space 770,000 square feet will be used for parking and the remainder to house an estimated 6,200 employees. Seven alternatives are considered (EMO/KS–790002). (EIS Order No. 90903.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Room 7274, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, (202) 755–6306.

Draft

Waverly Plantation Planned Community, Shelby County, Tenn., August 20: Proposed is the issuance of HUD home mortgage insurance for the Waverly Plantation Planned Community located in Shelby county, Tennessee. The community will encompass a 689.9 acre tract of land and include 2,962 dwelling units consisting of single family houses, apartments and townhouses. Also included are plans for elementary school/park sites, church sites, public and private recreational facilities, and supporting shopping centers (HUD–RO4–EIS–78–18). (EIS Order No. 90893.)

Final

Blair Village Apartment Complex, proposed sale, Fulton county, Ga., August 21: The proposed action is the sale of the Blair Village Apartment Complex which was acquired by the Department of Housing and Urban Development on December 2, 1975 through foreclosure on a FHA insured mortgage. Blair Village is a 1,062 unit apartment development located in southeastern Atlanta, Fulton county, Georgia. (HUD–RO4–EIS–78–02–F). Comments made by: AHP, EPA, HEW, USDA, DOI, DOE, COE, State and local agencies. (EIS Order No. 90899.)

Draft supplement

Shenandoah New Community, Grant, Coweta county, Ga., August 23: This statement supplements a final EIS, No. 25718, filed 12–6–72 concerning the awarding of a discretionary fund grant for the construction of a water treatment system for the Shenandoah New Community, Coweta county, Georgia. This supplement discusses a different system then that examined in the final EIS. Proposed is the construction of a 2.5 million gallon per day water treatment system. The construction will involve additions and improvements to existing facilities including upgrading of supply, treatment and distribution facilities. (EIS Order No. 90904.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256 Interior Bldg., Department of the Interior, Washington, D.C. 20240, (202) 343–3891.

Bureau of Land Management

Final

Crude Oil Transport Systems, Several Counties, Canada, August 24: Proposed for consideration are four applications for

A G 3 1 7 9 UMI

V 4 4 / 1 7 1

construction and operation of portions of a crude oil transportation system for the transport of Alaskan North Slope and foreign crude oil from the west coast to inland States under title V of Purpa. The locations of the proposals are as follows: (1) Port Angeles, Washington to Clearbrook, Minnesota, (2) Skagway, Alaska to Keg River, Alberta, Canada, (3) Kitimat, British Columbia, Canada to Edmonton, Alberta, Canada, and (4) Low Point, Washington to Edmonton, Alberta, Canada (FES–79–36). Comments made by: HEW, DOT, HUD, DOI, EPA, USDA, DOE, DOC, State and local agencies, groups, individuals and businesses. (EIS Order No. 90909.)

Bureau of Reclamation

Final

Bumping Lake Enlargement, Yakima Project, Yakima County, Wash., August 23: Proposed is the replacement of the existing Bumping Lake Dam, a feature of the Yakima project on the Bumping River in Yakima County, Washington, with a larger structure. The new dam would be 223 feet high, or five times higher than the existing structure, and would create an enlarged Bumping Lake with an active capacity of 458,000 acre-feet. The existing dam would be inundated. The alternatives considered range from alternate storage sites on the Bumping River to reallocation of irrigation water rights. Comments made by: DOI, FPC, AHP, COE, DOC, HEW, HUD, EPA, USDA, State and local agencies, groups, individuals and businesses. (EIS Order No. 90905.)

Geological Survey

Final

Caballo Mine, Mining and Reclamation Plan, Campbell County, Wyo., August 20: Proposed is approval of the surface mining and reclamation plan for the Caballo Mine, Carter Mining Company, Campbell County, Wyoming. The plan describes mining operations for 40 years on a total of about 6,700 acres (about 4,300 acres will actually be mined) of Federal, State, and privately owned mining leases. All of the land surface, except for 640 acres of State land, is privately owned. The coal will be used for electric power generation. Ten alternatives are considered (FES–79–34). Comments made by: AHP, USDA, HEW, DLAB, DOI, EPA, State and local agencies, businesses. (EIS Order No. 90892.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590, (202) 426–4357.

Federal Highway Administration

Draft

U.S. 12, Michigan Avenue Reconstruction, Wayne County, Mich., August 21: Proposed is the reconstruction of U.S. 12, also known as Michigan Avenue, from Nowlin Street in the city of Dearborn, Wayne County, Michigan. The length of the project is 1.3 miles. The existing two-way facility would be converted to a one-way pair of streets for which five alternative alignments are considered. In addition five other alternatives are discussed (FHWA–MICH–EIS–79–02–D). (EIS Order No. 90897.)

Final

N.J.–23 Widening, I–80 to New Street, Wayne, Passaic County, N.J., August 24: Proposed is the improvement of 1.65 miles of NJ–23 in Wayne township, Passaic County, New Jersey. The project would begin at I–80 and terminated near New Street. Improvement of the facility involves widening the existing 4-lane road-way to six lanes. Other improvements will include: The construction of an interchange with the proposed West Belt Highway and two-lane service roads on both sides of NJ–23, (2) realignment of NJ–23 from Lewis Street to the viaduct over the Conrail line and U.S. 202, and (3) the construction of an interchange immediately north of the viaduct at Alps Road (FHWA–NJ–EIS–77–01–F). Comments made by: DOT, NRC, USDA, FPC, EPA, DOI, HEW, COE, State agencies. (EIS Order No. 90908.)

Final

U.S. 221, Marion Bypass, McDowell County, N.C., August 21: The proposed action is the construction of a highway facility that will provide a bypass for U.S. 221 traffic presently routed through the town of Marion, McDowell County, North Carolina. Approximately half of the 11.8 mile project length will be a five-lane roadway along the existing alignment with the center lane for left turns only. The remainder of the project will be a four lane highway on new location with a 16-foot wide median and control of access to abutting properties (FHWA–NC–EIS–78–01–F). Comments made by: DOT, COE, HEW, FERC, DOI, USDA, EPA, AHP, State and local agencies. (EIS Order No. 90900.)

VETERANS ADMINISTRATION

Contact: Mr. Willard Sitler, Director, Environmental Affairs Office (66), Veterans Administration, 810 Vermont Avenue, Washington, D.C. 20420, (202) 389–2526.

Draft

Pacific National VA Memorial Cemetery, Honolulu; Honolulu City and County, Hawaii, August 21: Proposed is a master plan for the National VA Memorial Cemetery of the Pacific located in the Punchbowl Crater, Honolulu City and County, Hawaii. Major development elements of the plan include a Visitor Center/Administration Building and parking facility, an addition to the maintenance facility, Columbaria facilities, and major improvement of the overlook. The plan would expand burial capacity of the cemetery and improve its overall operations and appearance. (EIS Order No. 90896.)

Science Advisory Board

Environmental Pollutant Movement and Transformation Committee; Open Meeting

[FRL 1309–7]

Under Pub. L. 92–463, notice is hereby given of a meeting of the Task Group on Microcosms of the Environmental Pollutant Movement and Transformation Committee of the Science Advisory Board. The meeting will be held at the EPA Laboratory at Athens, Georgia on September 17, 1979. The address is the Environmental Research Laboratory, College Station Road, Athens, Georgia 30601. The room number will be posted at the building's main entrance.

The meeting is open to the public. The agenda is to review experimental data from a microcosm system known as the Exposure Analysis Modeling System.

Because seating capacity is limited, persons desiring to attend must pre-register and be given a confirmed reservation by the Executive Secretary of the Task Group, Dr. Joel L. Fisher. He may be reached at (202) 472–9444. Deadline for preregistration is close of business on September 14, 1979.

Dated: August 28, 1979.

Ernst Linde,

Acting Staff Director, Science Advisory Board.

Statement of Policy on the Recertification by Training of Commercial Applicators in Colorado and Nebraska under the Federal Insecticide, Fungicide, and Rodenticide Act, as Amended

SUMMARY: This notice explains EPA's policy on approving or disapproving training courses designed for recertifying commercial applicators who are certified under the Federal pesticide applicator certification program in Colorado and Nebraska.

EFFECTIVE DATE: August 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Andy Caraker, Senior Regional Coordinator, (TS-770-M), Office of Pesticide Programs, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, telephone (202) 472-9403.

John Wicklund, Chief, Toxic Substances and Pesticides Branch, Region VII, U.S. Environmental Protection Agency, 324 East 11th Street, Room 1500, Kansas City, Missouri 64106, telephone (816) 374-3036.

Lou Johnson, Chief, Toxic Substances Branch, Region VIII, U.S. Environmental Protection Agency, 1860 Lincoln Street, Suite 103, Denver, Colorado 80295, telephone (303) 837-3926.

SUPPLEMENTARY INFORMATION: The Administrative Procedure Act (5 U.S.C. 553(b)) provides that the solicitation of comments is not required of federal agencies for "interpretative rules, general statements of policy, or rules of agency organization, procedure or practice." EPA has determined that this notice falls within this exemption. Nevertheless, interested parties in states in which EPA is conducting a federal pesticide applicator certification program were given an opportunity to comment on the criteria. Written comments were received from 15 organizations. Copies of these comments are available for public inspection during normal business hours at the above locations.

The following is EPA's (Regions VII and VIII) policy on approving or disapproving training courses for the recertification (by training) of commercial pesticide applicators. This policy is only applicable in Colorado and Nebraska where EPA is conducting a federal pesticide applicator certification program. However, this does not preclude individual states from adopting these criteria or variations of these criteria.

Criteria for Recertification of Commercial Applicators Certified under the Federal Certification Program in Colorado and Nebraska

Introduction: In October 1972, Congress amended the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). One of the major provisions of the amended FIFRA is to certify applicators of restricted use pesticides. The certification program is an attempt to ensure that applicators have sufficient knowledge to prevent acute adverse human health and environmental effects in or near areas they treat with pesticides.

During the fall of 1977, the Environmental Protection Agency (EPA) began implementing federal pesticide applicator certification programs in states and on Indian reservations where there was no approved certification plan in effect. On June 8, 1978, EPA published in the **Federal Register** final regulations (40 CFR Part 171.11) governing federal applicator certification programs. Under these regulations commercial applicators who use or supervise the use of restricted use pesticides are required to be certified. In order to be certified, a commercial applicator must take and pass written examinations. An applicator's certification is valid for two years from the date of issuance and only in the state it is issued.

Recertification Criteria: Final regulations (40 CFR 171.11) provide that a certified commercial applicator may qualify for recertification by taking and passing written examinations administered by EPA, or by successfully completing an EPA approved training course. Recertification procedures must be completed during the twelve month period preceding the expiration date of his certificate.

Recertification serves two purposes: (1) It helps ensure that commercial applicators continue to meet the requirements of changing technology; and (2) It helps ensure that applicators maintain a continuing ability to use pesticides safely and properly. In states in which the Agency is administering certification programs, EPA is responsible for ensuring that commercial applicators either pass the required examinations or successfully complete an approved training course prior to being recertified.

EPA will provide certified commercial applicators ample opportunity to take the required written examinations for recertification. However, EPA is not in the position to provide the training required for recertification. The Agency does not have the personnel and funding needed to provide training. The availability of training will be dependent upon the willingness and capability of public or private organizations to develop recertification training programs which can be approved by EPA.

Information set forth herein describes the minimum criteria for training courses to recertify commercial applicators and the procedures for obtaining EPA approval.

Curriculum: On October 9, 1974, EPA published in the **Federal Register** "Standards for Certification of Pesticide Applicators", 40 CFR Part 171.1-6. The minimum standards an applicator must meet in order to be certified as a commercial applicator are listed in 40 CFR 171.4, "Standards for Certification of Commercial Applicators".

EPA acknowledges that commercial applicators who are certified have demonstrated their competence with respect to the commercial applicator standards. The Agency also recognizes that the purpose of recertification is not to redetermine an applicator's competency, but to ensure that he maintains the ability to apply pesticides properly and stays abreast of changing technology. To meet these goals, it is necessary to provide applicators with newly developed information as well as to review areas which directly affect the safe and proper use of pesticides. These areas are described below.

In order for an organization's training course, meeting, or workshop to qualify for EPA approval, it should include the following subject matter:

A. General

1. *Applicable State and Federal Pesticide Laws and Regulations.* This presentation should include a general review of the FIFRA requirements and its regulations and any state laws which pertain to pesticide application, storage, transportation and disposal. Special attention must be given to changes and additions that have taken place during the two-year period preceding the training course (including amendments to FIFRA, new or revised regulations, and Pesticide Enforcement Policy Statements (PEPS)).

2. *Environmental Precautions.* One of EPA's major responsibilities, in addition to individual applicator safety, is the protection of our environment from pollutants, including pesticides. A review of precautions applicators should take to prevent contamination of the environment should be included in the presentation. This review may be directly related to the major restricted use pesticides used in the category for which training is being provided.

3. *Calibration.* One of the problems associated with pesticide use is poor calibration of pesticide application equipment. Each training course should include a presentation on pesticide application equipment calibration, including sample problems.

B. Specific Category Material

1. *Pest Identification.* Before choosing and applying a specific pesticide, the applicator must first identify the target pest(s) to be treated and any non-target species (insects, weeds, etc.) that may be present. Pests or groups of pests are generally located in a specific environment. Each type of environment (including agricultural land, forests, aquatic areas, rights-of-way, and man-made structures) is covered by one of EPA's commercial applicator categories (40 CFR 171.3). Each presentation should include a section on the recognition of pests and beneficial organisms (i.e., insects, plants, etc.) directly related to the specific category that training is being provided for and the damage caused by the pest(s). Applicators should be provided with information on sources for identifying problem pests. Each presentation does not have to include identification of *all* pests for a particular category. For example, the course may provide training on identification of all major pests (insects, weeds, plant disease, etc.) for a particular crop, commodity or location, or training on identification of an individual group of pests (insects, weeds, etc.) for all the crops, commodities or locations covered by the particular category.

2. *Restricted Use Pesticides.* One of the main provisions of the amended FIFRA is that applicators of pesticides classified for restricted use be competent with respect to the use and handling of the pesticides. A part of being competent is being aware of specific pesticides' characteristics, hazards and safety factors. Each presentation should include a discussion of specific pesticides that are related to the commercial applicator category for which training is being provided. This discussion should include:

a. the family to which the particular pesticide(s) belong and the relative hazards, including special environmental precautions as related to the specific pesticide category (for example, organophosphates—high toxicity; chlorinated hydrocarbons—persistence);

b. persistence, volatility, potential phytotoxicity, drift potential, human hazards, special formulation hazards and precautions;

c. information on special calibration and application techniques (for example, Ultra Low Volume (ULV) application, or use of adjuvants);

d. safety factors which are necessary to prevent applicator poisoning; and

e. proper remedial procedures in case of accidents.

Not all pesticides that may be used in a particular category need to be discussed. However, emphasis should be given to the major restricted use pesticides for the particular category for which training is being offered. A review of the label and labeling for these pesticides should be included in the presentation.

3. *New Developments.* In order to provide applicators with the latest information available, the presentation should include up-to-date information dealing with pesticides products, application equipment and techniques, and hazards or precautions to be taken.

4. *Integrated Pest Management (IPM).* EPA's responsibilities include not only regulating the use of pesticides, but also encouraging the most officient use of available pesticides and only using them when needed. Integrated Pest Management (IPM) directly relates to this responsibility. Although EPA cannot require IPM training, individual organizations are encouraged to provide applicators with information on the concepts of IPM and any specific information related to the particular commercial applicator category for which training is being provided.

C. Demonstration and Research Category

Applicators who are certified under the Demonstration and Research category may be recertified by written examination or by successfully completing an approved training course for the category (example, Agricultural Plant, Forest, etc.) in which they were originally certified. In the event an applicator is certified for Demonstration and Research in more than one category, it would be necessary for the applicator to complete a training course approved for each category in which he wishes to be recertified.

Applicator Participation: When developing applicator training programs, a major consideration must be the amount of knowledge retained by the applicator. Trainees learn best when they are actively involved in the training course. One method of increasing the learning potential of the individaul is to incorporate procedures which require applicators to actually participate in the training course.

Each course to be approved by EPA for recertification must include a procedure requiring each indivudual to participate in a learning exercise. Attachment 1 outlines some examples of individual applicator participation procedures. Training methods not included in Attachment 1 may be submitted to EPA for consideration. Each method submitted to EPA will be considered on its own merit as it relates to its ability to increase an applicator's information retention.

In addition to participating in an approved training course, each applicator must complete EPA's "Pesticide Applicator Certification Form". EPA will only recertify applicators who have completed EPA's certification form and for whom the Agency has adequate assurances that the individual applicator successfully completed an approved training course. Mere passive attendance at a training course will not be considered as successful completion. Attendees should be made aware that failure to fully participate in the training course and to complete all course requirements will result in denial of recertification.

EPA will monitor all commercial applicator recertification courses. EPA retains the authority to withdraw approval of a training course not conducted in accordance with EPA's approval conditions. In the event a training course did not appear to satisfy the approval conditions, individual course sponsors will be given an opportunity to confer with EPA prior to any action to withdraw course approval.

EPA Approval: Each training course to recertify commercial applicators should be approved in advance by the appropriate EPA Regional Office. Only under special conditions (such as completion of a University level course) will a course be given approval after it is held.

Courses will be approved separately for each specific commercial applicator category. Before a course is approved for a particular category, it must meet the general criteria listed above and contain specific information on the individual category. A course may be approved for more than one category if specific information for each individual category is included in the program.

In order for an organization to have a course approved, the following procedures should be completed:

A. A final agenda for the course should be developed and submitted to the appropriate EPA Regional Office. It is the responsibility of the sponsoring organization to submit a final agenda to

EPA far enough in advance of the proposed course so that the Agency may review and approve or disapprove the course. EPA will approve or disapprove the proposed training course within 20 working days of official receipt. This agenda should include the curriculum; time allotted for each section; proposed training aids; instructional methodology; proposed instructors (if available); time, date and location of the proposed course; proposed applicator participation method; and number of anticipated attendees. The number of attendees requesting recertification will be considered as a factor when reviewing the proposed method of ensuring individual applicator participation. Organizations should encourage pre-registration in order to maintain an audience of reasonable size. EPA retains the discretion to withdraw approval in the event the number of attendees exceeds the anticipated attendance in large enough numbers so as to make individual applicator participation meaningless.

B. The appropriate EPA Regional Office will review all submitted material and approve or disapprove any proposed training course. Each course will be considered on its own merit.

The Agency will work with any organization which has had a proposed course disapproved to improve the program so it may be approved.

Applicator Participation Options

I. *Incomplete Outline:* The instructors or sponsors of the training session would develop an outline for each section of the course. Only the main headings and subheadings would be on the sheet distributed to the participants. It would be the responsibility of each individual participant to complete the remaining portions of the outline. Attachment 1(a) is an example of how an outline of this type might be prepared and completed by the applicator. (This is only a partial outline designed to provide interested groups with ideas.) The presentation should contain more information than just completing the outline and should also be designed to require the individual applicator to use experience and logic before completing the outline.

A EPA official would be responsible for reviewing each participant's outline and for determining whether or not he successfully completed the course.

II. *Written Examination:* Although EPA will not require organizations sponsoring training courses for recertification to use written examinations as a method of ensuring individual applicator participation, organizations may adopt this procedure. Written examinations have several advantages over other participation mechanisms: (1) they provide the instructor with a good method of evaluating both the individual participants and the course, and (2) they can be used when dealing with larger audiences.

Two types of testing conditions can be anticipated; testing at the end of a training session; and testing some time (several hours to days) after the training session. Test questions can be expected to produce different results in the two types of testing conditions and need to be developed accordingly. Each test should be designed so that statistical reliability can be determined; that is, it should reliably test the attendee's information retention.

The validity of any test should be assured by developing test questions in concert with the topic or lecture outline. The pass/fail point should be consistent with the judgment of the program faculty and EPA. An EPA official will be responsible for grading the exams and certifying the individual applicator(s) successfully completed the training session, including passing the exam if this option is used.

III. *Worksheets:* Worksheets are prepared for *each* area of discussion (see General and Specific Category curriculum material). Problems and questions should be suitable for the experience of the applicators attending the course. For labeling, have labels present so each attendee can analyze and answer questions relating to the label. Problems dealing with calibration should be developed so the answer can be worked out by the individual applicant. Calibration problems must require some thought, but should not be excessively difficult to answer. Worksheets should be completed on an individual basis. This is very important as it requires the individual applicator to think for himself and not to rely on others near him to supply the correct answers. The worksheet exercise must be followed up with an instructor-led group discussion of each problem and question and correct answer—WHY is an answer "right"; WHY is it "wrong". This may appear to be time-consuming, but it will be worth the extra effort if questions are valid and are kept to a reasonable number. This method also has the advantage being used in large audiences.

An EPA official will be responsible for reviewing each participant's worksheet to ensure that the individual fully participates in the course and completes all course requirements.

IV. *Group Problem-Solving:* Depending on the number of attendees, the main conference can be divided into smaller discussion groups after formal training is completed. Each discussion group is given a pesticide application problem, including all of the particulars relating to this problem. (For example, for a weed problem: the weed(s) of concern, weather conditions, soil conditions, human and environmental factors, land area of concern, choice of pesticide(s)/integrated pest management methods to use, potential legal problems, equipment available, and miscellaneous factors.) Members of the small groups then would discuss the problem among themselves and come up with a solution. Each group's solution to the problem would then be discussed and reviewed before the entire conference. This method of applicator participation provides some assurance that each applicator will participate in the smaller groups. It also allows for the applicator's individual experience and gives him the opportunity to learn from his peers.

It is the responsibility of an EPA official to ensure that each individual applicator fully participated in the course and completed all course requirements.

Attachment 1a

Incomplete Outline

(Italicized portions to be completed by applicator)

I. Applicable State and Federal Pesticide Laws and Regulations
A. State Laws
1. Types of State Laws
a. *Registration (State and Special Local Needs)*
b. *Commercial Applicator "For Hire" Licensing*
2. Types of Registration
a. *State (more restrictive than EPA)*
b. *Special Local Needs*
3. Commercial Applicator Licensing Requirements
a. *"For Hire" applicators require licensing*
b. *Must pass written exam*
c. *Renewal every other year by completion of training*
4. Prohibited Acts
a. *Sell or distribute unregistered pesticide products*
b. *Apply pesticides "for hire" without a license*
c. *Misuse a pesticide*
B. Federal Laws
1. Types or Names and Administering Agency(ies)
a. *FIFRA—EPA*
b. *Food, Drug & Cosmetic—FDA*
2. FIFRA Major Provisions
a. *Certification of applicators*
b. *Registration*
c. *Enforcement*
d. *Emergency exemptions*
3. Prohibited Acts (FIFRA)
a. *Misuse*
b. *Sale of unregistered pesticide*
c. *Applying restricted use pesticide without being certified or under the direct supervision of a certified applicator*
C. Recent Amendments and Regulations
1. 1978 amendments to FIFRA (major ones)
a. *Dealer record-keeping (Federal Programs)*
b. *Revision of misuse provisions*
i. *less than dosage*
ii. *non-target pests on registered crop or site*
c. *Etc.*
2. New Regulations
a. *Sale of restricted use pesticides to non-certified applicator*
b. *Etc.*
3. Pesticide Enforcement Policy Statements (PEPS)
a. *Numbers 1, 2, etc. revoked by 1978 FIFRA amendments*
b. *List new PEPS & purpose.*

Dated: August 13, 1979.

BILLING CODE 6560-01-M

FEDERAL COMMUNICATIONS COMMISSION

Radio Technical Commission for Marine Services; Cancelled Meeting

In accordance with Public Law 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

Notice of Meeting Cancellation

A schedule of September meetings of the Radio Technical Commission for Marine Services was published recently. Since that time, the scheduled September 13 meeting of Special Committee No. 71, "VHF Automated Radiotelephone Systems" has been cancelled. Details on the rescheduled meeting will be published in a future **Federal Register** Notice.

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. All RTCM meetings are open to the public. Written statements are preferred, but by previous arrangement, oral presentations will be permitted within time and space limitations.

Those desiring additional information concerning the above meeting(s) may contact either the designated chairman or the RTCM Secretariat (phone: (202) 632-6490).

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

[BC Docket No. 79-174, File No. BPH-8897; BC Docket No. 79-195, File BPH-9242; FCC 79-498]

E. H. "Pepper" Schultz and Beck Enterprises Inc.; Construction Permit for New FM Stations

In re applications of E. H. "Pepper" Schultz, Sparks, Nevada, Req: 98.3 MHz, #252, 0.5 kW (H&V), —490 feet (BC Docket No. 79-194, File No. BPH-8897); and Beck Enterprises Inc., Sparks, Nevada, Req: 98.3 MHz, #252, 3 kW (H&V), —385 feet (BC Docket No. 79-195, File BPH-9242), for construction permit for new FM broadcast stations: Memorandum opinion and order designating applications for consolidated hearing on stated issues.

Adopted: August 1, 1979.

Released: August 23, 1979.

By the Commission: Commissioner Lee absent.

1. The Commission has before it for consideration the above-captioned applications of E. H. "Pepper" Schultz [Schultz] and Beck Enterprises, Inc. [Beck] for construction permits for new FM broadcast stations at Sparks, Nevada which are mutually exclusive with each other since they specify operation on the same channel. Also before us are petitions to deny Beck's application filed by Schultz and Pendor Communications and responsive pleadings thereto.[1]

2. At the time it filed its petition, Pendor was a competing applicant for channel 252 at Sparks. However, on January 23, 1976 its application was dismissed. Pendor's petition raises only one issue, a matter raised also by Schultz in a pleading entitled "Petition to Deny (full disclosure)." Both allege that Don S. Beck, Beck's majority stockholder, has been attempting to sell a broadcast station that he does not own. Schultz also accuses Beck of "trafficking" in broadcast stations. Attached to both petitions is a copy of a classified advertisement appearing in the San Francisco Chronicle dated September 17, 1975, stating as follows:

AM radio station & FM Reno. Money-maker. Only 50M down. 702-322-7653 Aft 7 p.m. P.O. Box 2807, Reno, Nev. 89505.

According to the 1975-1976 edition of Nevada Bell Telephone Company Directory for Carson City-Dayton-Reno-Sparks-Virginia City, Nevada, the telephone number appearing in the advertisement belongs to Don S. Beck.[2] Hence, it appears that Beck placed the advertisement. Although Beck could not sell a broadcast station that he does not own, placement of the above advertisement indicates that Beck may be planning to sell the FM station if his application is granted. This would be violative of Section 1.597 of our Rules (the so-called "three year rule") which prohibits sale of a broadcast station if the owner has operated the station for less than three years. Since we are unable to conclude that an applicant who advertises to sell a station for which he has not yet been granted a construction permit possesses the necessary character qualifications to be a licensee, an issue with respect thereto will be specified.

3. In its petition, Schultz also states that Beck filed its application approximately eight months after Schultz's and that this would have been too late for consideration by the Commission if Schultz's application had been timely considered by us. Of course, this argument reflects a total misunderstanding of our rules and procedures governing the processing of broadcast applications. Beck's application was tendered for filing long before Schultz's application's cutoff date, October 1, 1975. Accordingly, it is timely filed and entitled to comparative consideration with Schultz's.

4. Further Schultz alleges that Beck approached him prior to filing his own application to attempt to persuade Schultz to sell his interest in his application or merge his interest with Beck. Beck does not deny discussing these possibilities with Schultz. There is no prohibition against applicants or potential applicants merging their interests or dismissing their applications, provided that they comply with Section 311 of the Communications Act of 1934, as amended, and Section 1.525 of our Rules. Hence, no issue will be included against Beck based upon his

[1] Additional pleadings include an opposition to Schultz's petition, filed by Beck, two other pleadings styled petitions to deny filed by Schultz, a motion to dismiss Beck's application and a supplement to motion to dismiss, filed by Schultz, and a motion to strike Schultz's motion to dismiss, filed by Beck. Only Schultz's original petition to deny, Pendor's petition and Beck's opposition were timely filed and contemplated by our Rules. None of the other pleadings are entitled to consideration. However, as a matter of administrative discretion, we will treat the additional pleadings as informal objections pursuant to Section 1.587 of our Rules and we will consider those matters raised which have bearing upon the qualifications of the applicants.

[2] Don S. Beck is 51 percent stockholder of Beck Enterprises, Inc. At the time of the application's original filing, he was 92.5 percent stockholder.

meetings with Schultz prior to filing his application.

5. Also, Schultz accuses Beck of proposing to operate with more power than necessary to cover its proposed service area in contravention of Section 324 of the Act.[3] However, review of Beck's engineering exhibits by the Commission's staff indicates that Beck's proposal is reasonable and violates no section of the Act or any rule or policy of the Commission.

6. In his petition, as amended on October 2, 1978, Schultz appears to allege that Beck obtained control of AM Station KWRL, Sparks, Nevada, without Commission approval, in violation of Section 310 of the Act.[4] Schultz's pleadings, which were prepared *pro se*, consist of numerous copies of contractual documents involving Station KWRL and court papers from Nevada state court proceedings involving various licensees of Station KWRL. Most of the Nevada court papers are isolated pleadings by various parties which are difficult to decipher without reference to the entire set. Since Schultz has failed to explain the significance of these papers or discuss their relevance to this proceeding, it is difficult for us to ascertain the basis for his allegations of Beck's involvement with KWRL or why that involvement affects his qualifications to be a licensee. However, our review of the aforementioned documentation together with Beck's response thereto suggest that control of Station KWRL may have passed to Beck without Commission approval.

7. The following scenario emerges from the pleadings before us: In October, 1974, Las Vegas Outdoor Advertising, Inc., (an entity controlled by Beck) contracted with Transierra Media, Inc. (then-licensee of Station KWRL) to purchase the station subject to Commission approval. Part of the consideration for that sale was assignment of a promissory note held by Las Vegas Outdoor Advertising, Inc. to Transierra Media. The sale was never completed because Las Vegas Outdoor Advertising was unable to secure the necessary financing. However, as a result of the assignment to Transierra Media, Inc. of the promissory note held by Las Vegas Outdoor Advertising, the latter became a creditor of Transierra Media. It was also agreed that Beck would help find a qualified purchaser of Station KWRL and that he would be repaid from the proceeds of the sale of the station. In November, 1976 Beck became General Manager of Station KWRL. In December, 1976 the Commission approved transfer of station to KWRL, Inc. KWRL, Inc.'s efforts to operate the station were not financially successful and several months after taking over the station, foreclosure proceedings were commenced by Transierra Media, now a creditor of the licensee. In December, 1977, Las Vegas Outdoor Advertising and Elmo Legg purchased from Transierra Media's principals, Cy Newman and Irving S. May, all assets of Transierra Media used in operation of the station. Since the station license was then held by a receiver, the sale from Newman and May to Beck and Legg was for assets only. However, in May, 1978 a Judicial District Court Judge in Nevada ordered that all assets of KWRL, Inc. be distributed to Transierra Media (now owned by Beck and Legg) and that the station license be assigned to Transierra Media subject to Commission approval. There is no record of any assignment of the license (or of an application therefor) back to Transierra Media. Nonetheless, an assignment of license to Jonsson Communications Corporation, the present licensee, was approved by the Commission on March 9, 1979. Although Peter Forsythe, Receiver, was the licensee when that assignment application was filed, the sales contract was executed between Transierra Media, Seller and Johsson, Buyer. According to that sales contract, the stock of the seller was held by Elmo Legg (50 percent) and Las Vegas Outdoor Advertising (50 percent). The contract was signed on behalf of the seller both by Donald S. Beck, President, and Peter Forsythe, Receiver. Hence, from the foregoing, it can reasonably be inferred that Beck, as 50 percent stockholder of Las Vegas Outdoor Advertising, may have assumed control of Station KWRL without Commission approval. Accordingly, an issue will be specified to determine whether Beck unlawfully controlled the licensee of Station KWRL, and the effect of any unauthorized control by Beck upon his qualifications to be a licensee.

8. Schultz' financial information is so outdated that we are unable to determine his proposed costs and funding sources. Since we cannot determine whether he is financially qualified to be a licensee, a financial issue will be specified against him.

9. By amendment dated March 23, 1979, Beck has revised its financial proposal. According to its application, as amended, Beck will required $67,039 to construct and operate for three months, itemized as follows:

Construction (1st 4 month payments)	$6,714
Miscellaneous items	23,000
Operating Costs (3 months)	37,325
Total	67,039

However, Beck has not shown availability of sufficient funds to construct and operate as proposed. Beck relies upon a commitment from Elmo T. Legg, 49 percent stockholder of the applicant, to lend $100,000. Further, pursuant to agreement between Don S. Beck and Legg, they are to supply 51 percent and 49 percent respectively of the funds needed to construct and operate the proposed station. However, review of the balance sheets submitted for Beck and Legg indicate that neither has current and liquid assets in excess of current liabilities by amounts sufficient to support their contributions (or, for Legg, to support his loan commitment). Legg's balance sheet lists $52,000 cash plus "listed stocks" of $264,000 and real estate of $248,000. Since the listed stocks are not identified by the name of issuer, market on which traded, and current market value, as required by Section III, page 3 paragraph 4(b) of the application (FCC Form 301), we are unable to determine whether they qualify as current assets. Also, we have no indication that Legg intends to sell any of his real estate to provide the necessary funds or whether said real estate is marketable. Furthermore, since his balance sheet fails to segregate current from long-term liabilities, all liabilities are presumed to be current, and are in excess of current assets. Beck's balance sheet also indicates liabilities in excess of current assets. In an April 1, 1979 amendment, Beck has submitted a letter from Leasing Limited of San Francisco, California in which it proposed to lease to Beck "some radio equipment with an approximate cost of $50,000." However, no listing of equipment to be leased is attached and we are unable to determine whether all necessary equipment will be covered by this lease. Hence, a general financial issue will be specified against Beck.

10. Schultz has failed to comply with the *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650, 21 RR 2d 1501 (1971), in several significant respects. It does not appear that Schultz has consulted with leaders of all significant groups that reflect the composition of Sparks, as required by Question and Answer 13(a) of the *Primer*. Demographic information submitted with Schultz's application indicates that the major local industries include tourism, conventions, manufacturing, warehousing and transportation. However, no representatives of any of these industrial groups have been consulted. Also, Schultz has consulted with no leaders of minority or ethnic groups. Examples of other significant groups not consulted include students, environmental and professional associations. Further, Schultz's proposal for the presentation of programming responsive to ascertained problems and needs does not comply with the *Primer's* requirements. Question and Answer 29 requires that applicants provide the description of their proposed programs and the anticipated time segment, frequency and duration of broadcast. Schultz's application does not contain this information. For the foregoing reasons, we are unable to conclude that Schultz's ascertainment efforts substantially comply with the *Primer*. See *Public Notice*—Commission Orders Return to Substantial Compliance Standard in Evaluating Ascertainment Showings, FCC 79–332, released June 8, 1979. Accordingly, an ascertainment issue will be specified against Schultz.

11. According to Beck's Articles of Incorporation submitted with its March 23, 1979 amendment, it is authorized to engage in "any lawful activity," however, it is not expressly authorized to operate a broadcast station. The instructions to the construction permit application forms (FCC Forms 301 and 340) and the Assignment of License and Transfer of Control forms (FCC Forms 314 and 315) require that a corporate applicant's charter specifically authorize broadcasting or that the applicant submit a letter from an appropriate state official stating that pursuant to the corporation law of the state wherein the proposed station is to be licensed the corporate purposes are sufficiently broad to authorize broadcasting. Also, we have accepted letters from attorneys admitted to the bar of the state indicating that under the applicable state law the corporate purposes are sufficiently broad. See *Saegertown Broadcasting Corporation*, 45 RR 2d 75 (1979). On reflection, we are convinced that such documentation is no longer necessary and is inconsistent with current notions of corporate law. The corporation law of most jurisdictions now permits corporations to engage in any lawful activity and general statements of corporate purpose are usually sufficient. Accordingly, no legal qualifications issue will be specified against Beck. In the future, general statements of corporate purpose will constitute an adequate showing that a corporate applicant is authorized to engage in broadcasting. Parties wishing to challenge a corporate applicant's authority to engage in broadcating must submit a showing that under its state law the applicant is not so authorized. Furthermore, FCC Forms 301, 314, 315 and 340 will be modified accordingly.

12. Beck also has failed to substantially comply with the requirements of the *Primer, supra*. In a January 18, 1978 amendment to its application, Beck has submitted a list of additional community leaders consulted. The amendment also contains the names of three employees or prospective employees who conducted these consultations. None of these employees are identified as management-level employees or propsective management-level employees, as required by Question and Answer 11(a). Further, Beck's general public survey contains no explanation of what methods, if any, were utilized to assure contact with a random sample of the population of Sparks. Therefore, it cannot be determined whether its consulations with members of the general public complied with Questin and Asnwer 13(b). Beck's general public consultations are further deficient because of its failure to indicate the dates during which the consultations were conducted. Accordingly, an ascertainment issue will also be included against Beck.

13. Schultz, in his supplement to his motion to dismiss (filed April 4, 1979) alleges that Beck's application contains certain misrepresentations with respect to its ascertainment of community problems and needs. Appended to Schultz's motion are affidavits of two persons listed in Beck's application as having been surveyed by Don S. Beck. Both deny ever being contacted by Beck in connection with its ascertainment efforts. These affidavits, in our judgment, raise serious questions about the truthfulness of Beck's statements regarding its community ascertainment efforts. Accordingly, a misrepresentation issue will be specified against Beck. *California Stereo, Inc.* 39 FCC 2d 401, 26 RR 2d 887 (Rev. Bd., 1973); *Belo Broadcasting Corporation*, 42 FCC 2d 1011, 28 RR 2d 732 (Rev. Bd. 1973).[5]

14. Beck's April 1, 1979 amendment (received by the Commission April 6, 1979) modified its transmitter location from 910 Glendale Road, Sparks, Nevada to 732 Glendale Road, Sparks, Nevada, a distance (according to Beck) of approximately one hundred yards. However, Beck has failed to amend Sections V–B and V–G of its application to reflect the new site's latitudinal and longitudinal coordinates. Further, it has failed to notify the Federal Aviation Administration of the proposed site, as required by Section 17.7 of the Commission's Rules. Hence, an issue will be included to determine whether or not Beck's proposed antenna tower constitutes a hazard to air navigation.

15. Data submitted by the applicants indicates that there would be significant difference in the size of the areas and population which would receive service from their proposals. Consequently, for purposes of comparison, the areas and populations which would receive FM service of 1mV/m or greater intensity, together with the availability of primary aural services in such area will be considered under the standard comparative issue for the purpose of determining whether a comparative preference should accrue to either of the applicants.

16. Our consideration of the allegations raised in several late-filed pleadings (see footnote 1 *supra*) should not be construed as condonation of applicants badgering the Commission with a plethora of petitions, motions, requests and other pleadings not contemplated by our Rules and filed long after cutoff. This practice delays designation for hearing (and accordingly delays institution of broadcast service) and frustrates the efforts of the Commission's staff to expeditiously process the large number of pending applications. Hence, we are in agreement with Beck which, in its motion to strike, states that review of these pleadings is contrary to our effort to speed and simplify the processing of contested broadcast applications. Nonetheless, Schultz's second motion to dismiss, as indicated at paragraph 12 *supra*, does contain one allegation which raises a matter so critical to Beck's qualifications that a hearing issue is mandated. Therefore, Beck's motion to strike will be denied with respect to that issue and granted in all other respects. However, all present and future applicants are advised that henceforth late-filed pleadings not

[3] Section 324 of the Act states, in part, that ". . . all radio stations . . . shall use the minimum amount of power necessary to carry out the communication desired."

[4] Section 310(b) of the Act states, in part, as follows: "No construction permit or station license, or any rights thereunder, shall be transferred, assigned, or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any corporation holding such permit or license, to any person except upon application to the Commission and upon finding by the Commission that the public interest, convenience, and necessity will be served thereby."

[5] Even if the misrepresentation issue is resolved in favor of Beck, deficiencies in its ascertainment remain (see paragraph 11 *supra*.) Hence, we are specifying the misrepresentation issue in addition to the ascertainment issue.

contemplated by our Rules may be summarily dismissed.[6]

17. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, because the proposals are mutually exclusive, they must be designated for a hearing in a consolidated proceeding on the issues specified below.

18. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order upon the following issues:

1. To determine whether E. H. "Pepper" Schultz is financially qualified to construct and operate as proposed.

2. To determine with respect to the ascertainment efforts of E. H. "Pepper" Schultz:

(a) Whether he consulted with leaders of the tourism and convention, manufacturing, warehousing, and transportation industries, minority and ethnic, student, environmental and professional groups;

(b) Whether he proposes programming responsive to the ascertained problems and needs of his proposed community of license.

3. To determine with respect to the application of Beck Enterprises, Inc.:

(a) The facts and circumstances surrounding the placement of the newspaper advertisement set out at paragraph 2, *supra*; and

(b) The effect of those facts and circumstances upon the basic and/or comparative qualifications of Beck Enterprises, Inc.

4. To determine with respect to Beck Enterprises, Inc.:

(a) Whether Donald S. Beck and/or Elmo T. Legg acquired control of Station KWRL, Sparks, Nevada, in contravention of Section 310(b) of the Communications Act of 1934, as amended, and the Commission's Rules.

(b) The effect of the facts and circumstances adduced pursuant to (a) above, upon Beck Enterprises, Inc.'s basic and/or comparative qualifications to be a licensee.

5. To determine with respect to Beck Enterprises, Inc.:

(a) Whether it made misrepresentations to the Commission with respect to its ascertainment of community problems and needs;

(b) The effect of the facts adduced pursuant to (a) above, upon Beck Enterprises, Inc.'s basic and/or comparative qualifications to be a licensee.

6. To determine whether Beck Enterprises, Inc. is financially qualified to construct and operate as proposed.

7. To determine with respect to the ascertainment efforts of Beck Enterprises, Inc.:

(a) Whether community leaders have been interviewed by principals, management-level, or prospective management-level employees of the applicant;

(b) What methods, if any, were utilized by the applicant to assure contact with a random selection of the general public; and

(c) The dates when the applicant's consultations with members of the general public were conducted.

8. To determine with respect to Beck Enterprises, Inc.:

(a) The exact location of its transmitter-antenna site; and

(b) Whether the antenna tower constitutes a hazard to air navigation.

9. To determine which of the proposals would, on a comparative basis, better serve the public interest.

10. To determine, in light of the evidence adduced pursuant to the foregoing issues, which, if either, of the applications should be granted.

19. It is further ordered, That the petitions to deny filed by Pendor Communications and by E. H. "Pepper" Schultz, are granted, to the extent indicated above, and, are denied, in all other respects.

20. It is further ordered, That the motions to dismiss, filed by E. H. "Pepper" Schultz, are dismissed, as procedurally defective, but when treated as informal objections, are granted, to the extent indicated above and, are denied, in all other respects.

21. It is further ordered, That the motion to strike, filed by Beck Enterprises, Inc., is granted, to the extent indicated above, and, is denied, in all other respects.

22. It is further ordered, That Pendor Communications, is made a party to this proceeding.

23. It is further ordered, That the Federal Aviation Administration, is made a party to this proceeding.

24. It is further ordered, That to avail themselves of the opportunity to be heard, the parties herein, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, shall, within twenty days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for hearing and present evidence on the issue specified in this Order.

25. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 1.594 of the Commission's Rules give notice of the hearing either individually or, if feasible and consistent with the Rules, jointly, within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by Section 1.594(g) of the Rules.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 79-27250 Filed 8-30-79; 8:45 am]

BILLING CODE 6712-01-M

[6] Section 1.584(c) of our Rules, as amended effective June 18, 1979, states as follows: "Untimely petitions to deny as well as other pleadings in the nature of a petition to deny, and any other pleadings or supplements which do not lie as a matter of law or are otherwise procedurally defective, are subject to return by the FCC's staff without consideration."

[BC Docket No. 79-209, File No. BPH-10775; BC Docket No. 79-210, File No. BPH-11004]

Bermey E. Stevens and Cashie Valley Broadcasters, Inc.; Construction Permit; Applications

In re applications of Bermey E. Stevens, Windsor, North Carolina. Req: 97.7 MHz, Channel No. 249 3 kW (H & V), 300 feet (BC Docket No. 79-209 File No. BPH-10775), and Cashie Valley Broadcasters, Inc., Windsor, North Carolina. Req: 97.7 MHz, Channel No. 249 3 kW (H & V), 300 feet (BC Docket No. 79-210 File No. BPH-11004) for construction permit; memorandum opinion and order designating applications for consolidated hearing on stated issues.

Adopted: August 9, 1979.

Released: August 24, 1979.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it for consideration the mutually exclusive applications of Bermey E. Stevens and Cashie Valley Broadcasters, Inc., for a new FM broadcast station at Windsor, North Carolina. In addition, we have before us a petition to dismiss or reject the Cashie Valley application filed by Stevens and related pleadings, petitions to specify issues filed by each applicant and related pleadings, and petitions for leave to amend. While seeking rejection for filing, the Stevens petition to dismiss does not challenge Cashie Valley's compliance with our acceptance criteria. Rather, the questions raised concern the applicant's legal qualifications, a subject appropriately addressed at this post-acceptance stage of the proceeding. Stevens has, in fact, incorporated his petition to dismiss into his petition to specify issues and we will consider the pleadings as one accordingly.[1]

2. *Character Issues: Both Applicants.* Both Stevens and Cashie Valley seek character qualification issues premised on Cashie Valley's survey of community leaders and Stevens' investigation thereof. Their requests, and the events underlying them, are as follows. In support of an argument that the Cashie Valley survey of community leaders was conducted under false pretenses, Stevens submitted fifteen affidavits, all stating (i) that Joseph Ray Phelps (Cashie Valley's president and 40% stockholder) had discussed community needs and problems with the affiant, (ii) that Mr. Phelps had asked for support for a new FM station, (iii) that the affiant had believed Mr. Phelps to be working for Bermey Stevens and (iv) that the affiant had signed a paper which he thought to be on Mr. Stevens' behalf.[2] Cashie Valley in opposition filed affidavits from five of the fifteen leaders and from the man who accompanied Mr. Phelps (see note 2, *supra*).[3] In these statements, all six persons report that their initial affidavits were made at the request of a representative from Stevens who first inquired as to whether they (the affiants) realized that they were supporting the Cashie Valley application. Furthermore, all six acknowledge that Mr. Phelps claimed no relationship with Mr. Stevens. Rather, the affiants themselves assumed that such a relationship existed.[4]

3. To begin with the Cashie Valley survey, Stevens' affidavits all refer to the collection of statements of support, a process which is not contemplated by our Rules and which plays no part in our evaluation process. Insofar as the requirements of our *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650, 21 RR 2d 1507 (1971), are concerned, nothing in the information before us suggests that Cashie Valley has not fulfilled them. Thus, each of the fifteen affiants specifically recalls discussing community needs with Mr. Phelps and none contends that he participated in this discussion solely because of Mr. Phelps' presumed connection with Mr. Stevens. Furthermore, there is no evidence of misrepresentations on Phelps' part and no apparent motive for him to have concealed or confused his identity. In this latter regard, there is inherent in Stevens' argument the proposition that community leaders will grant interviews only to applicants whose positions they support. We do not believe this to be the case and our entire ascertainment process would be undermined if it were. If the community leaders contacted by Cashie Valley were confused as to whom Mr. Phelps represented, we cannot conclude that their participation was affected to any significant degree.

4. Stevens' conduct raises problems of a different nature. As a licensee of the Commission, Stevens should know that statements of support are not properly a part of the ascertainment process. Yet, as Cashie Valley's affidavits make clear, Stevens deliberately introduced the concept of support into the proceeding, soliciting affidavits against his opponent on this basis. The possibility of an improper motivation for this conduct—be it the undermining of Cashie Valley's survey or the raising of frivolous issues as a delaying or discouraging technique—is so strong here that a further inquiry is called for. Hence, an appropriate issue will be specified.[5] [6]

5. *Duopoly Issue: Cashie Valley.* Stevens contends that a grant of Cashie Valley's application will result in common ownership of two FM stations with overlapping 1 mV/m contours, in violation of Section 73.240(a)(1) of our Rules. We do not agree. The interests which Stevens cites as common ones are the 60% interest of Charles Franklin Barry, III, in the Cashie Valley application and the 60% interest of his sister, Carmen S. Barry, in the licensee of Station WBXB, Edenton, North Carolina. Conceding that family relationship alone is insufficient to create a presumption of common control, see e.g. *KTRB Broadcasting Co., Inc.*, 46 FCC 2d 605, 29 RR 2d 1578 (1974), Stevens argues that brother and sister here are both under the influence of their father, Lynn Barry, making each one's interest attributable to the other. However, even though Charles and Carmen Barry are both relatively young in age, there is no basis for concluding that they have relied on their father's rather than their own resources. Thus, the balance sheet which Carmen Barry submitted with her application form showed sufficient net liquid assets to meet her $15,000 commitment and this sum is not so large as to be presumptively unavailable to a person of her age. And, insofar as the Cashie Valley proposal is concerned, the applicant's bank loan commitment specifies Charles Barry, and not his father, as the guarantor. The evidence before us then does not warrant departure from our usual observation that family relationships are typified by an independence of one member from another.

6. *Financial Issue: Cashie Valley.* We cannot from the information before us determine whether Cashie Valley is financially qualified to construct and operate as proposed. Turning first to the applicant's estimated expenses, the construction costs reflected in its most recent amendment (May 15, 1979) are so low as to be questionable on their face. Hence, further inquiry is necessary to establish their reasonableness. As for Cashie Valley's sources of funding, its bank commitment letter specifies as collateral "the personal endorsement of Charles Franklin Barry III, consisting of Savings Passbook with sufficient balance to secure loan." Though somewhat ambiguous, this language suggests that a deposit of a specific sum of money and not a personal guarantee is to secure the loan. Cashie Valley has not established Mr. Barry's ability to provide these funds [7] or the funds for a proposed personal loan to the applicant. A financial issue is therefore warranted.

7. *Section 73.3514/1.65 Issue: Cashie Valley.*[8] Joseph Ray Phelps' temporary part-time employment at Stations WBTE and WBXB could not assume decisional significance in this proceeding. Hence, Cashie Valley's failure to report the positions does not warrant an issue. *Rose Broadcasting Company*, 68 FCC 2d 1242, 43 RR 2d 1317 (1978).

8. *Duplicate Programming: Stevens.* Cashie Valley proposes independent programming while Stevens proposes to duplicate some of the programming of Station WBTE, Windsor, North Carolina. Therefore, evidence regarding program duplication will be admissible under the standard comparative issue. When duplicated programming is

[1] Stevens' petition for reconsideration of our acceptance for filing of the Cashie Valley application will be dismissed as moot.

[2] In addition, Stevens submitted the affidavit of a person who accompanied Mr. Phelps on some of his interviews.

[3] We have not considered the hearsay affidavit of Joseph J. Flythe, a local attorney.

[4] Mr. Phelps was at one time employed by Windsor's only existing radio station, a facility which is 50% owned by Bermey Stevens. Windsor is a very small town (population approximately 2,200) and this relationship was apparently widely known.

[5] Should the evidence at hearing cast a new light on Cashie Valley's role in these events, the presiding Administrative Law Judge may wish to expand the inquiry to include both applicants' conduct.

[6] We have no basis for attributing Stevens' actions here to his ownership of other broadcast interests. Hence, we will deny Cashie Valley's request for a concentration of control issue.

[7] Were Mr. Barry's personal guarantee sufficient collateral, we would require only that the bank indicate its satisfaction. *Sinton Broadcasting Co., Inc.*, FCC 76-761, 38 RR 2d 341 (1976).

[8] Section 73.3514 of our Rules requires applicants to include all information required by the application form. Section 1.65 makes applicants responsible for the accuracy and completeness of information furnished in a pending application.

A G 3 1 - 7 9

UMI

V 4 4 / 1 7 1

proposed, the showing permitted is limited to evidence concerning the benefits to be derived from the proposed duplication which would offset its inherent inefficiency. *Jones T. Sudbury*, 8 FCC 2d 360, 10 RR 2d 114 (1967).

9. *Main Studio Location: Stevens.* As required by Section 73.210 of our Rules, Stevens has shown good cause for locating his main studio outside of Windsor. Thus, the proposed location, the studio of Station WBTE, is only one mile from Windsor and is easily accessible from the city.

10. *Amendment.* Good cause has been shown for the filing of Cashie Valley's amendments of March 26, 1979, and May 15, 1979, and both will be accepted.

11. Except as indicated above, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

12. Accordingly, IT IS ORDERED, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications ARE DESIGNATED FOR HEARING IN A CONSOLIDATED PROCEEDING, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the facts and circumstances surrounding Bermey E. Stevens' investigation of the community leader survey conducted by Cashie Valley Broadcasters, Inc., and the effect thereof on Stevens' basic and/or comparative qualifications to be a Commission licensee.

2. To determine with respect to the application of Cashie Valley broadcasters, Inc., (i) the reasonableness of the applicant's proposed construction costs, (ii) the ability of Charles F. Barry, III, to guarantee a proposed bank loan and/or personally lend funds to the applicant and (iii) in light thereof, whether the applicant is financially qualified.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which, if either, of the applications should be granted.

13. IT IS FURTHER ORDERED, That the petitions to specify issues filed in this proceeding ARE GRANTED to the extent indicated herein and ARE DENIED in all other respects.

14. IT IS FURTHER ORDERED, That the petition to dismiss or reject application filed by Bermey E. Stevens, IS DISMISSED as moot.

15. IT IS FURTHER ORDERED, That the petitions for leave to amend filed by Cashie Valley Broadcasters, Inc., ARE GRANTED and the related amendments ARE ACCEPTED.

16. IT IS FURTHER ORDERED, That, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

17. IT IS FURTHER ORDERED, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Richard J. Shiben,

Chief, Broadcast Bureau.

BILLING CODE 6712-01-M

[CC Docket No. 79-184; FCC 79-457]

Authorization of Common Carrier Facilities To Meet North Atlantic Telecommunications Needs During the 1985-1995 Period; Policy Inquiry

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry.

SUMMARY: The Commission initiates an inquiry into the policies to be followed in authorizing Common Carrier facilities to meet North Atlantic telecommunications needs during the 1985–1995 period. This proceeding seeks information and views to aid the Commission in formulating policies and guidelines for construction and use of both submarine cable and satellite transmission facilities in the North Atlantic Region between 1985 and 1995. The notice indicates that specific information will be requested by a second notice of inquiry to be issued in the near future.

DATES: Dates for the filing of information and comments will be specified in a second notice of inquiry.

ADDRESSES: Federal Communication Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: James Warwick, International Programs Staff (202) 632-3214.

In the matter of inquiry into the policies to be followed in the authorization of Common Carrier Facilities to meet North Atlantic telecommunications needs during the 1985–1995 period.

Adopted: July 20, 1979.

Released: August 1, 1979.

By the Commission:

1. This notice of inquiry begins our process for developing policies and guidelines for the construction and use of cable and satellite transmission facilities to meet demands for common carrier services on the North Atlantic route during the 1985–1995 period. This planning period is the third consecutive period for which we will use a comprehensive proceeding to develop policies and guidelines for the construction and use of facilities.

2. Until 1970, international transmission facilities were authorized on an application-by-application basis. In June of that year, we initiated Docket No. 18875 [1] with the release of a Notice of Inquiry.[2] We there noted that the existing *ad hoc* review of applications for specific international transmission systems was no longer adequate to discharge effectively our statutory responsibilities under the Communications Act of 1934 and the Communications Satellite Act of 1962. *Ad hoc* review procedures had been rendered inadequate by the rapid pace of technological progress and the increase in demand for, and the complexity of, international telecommunications services.[3] We indicated our belief that the inquiry being instituted could provide a perspective for the planning of new facilities through the decade of the 1970's and stated our intent to employ our licensing procedures in a manner conducive to efficient planning by the carriers, Comsat and their correspondents. We requested the carriers and Comsat to provide detailed information pertaining to: the use of present facilities; demand for services; the transmission facilities (including technologies for expanding the capacity of existing facilities) that would be available during the 1970's; the cost of using such facilities; the effect on the objectives of the Communications Satellite Act of licensing facilities other than satellite; the demand for services; the desirability of competition between Comsat and the carriers; the effect of decisions on research and development of facilities; and other policy recommendations.

3. On June 25, 1971, we released a Statement of Policy and Guidelines in Docket No. 18875,[4] in which we set forth the policies[5] we would follow in our licensing of facilities in the North Atlantic region during the remainder of the 1970's. We found that the 845-circuit TAT-6 cable of AT&T's SF design which the US carriers had proposed was not consistent with our guidelines; but that a 3500-circuit cable of the SG design, available as soon as possible, would serve the public interest.[6] An SG TAT-6 cable was subsequently authorized [7] and became operational in the third quarter of 1976.

4. In February 1975, we reactivated Docket No. 18875 to address further North Atlantic Region facilities needs.[8] We noted the continuing increases in the pace of technology, in the complexity of communications systems and in demand for services required us continually to review the relevant information in order to establish or refine principles and guidelines to permit timely facilities planning and implementation. We further noted that facilities planning is inherently an ongoing process which requires that changing circumstances be anticipated and accommodated. This goal could only be accomplished by adopting a fluid, evolutionary planning process which included continuing consultation among all US and foreign entities having responsibilities for North Atlantic telecommunications.

5. In September 1974, at a meeting in Munich, Germany, representatives of the Commission, the Department of State, the Office of Telecommunications Policy[9] and the CEPT[10] and Canadian telecommunications entities determined that an ongoing process of exchange of information and views among all the entities concerned with the provision of telecommunications services in the North Atlantic Region could improve the planning of jointly-owned facilities in that region.[11] It was hoped that the exchange of information and discussion of principles would lead to the formulation of common CEPT-Canadian-US traffic forecasts, data bases and analytical methodologies for assessing the service reliability and economic aspects of facilities alternatives. This, in turn, could avoid divergent facilities preferences among CEPT, Canada and the US. Consequently, we structured Docket No. 18875 to accommodate this Consultative Process within the limitations placed on us by US procedural law.

6. Our first act in the reactivated Docket was to form three US working groups to address questions pertaining to traffic forecasting, service reliability and economics. This was followed in June 1975 by the first of a series of international working group meetings in the Consultative Process. In October of that year we released a Further Notice of Inquiry in Docket No. 18875 requesting detailed planning information from US parties.[12] Additional international working group meetings were held in March and October of 1976.

7. On November 29, 1976, we released our Further Statement of Policy and Guidelines in Docket No. 18875.[13] We therein reaffirmed the guidelines set forth in 1971 and amplified and clarified them by adopting additional policies.[14]

---

[1] Inquiry into Policy to be Followed in Future Licensing of Facilities for Overseas Services.

[2] Overseas Communications, FCC 70-620, 35 Fed. Reg. 10166, released June 18, 1970.

[3] We noted that the capacity of submarine cables had increased from 36 voice circuits in the mid-1950's to more than 800 voice circuits. Similarly, satellite capacity had increased from the 240 voice circuits provided by the INTELSAT-I in 1965 to the more than 1000 circuits provided by the INTELSAT-III's then in service, with the INTELSAT-IV's planned for use in 1971 expected to provide in excess of 5000 circuits. We also noted that demand for international telecommunications services was rapidly increasing, as demonstrated by the increase in the use of Atlantic Ocean region cable circuits from 30 in 1956 to more than 700 in 1970. Satellite circuit use in that region had increased from less than 100 in 1965 to more than 800 in 1970.

[4] Overseas Communications, 30 F.C.C. 2d 571 (1971).

[5] Those policies are:

(a) The public interest requires that we promote the continued development of both cable and satellite technologies and their most effective and timely applications to meet future requirements for international communications services;

(b) the public interest also requires that we authorize the most modern and effective facilities available via both cable and satellite technology with due regard for efficiency, economy, diversity and redundancy;

(c) the public interest and due regard for the concerns of the Administrations which operate the foreign end of cables require that care should be taken to minimize the need for imposing artificial formulae to govern the distribution of traffic among available media;

(d) the public interest requires that the economies available from each advance in technology be reflected in charges for service.

See 30 F.C.C. 2d at 572.

[6] The SG design was later modified to provide 4000 voice circuits. The recently-filed TAT-7 application indicates that this design has now been found capable of providing 4200 voice circuits.

[10] *Conference Europeene des Administrations des Postes et des Telecommunications*, an association of the postal and telecommunications entities of 26 European nations.

[11] Two meetings of representatives of the CEPT, Canadian and US telecommunications entities took place in 1971. However, these were *ad hoc* gatherings convened to address specific issues. No process was then established for ongoing consultation.

[12] Overseas Communications, FCC 75-161, 40 Fed. Reg. 50129, released October 21, 1975 (Third Notice of Inquiry).

[13] Overseas Communications, 62 F.C.C. 2d 451 (1976).

[14] These guidelines are:

(a) The continuing availability of adequate, reliable, low cost communications facilities and services between Europe and North America is a matter of common interest and concern to communications users, operating entities, and governments in Europe and North America;

(b) This commission does not, as a matter of policy, favor the use of one technology over another nor any predetermined distribution of traffic or transmission capacity among alternative technologies or suppliers. Pursuant to our statutory mandate, our primary policy objective has been and remains the achievement and efficient utilization of the lowest cost combination of facilities which can satisfy valid traffic needs and service objectives, irrespective of technology or supplier. Within this basic policy framework, both cable and satellite technologies—as well as any other—can and should be afforded the opportunity to evolve.

(c) The existing operational structure and attendant economic and other incentives of the international communications industry are not such as to lead automatically to the realization of the basic public interest policy objective enunciated above. Accordingly, this Commission must and will continue to scrutinize thoroughly both facility installation and utilization proposals of U.S. carriers prior to authorizing these carriers' participation in such facility programs, in order to ensure that U.S. communications users are not unnecessarily burdened with excessive facility investments or inefficient utilization of authorized facilities.

(d) The need to consider such interrelated factors as diversity, redundancy, restoration and other means to provide continuity of service within the context of the operational structure and varying economic and other incentives and preferences previously cited severely limits our ability to make the necessary public interest evaluations in the context of isolated applications for individual facility authorization. Accordingly, we will not in the future consider the authorization of major facility investments and utilization proposals as isolated instances, but will instead evaluate them in the context of a comprehensive long-range plan for the establishment and use of facilities to serve a particular geographic area during a specified future planning period. To ensure that all interested and affected parties have a full opportunity to participate in the evolution of a mutually acceptable long-range plan for future facility establishment and use, we shall approach the adoption of such a plan through an iterative process as set forth in the Annex to this decision.

(e) In our public interest evaluation of both long-range plans and specific facility applications, the primary criteria shall be those set forth in (b) above. For the purpose of cost analyses and comparisons, we shall consider as relevant only historical and/or projected investment and operating expenses-as opposed to lease charges or tariff rates. Moreover, before we can adopt any such long-range plan as a basis for specific facility planning and authorization, we would necessarily require comparable commitments regarding the use of cable and satellite facilities.

(f) The evolution of mutually acceptable long-range facility plans and the subsequent authorization of specific facilities will necessarily be a difficult and time-consuming process, given the

V 4 4 / 1 7 1

We also indicated that we would develop a comprehensive plan for the construction and use of facilities in the North Atlantic region which we would use as guidelines in acting upon applications proposing specific facilities through 1985. Our goal was to arrive at a comprehensive plan agreeable to all concerned entities which would result in the lowest-cost combination of facilities, consistent with meeting specified traffic requirements and maintaining acceptable service standards. We requested the US carriers and Comsat to submit proposed alternative plans and specific supporting information.

8. It was agreed at a December 1976 policy-level meeting of the Consultative Process in Reston, Virginia, that CEPT would also generate a master plan. The CEPT and U.S. plans would be discussed at a further policy-level meeting. After reviewing the plans and information submitted by the U.S. carriers and Comsat in late April 1977, we found it necessary to develop five alternative plans. These plans and the CEPT master plan were discussed at a policy-level consultative meeting in Rome, Italy, in mid-June 1977. On August 1, we released our Memorandum Opinion, Order and Notice of Proposed Rulemeking,[15] requesting comments on the U.S. plans discussed at Rome and on two additional plans generated in light of the Rome discussions. To facilitate further discussion with the CEPT and Canadian telecommunications entities and to better focus the comments to be filed, we designated one of the plans as the one we tentatively preferred. A meeting of the Commission and representatives of the CEPT and Canadian telecommunications entities was held on September 19, 1977, in Washington, D.C. On December 23, we released our Report, Order and Third Statement of Policy and Guidelines,[16] adopting our tentatively-preferred plan as the comprehensive facilities construction and use plan which would serve as our guideline in acting on applications for North Atlantic facilities through year-end 1985.

9. The plan adopted did not contemplate construction of a TAT–7 cable during the planning period, a course which the U.S. carriers had advocated and which was preferred by the CEPT and Canadian telecommunications entities. Petitions for reconsideration were filed by the U.S. carriers and other U.S. parties. We agreed to reconsider our decision [17]and participated in another meeting with representatives of the CEPT and Canadian telecommunications entities in Reston, Virginia, in July 1978, held oral argument for U.S. parties in August and attended a TOP SECRET briefing by the Department of Defense in October. On October 25, 1978, we concluded that no informtion had been presented to us which showed that the plan we had previously adopted was not the lowest-cost plan for U.S. ratepayers, or that it would not provide sufficient capacity to accommodate North Atlantic circuit needs throughout the planning period.[18] However, we noted that one of the major objectives of our proceeding had been to develop a comprehensive facilities construction and use plan for both cables and satellites which was acceptable to all entities. In view of the differences between the plan we had adopted and that preferred by the CEPT and Canadian telecommunications entities, it was obvious that this goal had not been attained. We found that the public interest would be served by a compromise which would permit implementation of a TAT–7 cable no earlier than July 1, 1983, if a mutually-agreeable comprehensive facilities construction and use plan for both cable and satellites for the entire planning period could be reached. We also set forth procedures for achieving this end.

10. Pursuant to those procedures, using the guidelines set by our staff, the U.S. carriers met with the CEPT and Canadian entities to negotiate a facilities plan and submitted it to us for review. In February of this year,[19] we found the majority of the negotiated plan acceptable. However, we required AT&T to conduct further negotiations with two counties and requested the carriers and Comsat to submit proposal's for handling the distribution of circuits within the plan should actual traffic vary from that now forecast. These proposals, the results of the further negotiations and an applicaton for the TAT–7 cable have now been filed. We shall act on these matters in the near future.

11. As we near the end of the current phase of Docket No. 18875, we conclude that the process we set forth in February 1975, and the procedures developed during the pendency of that docket, have proved to be useful and effective. We continue to believe, however, that it is essential to review existing policies and, in consultation with the telecommunications entities of the other countries involved, to develop such new principles, policies and guidelines as charging circumstances require. These activities must encompass all available transmission media and be based on examination of all relevant information available. However, the full benefit of this process can only be achieved if it is conducted on a sufficiently timely basis to prevent the time required to reach decision from precluding the exercise of any useful facilities option. This will not be easily achieved.

12. We again note that the pace of technological progress continues to accelerate. Preliminary indications are that the decade of the 1980's will see the availability of fiber-optic submarine cables, continued improvements in satellite technology, such as satellite switched time division multiple access, intersatellite links and multiple-beam spacecraft antennas, as well as increased use of digital technologies. Demand for service also continues to increase. The US carriers at present use approximately 6,786 voice circuits for the provision of their services to Europe.[20] They project that by the end of the 1985 current planning period, 19,717 voice circuits will be required for service to the CEPT nations alone. It is likely that demand for service will not be limited simply to an increase in existing service, but that it also will include a number of new services as well.

13. As the capacity and flexibility of facilities increase, and the demand for service grows, the number of interacting options also increases, and the task of facilities planning becomes proportionately more complex. This increased complexity could lengthen the time required to reach decision. However, it now appears that for the next planning period there may be less, rather than more, time available to reach decision if all viable facilities options are to be considered.[21] Thus, it is essential to begin consideration of North Atlantic facilities construction and use for the period beyond 1985 as soon as possible. Indeed, this process has already begun.

14. As we noted in our February 1975 Further Notice of Inquiry, facilities planning is a continuing activity which requires the use of an evolutionary process for reaching decision. Thus, when the CEPT, Canadian and US telecommunications entities met in Reston in July 1978 to discuss the divergent US and CEPT facilities plans, we also discussed possible improvements to the Consultative Process which might help avoid or narrow such divergences in the future. That meeting resulted in an agreement to form an informal international working group which would explore in more detail means of improving the Process.[22] The activities of this working group led to the convening of a policy-level meeting of the Consultative Process in Montreal in March of this year to further discuss improvements to the Process.

15. A consensus was reached at that meeting that it was essential immediately to begin developing and discussing the technological, traffic-forecasting and economic information central to facilities planning, and to develop a timetable for reaching decision for the 1985–1995 period. An international working group was formed to begin this task and terms of reference were generated to guide that groups efforts.[23] It was agreed that this working group should initially address only the first four terms of reference at a meeting in Montreal now scheduled for July 24–27, 1979. It was further agreed that the informal international working group formed at Reston should continue its efforts. A further policy-level Consultative Process meeting was tentatively scheduled for early October of this year to consider reports from these two working groups and to define further the structure of the Consultative Process.

16. Since the March Montreal meeting, our staff has established and participated in an informal process to coordinate the submission of the views of the various US parties to the July international working group meeting. Three *ad hoc* working groups have been formed to address the four terms of reference to be discussed in Montreal in July. These groups are chaired by representatives of the carriers and Comsat. The efforts of the *ad hoc* working groups are coordinated by a general coordinating committee chaired by our staff. All meetings of these groups have been public and membership in the groups is open to anyone who wishes to participate. The efforts of these groups will produce the US submission to the July 24–27 international working group meeting in Montreal. This submission will consist of a compilation of the views of the participants in the US process.

17. In this docket, we will again use an evolutionary process to formulate our policy and guidelines for the 1985–1995 period. After the July international working group meeting in Montreal, we shall issue a second notice of inquiry requesting the detailed information required to permit us to generate those guidelines. Much of the information will be the same as that already being prepared for the Montreal meeting. Additional notices of inquiry will be issued as needed or found useful.

18. At present, we contemplate that we will begin a rulemaking immediately upon conclusion of the inquiry phase of this docket. We expect that this will coincide with the conclusion of the efforts of the international working group. That rulemaking will result in the adoption of the US policies and guidelines for the 1985–1995 planning period. However, it is now too early to specify the procedural steps this process will require as it evolves. To do so now would unduly inhibit our flexibility to meet circumstances which are not yet defined.

19. While we believe that the scope and procedures of Docket No. 18875 have yielded useful results, we think improvements can be made. We believe that both this docket and the improved Consultative Process must consider satellite options in the same manner and at the same time it considers cable options. If at all possible, this must be done in sufficient time so that the results are available before INTELSAT must make its decisions. This was not accomplished in Docket No. 18875. We also believe that questions pertaining to the provision of services (particularly new services), and to the number of US carriers to provide those services, should be addressed—at least to the extent that they affect facilities construction and use. Finally, we think that the procedures employed in Docket No. 18875 should be reexamined to determine whether changes can be made which will allow us more rapidly to reach our decisions, within the limitations of US procedural law. We shall request the US parties to address these issues in the second notice of inquiry. In order to facilitate discussion at the October Consultative Process meeting, we shall also request the parties to suggest any further improvements in the Consultative Process which they believe would be helpful.

20. Authority for this Inquiry is found in Sections 4(i), 214 and 413 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 154(i), 214 and 413 (1970) and in Section 201(c) of the Communications Satellite Act of 1962, 47 U.S.C. § 801(c) (1970).

Federal Communications Commission.

William J. Tricarico,

Secretary.

necessity of accommodating this process to the differing legal requirements and operating arrangements of the sovereign nations involved. We shall make every effort to ensure the success of this effort, within our basic statutory mandate, public interest obligations, and legal system. As a part of our effort to achieve an acceptable plan, we also desire to explore, where beneficial, changes in the present ownership arrangements and provision of circuits within future transatlantic facilities. Specifically, we propose to explore the feasibility and desirability of substituting end-to-end provision of whole circuits within facilities, for the present arrangement whereby each terminal country provides fifty percent of each transatlantic circuit.

[14] *See* 62 F.C.C. 2d at 458–9.

[15] Overseas Communications, FCC 77–536, released August 1, 1977.

[16] Overseas Communications, 67 F.C.C. 2d 358 (1977).

[17] Overseas Communications, 70 F.C.C. 2d 358 (1978).

[18] Public Notice released October 25, 1978, FCC 78–758, Memorandum Opinion and Order, Overseas Communications, 71 F.C.C. 2d 1090 (1979).

[19] Public Notice released Febuary 26, 1979, Overseas Communications, 71 F.C.C. 2d 64, Memorandum Opinion and Order released March 16, 1979, Overseas Communications, 71 F.C.C. 2d 71.

[20] This number does not include either transatlantic cable circuits used to provide services between the US and countries in the Middle East, Africa and in the Indian Ocean basin or Atlantic Ocean region satellites used to serve those areas and South America.

[21] In particular, we note that it now appears that beginning in 1980 it will be necessary to replace the INTELSAT-V satellites then serving the Atlantic Ocean Region. The choice of replacements for these satellite will obviously have a major bearing on North Atlantic facilities planning for the period after 1985.

[22] This working group consists of one representative from each of the CEPT, Canada and the Commission.

[23] These terms of reference are:

(1) Development of an overall facility-decision timetable governing the requirement for new telecommunications facilities for the North Atlantic for the period post-1985.

(2) Development of a common data-base of traffic forecasts for the 10-year period commencing 1985 and extending to 1995.

(3) Development of common quality of service criteria.

(4) Development of a projection of technological facility alternatives likely to be available at various junctures within the 10-year period in question.

(5) Development of list of facility alternatives available to accommodate traffic demand taking into account 1, 2, 3 and 4.

(6) Exchange of views on methodology that could be employed by the various Administrations in evaluation of alternatives.

(7) Preparation of a report to senior level CEPT/USA/Teleglobe Canada meeting outlining results of (1) to (6) above.

FEDERAL RESERVE SYSTEM

BankAmerica Corporation; Public Hearing on Application

Application Regarding Proposed Geographic Expansion of Data Processing Activities of BankAmerica's Subsidiary, Decimus Corporation, Within the Northwestern, Middle Atlantic, and Certain Southern States, Docket No. 79–1.

On September 28, 1976, BankAmerica Corporation, San Francisco, California, a registered bank holding company, applied under section 4(c)(8) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. section 1843(c)(8)), and section 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for

AG 31 79 UMI

V 4 4 / 1 7 1

permission to expand the geographic market for the data processing activities of its subsidiary, Decimus Corporation, San Francisco, California ("Decimus"), throughout the area encompassed by Federal Reserve Districts I through V, except for the State of Ohio. In accordance with the Board's Regulation Y, 12 CFR 225.4(b)(1), and by reason of an unchallenged published notice, Decimus is authorized to operate, and does operate, from its Piscataway, New Jersey office, in that part of the State of New Jersey in which the *Newark Star Ledger* is a newspaper of general circulation.

The expanded market to be serviced by Decimus' Piscataway, New Jersey office includes the District of Columbia and the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, Maryland, Delaware, West Virginia, Virginia, North Carolina, South Carolina, the eastern half of Kentucky, and areas in the northern and southern parts of the State of New Jersey that lie outside the *Newark Star Ledger's* sphere of circulation.

BankAmerica proposes that Decimus engage in this expanded geographic market in Decimus' current activities of storing and processing banking, financial and related economic data, including deposit accounting, general ledger accounting, account reconciliation, loan accounting, credit union accounting and providing payroll, accounts receivable and payable, billing and similar data processing services. BankAmerica proposes to offer these services to banks, savings and loan associations, credit unions, savings banks, other financial institutions such as mortgage banking companies, and certain non-financial customers such as automobile dealers and real estate developers.

Several data processing firms located in the area under consideration protested the application and requested a formal hearing. On May 20, 1977, the Board ordered that a formal hearing, in accordance with the Board's Rules of Practice for Formal Hearings (12 CFR 263), be held on the application at the Federal Reserve Bank of Philadelphia, Philadelphia, Pennsylvania. On July 6, 1977, the Board stayed the administrative hearing on the application, at BankAmerica's request, pending judicial resolution of BankAmerica's claim that its application had been approved under the 91-day rule in section 4(c) of the Act. On May 14, 1979, the United States Court of Appeals for the Ninth Circuit rejected BankAmerica's 91-day contention. On May 24, 1979, BankAmerica petitioned the Court of Appeals for rehearing and, on June 2, 1979, the Court denied BankAmerica's petition. BankAmerica did not petition the U.S. Supreme Court for *certiorari*. Accordingly, the Board's hearing Order of May 20, 1977, has been reactivated.

Following the designation by the U.S. Office of Personnel Management of Administrative Law Judge Paul N. Pfeiffer, of the U.S. Consumer Product Safety Commission, to hear, and issue a recommended decision on, the application, a prehearing conference was held on August 2, 1979, at the Federal Reserve Bank Philadelphia, in Philadelphia, Pennsylvania. At the conference, the Administrative Law Judge directed that the hearing on the application commence at 10:00 A.M. (EDST) on October 10, 1979, in the Public Servie Meeting Room, Third Floor, of the Federal Reserve Bank of Philadelphia, 100 N. 6th St., Philadelphia, Pennsylvania.

The basic issue in the hearing is whether, pursuant to the requirements of section 4(c)(8) of the Bank Holding Company Act of 1956, as amended, (12 U.S.C. section 1843(c)(8)), the proposed activity of Decimus "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition. . . . "

In light of the lapse in time since the Board's May 20, 1977, hearing Order, it is deemed appropriate to provide additional public notice of the application and the administrative hearing thereon. Accordingly, any person (apart from those who appeared at the prehearing conference) desiring to give testimony, present evidence, or otherwise participate in these proceedings should file with the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, no later than September 26, 1979, a written request containing a statement of the nature of the requesting person's interest in the proceedings, the extent of the participation desired, a summary of the matters concerning which the requesting person desires to give testimony or submit evidence, and the names and identity of proposed witnesses. A copy of the request should be served upon counsel for the applicant, Bank American Corporation, addressed to John S. Martel, Esq., 31st floor, Russ Building, 235 Montgomery St., San Francisco, California 94104.

By order of the Board of Governors of the Federal Reserve System, August 27, 1979.

Theodore E. Allison,

Secretary of the Board.

[FR Doc. 79-27275 Filed 8-30-79; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than September 24, 1979.

A. *Federal Reserve Bank of Boston*, 30 Pearl Street, Boston, Massachusetts 02106:

UST CORP., Boston, Massachusetts (investment advisory activities; Florida): to engage, through its subsidiary, UST Financial Planning Corp., in investment advisory activities by providing its clients with portfolio investment advice including analysis and recommendation of appropriate investments; furnishing general economic information and advice, statistical forecasting services and industry studies; and making general financial planning recommendations. These activities will be conducted from an office in Palm Beach, Florida, serving southern Florida.

B. *Federal Reserve Bank of Kansas City*, 925 Grand Avenue, Kansas City, Missouri 64198:

1. UNITED BANKS OF COLORADO, INC., Denver, Colorado (mortgage banking activities; Colorado): to engage, through its subsidiary, United Mortgage Company, in making, acquiring, and arranging real estate mortgage loans, and in serving such loans. These activities would be conducted from an office in Fort Collins, Colorado, serving Larimer, Boulder, and Weld Counties, Colorado.

2. AFFILIATED BANKSHARES OF COLORADO, INC., Boulder, Colorado (mortgage banking activities; Colorado): to engage, through its subsidiary Piedmont Mortgage and Investment Co., Inc., in making, acquiring and servicing residential and commercial real estate loans. These activities will be conducted from an office located in Colorado Springs, Colorado, serving El Paso and Teller Counties, Colorado.

3. MIDLAND CAPITAL CO., Oklahoma City, Oklahoma (mortgage banking activities; California) to engage, through its subsidiary, Midland Mortgage Co. in the origination and servicing of all types of residential and commercial mortgage loans, including VA, FHA and conventional financing. These activities would be conducted from an office in Upland, California serving Ontonio, West Covina, Covina, Diamond Bar and Pomona.

C. *Federal Reserve Bank of Richmond*, 701 East Byrd Street, Richmond, Virginia 23261:

MARYLAND NATIONAL CORPORATION, Baltimore, Maryland (mortgage and insurance activities; Maryland): to engage, through its subsidiary, Maryland National Mortgage Corporation in originating, buying, selling and otherwise dealing in mortgage loans as principal or agent; servicing mortgage loans; acting as an adviser in mortgage loan transactions; and engaging in the sale as agent of credit life, credit disability and credit accident and health insurance in connection with extensions of credit by bank and nonbank subsidiaries of the holding company.

D. *Other Federal Reserve Banks;* None.

Board of Governors of the Federal Reserve System, August 24, 1979.

Griffith L. Garwood,

Deputy Secretary of the Board.

BILLING CODE 6210-01-M

First Bancorporation of Cleveland, Inc.; Formation of Bank Holding Company

First Bancorporation of Cleveland, Inc., Cleveland, Texas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 100 per cent of the voting shares (less director's qualifying shares) of First Bank and Trust, Cleveland, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 27, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 27, 1979.

are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 24, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 23, 1979.

Griffith L. Garwood,

Deputy Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Early Termination of Waiting Period of the Premerger Notification Office

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the 30-day waiting period of the premerger notification rules.

SUMMARY: Norsk Hydro A.S. is granted early termination of the 30-day waiting period provided by law and the premerger notification rules with respect to its proposed acquisition of certain voting securities of Transnitro, Inc. indirectly held by Montedison S.p.A. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to requests for early termination from both parties to the transaction. Neither agency intends to take any action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: August 23, 1979.

FOR FURTHER INFORMATION CONTACT: Joan S. Truitt, Attorney, Premerger Notification Office, Bureau of Competition, Room 303, Federal Trade Commission, Washington, D.C. 20580 (202-523-3894).

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. § 18a, as added by sections 201 and 202 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act and § 803.11 of the rules implementing the Act permit the agencies, in individual cases, to terminate this waiting period prior to its expiration and require that notice of this action be published in the **Federal Register.**

By direction of the Commission.

James A. Tobin,

Acting Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

Device Good Manufacturing Practice Advisory Committee; Request for Nominations for Members

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document requests nominations for membership on the Device Good Manufacturing Practice Advisory Committee.

DATE: Nominations must be received by October 1, 1979, at the address shown below.

FOR FURTHER INFORMATION CONTACT: Lincoln I. Gluscevich, Bureau of Medical Devices (HFK-132), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-8115.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration requests nominations for membership on the Device Good Manufacturing Practice Advisory Committee. A vacancy will occur on May 31, 1980, in each of the following interest groups: Industry; general public; and Federal, State, or local government.

The Commissioner of Food and Drugs will appoint as members those nominees who are most representative of an interest group to serve on the advisory committee.

FDA also requests nominations for consultants to the Device GMP Advisory Committee. Persons applying should have quality assurance expertise in one or more of the following areas: manufacture of medical devices or in vitro diagnostic products, or sterile medical device manufacturing.

On May 28, 1976, the Medical Device Amendments of 1976 (Pub. L. 94-295) were enacted into law amending the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 201 et seq.). Section 520(f) of the act (21 U.S.C. 360j(f)) provides the agency with authority to develop and promulgate regulations requiring that methods used in, and the facilities and controls used for, the manufacture, packing, storage, and installation of a medical device conform to current good manufacturing practice. These regulations are designed to ensure that devices will be safe and effective and otherwise in compliance with the act.

Under section 520(f)(3) of the act, the Commissioner has established an advisory committee for advising and making recommendations on these regulations. Additionally, under this provision, the Commissioner is authorized to request recommendations from the advisory committee on any petitions submitted requesting exemption or variance from good manufacturing practice requirements.

As required by section 520(f) of the act, the advisory committee is composed of nine members selected from different interest groups as follows:

1. Three members who are officers or employees of any State or local government or of the Federal Government;
2. Two members who are representative of interests of the device manufacturing industry;
3. Two members who are representative of the interests of physicians and other health professionals; and
4. Two members who are representative of the interests of the general public.

The term of office is 3 years.

The Food and Drug Administration has a special interest in assuring that women and minority groups are adequately represented on advisory committees and, therefore, extends particular encouragement to nominations for appropriately qualified females and minority candidates.

Any interested person may nominate one or more qualified persons for membership, or a person may nominate him or herself. A complete curriculum vitae of the nominee shall be included, along with a description of the nominee's current employment background, if any, regarding medical devices. Nominations shall state that the nominee is aware of the nomination, is willing to serve on the committee, and appears to have no conflict of interest. The agency will ask potential candidates to provide detailed information concerning financial holdings, consultancies, and research grants or contracts to permit evaluation of possible sources of conflict of interest.

Dated: August 23, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

Immunoglobulin Workshop; Public Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces a public meeting to discuss the clinical characteristics and current and potential uses of immunoglobulin preparations for intramuscular (i.m.) and intravenous (i.v.) administration. The causes and prevention of clinical reactions to these products will be presented.

DATE: The meeting will be held from 8:30 a.m. to 3 p.m., October 30 and 31, 1979.

ADDRESS: The meeting will be held in the Wilson Hall (Bldg. 1) auditorium, National Institutes of Health, 9000 Rockville Pike, Bethesda, MD 20205.

FOR FURTHER INFORMATION CONTACT: Barbara Alving, Bureau of Biologics (HFB-250), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, MD 20205, 301-496-4833.

SUPPLEMENTARY INFORMATION: Immunoglobulins are plasma derivatives used for the prophylaxis or modification of various infectious diseases and as replacement therapy for patients with an immune deficiency. Both public and private organizations are engaged in efforts to develop immunoglobulin preparations that are safe and effective for i.v. administration. Currently, only preparations for i.m. administration are generally available.

The Bureau of Biologics, Food and Drug Administration, in conjunction with the Division of Blood Diseases and Resources, National Heart, Lung, and Blood Institute, will hold a public meeting to discuss the clinical characteristics and current and potential uses of i.m. and i.v. preparations. The causes and prevention of clinical reactions to these products will also be presented.

The workshop will be held from 8:30 a.m. to 3 p.m., October 30 and 31, 1979, in the Wilson Hall (Bldg. 1) auditorium, National Institutes of Health, 9000 Rockville Pike, Bethesda, MD 20205. Persons planning to attend are requested to contact Barbara Alving, Bureau of Biologics (address above), by October 17, 1979.

Dated: August 23, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26762 Filed 8-30-79; 8:45 am]

BILLING CODE 4110-03-M

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming consumer exchange meeting to be chaired by George Gerstenberg, District Director, New York District, New York, NY.

DATE: The meeting will be held 10 a.m. to 12 m., Wednesday, September 26, 1979.

ADDRESS: The meeting will be held at the Syosset Public Library, the meeting rm., 225 S. Oyster Bay Rd., Syosset, NY 11791.

FUR FURTHER INFORMATION CONTACT: Alicia Martinez, Consumer Affairs Officer, Food and Drug Administration, Department of Health, Education, and Welfare, 850 Third Ave., Brooklyn, NY 11232, 212-965-5754.

SUPPLEMENATRY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's New York District Office, and to contribute to the agency's policymaking decision on vital issues.

Dated: August 23, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-27009 Filed 8-30-79; 8:45 am]

BILLING CODE 4110-03-M

[Docket No. 76N-0400]

Good Laboratory Practice for Nonclinical Laboratory Studies; Availability of the Post Conference Report

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The agency announces the availability of the post conference report prepared from the recently conducted management briefing sessions on the final regulations regarding good laboratory practice in the conduct of nonclinical laboratory studies. The sessions were held on May 1, 2, and 3, 1979 in Washington, Chicago, and San Francisco. The purpose of the conferences was to provide the regulated industry with information required to understand and comply with the regulations.

ADDRESSES: The report is available for public examination in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857; single copies are available from Linda Grassie, Consumer Communications Management Staff (HFJ-10), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Paul D. Lepore, Bioresearch Monitoring Staff (HFC-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-[illegible]9.

SUPPLEMENTARY INFORMATION: The final order on the good laboratory practice regulations was published in the **Federal Register** of December 22, 1978 (43 FR 59986) with an effective date of June 20, 1979. Because the regulations constitute the first of a series of regulations concerning investigational requirements which are being developed as a result of the FDA Bioresearch Monitoring Program, and the concepts are complex, the agency elected to conduct briefing sessions for interested persons. The sessions were attended by some 800 persons representing product sponsors, study contractors, universities, and government. Approximately 300 questions were posed at the sessions and these questions and their answers were composited and serve as the basis for the post conference report.

The report described in this notice is available for public examination between 9 a.m. and 4 p.m., Monday through Friday, in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857. Requests in writing for a single copy of the report titled "Good Laboratory Practice Regulations Management Briefings," Post Conference Report, August, 1979, may be made to Linda Grassie, Consumer Communications Management Staff (HFJ-10), address above. Conference attendees will receive a copy of the post conference report. Thus, the agency asks that only interested persons who did not register at any of the conferences request a copy of the report.

A G 3 1 7 9 UMI

Dated: August 24, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[Docket No. 79F-0247]

Farbenfabriken Bayer AG; Withdrawal of Petition for Food Additives

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces the withdrawal without prejudice of the petition (FAP 2R0864) proposing the safe use of certain optical brighteners in food-contact paper and paperboard. This action is taken because the petitioner has failed to submit additional requested information.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b), 72 Stat. 1786 (21 U.S.C. 384(b))), the following notice is issued:

A petition (FAP 2R0864) was filed by Farbenfabriken Bayer Aktiengesellschaft, Leverkusen, Germany, notice of which was published in the **Federal Register** of May 13, 1967 (32 FR 7224), proposing the issuance of a regulation to provide for the safe use of any of the following substances as optical brighteners in food-contact paper and paperboard:

4,4'-Bis(2''-[3'''-sulfophenylamino]-4''-[*N,N*-di(2'''-hydroxyethyl)-amino]-1'',3'',5''-triazinyl-6''-amino)-stilbene-2,2'-disulfonic acid, tetrasodium salt.

4,4'-Bis(2''-[*N,N*-di(2'''-hydroxyethyl)amino]-4''-amino-1'',3'',5''-triazinyl-6''-amino)-stilbene-2,2'-disulfonic acid, disodium salt.

4,4'-Bis[2''-(4'''-sulfophenylamino)-4''-(*N,N*-di[2'''-hydroxyethyl]-amino)-1'',3'',5''-triazinyl-6''-amino]-stilbene-2,2'-disulfonic acid, tetrasodium salt.

4,4'-Bis[2''-(*N,N*-di(2'''-hydroxyethyl)-amino)-4''-phenylamino-1'',3'',5''-triazinyl-6''-amino]-stilbene-2,2'-disulfonic acid, tetrasodium salt.

Subsequently, the Food and Drug Administration requested the petitioner to submit additional information as provided for in § 171.1(j) (21 CFR 171.1(j)) of the procedural food additive regulations. The requested information has not been received; therefore, this petition in regarded as having been withdrawn without prejudice to a future filing.

Dated: August 21, 1979

Sanford A. Miller,

Director, Bureau of Foods.

BILLING CODE 4110-03-M

[Docket No. 79M-0203]

Paris Contact Lens Laboratory; Premarket Approval of Softsite ™ (Hefilcon A) Hydrophilic Contact Lens PHP

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces approval of the application for premarket approval under the Medical Device Amendments of 1976 of the Softsite ™ (hefilcon A) Hydrophilic Contact Lens PHP sponsored by Paris Contact Lens Laboratory, Coral Gables, FL. After reviewing the Ophthalmology Device Classification Panel's recommendation, FDA notified the sponsor that the application was approved because the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by October 1, 1979.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be sent to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Keith Lusted, Bureau of Medical Devices (HFK-402), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

SUPPLEMENTARY INFORMATION: The sponsor, Paris Contact Lens Laboratory, Coral Gables, FL 33146, submitted a new drug application for the Softsite ™ (hefilcon A) Hydrophilic Contact Lens to FDA on October 17, 1975. The application was reviewed by the Ophthalmology Device Classification Panel, an FDA advisory committee, which recommended approval of the application. On April 23, 1979, FDA approved the application by a letter to the sponsor from the Director of the Bureau of Medical Devices.

Before enactment of the Medical Device Amendments of 1976 (Pub. L. 94-295, 90 Stat. 539-583) (the amendments), soft contact lenses and solutions were regulated as new drugs. Because the amendments broadened the definition of the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h)) (the act), soft contact lenses and solutions are now regulated as class III devices (premarket approval). As FDA explained in a notice published in the **Federal Register** of December 16, 1977 (42 FR 63472), the amendments provide transitional provisions to ensure continuation of premarket approval requirements for class III devices formerly considered new drugs. Furthermore, FDA requires, as a condition to approval, that sponsors of applications for premarket approval of soft contact lenses or solutions comply with the records and reports provisions of 21 CFR Part 310, Subpart D, until these provisions are replaced by similar requirements under the amendments.

A summary of the information upon which the agency's approval is based is available upon request from the Hearing Clerk (address above). Requests should be identified with the name of the device and the Hearing Clerk docket number found in brackets in the heading of this document.

The labeling of the Softsite ™ (hefilcon A) lens, like that of other approved soft contact lenses, states that the lens is to be used only with certain solutions for disinfection and other purposes. The restrictive labeling helps to inform new lens users that they must avoid purchasing inappropriate products, e.g., solutions for use with hard contact lenses. However, the restrictive labeling needs to be updated periodically to refer to new solutions that FDA approved for use with an approved lens. A sponsor who does not update the restrictive labeling may violate the misbranding provisions of section 502 of the act (21 U.S.C. 352) as well as the Federal Trade Commission Act (15 U.S.C. 41-58), as amended by the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act (Pub. L. 93-637). Furthermore, failure to update the restrictive labeling to refer to new solutions that may be used with an approved lens may be grounds for withdrawing approval of the application for the lens, under section 515(e)(1)(F) of the act (21 U.S.C. 360e(e)(1)(F)). Accordingly, whenever FDA publishes a notice in the **Federal Register** of the agency's approval of a new solution for use with an approved lens, the sponsor of the lens shall correct its labeling to refer to the new solution at the next printing or at any other time FDA prescribes by letter to the sponsor.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e(d)(3)), authorizes any interested

person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of FDA's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of the FDA administrative practices and procedures regulations or a review of the application and the FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing any petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register.** If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time, on or before October 1, 1979, file with the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, four copies of each petition and supporting data and information, identified with the name of the device and the Hearing Clerk docket number found in brackets in the heading of this document. Received petitions may be seen in the above office from 9 a.m. to 4 p.m., Monday through Friday.

Dated: August 23, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[Docket No. 79N-0329]

Recommended Grade A Pasteurized Milk Ordinance and Related Documents; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces availability of the Grade A Pasteurized Milk Ordinance—1978 Recommendations of the United States Public Health Service/Food and Drug Administration—and its four related documents.

ADDRESS: Copies of these documents are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402:

FOR FURTHER INFORMATION: Eugene T. McGarrahan, Bureau of Foods (HFF-415), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-245-1155.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 1, 1977 (42 FR 6001), FDA announced the availability of the proposed revision of the recommended Grade A Pasteurized Milk Ordinance and related documents. Copies of the proposed revisions were placed on display in the office of the FDA Hearing Clerk and sent to Federal, State, and industrial officials to provide opportunity for comments.

All comments submitted were considered before finalizing the following recommended Grade A Pasteurized Milk Ordinance and related documents:

1. Grade A Pasteurized Milk Ordinance—1978 Recommendations of the U.S. Department of Health, Education, and Welfare, Public Health Service/Food and Drug Administration, Price $5.50; order by Stock No. 017-001-00419-7. Cover and index tabs, Price $2.75; order by stock No. 017-001-00422-7.

2. Grade A Condensed and Dry Milk Products and Condensed and Dry Whey—1978 Recommended Sanitation Ordinance for Condensed and Dry Milk Products and Condensed and Dry Whey Used in Grade A Pasteurized Milk Products—Supplement I to the Grade A Pasteurized Milk Ordinance, Price $3.75; order by stock No. 017-001-00420-1. Cover and index tabs, Price $3.00; order by stock No. 017-001-00423-5.

3. Fabrication of Single-Service Containers and Closures for Milk and Milk Products—Sanitation Standards—1978 Edition, Price $1.25; order by stock No. 017-001-00413-8.

4. Evaluation of Milk Laboratories—1978 Edition, Price $1.50; order by stock No. 017-001-00412-0.

5. Methods of Making Sanitation Ratings of Milk Supplies—1978 Edition, Price $1.75; order by Stock No. 017-001-00421-9.

Printed copies of the documents are now available to interested parties from the Government Printing Office, at the price indicated above, and a copy of each document has been placed on display in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

Dated: August 27, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 1505-01-M

Special Assistance to Small Businesses; Establishment of Service Desks

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The agency announces the establishment of service desks to help small businesses understand and comply with the agency's regulatory requirements. The agency also announces the appointment of an official to assure a consistent agency-wide small business policy.

FOR FURTHER INFORMATION CONTACT: Brian Rafferty, EDRO Small Business Coordinator (HFO-22), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4166.

SUPPLEMENTARY INFORMATION: On June 19, 1979, the Food and Drug Administration (FDA) announced the expansion of its program to help small businesses understand and comply with the agency's regulatory requirements. The effort, which responds to a directive issued by President Carter on June 14, 1978, calling for regulatory agencies to give special assistance to small businesses, involves two major initiatives: (1) A pilot program of "service desks" to be operational by September 4, 1979 and (2) the appointment of an official on the FDA Commissioner's staff to help assure a consistent agency-wide policy for small businesses.

The service desks will be an accessible, efficient channel through which small businesses can acquire information from the agency. They will provide technical assistance and

interpretation of agency rules and regulations. They will answer small manufacturers' questions such as how to fill out FDA forms and what regulations govern the marketing of a new product. When invited, they will also visit a small firm's plant to discuss the firm's concerns.

The small business service desks have been established in the following four regional areas:

(1) Food and Drug Administration, 20 Evergreen Pl., East Orange, NJ 07018, 201–645–6365. Small Business Representative: George Ray Walden.
(2) Food and Drug Administration, 880 W. Peachtree, St. NW., Atlanta, GA 30309, 404–881–3576. Small Business Representative: Bradley, D. Eichorst.
(3) Food and Drug Administration, 175 W. Jackson Blvd., Rm. A–1945, Chicago, IL 60604, 312–353–9406. Small Business Representative: Danny Horner.
(4) Food and Drug Administration, 1600 N. Broadway, Suite 200, Santa Ana, CA 92706, 714–836–2377. Small Business Representative: J. Lawrence Stevens.

The service desks in East Orange and Santa Ana will be devoted exclusively to working with small medical device firms. The desks in Atlanta and Chicago will be serving all small businesses under FDA's jurisdiction. Each desk will service an FDA regional area, not just a single city or state.

After the pilot program has operated for 1 year, the agency will evaluate it to determine whether it should be continued, expanded, or discontinued. In addition to the two major initiatives, FDA will actively seek comments from small businesses on proposed policies and will require, for all appropriate regulations, an analysis of their economic impact on small businesses.

These initiatives expand FDA's current small business assistance program for medical devices. The Medical Device Amendments of 1976 mandated that nonfinancial, technical assistance be provided to small device manufacturers, and an Office of Small Manufacturers Assistance in FDA's Bureau of Medical Devices helps small businesses comply with new regulations.

Small businesses wanting further information should contact the following persons: Brian Rafferty, EDRO Small Business Coordinator (HFO–22), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, or H. Neal Dunning, Director, Office of Small Manufacturers Assistance, Bureau of Medical Devices, Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910.

Small businesses who wish to provide feedback to the agency regarding their use of the agency's present program to assist small businesses or who have additional ideas for the agency to consider should contact the following person: Minna Golden, Small Business Coordinator (HF)–20), Office of the Commissioner, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Dated: August 27, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

Office of the Assistant Secretary for Health

National Council on Health Care Technology; Announcement Soliciting Comments on Health Care Technology and Technology Assessment

Note: This document originally appeared in the **Federal Register** of Wednesday, August 29, 1979.

Announcement is made that the National Council on Health Care Technology is soliciting the views and comments of professional health societies and organizations regarding the Department's focus in the field of health care technology and technology assessment. Organizations wishing to make formal presentations to the Council may do so at the October 10 afternoon meeting to be held in Room 800 of the Hubert H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201. Participants should plan to limit their presentations to ten minutes. However, written statements may be filed with the staff before or after the meeting.

Interested parties should contact Mr. Dwight Blankenbaker, Acting Executive Secretary, Office of Health Research, Statistics, and Technology, National Center for Health Care Technology, 5600 Fishers Lane, Rockville, Maryland 20857, (202) 472–4248.

August 23, 1979.

Institute of Museum Services

National Museum Services Board; Meeting

The National Museum Services Board (NMSB) will hold an open meeting September 7–8 in St. Louis to discuss future policy directions of the Institute of Museum Services (IMS), including the Institute's museum grants program, reauthorization, budget request, and regulations pertaining to the FY 1980 grants program.

The Board will meet from 8:30 a.m. to 3:30 p.m. September 7 in the Lehmann Building of the Missouri Botanical Gardens, 2345 Tower Grove Avenue; and from 9:00 a.m. to 3:30 p.m. September 8 in the Explorer Room of the Arch Museum, 11 N. 4th Street.

For further information, contact Sam Eskenazi or Loretta Ingraham, 202–472–3325.

Dated: August 28, 1979.

Lee Kimche,

Director.

Office of the Secretary

White House Conference on Families; Briefing for National Organizations

The White House Conference on Families was called by President Carter to "examine the strengths of American families, the difficulties they face, and the ways in which family life is affected by public policies."

The Conference is guided by a 41-person National Advisory Committee that has adopted an innovative conference process to take the White House Conference on Families to the people. The Committee at its first meeting on July 19 and 20 adopted a plan for Conference activities which includes hearings, state activities, national organization efforts and several White House Conferences across the country to be held in June and July of 1980.

The Committee strongly affirmed the importance of involving national organizations in the White House Conference on Families and discussed specific ways in which national organizations and their members can participate in Conference activities, including:

- Sponsoring activities in conjunction with the White House Conference on Families.
- Testifying at national hearings to be held across the country this fall.
- Encouraging members and local affiliates to participate in state and local activities, and state conferences.
- Submitting recommendations on issues which will be compiled and distributed to delegates to the White House Conferences.
- Attending the White House Conferences on Families as state or at-large delegates. (The vast majority of delegates will be selected at the state level.)

On Tuesday, September 11, 1979, from 9:30 a.m. until noon, a briefing on the White House Conference on Families will be held for national organizations in Room 450 of the Old Executive Office Building.

At this briefing, Jim Guy Tucker, the Chairperson, and the Conference staff will answer questions about Conference goals, activities, and issues.

Clearance procedures require registration prior to the meeting, as well as the use of the entrance on 17th Street near Pennsylvania Avenue. Those wishing to attend should supply their names, organizations and position titles, addresses and telephone numbers on a request addressed to the White House Conference on Families, 330 Independence Avenue, SW., Washington, D.C. 20201. Further information can be obtained from the Conference staff at (202)245–6073.

Dated: August 28, 1979.

John L. Carr,

Executive Director.

DEPARTMENT OF INTERIOR

Bureau of Land Management

Utah; Announcement of Wilderness Inventory Decision on Utah Portion of Paria Canyon Instant Study Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice announces the wilderness characteristics decision on the Utah portion of the Paria Canyon Primitive Area and the roadless public lands in Utah contiguous to the Primitive Area. The area possessing wilderness characteristics contains 21,470 acres of public land. This area is depicted on the review area map published in the **Federal Register** of June 21, 1979. Areas not possessing wilderness characteristics contain 23,468 acres of public land, which are released from the constraints of interim protection as set forth in 603(c) of the Federal Land Policy and Management Act of 1976.

A report on the preliminary findings of wilderness characteristics was made available to the public on June 20, 1979. A 30-day public comment period was announced in the **Federal Register** of June 21, 1979. Four comments were submitted. One comment agreed in general with the finding but disagreed with the naturalness characteristic finding in one portion of the review area. Three comments confirmed the entire preliminary finding. The limited comments therefore support this decision.

The portion of the Utah review area possessing wilderness characteristics will be included in the ongoing suitability study of the entire Paria Canyon Instant Study Area conducted by the Arizona Strip District. This decision will become final on October 1, 1979, unless the Utah State Director publishes an amended decision because of new information received as a result of this publication.

FOR FURTHER INFORMATION CONTACT: Lawrence Royer, Cedar City BLM District Office, 801–586–2401.

Dated: August 23, 1979.

William G. Leavell,

Acting State Director.

[FR Doc. 79–27091 Filed 8–30–79; 8:45 am]

BILLING CODE 4310–84–M

Colorado Initial Wilderness Inventory Decision

Decision on lands which will no longer be subject to the BLM Wilderness inventory and lands to be intensively inventoried for wilderness characteristics.

This Notice announces the final decisions of the Colorado State Director of the Bureau of Land Management on public lands which will receive no further consideration in the BLM wilderness review process and public lands which will receive intensive wilderness inventory to determine the actual presence or absence of wilderness characteristics. The final initial inventory decision is contained in the detailed document titled "BLM Initial Wilderness Inventory-Final" which, with statewide maps and appropriate unit maps, is available upon request from the Colorado State Office of the Bureau of Land Management.

These decisions were reached after a systematic initial wilderness inventory, which included extensive pubic involvement and review of all public lands administered by the Bureau of Land Management in Colorado. This inventory is mandated by Section 603 of the Federal Land Policy and Management Act of 1976 and is being conducted using procedures identified in the Bureau of Land Management's Wilderness Inventory Handbook published September 27, 1978. In Colorado, initial wilderness inventory decisions are based on the wilderness criteria of size, roadlessness and imprints of man under the process detailed in the handbook. Copies of the handbook are available from any office of the Bureau of Land Management.

The final decisions are based upon the proposed Initial Wilderness Inventory Decision presented for public review and comment and published in the **Federal Register**, Vol. 44, No. 57, Thursday, March 22, 1979 (44 FR 17592). Public information packets and maps were prepared and mailed out at that time, and news releases were issued presenting the recommendations to the public. A 130-day public comment period followed. During this public comment period, a series of 34 open houses and workshops attended by 323 people were held throughout the State to explain the State Director's recommendations and accept public comment. All public inputs, written and oral, were accepted until July 31, 1979. During the comment period, the BLM received 480 public comments of which 307 were specific to the initial wilderness inventory. Comments included letters, maps, video tapes, photos, oral testimony, reports, and phone calls. The specific comments represented 1,936 inputs pertaining directly to the initial wilderness inventory recommendations, most of which focused on the absence or presence of roads and imprints of man in specific inventory units. These inputs were field checked for validity by BLM personnel.

Many of the public comments asked BLM to place several units in intensive inventory that had not been recommended as such, explaining that their lack of wilderness characteristics was not obvious. Many other comments objected to intensive wilderness inventory for units which the BLM had recommended for intensive inventory, citing conflicts with minerals production or grazing activities and indicating an obvious lack of wilderness characteristics in these areas. Resource conflicts are not considered in the inventory phase of the BLM wilderness review. Comments relating to possible resource conflicts were processed and will be retrieved and utilized in the "study" phase of the BLM wilderness review, at which time all resource uses

of the land are considered in making a wilderness recommendation.

All public comments have been read, analyzed, and where appropriate, field checked. Each comment is on file in both the State and District offices. Results of this analysis are summarized for specific units in the final "BLM Initial Wilderness Inventory-Final" report and are displayed in detail in the State Director's Initial Inventory Public Analysis Report. The final initial inventory report, including maps, is available upon request from the Bureau of Land Management's Colorado State Office. The State Director's Initial Inventory Public Analysis Report is available for inspection at the BLM Colorado State Office.

Initial Inventory Decisions

Decision No. 1—Approximately 7,022,305 acres of the public land in Colorado will be released from further wilderness consideration and from the management restrictions imposed by Section 603(c) of the Federal Land Policy and Management Act of 1976. These lands may be grouped in the following categories:

A. *Inventory units released from further wilderness consideration with substantive public agreement.* This group includes dispersed and small tracts of public lands and those which are roaded or otherwise intensively developed, comprising approximately 6,650,000 acres. In the March 22, 1979 announcement, the BLM recommended these lands be dropped from further wilderness consideration. Upon completion of the public comment period, it was the consensus that these lands be released from further wilderness consideration. This portion of the State Director's decision will become effective on or before October 1, 1979.

B. *Inventory units previously recommended for intensive inventory which are now released from further wilderness consideration.* This group includes seven units and totals approximately 50,160 acres. In the March 22, 1979 announcement, the BLM recommended these lands for intensive inventory, but information obtained during the public comment period showed these lands to be obviously lacking in wilderness characteristics. Field check confirmed this new information and they are now released from further wilderness consideration. This portion of the State Director's decision will become effective on or before October 15, 1979.

Inventory units in this group include:

Inventory unit No.	Approximate acreage	General location
		CRAIG DISTRICT
CO-010-211	6,520	Extreme Northwest Colorado (Moffat County).
CO-010-213	9,540	Extreme Northwest Colorado (Moffat County).
CO-010-272	9,800	Along Yampa River West of Maybell, Colorado (Moffat County).
		MONTROSE DISTRICT
CO-030-364	7,000	West of Delta (Delta County).
		GRAND JUNCTION DISTRICT
CO-070-013	5,400	East of Douglas Pass (Garfield County).
CO-070-320	7,100	North of Rifle (Garfield County).
CO-070-439	4,800	Northwest of Dotsero (Garfield County).

C. *Inventory units which received some support for intensive inventory but which are now released from further wilderness consideration.* This group includes 40 units and approximately 322,145 acres. In the March 22, 1979, announcement, the BLM recommended that these units be released from further wilderness consideration because they obviously lacked wilderness characteristics. Some public objection was received to this recommendation.

A field check did not validate these comments, consequently, these units are now released from further wilderness consideration. This portion of the State Director's decision will become effective on or before October 15, 1979.

Inventory units in this group include:

Inventory unit No.	Approximate acreage	General location
		CRAIG DISTRICT
CO-010-012	10,370	West of Meeker (Rio Blanco County).
CO-010-017	10,635	Southeast of Dinosaur (Rio Blanco County).
CO-010-024A	15,000	Southeast of Dinosaur (Rio Blanco County).
CO-010-050	17,800	West of Douglas Pass (Rio Blanco-Garfield Counties)
CO-010-055A	19,430	Northwest of Meeker (Moffat County).
CO-010-101	3,200	North of Walden (Jackson County).
CO-010-102	2,560	North of Walden (Jackson County).
CO-010-106	4,480	North of Walden (Jackson County).
CO-010-111	2,560	North of Walden (Jackson County).
CO-010-113	3,200	North of Walden (Jackson County).
CO-010-243A	3,520	Extreme Northwest Colorado (Moffat County).
CO-010-254	10,600	Extreme Northwest Colorado (Moffat County).
CO-010-283	7,800	South of Maybell (Moffat County).
CO-010-290	15,220	Southwest of Craig (Moffat County).
		MONTROSE DISTRICT
CO-030-080	2,880	Southeast of Montrose (Gunnison County).
CO-030-084	1,600	Southeast of Montrose (Gunnison County).
CO-030-253	720	Adjacent to Mesa Verde National Park (Montezuma County).
CO-030-255	2,080	Adjacent to Mesa Verde National Park (Montezuma County).
CO-030-255A	2,520	Adjacent to Mesa Verde National Park (Montezuma County).
CO-030-327	8,470	Southwest of Ridgeway (San Miquel County).
		CANON CITY DISTRICT
CO-050-003	16,700	East of Salida (Freemont County—Chaffee County).
CO-050-120	27,500	West of Saguache (Saguache County).
		GRAND JUNCTION DISTRICT
CO-070-009A	47,300	North of Fruita (Garfield County).
CO-070-010	25,300	North of Fruita (Garfield County).
CO-070-011	25,600	North of Fruita (Garfield County).
CO-070-123	11,400	Southwest of Fruita (Mesa County).
CO-070-323	700	North of Rifle (Garfield County).
CO-070-324	5,100	North of Rifle (Garfield County).
CO-070-325	700	North of Rifle (Garfield County).
CO-070-330	300	North of Rifle (Garfield County).
CO-070-331	4,500	North of Rifle (Garfield County).
CO-070-332	2,400	North of Rifle (Garfield County).
CO-070-333	1,300	North of Rifle (Garfield County).
CO-070-334	5,400	North of Rifle (Garfield County).
CO-070-335	3,600	North of Rifle (Garfield County).
CO-070-336	3,000	North of Rifle (Garfield County).
CO-070-337	100	North of Rifle (Garfield County).
CO-070-341	3,800	North of Rifle (Garfield County).
CO-070-342	800	North of Rifle (Garfield County).
CO-070-343	200	North of Rifle (Garfield County).

Decision No. 2—Approximately 1,310,922 acres and 118 inventory units of the public lands in Colorado will be intensively inventoried for wilderness characteristics. Inventory of these lands is in progress and the public is encouraged to participate. Management limitations imposed by Section 603(c) of the Federal Land Policy and Management Act of 1976 will continue to apply to these lands until they are officially released from further wilderness consideration or until they are designated as Wilderness by Congress. These lands may be grouped in the following categories:

A. *Inventory units or portions of inventory units previously recommended for intensive wilderness inventory and which will not be intensively inventoried.* This group includes 110 units and approximately 1,180,722 acres. In the March 22, 1979 announcement, the BLM recommended that these units be intensively inventoried because it was not clear and obvious that they lacked wilderness characteristics. These units received considerable public comment which was field checked by BLM for validity.

As a result, the State Director judged that these areas may have potential for containing wilderness characteristics and should therefore be intensively inventoried. This portion of the State Director's decision will become effective on or before October 15, 1979.

Inventory units in this group include:

Inventory unit No.	Approximate acreage	General location
		CRAIG DISTRICT
CO-010-208	40,290	Extreme Northwest Colorado (Moffat County).
CO-010-208E	8,740	Extreme Northwest Colorado (Moffat County).
CO-010-210	6,080	Extreme Northwest Colorado (Moffat County).
CO-010-210D	16,960	Extreme Northwest Colorado (Moffat County).
CO-010-214	24,470	Extreme Northwest Colorado (Moffat County).
CO-010-230	17,060	West of Maybell, Colorado (Moffat County).
CO-010-218, 218A-224, 224A, 226-227, 228, 229D-271/N6b.	39,680	Adjacent to Northern boundary of Dinosaur National Monument (Moffat County).
UT-080-104	4,420	Adjacent to the Western boundary of Dinosaur National Monument—in Colorado but inventoried by Utah BLM under Cooperative Agreement (Moffat County).
UT-080-110	4,900	West of Dinosaur National Monument—in Colorado but inventoried by Utah BLM under Cooperative Agreement. Unit extends in Utah. (Moffat County).
UT-080-114	2,071	Adjacent to the western boundary of Dinosaur National Monument—in Colorado but inventoried by Utah BLM under Cooperative Agreement. (Moffat County).
CO-010-001A	9,270	North of Dinosaur, Colorado (Moffat County).
CO-010-001B	7,510	North of Dinosaur, Colorado (Moffat County).
CO-010-002	16,080	East of Dinosaur, Colorado (Moffat County).
CO-010-003	13,000	East of Dinosaur, Colorado (Moffat County).

CO-070-372	8,800	South of Carbondale (Pitkin County-Garfield County).
CO-070-392	270	West of Aspen (Pitkin County).
CO-070-421	15,500	Southwest of Bond (Eagle County).
CO-070-425	5,300	North of Dotsero (Eagle County-Garfield County).
CO-070-430	21,000	South of Burns (Eagle County)
CO-070-433	17,500	North of Eagle (Eagle County).

B. *Inventory units or portions of inventory units previously not recommended to be intensively inventoried but which will now be intensively inventoried.* This group includes eight units and approximately 130,200 acres. The BLM, in the March 22, 1979 announcement, recommended that these units not be intensively inventoried as in-house data indicated that it was clear and obvious that they lacked wilderness characteristics. As a result of information obtained during the public review period and subsequent field checking by BLM, the State Director has judged that there is reason to conclude that it is not clear and obvious that they lack wilderness characteristics. As a result, these areas will now be intensively inventoried to determine if they do or do not contain wilderness characteristics. This portion of the State Director's decision will become effective on or before October 15, 1979.

Inventory units in this group include:

Inventory unit No.	Approximate acreage	General location
		CRAIG DISTRICT
CO-010-046	18,600	South of Rangely (Rio Blanco County).
		CANON CITY DISTRICT
CO-050-142	3,300	Southeast of Antonito (Conejos County).
		GRAND JUNCTION DISTRICT
CO-070-00	29,300	North of Fruita (Garfield County).
CO-070-015A	13,000	North of Grand Junction (Garfield County-Mesa County).
CO-070-015B	12,800	North of Grand Junction (Garfield County-Mesa County).
CO-070-031	23,700	North of Grand Junction (Garfield County-Mesa County).
CO-070-130	21,500	South of Grand Junction (Mesa County).
CO-070-130A	8,000	South of Grand Junction (Mesa County).

For the purposes of the Final Initial Wilderness Inventory Decision, each inventory unit is considered individually and separateiy from every other inventory unit. Should any amendment to these determinations be made by the BLM State Director of Colorado as a result of new information received following this publication, that amendment will be formally published in the **Federal Register** and will become effective on or before October 1, 1979.

Address: Requests for the decision document and maps should be sent to: State Director, c/o WILDERNESS, Colorado State Office, Bureau of Land Management, Main Post Office Building, P.O. Box 2266, Denver, Colorado 80201.

Dale R. Andrus,

State Director, Colorado.

August 31, 1979.

Outer Continental Shelf Proposed Oil and Gas Lease Sale No. 55; Availability of Draft Environmental Statement and of Public Hearings Regarding Proposed Oil and Gas Lease Sale

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement relating to a proposed Outer Continental Shelf oil and gas lease sale of 350 tracts of submerged lands on the Outer Continental Shelf in the eastern Gulf of Alaska.

Single copies of the draft environmental statement can be obtained from the Office of the Manager, Alaska Outer Continental Shelf Office, Bureau of Land Management, P.O. Box 1159, Anchorage, Alaska 99510, and from the Office of Public Affairs (130), Bureau of Land Management, Washington, D.C. 20240.

Copies of the draft environmental statement will also be available for review in the following libraries: Alaska Federation of Natives, 670 W. Fireweed Lane, Anchorage, Alaska 99501; Department of Interior, Alaska Resources Library, 733 W. 4th Avenue, Anchorage, Alaska 99501; Kenai Community Library, Box 157, Kenai, Alaska 99611; North Star Borough Library, Fairbanks, Alaska 99701; University of Alaska, Institute of Economics and Government Research Library, Fairbanks, Alaska 99801; Z. J. Loussac Public Library, 427 F Street, Anchorage, Alaska 99801; Alaska State Library, Juneau, Alaska 99811; Bureau of Indian Affairs School Library, Elim, Alaska 99739; Department of Defense, Army Corps of Engineers Library, Anchorage, Alaska 99510; Department of Interior—Bureau of Mines Library, AF—

F.O. Center, P.O. Box 550, Juneau, Alaska 99802; Ketchikan Community College, 7th & Madison, Ketchikan, Alaska 99901; Seldovia Public Library, Seldovia, Alaska 99663; University of Alaska—Juneau Library, P.O. Box 1447, Juneau, Alaska 99802; Anchor Point Public Library, Anchor Point, Alaska 99556; Cordova Public Library, Cordova, Alaska 99574; Elim Learning Center, Elim, Alaska 99739; Haines Public Library, Haines, Alaska 99827; Homer Public Library, Homer, Alaska 99603; Juneau Memorial Library, Douglas Public Library, 114 W. 4th Street, Juneau, Alaska 99824; Ketchikan Public Library, 629 Dock Street, Ketchikan, Alaska 99901; Kodiak Public Library Association, Inc., Kodiak, Alaska 99615; Metlakatla Extension Center, Metlakatla, Alaska 99926; Petersburg Extension Center, Petersburg, Alaska 99833; Seward Community Library, Seward, Alaska 99664; Sitka Community Library, Sitka, Alaska 99835; University of Alaska—Anchorage Library, 3211 Providence Drive, Anchorage, Alaska 99504; University of Alaska, Elmer E. Rasmusson Library, Fairbanks, Alaska 99701; Wrangell Extension Center, Wrangell, Alaska 99929.

In accordance with 43 CFR 3314.1, public hearings will be held for the purpose of receiving comments and suggestions relating to the draft EIS. The exact locations and dates for these hearings will be announced at a later date. Comments on the draft environmental statement will be accepted until October 22, 1979.

After a public hearing is held and comments have been received and analyzed, a final environmental statement will be prepared.

Ed Hastey,

Associate Director, Bureau of Land Management

[AA-6747-A thru AA-6747-K]

Alaska Native Claims Selections

On December 24, 1968, the State filed general purposes grant selection applications pursuant to Sec. 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, Sec. 6(b) (1976)) for certain lands in the South Naknek area. Applications AA-5159, AA-5160, AA-5161 and AA-5163 selected lands in T. 18 S., R. 47 W., Ts. 17 and 18 S., R. 48 W. and T. 18 S., R. 49 W., Seward Meridian. On January 12 and June 16, 1972 and January 2, 1979 each application was amended to include all lands in the townships, excluding patented lands.

The Bureau of Indian Affairs filed an application on December 12, 1968, to withdraw all unreserved public lands in Alaska for the determination and protection of the rights of the Alaska Natives. Subsequently, on January 17, 1969, Public Land Order 4582 was issued to affirm the withdrawal of all unreserved lands in Alaska from all forms of appropriation and disposition under the public land laws except locations for metalliferous minerals. Public Land Order 4582 further provided tha applications filed by the State of Alaska after December 12, 1968, and prior to January 4, 1969, must be embraced in leases, licenses, permits, or contracts issued pursuant to the Mineral Leasing Act of 1920 or the Coal Leasing Act of 1914 in order to be a valid selection application.

Since the lands selected in State selection applications AA-5159, AA-5160, AA-5161 and AA-5163 filed on filed on December 24, 1968 were not entirely within lands embraced in leases, etc., these applications must be and are hereby rejected as to the following described lands:

Seward Meridian, Alaska (Unsurveyed)

State Selection AA-5159

T. 18 S., R. 49 W.
Secs. 24, 25 and 36 (fractional), all.
Containing approximately 850 acres.

State Selection AA-5160

T. 18 S., R. 48 W.
Sec. 2, all;
Secs. 3, 4, 8 and 9 (fractional), all;
Secs. 10 and 16, all;
Secs. 17, 18 and 19 (fractional), all;
Secs. 20 and 21, all;
Secs. 29, 30 and 31, all.
Containing approximately 7, 881 acres.

State Selection AA-5161

T. 18 S., R. 47 W.
Secs. 1 and 12, all.
Containing approximately 1,280 acres.

State Selection AA-5163

T. 17 S., R. 48 W.
Sec. 24 (fractional), excluding Native allotment AA-6285;
Secs. 25, 26, 34 and 35 (fractional), all;
Sec. 36, all.
Containing approximately 2, 335 acres.
Aggregating approximately 12,346 acres.

Furthermore, on November 14, 1978, the State filed general purposes grant selections AA-21811, AA-21812, AA-21816, AA-21817, AA-21818 and AA-21820, all as amended, pursuant to Sec. 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, Sec. 6(b) (1976)) for certain lands in the South Naknek area. Since these lands were withdrawn and properly selected by the village corporation, the aforementioned State selections are hereby rejected as the following described lands:

Seward Meridian, Alaska

State Selection AA-21811

T. 17 S., R. 44 W. (Surveyed)
All.

State Selection AA-21812

T. 17 S., R. 45 W. (Partially Surveyed)
All.

State Selection AA-21816

T. 18 S., R. 44 W. (Unsurveyed)
All.

State Selection AA-21817

T. 18 S., R. 45 W. (Unsurveyed)
Secs. 1 to 12, inclusive, all.

State Selection AA-21818

T. 18 S., R. 46 W. (Unsurveyed)
Secs. 1 to 12, inclusive, all.

State Selection AA-21820

T. 19 S., R. 44 W. (Unsurveyed)
All.

The State selected lands rejected above were not valid selections and will not be charged against the village corporation as State selected lands.

On September 22, 1960, November 4, 1963 and March 24, 1965, the State filed a community grant selection application pursuant to Sec. 6(a) and general purposes grant selection applications pursuant to Sec. 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, Secs. 6(a) and (b) (1976)), for certain lands in the Bristol Bay area. Applications A-053268, A-060425 and A-062282 (as amended) selected lands in Ts. 17 and 18 S., Rs. 45 and 46 W. and T. 17 S., R. 47 W., Seward Meridian. A decision granting tentative approval was issued on May 18, 1965 for certain lands in T. 17 S., R. 46 W., Seward Meridian, selected by the State under application A-060425.

Section 11(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 696; 43 U.S.C. 1601, 1610(a) (1976)) (ANCSA), withdrew the lands surrounding the Native village of South Naknek, including lands in the subject State selection applications for Native selection. Qinuyang Limited filed selection applications AA-6747-A on January 15, 1974, AA-6747-B through AA-6747-H on November 12, 1974 and AA-6747-I through AA-6747-K on December 13, 1974, under the provisions of Sec. 12 of the Alaska Native Claims Settlement Act (85 Stat. 688, 701; 43 U.S.C. 1601, 1611(a) (1976)) (ANCSA), for the surface estate of lands located near the village of South Naknek, including lands within the subject State selections.

Section 12(a)(1) of the Alaska Native Claims Settlement Act provides that

village selections shall be made from lands withdrawn by Sec. 11(a).

Section 11(a)(2) further withdrew for possible selection by the Native corporation those lands within the townships described in Sec. 11(a)(1) that have been selected by, or tentatively approved to, but not yet patented to the State under the Alaska Statehood Act.

Section 12(a) further provided, however, that no village corporation may select more than 69,120 acres from lands withdrawn by Sec. 11(a)(2).

The following described State selected and tentatively approved lands have been properly selected under village selection applications AA–6747–A, AA–6747–B, AA–6747–C, AA–6747–G and AA–6747–I. Accordingly, the following State selection applications are rejected and the tentative approval given is rescinded as to the following described lands:

Seward Meridian, Alaska (Unsurveyed)

State Selection AA–5160 (General Purposes Grant)

T. 16 S., R. 48 W.
Secs. 28 and 32, all.
Containing approximately 1,280 acres.

State Selection A–053268 (General Purposes Grant)

T. 17 S., R. 45 W.
Sec. 17, that portion south of the left bank of the Naknek River;
Sec. 18, that portion south of the left bank of the Naknek River excluding Native allotments AA–6609 and AA–6719 Parcel A;
Sec. 19, excluding Native allotment AA–6609;
Secs. 20 and 21, those portions south and west of the left bank of the Naknek River;
Sec. 26, that portion west of the left bank of the Naknek River excluding U.S. Survey 5502, Native allotments AA–6157 Parcel A and AA–7863;
Sec. 27, that portion south of the left bank of the Naknek River excluding U.S. Survey 5502, Native allotments AA–7862 and AA–7863;
Secs. 28 and 29, excluding the Naknek River;
Secs. 30, 31 and 32, all;
Sec. 33, excluding Native allotment A–067640;
Sec. 34, excluding Native allotments AA–7862 and AA–7863;
Sec. 35, that portion south and west of the left bank of the Naknek River excluding U.S. Survey 5502, Native allotments AA–7862 and AA–7863;
Sec. 36, that portion south of the left bank of the Naknek River.
Containing approximately 6,420 acres.

T. 18 S., R. 45 W.
Secs. 1, 2 and 3, all;
Sec. 4, excluding Native allotment A–067640;
Secs. 5 to 12, inclusive, all.
Containing approximately 7,546 acres.

T. 18 S., R. 46 W.
Secs. 1 to 12, inclusive, all.
Containing approximately 7,626 acres.

State Selections A–053268 and A–060425 (General Purposes Grants)

T. 17 S., R. 46 W.
Sec. 5, that portion south of the left bank of the Naknek River excluding U.S. Survey 543 and Native allotment AA–6234;
Sec. 6, that portion south of the left bank of the Naknek River excluding U.S. Survey 527, U.S. Survey 528, U.S. Survey 1572, U.S. Survey 1573 and Native allotment AA–7251 Parcels A and B;
Sec. 7, excluding Native allotments AA–6732 and AA–7251 Parcels A and B;
Sec. 8, excluding Native allotments AA–6234 and AA–7584 Parcel B;
Sec. 9, excluding Native allotment AA–6284 and the Naknek River;
Secs. 10, 13 and 14, those portions south of the left bank of the Naknek River;
Secs. 15, 16 and 17, all;
Sec. 18, excluding Native allotment AA–6732;
Secs. 19 to 36, inclusive, all.
Containing approximately 16,786 acres.

State Selection A–062282 (Community Grant)

T. 17 S., R. 47 W.
Sec. 11, S½, excluding U.S. Survey 69, U.S. Survey 1424, U.S. Survey 1425, U.S. Survey 1581, U.S. Survey 2875, U.S. Survey 2957, U.S. Survey 3008, U.S. Survey 4879, Native allotments AA–6237, AA–6729 and the Naknek River;
Sec. 14, excluding U.S. Survey 4879, Native allotments AA–2524, AA–6729 and A–058897;
Sec. 15, SW¼, excluding Native allotments AA–7583 and AA–7585.
Containing approximately 684 acres.
Aggregating approximately 40,342 acres.

The total amount of State selected lands rejected to permit the conveyance hereafter given totals approximately 40,342 acres, which is less than the 69,120 acres permitted by Sec. 12(a)(1) of the Alaska Native Claims Settlement Act. Further action on the subject State selection applications as to those lands not rejected herein will be taken at a later date.

As to the lands described below, the applications submitted by Qinuyang Limited, as amended, are properly filed, and meet the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a), aggregating approximately 88,333 acres, is considered proper for acquisition by Qinuyang Limited and is hereby approved for conveyance pursuant to Sec. 14(a) of the Alaska Native Claims Settlement Act:

Seward Meridian, Alaska (Surveyed)

T. 17 S., R. 44 W.
Sec. 31, Lots 5 to 12, inclusive, E½SW¼, SW¼SE¼;
Sec. 32, lot 5.
Containing 341.27 acres.

Seward Meridian, Alaska (Unsurveyed)

T. 18 S., R. 44 W.
Sec. 5, that portion west of the left bank of the Naknek River;
Secs. 6 and 7, all;
Sec. 8, that portion west of the left bank of the Naknek River;
Sec. 9, that portion south and east of the left bank of the Naknek River;
Sec. 10, that portion south of the left bank of the Naknek River excluding ANCSA Sec. 3(e) application AA–25572 Site 2;
Sec. 12, that portion south of the left bank of the Naknek River;
Sec. 13, all;
Sec. 14, that portion south of the left bank of the Naknek River;
Sec. 15, that portion south and west of the left bank of the Naknek River;
Sec. 16, that portion south and east of the left bank of the Naknek River;
Sec. 17, that portion south and west of the left bank of the Naknek River;
Sec. 18, all;
Sec. 19, excluding Native allotment AA–6229 Parcel B;
Secs. 20 to 29, inclusive, all;
Sec. 30, excluding Native allotment AA–7906 Parcel A;
Secs. 31 to 36, inclusive, all.
Containing approximately 16,923 acres.

T. 19 S., R. 44 W.
Secs. 1 to 9, inclusive, all.
Containing approximately 5,725 acres.

T. 17 S., R. 45 W.
Sec. 17, that portion south of the left bank of the Naknek River;
Sec. 18, that portion south of the left bank of the Naknek River excluding Native allotments AA–6609 and AA–6719 Parcel A;
Sec. 19, excluding Native allotment AA–6609;
Secs. 20 and 21, those portions south and west of the left bank of the Naknek River;
Sec. 26, that portion west of the left bank of the Naknek River excluding U.S. Survey 5502, Native allotments AA–6157 Parcel A and AA–7863;
Sec. 27, that portion south of the left bank of the Naknek River excluding U.S. Survey 5502, Native allotments AA–7862 and AA–7863;
Secs. 28 and 29, excluding the Naknek River;
Secs. 30, 31 and 32, all;
Sec. 33, excluding Native allotment A–067640;
Sec. 34, excluding Native allotments AA–7862 and AA–7863;
Sec. 35, that portion south and west of the left bank of the Naknek River excluding U.S. Survey 5502, Native allotments AA–7862 and AA–7863;
Sec. 36, that portion south of the left bank of the Naknek River.
Containing approximately 6,420 acres.

T. 18 S., R. 45 W.
Secs. 1, 2 and 3, all;
Sec. 4, excluding Native allotment A–067640;
Secs. 5 to 12, inclusive, all.
Containing approximately 7,546 acres.

T. 17 S., R. 46 W.
Sec. 5, that portion south of the left bank of the Naknek River excluding U.S. Survey 543 and Native allotment AA–6234;
Sec. 6, that portion south of the left bank of the Naknek River excluding U.S. Survey 527, U.S. Survey 528, U.S. Survey 1572, U.S. Survey 1573 and Native allotment AA–7251 Parcels A and B;
Sec. 7, excluding Native allotments AA–6732 and AA–7251 Parcels A and B;
Sec. 8, excluding Native allotments AA–6234 and AA–7584 Parcel B;
Sec. 9, excluding Native allotment AA–6284 and the Naknek River;
Secs. 10, 13 and 14, those portions south of the left bank of the Naknek River;
Secs. 15, 16 and 17, all;
Sec. 18, excluding Native allotment AA–6732;
Secs. 19 to 36, inclusive, all.
Containing approximately 16,786 acres.

T. 18. S., R. 46 W.
Secs. 1 to 12, inclusive, all.
Containing approximately 7,626 acres.

T. 17 S., R. 47 W.
Sec. 1, that portion south and east of the left bank of the Naknek River excluding U.S. Survey 527 and Native allotment AA–7251 Parcel A;
Sec. 9, that portion south of the left bank of the Naknek River excluding U.S. Survey 127, U.S. Survey 2332 and U.S. Survey 4686;
Sec. 10, that portion south of the left bank of the Naknek River excluding U.S. Survey 1105, U.S. Survey 1576, U.S. Survey 2330, U.S. Survey 2332, U.S. Survey 3007, U.S. Survey 4879 and U.S. Survey 5041;
Sec. 11, excluding U.S. Survey 69, U.S. Survey 1424, U.S. Survey 1425, U.S. Survey 1581, U.S. Survey 2875, U.S. Survey 2957, U.S. Survey 3008, U.S. Survey 4879, Native allotments AA–6237, AA–6729 and the Naknek River;
Sec. 12, excluding U.S. Survey 1028, U.S. Survey 1425, Native allotments AA–6113 Parcel A, AA–6233, AA–6729, AA–6730, AA–6731, AA–6732, AA–7251 Parcel A, AA–7584 Parcel A and the Naknek River;
Sec. 13, excluding Native allotments AA–6729, AA–6730 and AA–6732;
Sec. 14, excluding U.S. Survey 4879, Native allotments AA–2524, AA–6729 and A–058897;
Sec. 15, excluding U.S. Survey 2331, U.S. Survey 4879, U.S. Survey 4971, Native allotments AA–2524, AA–7583, AA–7585 and A–058897;
Sec. 16, excluding U.S. Survey 127, U.S. Survey 4686, U.S. Survey 4971, Native allotment AA–7585 and the Naknek River;
Sec. 17 (fractional), excluding U.S. Survey 487, ANCSA Sec. 3(e) application AA–12834 and Native allotment AA–6133;
Sec. 18 (fractional), all;
Sec. 19 (fractional), excluding Native allotments AA–6285 and AA–6733;
Sec. 20, all;
Secs. 21 and 22, excluding Native allotment AA–7585;
Sec. 23, excluding Native allotment AA–6236 Tract 1;
Secs. 24 to 33, inclusive, all;
Sec. 34, excuding Native allotment AA–6236 Tract 2;
Secs. 35 and 36, all.
Containing approximately 13,340 acres.

T. 18 S., R. 47 W.
Secs. 1 and 12, all.
Containing approximately 1,280 acres.

T. 17 S., R. 48 W.
Sec. 24 (fractional), excluding Native allotment AA–6285;
Secs. 25, 26, 34 and 35 (fractional), all;
Sec. 36, all.
Containing approximately 2,335 acres.

T. 18 S., R. 48 W.
Sec. 2, all;
Secs. 3, 4, 8 and 9 (fractional), all;
Secs. 10 and 16, all;
Secs. 17, 18 and 19 (fractional), all;
Secs. 20 and 21, all;
Secs. 28 to 32, inclusive, all.
Containing approximately 9,161 acres.

T. 18 S., R. 49 W.
Secs. 24, 25 and 36 (fractional), all.
Containing approximately 850 acres.
Aggregating approximately 67,992 acres.
Total aggregated acreage approximately 88,333 acres.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(f) (1976)); and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688), 708; 43 U.S.C. 1601, 1616(b) (1976)), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file AA–6747–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles and four-wheel drive vehicles.

60 Foot Road—The uses allowed on a sixty (60) foot wide road easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks.

One Acre Site—The uses allowed for a site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 2d D9, L) A one (1) acre site easement upland of the ordinary high water mark in Sec. 21, T. 17 S., R. 45 W., Seward Meridian, on the right bank of Smelt Creek. The uses allowed are those listed above for a one (1) acre site.

b. (EIN 6a D9, L) An easement for a proposed access trail twenty-five (25) feet in width from site EIN 2d D9, L in Sec. 21, T. 17 S., R. 45 W., Seward Meridian, to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

c. (EIN 8 D1, D9, L) An easement for a proposed access trail twenty-five (25) feet in width from site EIN 8a D1, D9, L in Sec. 19, T. 18 S., R. 44 W., Seward Meridian, westerly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

d. (EIN 8a D1, D9, L) A site easement upland of the ordinary high water mark in Sec. 19, T. 18 S., R. 44 W., Seward Meridian, on the left bank of Big Creek. The site is one (1) acre in size with an additional twenty-five (25) foot wide easement on the bed of the creek along the entire waterfront of the site. The uses allowed are those listed above for a one (1) acre site.

e. (EIN 14 C3, D1, D9) An easement for an existing access trail twenty-five (25) feet in width from Sec. 18, T. 17 S., R. 47 W., Seward Meridian, southwesterly paralleling Kvichak Bay throughout the selection and tying into the trail from Egegik (EIN 14 C3). The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

f. (EIN 20 C3, C5, D1) An easement sixty (60) feet in width for an existing road from a cannery in Sec. 6, T. 17 S., R. 46 W., Seward Meridian, westerly to Sec. 18, T. 17 S., R. 47 W., Seward Meridian. The uses allowed are those listed above for a sixty (60) foot wide road easement.

g. (EIN 20b C3, C5, D1) An easement for an existing access trail fifty (50) feet in width from the cannery in Sec. 6, T. 17 S., R. 46 W., Seward Meridian, southeasterly to Savonoski. The uses allowed are those listed above for a fifty

(50) foot wide trail easement. The season of use will be limited to winter use.

h. (EIN 29a C5) An easement for an existing access trail twenty-five (25) feet in width from South Naknek southerly to an unnamed lake in Secs. 25 and 26, T. 17 S., R. 47 W., Seward Meridian, and continuing southerly with a proposed trail to public land. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

The grant of lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1976))), contract, permit, right-of-way or easement, and the right of the lessee, contractee, permittee or grantee to the complete enjoyment of all rights, privileges and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of ANCSA, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

3. Those rights for water pipeline purposes as have been granted to the Alaska Packers Association, its successors or assigns, by right-of-way, A–011532, located in Secs. 11, 14, 23, 24 and 25, T. 17 S., R. 47 W., Seward Meridian, under the Act of February 15, 1901 (31 Stat. 790; 43 U.S.C. 959);

4. A right-of-way, A–051081, located in Secs. 5 and 6, T. 17 S., R. 46 W., Seward Meridian, and Secs. 10, 11, 12 and 15, T. 17 S., R. 47 W., Seward Meridian, twenty (20) feet each side of the centerline, for an electrical distribution line for the Naknek Electric Association, Inc., under the provisions of the act of October 21, 1976 (90 Stat. 2743, 2776; 43 U.S.C. 1701, 1761);

5. Airport lease, AA–9583, containing approximately 165 acres, located in Sec. 14, T. 17 S., R. 47 W., Seward Meridian, issued to the State of Alaska, Department of Transportation and Public Facilities, under the provisions of the act of May 24, 1928 (45 Stat. 728–729; 49 U.S.C. 211–214 (1976)); and

6. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (1976)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

Qinuyang Limited is entitled to conveyance of 92,160 acres of land selected pursuant to Sec. 12(a) of the Alaska Native Claims Settlement Act. To date, approximately 88,333 acres of this entitlement have been approved for conveyance; the remaining entitlement of approximately 3,827 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of the Alaska Native Claims Settlement Act, conveyance to the subsurface estate of the lands described above shall be granted to Bristol Bay Native Corporation when conveyance is granted to Qinuyang Limited for the surface estate, and shall be subject to the same condition as the surface conveyance.

Only the following inland water body, within the described lands, is considered to be navigable: Naknek River.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks in the ANCHORAGE TIMES. Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file and appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until October 1, 1979, to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the adverse parties to be served are:

Qinuyang Limited, South Naknek, Alaska 99670.

Bristol Bay Native Corporation, P.O. Box 198, Dillingham, Alaska 99576.

State of Alaska, Division of Lands, 323 East Fourth Avenue, Anchorage, Alaska 99501.

Sue A. Wolf,

Chief, Branch of Adjudication.

BILLING CODE 4310–84–M

Fish and Wildlife Service

Endangered Species Permit; Receipt of Application

The applicants listed below wish to be authorized to conduct the specified activity with the indicated Endangered Species: Applicant: Woodland Park Zoological Garden, 5500 Phinney Ave. North, Seattle, Wash. 98103: PRT 2–4558.

The applicant requests a permit to purchase in interstate commerce one male white-eared pheasant *(Crossoptilon crossoptilon)* from Charles Sivelle, Dix Hills, New York for enhancement of propagation. Applicant: Oklahoma City Zoo, 2101 N.E. 50th, Oklahoma City, Okla.; PRT 2–4572.

The applicant requests a permit to import one male from and export one male snow leopard *(Panthera uncia)* to the Beksbourne Zoo, England in an even exchange of animals for enhancement of propagation. Applicant: Buffalo Zoological Gardens, Delaware Park, Buffalo, New York 14214; PRT 2–4591.

The applicant request a permit to purchase in interstate commerce two clouded leopards *(Neofelis nebulosa)* from Robert Baudy, Rare Reline Breeding Compound, Center Hill, Florida for enhancement of propagation. Applicant: Dr. Rollin G. Bauer, Jr., Section of Ecology and Systematics, Division of Biological Sciences, Cornell University, Ithaca, New York 14853; PRT 2–4547.

The applicant requests a permit to export and re-import museum specimens of endangered and threatened species of wildlife already accessioned into the university's vertebrate museum for scientific research.

Humane care and treatment during transport, if applicable, has been indicated by the applicant.

Documents and other information submitted with these applications are available to the public during normal business hours in Room 601, 1000 N. Glebe Road, Arlington, Virginia or by writing to the Director, U.S. Fish and Wildlife Service, WPO, Washington, D.C. 20240.

Interested persons may comment on these applications by October 1, 1979 by submitting written data, views, or arguments to the Director at the above address.

Dated: August 27, 1979.

Fred L. Bolwahnn,

Acting Chief, Permit Branch, Federal Wildlife Permit Office U.S. Fish and Wildlife Service.

BILLING CODE 4310–55–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–71]

Certain Anaerobic Impregnating Compositions and Components Therefor; Investigation

Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on July 19, 1979, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Loctite Corporation, 705 North Mountain Road, Newington, Connecticut 06111, alleging that unfair methods of competition and unfair acts exist in the importation into the United States of certain components for anaerobic impregnating compositions, or in their sale, because (1) such impregnating compositions are allegedly covered by claims 1, 4, and 12 of U.S. Letters Patent 4,069,378, and (2) such components allegedly contribute to and induce infringement of claims 1, 4, and 12 of U.S. Letters Patent 4,069,378.

The complaint alleges that the effect or tendency of the unfair methods of competition and unfair acts is to substantially injure an industry, efficiently and economically operated, in the United States. Complainant requests permanent exclusion from entry into the United States of the imports in question after a full investigation.

Having considered the complaint, the Commission, on August 16, 1979, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine whether there is a violation of subsection (a) of this section in the unlawful importation of certain anaerobic impregnating compositions, or of the monomer component thereof singly or in combination with either the surfactant or the initiator components, into the United States, or in their sale, because (1) such impregnating compositions are allegedly covered by claims 1, 4 and 12 of U.S. Letters Patent 4,069,378, and (2) such mononer component allegedly contributes to and induces infringement of claims 1, 4 and 12 of U.S. Letters Patent 4,069,378, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

(2) For the purpose of this investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—Loctite Corporation, 705 North Mountain Road, Newington, Connecticut 06111.

(b) The respondents are the following companies alleged to be involved in the unauthorized importation of such anaerobic impregnating compositions and components therefor into the United States, or in their sale, and are parties upon which the complaint shall be served;

Ultraseal, Ltd., 768 Buckingham Avenue, Slough, Berks, S.L. 1–4–N–L. England.

Imprex, Inc., 3260 South 108th Street, Milwaukee, Wisconsin 53227.

Ultraseal America, Inc., 2401 South Lenox Street, Milwaukee, Wisconsin 53207.

NL Permanent Mold Castings Division, NL Industries, Inc., 1230 Avenue of the Americas, New York, New York 10020.

Aluminum Casting & Engineering Co., 2039 South Lenox Street, Milwaukee, Wisconsin 53207.

Sundstrand Corporation, 4751 Harrison Avenue, Rockford, Illinois 61101.

Southfield Machine Products Co. Division, Cast Metal Industries, Inc., 19400 West 8 Mile Road, Southfield, Michigan 48075.

(c) Wilhelm A. Zeitler, U.S. International Trade Commisison, 701 E Street NW., Washington, D.C. 20436, is hereby named Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Chief Administrative Law Judge Donald K. Duvall, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with section 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless and sufficient cause is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be alleged in the complaint and this notice and to enter both a recommended determination and a final determination containing such findings.

The complaint is available for inspection by interested persons at the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, and in the Commission's New York City Office, 6 World Trade Center, New York, N.Y. 10048.

By order of the Commission.

Issued: August 27, 1979.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[AA1921-210]

Certain Marine Radar Systems From United Kingdom; Investigation and Hearing

Having received advice from the Department of the Treasury on August 17, 1979, that certain marine radar systems (provided for in item 685.60 of the Tariff Schedules of the United States (TSUS)) from the United Kingdom are being, or are likely to be, sold at less than fair value, the United States International Trade Commission, on August 27, 1979, instituted investigation No. AA1921-210 under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

For purposes of the Treasury Department's determination "certain marine radar systems" means X-band radar systems provided for in item 685.60, Tariff Schedules of the United States, designed principally for boat or ship installation with direct current power supply from 6 to 60 volts, having a maximum viewable display dimension of less than 11 inches, and having an antenna assembly with transmitter-receiver permanently affixed, and parts thereof; all the foregoing, whether such radar system components are imported together as units or separately.

Public hearing. A public hearing in connection with this investigation will be held on Wednesday, October 10, 1979, in the Commission's Hearing Room, U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. 20436, beginning at 10 a.m., e.d.t. All interested persons will be afforded an opportunity to be present, to appear by counsel or in person, to provide information, and to be heard at such hearing. Requests to appear at the hearing should be received in writing in the office of the Secretary to the Commission, United States International Trade Commission, 701 E Street, NW., Washington, D.C., not later than noon, Friday, October 5, 1979.

Written statements. Interested parties may submit statements in writing in lieu of, or in addition to, appearing at the public hearing. A signed original and nineteen true copies of such statements should be submitted. Requests for confidential treatment should be directed to the attention of the Secretary. Any business information which a submitter wishes the Commission to treat as confidential should be clearly marked "Confidential Business Data." Submitters seeking confidential treatment must conform with the requirements of section 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). Should a request for confidential treatment be denied, the submission will be returned to the submitting party.

All written submissions, except for confidential business data, will be made available for inspection by interested persons. To assure that such statements are given due consideration by the Commission, such statements should be received not later than the close of business, Friday, October 19, 1979.

By order of the Commission.

Issued: August 28, 1979.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

DEPARTMENT OF LABOR

Employment and Training Administration

Employment Transfer and Business Competition Determinations Under the Rural Development Act; Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determined that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation is the local area in which the proposed facility will be located.
2. Employment trends in the same industry in the local area.
3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.
4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).
5. In the case of applications involving the establishment of branch plant or facilities, the potential effect of such new facilites on other existing plant or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice. Comments received after the two-week period may not be considered. Send comments to: Administrator, Employment and Training Administration, 601 D Street, N.W., Washington, D.C. 20013.

Signed at Washington, D.C. this 24th day of August 1979.

Earl T. Klein,

Director, Office of Program Services.

Applications received during the week ending August 25, 1979.

Name of Applicant, and Location of Enterprise, Principal Product or Activity

Maxon Marine Industries, Inc., Tell City, Indiana, construction and repairs of steel barges.
Quality Mills, Inc., Mount Airy, North Carolina, manufacturing of knit apparel.
Frederic A. Potts & Co., Inc., Pottsville, Pennsylvania, deep and strip mining, processing of anthracite coal.
Colony Fair Development Co., Palmer, Alaska, shopping center.
Farmore, Inc., Levelland, Texas, shopping center.

BILLING CODE 4510-30-M

Intent to Reallocate Nonutilized Funds Under Comprehensive Employment and Training Act (CETA) Annual Plan Subgrants Carried Forward From Fiscal Year 1979 Into Fiscal Year 1980

AGENCY: Employment and Training Administration.

ACTION: Notice.

SUMMARY: Pursuant to 20 CFR 676.47, the Department of Labor announces its intent to reallocate nonutilized funds under CETA prime sponsor annual plan subparts carried forward from Fiscal Year 1979 into Fiscal Year 1980, as indicated below. The purpose of this notice is to provide 30 days notice to all interested parties of the Department's intent to reallocate these funds.

FOR FURTHER INFORMATION CONTACT: Robert Anderson, Administrator, Office of Comprehensive Employment Development, 601 D Street, N.W., Room 5010, Washington, D.C. 20213. Telephone: 202-376-6254.

SUPPLEMENTAL INFORMATION: This action is being taken by the Department to assure the effective utilization of all funds made available under CETA and, to the maximum extent possible, to assure that these funds are made available to those areas which are most in need of such funds.

Section 676.47 provides that the Department shall not consider as nonutilization carryover funds of up to 10 percent of the annual allocation for each subpart of a CETA prime sponsor's annual plan. Accordingly, the Department is advising all prime sponsors that carryover funds in excess of 10 percent of the annual allocation for programs funded under Titles II-D and VI of CETA shall be reallocated. It is also our intent to review all carryover funds in excess of 40 percent for programs funded under Title II-A, B and C, including Special Grants to Governors, to determine whether it is appropriate and necessary to reallocate nonutilized funds in excess of 40 percent of the annual allocation for these activities.

With respect to Youth Community Conservation Improvement Programs and youth Employment and Training Programs, it is the intent of the Department to reallocate all nonutilized funds in excess of 20 percent of the annual allocation for these programs. In accordance with the law, all Summer Youth Employment Program funds carried over from one fiscal year to the next will be combined with new obligational authority for the next year's program.

Since funds for the Private Sector Initiative Program were not made available until late in the fiscal year, no limitation is being established on the amount of carry forward into Fiscal Year 1979. Likewise, funds carried forward for programs such as the Skill Training Improvement Program (STIP) and the Help through Industry Retraining and Employment (HIRE) program shall not be subject to any reallocation action.

Robert Anderson,

Administrator, Office of Comprehensive Employment Development.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-79-109-C]

Ligon Preparation Co.; Petition for Modification of Application of Mandatory Safety Standard

Ligon Preparation Company, Post Office Box 47, Drift, Kentucky 41619 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations) to its I-201 Mine located in Floyd County, Kentucky. This petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. Due to hazardous roof conditions in the area of 11 seals in the petitioner's mine, it is virtually impossible to travel to the seals to inspect them as required.

2. As an alternative to weekly inspections of the seals, the petitioner proposes to establish an air monitoring checkpoint where the affected split of air enters the main return airway.

3. The petitioner will conduct tests for methane content, oxygen deficiency, and air quality at the checkpoint and record the results of the tests.

4. The petitioner believes that this alternative will achieve no less protection for its miners than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before October 1, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 21, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510-43-M

[Docket No. M-79-129-C]

United States Steel Corp.; Petition for Modification of Application of Mandatory Safety Standard

United States Steel Corporation, 600 Grant Street, Pittsburgh, Pennsylvania 15230 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations) to its Maple Creek No. 1 Mine located in Washington County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Public Law 95-164.

The substance of the petition follows:

1. Progressive roof deterioration in specified return air entries of the petitioner's mine has resulted in numerous, massive roof falls in the entries.

2. Due to these adverse conditions, it is extremely hazardous and virtually impossible to travel and examine the entries.

3. The return airways ventilate only abandoned areas of the petitioner's mine.

4. Restoration of the return air entries is not feasible.

5. As an alternative to weekly examinations of the entries, the petitioner proposes to establish air monitoring stations designated on a map supplied with the petition where air measurements for the entries will be made according to procedures outlined in the petition.

6. The petitioner believes that this alternative method will achieve no less protection for its miners than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before October 1, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 17, 1979.

Occupational Safety and Health Administration

[V-79-3]

Airtek-Karrena Chimney Corp.

AGENCY: Occupational Safety and Health Administration Department of Labor.

ACTIONS: (1) Notice of application for variance and interim order; (2) Grant of interim order.

SUMMARY: This notice announces the application of Airtek-Karrena Chimney Corporation for a variance and interim order pending a decision on the application for a variance from the standards prescribed in certain sections of 29 CFR 1926.552(c) concerning personnel hoists, and 1926.451(1)(5) concerning boatswain's chairs.

It also announces the granting of an interim order until a decision is rendered on the application for variance.

DATES: The effective date of the interim order is August 31, 1 979. The last date for interested persons to submit comments is October 1, 1979. The last date for affected employers and employees to request a hearing on the application is October 1, 1979.

ADDRESSES: Send comments or requests for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 3rd Street and Constitution Avenue NW., Room N-3656, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

I. Notice of Application

Notice is hereby given that Airtek-Karrena Chimney Corporation, 1776 Heritage Drive, Quincy, Massachusetts 02171 has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and an interim order pending a decision on the application for a variance, from the standards prescribed in 29 CFR 1926.552(c) (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14) (i) and (iii), and (16) Personnel Hoist and 29 CFR 1926.451(1)(5) Boatswain's chairs.

The places of employment that will be affected by the application are all the applicant's chimney construction sites in States under Federal jurisdiction, and all future stack erection sites in States under Federal jurisdiction.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

The applicant requested a variance from Section 1926.451(1)(4) to permit the use of wire rope in lieu of manila rope. Section 1926.451(1)(4) requires an employee using a boatswain's chair to be protected by a safety belt and lifeline in accordance with Section 1910.104. Under § 1926.104(c) manila or equivalent rope is permitted. Since wire rope is equivalent to manila rope, a variance from § 1926.451(1)(4) is unnecessary.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by §§ 1926.451(1)(5) and 1926.552(c).

The applicant is engaged in the construction of chimneys and/or chimney liners. In erecting or repairing the chimney and/or chimney liner, work must be performed at elevations at which access ladders are impractical.

The applicant contends that it is not feasible to use personnel hoists meeting the requirements of certain sections of 1926.552(c) inside a chimney. In a small chimney there would be insufficient room to construct a hoist tower and the hoist tower would interfere with the design and construction of the chimney and and/or chimney liner.

Instead, the applicant states that it would use a system incorporating Special Workmen's Hoist and Safety Cages, boatswains chairs, and a material hoist. Specifically, the applicant proposes to transport personnel to and from the elevated platform, during maintenance (repair) or construction work on chimneys, utilizing a Special Workmen's Hoist, including the hoist machine, safety cage with safety cables on opposite sides, safety devices that will grip the safety cables in the event of any failure of the hositing cable and limit switches to prevent overrun of the cage at both top and bottom of the chimney; to transport personnel one at a time to and from the elevated scaffold during the maintenance or construction work on chimneys or chimney liners of a small diameter or from a bracket scaffold on the outside of a chimney utilizing a boatswain's chair attached to the hoisting cable of a material hoist from which the material bucket shall be temporarily disconnected; to attach the safety belt of the personnel being transported one at a time to or from the elevated scaffold in the boatswain's chair to a clamp riding a separate lifeline of ⅝-inch diameter wire rope securely attached to the rigging at the top and to a weight at the bottom; and to substitute the material hoist for the "block and falls" when transporting personnel one at a time in a boatswain's chair. The applicant has submitted detailed procedures which it will follow in transporting personnel by these means in lieu of the requirements of 29 CFR 1926.451(1)(5) and 29 CFR 1926.552(c) (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14) (i) and (iii) and (16).

A copy of the application will be made available for inspection and copying upon request at the locations listed above. All interested persons, including employers and employees, who believe they would be affected by the grant or denial of the application for a variance are invited to submit written data, views and arguments relating to the pertinent application no later than October 1, 1979. In addition, employers and employees who believe they would be affected by a grant or denial of the variance may request a hearing on the application no later than October 1, 1979, in conformity with the requirements of 29 CFR 1905.15. Submission of written comments and requests for a hearing should be in quadruplicate, and must be addressed to the Office of Variance Determination at the above address.

II. Interim Order

It appears from the application for a variance and interim order that, as required by section 6(d) of the Act, the use of a Special Workmen's Hoist to transport employees and the substitution of a materials hoist for block and falls on a boatswain's chair will provide to the affected employees a place of employment as safe as that which be provided if the applicant complied with 29 CFR 1926.451(1)(5) and 29 CFR 1926.552(c) (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14) (i) and (iii) and (16). It further appears that an interim order is necessary to prevent undue hardship to the applicant and its employees pending a decision on the variance. Therefore it is ordered, pursuant to the authority in section 6(d) of the Occupational Safety and Health Act of 1970, in 19 CFR 1905.11(c), and in Secretary of Labor's Order No. 8-76 (41 FR 25059), that Airtek-Karrena Chimney Corporation be, and it is hereby, authorized to utilize a Special Workmen's Hoist consisting of hoist machine and a special two-man safety cage to transport employees to and from the work platform, and to use a boatswain's chair to transport employees one at a time while substituting a materials hoist for the block and falls, provided that the following conditions are complied with.

I. Hoist Machine

a. *Requirements.* (1) The hoist machine shall be designated as a portable man hoist.

(2) The hoist machine shall be powered both in the up and down direction.

(3) The hoist machine shall be located far enough from the footblock to obtain correct fleet angle or proper spooling on the hoist drum.

(4) The hoisting machine shall be a type of which the car hoisting drum is driven in both directions of rotation and is automatically stopped and held rotationless upon loss of applied power so that the drum cannot be in a freewheeling condition. A drive system of which the hoisting drum can be placed into a freewheeling position for the purpose of lowering the car by use of the braking system or a system of which the velocity of the car being lowered is reduced by increasing the engine or motor speed shall not be allowed.

(5) The hoist machine shall be equipped with a hand or foot-operated constant pressure control switch (dead-man control) which shall stop the hoist immediately if released. The switch shall be provided with appropriate protection to prevent it from activating in the event it is struck by falling or moving objects.

(6) The hoist machine shall be equipped with a winding drum of not less than 30 times the diameter of rope used, with rope not to be spooled closer than two inches to edge of flange.

(7) The hoist machine shall be equipped with a line speed indicator maintained in good working condition.

(8) The hoist machine shall be equipped with *EITHER* two independently operated brakes each capable of holding the load as follows:

(i) An externally contracting band type brake mounted directly on the hoist drum. A foot pedal shall be located near the operator's seat for sit down control.

(ii) An electromagnetic braking device, capable of holding 150 percent of the rated load, which shall be automatically applied upon cessation of power. The electromagnetic brake shall be properly located in the drive between the power source and the drum.

Or, two independent band type brakes in conjunction with hydraulic braking, each capable of holding the load as follows:

(i) Two independent band type brakes, one mounted directly on the hoist drum the second mounted directly on the hydraulic motor which is spring engaged and hydraulically disengaged and will automaticaly engage upon cessation of power and capable of

withstanding 150 percent of the rated load.

(ii) Hydraulic braking system which is concurrent with hand control lever.

(9)(i) The hoist machine frame shall be self-supporting rigid, welded steel frame with skid base and holding brackets for anchor lines located at corners, as well as legs for anchor bolts.

(ii) The hoisting machine shall be securely anchored to prevent machine displacement, movement or dislodgment.

(10) Hoist machine wiring shall be equipped with terminal blocks for connections with limit switches that are placed at upper and lower end of travel to prevent the bottom of the cage from being taken above the platform level of the top scaffold or below the bottom loading platform. The hoist shall stop automatically if limit switch contact is opened.

(11) All electrical equipment shall be waterproof.

(12) The hoisting machine shall be electrically grounded.

(13) Single lever control for both speed and direction shall be used.

b. *Operating control.* (1) The operator of the hoist shall be an experienced operator.

(2) The hoist shall not be operated in excess of 250 ft/min. when carrying personnel.

(3) Signals shall consist of two-way radio or wired intercom between hoist operator, the lower landing and the upper landing.

c. *Hoist Rope.* (1) The hoisting rope shall be improved plow steel or equivalent quality of nonrotating type or regular lay rope with proper swivel and shall not be less than one-half inch diameter. It shall be attached to the cage by a closed hook or hook with locking swivel safety latch.

(2) Where clip fastener is used, the clips shall be installed in accordance with Table H–20, 29 CFR 1926.251(a)(2) and they shall be installed with "U" of clip on dead end rope. Spacing clip-to-clip shall be six times the diameter of the rope.

(3) The load end of the hoist rope shall be weighted to prevent line run

d. *Footblock.* (1) The fooblock shall be of construction type of solid single piece ball, which will prevent rope escapement due to sheave failure, and provide for rope return.

(2) The line diameter of the footblock shall be not less than 25 times the rope diameter.

(3) The change in direction of hoist rope at the footblock shall be approximately 90°.

e. *Cathead.* (1) The overhead sheave supports shall be securely fastened together by bolts or welds to prevent spreading. The sheaves shall be installed between the supporting members and shall rotate on a fixed shaft or the shaft shall revolve in pillow block bearing.

(2) The sheaves used on cathead shall have a minimum diameter equal to 24 times diameter of rope when travel of rope on the sheaves is approximately 90°. When using ½ inch diameter rope, the corresponding minimum sheave diameter shall be 12 inches.

II. Safety Cage

a. *Cage.* (1) The cage shall be of welded construction of two-man capacity.

(2) The framework of the cage shall be converted with aluminum expanded-Xor equivalent.

(3) The floor shall be of ¾ inch thick plywood securely fastened in place, or equivalent.

(4) The roof shall be slanted and of ⅛ inch thick aluminum or equivalent.

(5) The entrance to the cage shall have positive mechanical locking.

(6) Safety clamps shall be of a type that are portable and can be attached or detached from the safety cable. The clamps shall be fabricated 100 percent of stainless steel, having instant holding action, and a solid self-locking pin, spring loaded, for locking the two parts together.

(7) The safety clamps attached on opposite side of the cage shall grip the safety cables in case of emergency.

(8) The safety clamps shall operate on the broken rope principle.

b. *Safety cables.* (1) There shall be two steel safety cables suitable for use with safety clamps, as described in paragraph (g) (6), (7) and (8), or equivalent.

(2) One end shall be fastened to an overhead support which is supported independently of the overhead support for the hoist rope and the bottom end securely attached with approximately 100 pound tension on the ropes. Safety cables shall be ⅜ inch diameter when used with two-man cage.

c. *Capacity.* The maximum for the two-man cage shall be 2 men or 400 pounds. A sign stating capacity shall be posted in the cage.

d. *Emergency escape.* An emergency escape device with accommodations for each man in the cage with a minimum 9/16 inch braided nylon rope or better, long enough to reach the bottom landing from the highest escape point below the upper landing shall be securely attached to the inside of the cage. This means of escape is good only for one person at a time.

III. Welding and Electrical

All welding and electrical work shall be done in accordance with the appropriate standards.

IV. Inspection

(1) An inspection and test of all functions and safety devices of the Safety Cage shall be made under the supervision of a competent person prior to initial use on each job.

(2) Visual inspection shall be performed daily on the manlift system.

(3) A drop test shall be performed before initial use at each job and monthly thereafter for the duration of the job.

(4) A periodic inspection of the workplace shall be made to assure that employee exposure to carbon monoxide is below the threshold limit value.

Airtek Karrena Chimney Corporation shall give notice of this interim order to employees affected thereby by the same means required to be used to inform them of the application for variance.

Effective date. This interim order shall be effective as of August 31, 1979, and shall remain in effect until a decision is rendered on the application for variance.

Signed at Washington, D.C. this 24th day of August 1979.

Eula Bingham,

Assistant Secretary of Labor.

[FR Doc. 79–27328 Filed 8–30–79; 8:46 am]

BILLING CODE 4510–26–M

[V–77–12; V–77–6]

Francis Hankin & Co., Inc., and Pittsburgh-Des Moines Steel Co.; Grants of Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Grants of Variances.

SUMMARY: This notice announces the grants of variance to Francis Hankin & Co. Inc., and Pittsburgh-Des Moines Steel Company, from the standards prescribed in 29 CFR 1926.451(1) (4) and (5) concerning boatswain's chairs and in 29 CFR 1926.552 (c) (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14) (i) and (iii), and (16) concerning personnel hoists.

DATES: The effective date of the variances is August 31, 1979.

FOR FURTHER INFORMATION CONTACT:

I. Background

Francis Hankin & Co., Inc., 117 Crockford Blvd., Scarborough, Ontario, Canada MIR 3B9 and Pittsburgh-Des Moines Steel Co., 1015 Tuttle Street, Des Moines, Iowa 50308 have made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; U.S.C. 655) and 29 CFR 1905.11 for variances, and for interim orders pending a decision on the applications for variances, from the safety standards prescribed in 29 CFR 1926.451(1) (4) and (5) and 1926.552 (c) (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14) (i) and (iii), and (16). The standards set requirements governing the use of boatswain's chairs and personnel hoists. The facilities affected by the applications are all the applicants' present and future construction sites in States under Federal jurisdiction where chimney stack erection and chimney maintenance occur.

Notices of the applications, and grants of interim order were published in the Federal Register on October 4, 1977 (42 FR 54029) and April 1, 1977 (42 FR 17539) respectively. The notices invited interested persons, including affected employers and employees, to submit written data, views, and arguments regarding the grant or denial of the variances requested. In addition, affected employers and employees were notified of their right to request a hearing on the application for variances. One comment letter was received from the State of Michigan in response to the Federal Register Notice of Francis Hankin and Company, Inc. The issues raised by this comment letter are discussed below.

II. Facts

The applicants are engaged in chimney construction and maintenace work and state that all construction projects are under the direct spervision of its prinicpal offices even though the projects themselves are spread throughout the country.

In constructing a chimney, the elevated working platform or scaffolding is moved upward with the construction. In order for employees to reach such a platform, an access ladder or equivalent safe means of access must be provided as required by 29 CFR 1926.451(a)(13). The applicants state that as the height of the construction increases it becomes impractical to use an access ladder and another safe means of access must be provided.

There is insufficient room to construct a hoist tower as required by certain Sections of 29 CFR 1926.552(c) in small chimneys. The hoist would interfere with the design and construction of proper scaffolding. Since the hoist tower must be kept higher than the chimney construction, the frequent extension of the hoist tower involves many difficulties in erection, bracing, and guying. In order for a hoisting tower to operate properly, it must be maintained in a plumb position. Thus, it is difficult to provide safe access from an outside tower to the chimney over the increasing distances because of the tapering of the chimney toward the top. In addition, a hositing tower may be inoperable unless rigidity is maintained, which would be difficult with wind conditions at heights of several hundred feet.

Accordingly, in lieu of constructing a hoist tower as specified in 29 CFR 1926.552(c) (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14) (i) and (iii), and (16), the applicants use a special workmen's hoist with a hoist machine, safety cage, and safety cables, to transport employees to and from the elevated work platform. Some of the safety features of the special workmen's hoist include safety devices that will grip the safety cables in the event of any failure of the hositing cable and limit switches that will prevent overrun of the cage at both the top and bottom of the chimney. The applicants use the safety cage only for hoisting and lowering workmen. The safety cage and safety cables are pulled aside on the foundation when not in use and the hoisting rope-connection is transferred to the bucket for hoisting materials.

The applicants also state that becuase the safety cage operates on the inside of the chimney, it is not practical to use it to transport employees to and from the elevated scaffold when constructing a chimney or chimney lining of small diameter, or to transport employees to the bracket scaffold on the outside of a chimney. When it is not feasible to use the safety cage, the applicants raise and lower employees, one at a time, on a boatswain's chair. Because the height of the chimneys makes a block and falls difficult to manage, the applicants purpose to substitute a hoist for the block and falls required by § 1926.451(1)(5) when transporting employees in the boatswain's chair.

The material bucket would be temporarily disconnected from the hoisting cable and the boatswain's chair would be attached to the cable. To further insure the safety of the employee in the boatswain's chair, the employee's safety belt is attached to a suitable safety clamp riding a separate lifeline securely attached to the rigging at the top and to a weight at the bottom.

The applicants base their variance applications on many years of past experience in using safe practices in chimney construction. The applicants have also submitted detailed safety specifications for the use of a special workmen's hoist and safety cage which insure the protection of the safety of employees being transported in the safety cage.

III. Decision

29 CFR 1926.552(c) sets forth the requirements for the construction of hoist towers when used as personnel hoist both inside and outside of a structure. The primary purpose of the standard is to protect the safety of employees being mechanically transported from one elevation to another.

It appears from the applications and supporting data that there are special

V 4 4 / 1 7 1
A G 3 1 7 9
UMI

circumstances involved in transporting employees to and from the elevated work platforms and scaffolds in the chimney construction industry. It is found that there are may difficulties and hazards involved in the construction of hoist tower and in providing a safe means of access from the hoist tower to the elevated work platforms and scaffolds. The construction of hoist tower as required by 29 CFR 1926.552(c), (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14) (i) and (iii), and (16) is not a feasible method for transporting employees engaged in chimney construction work because of the tapering chimney and the difficulty in maintaining the required rigidity in wind conditions present at elevations of several hundred feet.

For these reasons, the applicants use a special workmen's hoist and safety cage to transport employees to and from the elevated work platform and scafford. The applicants have submitted safety specifications for a special workmen's hoist and safety cage which insure the protection and safety of employees. The safety specifications for the use of the hoist and safety cage have been incorporated in the final order granted below. The specifications include safety features which require limit switches to prevent overrun of the cage at the top and bottom of the chimney, and safety devices which will grip the safety cables in the event of failure of the basic hoisting facility.

29 CFR 1926.451(1)(4) requires an employee using a boatswain's chair to be protected by a safety belt and lifeline in accordance with § 1926.104. This is intended to protect the employee in the event of a fall.

During certain stages in the construction of chimneys, it is not always technically feasible for the applicants to use the safety cage to raise and lower employees. At times employees perform work from a bracket scaffold on the outside of a chimney. Since the safety cage operates on the inside of the chimney, this cannot be used to transport employees to and from the bracket scaffold. In other situations, the chimney or chimney liner are too narrow to permit the operation of the safety cage inside the chimney. In these instances, the applicants use a hoist to raise and lower employees, one at a time, in a boatswain's chair. During this procedure, the employee's safety belt is attached to a safety clamp riding a separate lifeline as an additional safety measure. The boatswain's chair is used only for transporting employees. The material bucket, which is used for transporting materials, is removed from the hoist cable when the boatswain's chair is used to transport an employee. This procedure is reversed when the transporting of materials is again required.

29 CFR 1926.451(1)(5) requires the use of a block and falls with a boatswain's chair. The primary purpose of the standard is to provide employees with a method of controlling their ascent while being transported in the boatswain's chair.

The block and falls required by 29 CFR 1926.451(1)(5) when using the boatswain's chair, is normally used to ascend heights of up to about 200 feet. Since the employees have to be elevated to heights of several hundred feet, the applicants substitute a hoist rope for the block and falls required by the standard.

It appears from the applications and supporting data that the procedures used by the applicants for transporting employees are more suited and adapted to the chimney construction industry than are the procedures required by the standards. The applicants have furnished information which show that the special workmen's hoist and safety cage and the boatswain's chair provide employees with a safe means of access to and from the elevated work platforms and scaffolds.

Therefore, it is determined that the transportation of employees through the methods described will provide employment and places of employment which are as safe and healthful as those which would prevail if the applicants were to comply with the requirements of 29 CFR 1926.552(c) and 29 CFR 1926.451(1) (4) and (5).

As stated in the Background section, one comment letter was received from the State of Michigan as a result of the **Federal Register** Notice of Francis Hankin and Company, Inc. The State made recommendations and expressed objections to the conditions of the interim order. The issues raised by the State are as follows:

(1) A recommendation was made to include, in the Order, the requirements of overhead protection for the operator and an enclosure to protect the operator against the elements. These requirements are mandatory and are addressed in other standards—§ 1926.552(b) (4) and (8) and ANSI A10.5–1969—applicable to the employer.

(2) There was a suggestion made that the operator be required to remain at the hoist machine at all times when the cage is aloft. OSHA agrees that total attendance by the operator is mandatory if employees are in the cage. When the cage is in an unoccupied elevated position, no hazard exists as the requirements of § 1926.552(b)(8) provides adequate coverage.

(3) There was disagreement with the idea of using safety hooks to attach the hoist rope to the cage. OSHA believes that a positive swivel type connection and other fully closed hooks, which develops the rated capacity of the hook bowl for the full circumference of the closed hook bowl is acceptable. However, States with State plans have the option of imposing additional requirements.

(4) The opinion was expressed that except for the cage design, the hoisting rope and the remainder of the system should be designed with a safety factor of 10. The applicant has exceeded this requirement by providing a safety factor of 13 to 1.

(5) The commentor recommended that the following safeguards be added to the Order: (1) limiting the dimensions of the cage to prevent more than two persons, plus equipment, to be contained in the cage; and (2) affixing a sign to the cage to indicate the capacity in weight and number of passengers. The two-man capacity requirements are referenced in the Order and the manufacturing posting requirements are referenced in the applicable provisions of § 1926.552(a)(2).

(6) There was objection to using a two-way radio as a means for signaling the operator. The commentor feels that only a wired intercom should be used. Since the two-way radio may be more effective than a wired intercom at a particular location, or vice versa, we have included both communicating systems in the *Order*. However, States operating under State plans have the option of requiring a wired intercom exclusively.

(7) A recommendation was made that a body harness be available for each passenger in the cage for emergency escape. An emergency escape device that may be reused will provide equivalent protection for each man in the cage.

(8) The statement was made that the requirements for inspection and replacement of hoist ropes should be included in the Order. Hoist rope inspection and replacement requirements are covered by the applicable provisions of § 1926.552 (a) and (b), and must be met by the applicant.

(9) There was a suggestion made to include in the inspection requirements that the drop test be witnessed by State enforcement personnel. States with State plans may require that the test be witnessed by State enforcement personnel.

IV. Order

Pursuant to authority in section 6(d) of the Occupational Safety and Health Act of 1970, section 107 of the Contract Work Hours and Safety Standards Act, as amended (83 Stat. 96 (40 U.S.C. 333)), 29 CFR Part 1905, 29 CFR 1926.2 and in Secretary of Labor's Order No. 8–76 (41 FR 25059), it is ordered that Francis Hankin & Co., Inc. and Pittsburgh-Des Moines Steel Company be, and they are hereby authorized to:

(1) Transport personnel to and from the elevated platform during construction work on chimneys, utilizing a special workmen's hoist, including the hoist machine, safety cage with safety cables on opposite sides, safety devices that will grip the safety cables in the event of any failure of the hoisting cable, and limit switches to prevent overrun of the cage at both top and bottom of the chimney in lieu of complying with 29 CFR 1926.552(c) (1), (2), (3), (4), (5), (6), (7), (8), (9), (12), (13), (14)(i) and (iii), and (16); and

(2) Transport personnel one at a time to and from the elevated scaffold during construction work on chimneys or chimney linings of a small diameter, or to and from a bracket scaffold on the outside of a chimney by utilizing a boatswain's chair attached to the hoisting cable of a hoist from which the material bucket shall be temporarily disconnected, with the safety belt of the personnel being transported in the boatswain's chair attached to a safety clamp riding a separate lifeline of ⅜ inch-diameter wire rope securely attached to the rigging at the top and to a weight at the bottom, and to substitute a hoist for the block and falls when transporting personnel in a boatswain's chair, in lieu of complying with 29 CFR 1926.451(1)(4) and (5); in accordance with the following additional conditions:

I. Hoist Machine

a. *Requirements.* (1) The hoist machine shall be of a type designated as a portable man hoist.

(2) The hoist machine shall be powered both in the up and down direction.

(3) The hoist machine shall be located far enough from the footblock to obtain correct fleet angle or proper spooling on the hoist drum.

(4) The hoist machine shall be a type by which the car hoisting drum is driven in both directions of rotation and is automatically stopped and held rotationless upon loss of applied power so that the drum cannot be in a freewheeling condition. A drive system by which the hoisting drum can be placed into a freewheeling position for the purpose of lowering the car by use of the braking system, or a system by which the velocity of the car being lowered is reduced by increasing the engine or motor speed shall be used.

(5) The hoist machine shall be equipped with a hand or foot-operated constant pressure control switch (deadman control) which shall stop the hoist immediately upon release. The switch shall be provided with appropriate protection to prevent it from activating in the event it is struck by falling or moving objects.

(6) The hoist machine shall be equipped with a winding drum of not less than 30 times the diameter of rope used, with rope not to be spooled closer than two inches to edge of flange.

(7) The hoist machine shall be equipped with a line speed indicator maintained in good working condition.

(8) The hoist machine shall be equipped with *EITHER*

(a) two independently operated brakes each capable of holding the load as follows:

(i) An externally contracting band type brake mounted directly on the hoist drum. A foot pedal shall be located near the operator's seat for sit-down control.

(ii) An electromagnetic brake device, capable of holding 150 percent of the rated load, which shall be automatically applied upon cessation of power. The electromagnetic brake shall be properly located in the drive between the power source and the drum.

OR (b) two independent band type brakes in conjunction with hydraulic braking, each capable of holding the load as follows:

(i) Two independent band type brakes, one mounted directly on the hoist drum, the second mounted directly on the hydraulic motor which are spring engaged and hydraulically disengaged, and will automatically engage upon cessation of power, and are capable of withstanding 150 percent of the rated load.

(ii) Hydraulic braking system which is concurrent with hand control lever.

(9)(i) The hoist machine frame shall be self-supporting, rigid, welded steel frame with skid base and holding brackets for anchor lines located at corners, as well as legs for anchor bolts.

(ii) the hoist machine shall be securely anchored to prevent machine displacement, movement or dislodgment.

(10) Hoist machine wiring shall be equipped with terminal blocks for connections with limit switches that are placed at upper and lower end of travel to prevent the bottom of the cage from being taken above the platform level of the top scaffold or below the bottom loading platform. The hoist shall stop automatically if limit switch contact is opened.

(11) All electrical equipment shall be waterproof.

(12) The hoisting machine shall be electrically grounded.

(13) Single lever control for both speed and direction shall be used.

b. *Operating control.* (1) The operator of the hoist shall be an experienced operator.

(2) The hoist shall not be operated in excess of 250 ft/min. when carrying personnel.

(3) Signals shall consist of two-way radio or wired intercom between hoist operator, the lower landing and the upper landing. The communication system shall be so designated to eliminate outside interference.

c. *Hoist rope.* (1) The hoisting rope shall be improved plow steel or equivalent quality of nonrotating type or regular lay rope with proper swivel and shall be not less than one-half inch diameter. It shall be attached to the cage by a closed hook or hook with locking swivel safety latch.

(2) Where clip fastener is used, the clips shall be installed in accordance with Table H–20, 29 CFR 1926.251(a)(2) and they shall be installed with "U" of clip on dead end of rope. Spacing clip-to-clip shall be six times the diameter of the rope.

(3) The load end of the hoist rope shall be weighted to prevent line run.

d. *Footblock.* (1) The footblock shall be of construction type of solid single piece bail, which will prevent rope escapement due to sheave failure, and provide for rope return.

(2) The line diameter of the footblock shall be not less than 24 times the rope diameter.

(3) The change in directions of hoist rope at the footblock shall be approximately 90°.

3. *Cathead.* (1) The overhead sheave supports shall be securely fastened together by bolts or weld to prevent spreading. The sheaves shall be installed between the supporting members and shall rotate on a fixed shaft or the shaft shall resolve in pillow block bearings.

(2) The sheaves used on cathead shall have a minimum diameter equal to 24 times diameter of rope when travel of rope on the sheaves is approximately 90°. When using ½ inch diameter rope, the corresponding minimum sheave diameter shall be 12 inches.

II. Safety Cage

a. *Cage.* (1) The cage shall be of welded construction of two-man capacity.

(2) The framework of the cage shall be covered with aluminum expand-X or equivalent.

(3) The floor shall be ¾ inch thick plywood or equivalent securely fastened in place.

(4) The roof shall be slanted and 2 thicknesses of ¼ inch plywood, or ⅛ inch thick aluminum, or equivalent.

(5) The entrance to the cage shall have positive mechanical locking.

(6) Safety clamps shall be of a type that are portable and can be attached or detached from the safety cable. The clamps shall be fabricated 100 percent of stainless steel, have instant holding action, and a solid self-locking pin, spring loaded, for locking the two parts together.

(7) The safety clamps attached on opposite sides of the cage shall grip the safety cables in case of emergency.

(8) The safety clamps shall operate on the broken rope principle.

b. *Safety cables.* (1) There shall be two steel safety cables suitable for use with safety clamps, as described in paragraph II, (a) (6), (7) and (8), or equivalent.

(2) One end shall be fastened to an overhead support which is supported independently of the overhead support for the hoist rope and the bottom end securely attached with approximately 100 pound tension on the ropes. Safety cables shall be ½ inch diameter.

c. *Capacity.* The maximum for the two-man cage shall be 2 men or 400 pounds. A sign stating capacity shall be posted in the cage.

d. *Emergency escape.* An emergency escape device, with accommodations for each man in the cage, with a minimum ⅝ inch braided nylon rope or better, which will enable each man in the cage to reach the bottom landing from the highest escape point below the upper landing shall be securely attached to the inside of the cage. This means of escape is good only for one person at a time.

III. Welding and Electrical

All welding and electrical work shall be done in accordance with the appropriate standards.

IV. Inspection

(1) An inspection and test of all functions and safety devices of the Safety Cage shall be made under the supervision of a competent person prior to initial use on each job.

(2) Visual inspection shall be performed daily on the manlift system.

(3) A drop test shall be performed before initial use at each job and monthly thereafter for the duration of the job.

(4) A periodic inspection of the workplace shall be made to assure that employee exposure exposure to carbon monoxide is below the threshold limit value.

As soon as possible Francis Hankin & Company Inc. and Pittsburgh-Des Moines Steel Company, shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of their applications for a variance.

Effective date. This order shall become effective on August 31, 1979, and shall remain in effect until modified or revoked in accordance with section 6(d) of the Occupational Safety and Health Act of 1970.

Signed at Washington, D.C. this 24th day of August, 1979.

Eula Bingham,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

[V-77-10]

Inmont Corp.; Grant of Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Grant of Variance.

SUMMARY: This notice announces the grant of variance to Inmont Corporation from the standard prescribed in 29 CFR 1910.106(h)(4)(i)(*c*) which requires that storage tanks inside of buildings shall be located above grade with adequate drainage and separated from the processing area by construction having a fire resistence rating of at least two hours.

DATE: The effective date of the variance is August 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. James J. Concannon, Director, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue, N.W., Room N-3656, Washington, D.C. 20210, Telephone: (202) 523-7193, or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 32nd Floor, Room 3263, 230 South Dearborn Street, Chicago, Illinois 60604.

U.S. Department of Labor, Occupational Safety and Health Administration, 1400 Torrence Avenue, 2nd Floor, Calumet City, Illinois 60409.

I. Background

Inmont Corporation, 3030 West 51st Street, Chicago, Illinois 60632, made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance and for an interim order pending a decision on the application for a variance from the safety and health standards prescribed in 29 CFR 1910.106(h)(4)(i)(*c*). The standard sets the condition for storage of flammable and combustible liquids inside buildings. The address of the place of employment affected by the application is as follows:

Inmont Corporation, 3030 West 51st Street, Chicago, Illinois 60632.

Notice of the application and of the granting of the interim order were published in the **Federal Register** on August 9, 1977 (42 FR 40270-71). The notice invited interested persons, including affected employers and employees to submit written data, views, and arguments regarding the grant or denial of the variance requested. In addition, affected employers and employees were notified of their right to request a hearing on the application for a variance. No written comments or requests for a hearing have been received.

II. Facts

The applicant is a manufacturer of flammable solvent base printing inks. The solvents include barium lithol pigment, exempt lactol spirits, toluene, metal resinate of wood rosin, ethyl cellulose, and wax compound. The ink is transferred from the main processing building to the South Finishing Ink Tank Storage Building by an overhead enclosed pipe bridge. Here it is stored in tanks until transferred by pump and pipe line to tank wagons located at the exterior of the building.

The South Finishing Ink Tank Storage Building is constructed of a single exterior wall consisting of an inside 3¾" concrete block brick (with no voids) and then a 3½", thick face brick exterior. All concrete bricks and blocks are joined together with mortar while the two wall members are joined with morter and tie strips. Two double wooden doors are located at each end of the 95' long building. The roof of the building is of a pre-stressed concrete design. The concrete floor on which 26 storage tanks are mounted is approximately 6' 8" below grade level.

Storage tanks are equipped with gauges, self closing valves, automatic lubricators, side entering agitators, and an overflow protection system. The applicant contends that each tank normally holds 2,000 to 4,000 gallons of ink. It further states that the building is only occupied for 5 to 10 minutes at any one time by employees reading gauges during the ink transfer operation and while oiling automatic lubricators (approximately 3 hours weekly).

The applicant states that is is unable to comply with the standard because sufficient space is not available to relocate the storage tanks. Instead, it has installed a mechanical exhaust ventilation system (equipped with two fans) which exceed one cubic foot of air movement per minute per square foot of building area. This system is specifically designed to remove floor level vapors from below grade spaces (exhaust ducts approximately 18" from the floor). In addition, a vapor detection system, with 10 monitoring units, assures that flammable vapor concentration is kept below 25 percent of the lower flammable limits (LFL), and there are two additional automatically activated exhaust fans to double the air evacuation in case of LFL increase. Also, a constantly supervised fan monitoring panel verifies that all exhaust and make-up air ventilation operates properly.

In the event the flammable vapor concentration approaches 25 percent of the LFL, the vapor detection system activates and sounds an audible alarm in both the South Finishing Ink Tank Storage Building and the plant's production office. An alarm also activates in the event of power failure. Once an alarm sounds, a flashing red light (located above the front door of the storage building) is put into operation to alert employees not to enter the building and to evacuate the area. An additional light and buzzer activates in the plant supervisor's office.

In the event of a fire and/or explosion, an additional alarm sounds when the heat sprinkler system is activated. This alarm is audible throughout the storage building and the entire plant. When the alarm sounds, all employees, except trained fire brigade members, are evacuated. The local Fire Department is summoned by the American District Telegraph Company (ADT) which monitors the plant's main fire pump controls 24 hours daily.

Other safeguards in the South Finishing Ink Tank Storage Building include: explosion-proof electrical equipment and wiring; extensive bonding and grounding; emergency lighting; smoke, heat, and explosion relief; catwalk; pumping system to handle ground water seepage; No Smoking and Exit signs; excellent housekeeping; and, two portable fire extinguishers. There are three large wheeled dry chemical fire extinguishers next to the storage building to protect the adjacent yards.

III. Decision

Section 1910.106(h)(4)(i)(*c*) requires that storage tanks inside of buildings shall be located at or above grade with adequate drainage and separated from the processing area by construction having a fire resistance rating of at least two hours. The purpose of the standard is to prevent fire and/or explosion by eliminating vapors which are heavier than air from accumulating in spaces below grade level or pits.

In this situation, 28 storage tanks containing flammable solvent base printing inks are mounted inside of the applicant's South Finishing Ink Tank Storage Building 6'8" below grade level. These tanks cannot be relocated due to insufficient space. However, the possibility of a fire and/or an explosion is unlikely because of the following reasons:

The low level mechanical exhaust ventilation system is capable of removing flammable vapors in spaces below grade.

If the mechanical exhaust ventilation system fails to provide the required ventilation, two exhaust fans automatically activate to maintain flammable vapor concentrations below 25 percent of the LFL.

A constantly supervised fan monitoring panel assures that all exhaust and make-up air ventilation is sufficient enough to dilute the flammable vapors below 25 percent of the LFL.

In the event flammable vapor concentration approaches 25 percent of the LFL, a vapor detection system activates and sounds an audible alarm that notifies employees to evacuate the storage building until adequate ventilation has been established.

Since the storage tanks are equipped with agitators that eliminate tank cleaning, the ink transfer operation is done in an enclosed system, and the tank overflow devices prevent spillage of flammable inks, all ignition sources are adequately secured.

Thus, by installing the above safeguards, adequate ventilation is maintained, flammable vapors are removed from the areas below grade, and the fire/explosion hazard is either eliminated or controlled.

Moveover, if a fire/explosion occurs inside of the storage building, the sprinkler system activates automatically and sounds an audible alarm throughout the entire facility. This alarm is also transmitted to a central control station to assure that the local Fire Department is immediately summoned. An employee can evacuate the storage building in less than two minutes since the travel distance to the nearest means of egress from any point in the building is less than 50 feet (the building is 95' long).

The fact that the employees only occupy the building 5 to 10 minutes at a time to perform non-hazardous duties—reading guages and oiling lubricators—reduces their exposure to hazardous flammable vapor concentrations and also fire/explosions.

The Emergency Evacuation Plan is representative of OSHA's intent to permit fire brigades where there is adequate training, organization, and planning to assure that the safety and health of employees are not jeopardized.

A variance investigation was conducted by OSHA representatives of the storage building. As a result, they support the granting of the variance.

Therefore, for the above reasons it has been determined that the applicant is providing a place of employment as safe as that which would be obtained by complying with § 1910.106(h)(4)(i)(*c*).

IV. Order

Pursuant to authority in section 6(d) of the Occupational Safety and Health Act of 1970, and in Secretary of Labor's Order No. 8-76 (41 FR 25059), it is ordered that Inmont Corporation be, and is hereby authorized to store its flammable inks in storage tanks located inside of its South Finishing Ink Tank Storage Building provided that the following conditions are followed:

(1) Exhaust ventilation across the storage area, in those places where flammable vapors may collect, shall maintain a level of vapor concentration below 25 percent of the LFL.

(2) Constant monitoring of the storage room atmosphere shall be conducted to assure that the level of flammable vapor concentrations is below 25 percent of the LFL.

(3) If the specified levels are exceeded, a distinctive alarm perceivable above ambient noise or light levels shall alert the employees when there is an emergency situation. Employees shall immediately evacuate the storage building and its surrounding area.

(4) Employees shall be trained to recognize the emergency evacuation alarm.

(5) The Emergency Evacuation Plan shall be enforced and include the following procedures:

(a) Only employees trained and educated to handle flammable liquid vapor leaks shall be allowed to reenter the storage area to reestablish safe vapor concentrations. These employees shall be provided with proper personal protective clothing and equipment. They shall be required to wear (as appropriate) foot, leg, body, hand, head, eye, face, and respiratory protection.

(b) All untrained employees shall remain out of the area until vapor concentrations are below 25 percent of the LFL.

(c) Only upon reestablishment of the safe limit shall normal work operations resume.

V 4 4 / 1 7 1 A G 3 1 7 9

(d) All employees shall be instructed in the Emergency Evacuation Plan procedures.

(6) Storage tanks shall not be more than 6'8" below the earth's grade level.

(7) "No Smoking" signs shall be conspicuously displayed near the storage tanks.

(8) All exits shall be properly marked by a readily visible sign.

(9) Fire doors shall be installed at each end of the storage building.

(10) All pipes shall be disconnected on the storage tank without an agitator.

(11) The catwalk shall only be used for reading top tank controls and evacuation purposes.

As soon as possible, Inmont Corporation shall give notice of the terms of the order to affected employees by the same means required to be used to inform them of the application for variance.

This order shall become effective on August 31, 1979, and shall remain in effect until modified or revoked in accordance with section 6(d) of the Occupational Safety and Health Act of 1970.

Signed at Washington, D.C. this 24th day of August, 1979.

Eula Bingham,

Assistant Secretary of Labor.

[TA-W-5588]

Adriana Coat Co., Jersey City, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In ordr to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at the Adriana Coat Company, Jersey City, New Jersey. In the following determinations, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A Departmental survey of manufacturers for whom Adriana Coat performed contract work indicated that those manufacturers which accounted for the decline in Adriana Coat's business increased the amount of contract work they let to other domestic coat contractors and purchased only insignificant quantities of imported ladies' coats. None of these manufacturers reduced orders with domestic sources as a result of declining coat sales. Adriana Coat's contract business increased in the first six months of 1979 compared to the first six months of 1978.

Conclusion

After careful review, I determine that all workers of the Adriana Coat Company, Jersey City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Harry J. Gilman,

Supervisory International Economist, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 10, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 10, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 27th day of August 1979

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-28-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 10, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 10, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 27th day of August 1979.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-5661]

Armco Steel Corp., Metal Products Division, Davis, Calif.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 27, 1979 in response to a worker petition received on June 21, 1979 which was filed by the United Mine Workers of America on behalf of workers and former workers producing corrugated steel pipe for Armco Steel Corporation, Davis, California. The investigation revealed that the petition was filed by the United Steelworkers of America on behalf of the workers and former workers producing corrugated steel pipe and multi-plate for Armco Steel Corporation, Metal Products Division, Davis, California. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of corrugated steel pipe and multi-plate are negligible. A survey of principal importers of pipe and similar articles failed to reveal any importers of corrugated drainage pipe. The importer cited the bulkiness of this item and the resulting high freight costs as reasons for not importing drainage pipe. The multi-plate produced at the plant is corrugated steel pipe at a later stage of processing.

The Department conducted a survey of customers purchasing corrugated steel pipe and multi-plate from the Davis plant. None of the surveyed customers purchased imported corrugated steel pipe or multi-plate.

Conclusion

After careful review, I determine that all workers of Armco Steel Corporation, Metal Products Division, Davis, California are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Harry J. Gilman,

Supervisory International Economist, Office of Foreign Economic Research.

[TA-W-5589]

Avante Fashions, Hoboken, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Avante, Hoboken, New Jersey. The investigation revealed that the correct name of the company is Avante Fashions. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The value of Avante Fashion's sales increased in 1978 compared to 1977. A survey of the manufacturers for whom Avante performed a majority of its contract work in 1977, 1978 and the first half of 1979 was conducted. Manufacturers that decreased purchases from Avante reported increasing sales of ladies' coats and increasing reliance on other domestic contracts for ladies' coats in the first half of 1979 compared to the same period in 1978.

Conclusion

After careful review, I determine that all workers of Avante Fashions, Hoboken, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

Beacon Tex Print, Ltd., Beacon, N.Y.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 16, 1979 in response to a worker petition received on July 10, 1979 which was filed by the United Textile Workers of America on behalf of workers and former workers printing textiles at Beacon Tex Print, Limited, Beacon, New York. In the following determination, without regard to whether any of the criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of finished fabric (bleached, dyed, and printed) decreased during the first quarter of 1979 compared with the first quarter of 1978. The ratios of imports to domestic production and consumption have been less than 2 percent in each year since 1974.

The Department conducted a survey of Beacon Tex Print's customers for their purchases of imported finished fabric. Survey respondents reported they did not purchase imported fabric.

Conclusion

After careful review, I determine that all workers of Beacon Tex Print, Limited, Beacon, New York are denied eligibility to apply for adjustment assistance under Title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

[TA-W-5757]

Beattie Manufacturing Co., Little Falls, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 17, 1979 in response to a worker petition received on July 12, 1979 which was filed on behalf of workers and former workers producing rugs and carpets at Beattie Manufacturing Company, Little Falls, New Jersey. The investigation revealed that the plant produces tufted carpets and does not produce rugs. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of tufted carpets and rugs were negligible relative to U.S. production in each year from 1974 through the first quarter of 1979. Over the past five years, U.S. imports have been less than one-half of one percent of

the U.S. production of tufted carpets and rugs.

Conclusion

After careful review, I determine that all workers of Beattie Manufacturing Company, Little Falls, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

Cerro Coat, Inc., Hoboken, N.J.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 27, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Cerro Coat, Inc., Hoboken, New Jersey. The investigation revealed that the plant primarily produces ladies' coats and ladies' raincoats. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses' and children's coats and jackets and U.S. imports of women's, girls' and infant's raincoats increased absolutely in 1978 compared to 1977.

The Department conducted a survey of the manufacturers for which Cerro Coat, Inc. produces ladies' coats and raincoats. The survey indicated that one manufacturer, which represented the majority of contract work performed by Cerro Coat, Inc. in 1977, decreased contracts for ladies' coats with Cerro Coat, Inc. in 1978 compared to 1977 and increased purchases of imported ladies' coats.

This manufacturer also decreased contract work with other domestic sources in 1978. The same manufacturer decreased contracts for ladies' coats for Cerro Coat, Inc. and increased purchases of imported coats in the first six months of 1979 compared to the first six months of 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' coats and raincoats produced at Cerro Coat, Inc., Hoboken, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Cerro Coat, Inc., Hoboken, New Jersey engaged in employment related to the production of ladies' coats and raincoats who became totally or partially separated from employment on or after June 5, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th Day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

[TA-W-5663]

Chrysler Corp., Lyons Trim Plant, Lyons, Mich.; Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, on August 3, 1979, the Department of Labor issued a certification of eligibility to apply for adjustment assistance to workers engaged in employment related to the production of seat cushion and back covers, and door and quarter trim panels at Chrysler Corporation's Lyons Trim Plant, Lyons, Michigan.

Subsequent to the certification, the Office of Trade Adjustment Assistance received an inquiry requesting coverage of all workers at Chrysler Corporation's Lyons Trim Plant. As a result of investigation TA-W-5663, workers engaged in employment related to the production of vinyl roofs were denied eligibility to apply for adjustment assistance benefits. Vinyl roof production had been shifted to another domestic Chrysler plant and was not affected by imports. Further investigation revealed that workers at the Lyons Trim Plant are not separately identifiable by product line, as originally believed. All workers at the plant were used interchangeably on all three product lines. Any worker who performed work related to the production of vinyl roofs also spent a substantial amount of time in work related to the production of seat cushion and back covers, and door and quarter trim panels. Therefore, the certification is revised to cover all workers at Chrysler Corporation's Lyons Trim Plant, Lyons, Michigan.

Conclusion

The revised certification applicable to TA-W-5663 is hereby issued as follows:

All workers of Chrysler Corporation's Lyons Trim Plant, Lyons, Michigan who became totally or partially separated from employment on or after February 1, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

[TA-W-5703]

Collateral Control Corp., DeQueen, Ark.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 5, 1979 in response to a worker petition received on June 29, 1979 which was filed on behalf of workers and former workers of Collateral Control Corporation, St. Paul, Minnesota, performing bonded warehousing operations at Rubber Corporation of Arkansas, DeQueen, Arkansas.

It is concluded that all of the requirements have been met.

Workers of Rubber Corporation of Arkansas, DeQueen, Arkansas were certified eligible to apply for adjustment assistance on March 25, 1977 TA-W-1520; (42 FR 18162, April 5, 1977). That determination resulted from a finding that increased imports of articles like or directly competitive with the canvas and rubber footwear produced by Rubber Corporation of Arkansas contributed importantly to the decline in sales and production and separation of workers of that firm.

Investigation revealed that several employees of Rubber Corporation of Arkansas engaged in warehousing operations were actually on the payroll of Collateral Control Corporation (headquarters-Minneapolis, Minnesota) in order to satisfy requirements for third party control of inventory used as collateral to secure bank financing. Workers on the Collateral Control payroll performed warehousing operations identical to those performed by warehouse workers on the payroll of Rubber Corporation of Arkansas. The reduced operations and ultimate closure of Rubber Corporation of Arkansas resulted in the layoff of warehouse employees on the payroll of Collateral Control Corporation as well as those on the payroll of Rubber Corporation of Arkansas. Thus, the conditions surrounding the layoff of workers on the payroll of Collateral Control Corporation at the DeQueen plant were identical to those surrounding the layoff of workers of Rubber Corporation of Arkansas at that facility.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the canvas and rubber footwear produced at Rubber Corporation of Arkansas, DeQueen, Arkansas contributed importantly to the decline in sales or production and to the total or partial separation of workers of Collateral Control Corporation, DeQueen, Arkansas. In accordance with the provisions of the Act, I make the following certification:

All workers of Collateral Control Corporation, DeQueen, Arkansas who became totally or partially separated from employment on or after June 20, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

[TA-W-5436]

Cooper-Wiss, Newark, N.J.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on May 21, 1979 in response to a worker petition received on May 18, 1979 which was filed by the AFL-CIO, Local 262, New Jersey on behalf of workers and former workers producing scissors and shears at Cooper-Wiss, Newark, New Jersey. It is concluded that all of the requirements have been met.

U.S. imports of scissors and shears have increased absolutely in 1978 compared to 1977, and in the first quarter of 1979 compared to the like quarter of 1978.

The Department conducted a survey of customers purchasing scissors and shears from Cooper-Wiss, Newark, New Jersey. Some of the customers responding to the survey indicated decreased purchases of scissors and shears from Cooper-Wiss and simultaneous increases in the purchases of products from foreign sources in 1978 compared to 1977, and in the first quarter of 1979 compared to the like quarter of 1978.

Cooper-Wiss began shut down procedures of the Newark, New Jersey plant on August 6, 1979. Workers at the Newark plant are scheduled for lay off by December 1979.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with scissors and shears produced at Cooper-Wiss, Newark, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

"All workers of Cooper-Wiss, Newark, New Jersey, engaged in employment related to the production of scissors and shears at the Newark, New Jersey facility who became totally or partially separated from employment on or after July 27, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974."

Signed at Washington, D.C. this 22nd day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

Cousins, West New York, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing ladies coats at Cousins, West New York, New Jersey. In the following determination, without regard to whether any of the criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivison have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A department survey of manufacturers for whom Cousins performed contract work revealed that those manufacturers which decreased their business with Cousins during the period of investigation increased their business with other domestic sources and experienced increasing sales of ladies' coats. The manufacturer which accounted for the bulk of Cousins' business declines in the first five months of 1979 compared to the first five months of 1978 did not purchase imported ladies' coats, did not utilize foreign contractors.

Conclusion

After careful review, I determine that all workers of Cousins, West New York, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Cowan, Frank Manufacturing Co., Inc., San Francisco, Calif.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 7, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers formerly producing juniors' dresses at Cowan, Frank Manufacturing Company, Incorporated, San Francisco, California. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A Departmental survey was conducted with the customers of Cowan, Frank Manufacturing Company, Incorporated. The survey revealed that the majority of customers did not purchase imported juniors' dresses in 1977, 1978 or in the first four months of 1979. The major customer who purchased imported juniors' dresses made its first purchase from Cowan, Frank Manufacturing Company in the January through April period of 1979.

Conclusion

After careful review, I determine that all workers of Cowan, Frank Manufacturing Company, Incorporated, San Francisco, California are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Dante Fashions, Inc., Hoboken, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Dante, Hoboken, New Jersey. The investigation revealed that the correct corporate title is Dante Fashions, Incorporated. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Manufacturers for whom Dante did contract work who decreased contract work with Dante in 1978 compared with 1977 reported that their total sales of ladies' coats had remained substantially unchanged from 1977 to 1978 and that their imports of ladies' coats had decreased in 1978 compared with 1977. Those manufacturers that decreased contract work with Dante in the first half of 1979 compared to the same period in 1978 have also reported increased sales of ladies' coats and increased contracts with other domestic contractors during this period.

Conclusion

After careful review, I determine that all workers of Dante Fashions, Incorporated, Hoboken, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of August 1979.

Delcor Fashions Co., Inc., Jersey City, N.J.; Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Delcor, Jersey City, New Jersey. The investigation revealed that the correct name of the company is Delcor Fashions Company, Incorporated. In the following determination, without regard to whether any of the criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A survey of the manufacturers Delcor Fashions worked for in 1977, 1978 and 1979 was conducted. Manufacturers that decreased purchases from the subject firm either decreased imports of ladies' coats or increased their contracts with other domestic sources during the period under investigation.

Conclusion

After careful review, I determine that all workers of Delcor Fashions Company, Incorporated, Jersey City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

Donna Coal Corp., Ethel, W. Va.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 19, 1979 in response to a worker petition received on June 12, 1979 which was filed on behalf of workers and former workers producing coal at Donna Coal Corporation, Ethel, West Virginia. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Employment at Donna Coal Company remained unchanged in 1978 compared to 1977. The major customer of Donna Coal Company increased purchases of domestically produced coke in the first five months of 1979 compared to the first five months of 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude all workers of Donna Coal Corporation, Ethel, West Virginia are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

E. I. du Pont de Nemours & Co., Inc., Chambers Works Deepwater, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 22, 1979 in response to a worker petition received on June 18, 1979 which was filed by the Chemical Workers Association, Incorporated on behalf of workers and former workers producing dyes, tetra ethyl lead, Freon, various chemical intermediates and Hylene at the Chambers Works, Deepwater, New Jersey of E. I. Dupont de Nemours and Company, Incorporated. The investigation revealed that the plant produces primarily dyes, cyclic intermediate chemicals, gasoline anti-knock compounds containing tetra ethyl lead, Freon and several elastomers including Hylene. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Dyes and Cyclic Intermediate Chemicals

The Office of Trade Adjustment Assistance conducted a survey of customers which purchase dyes and cyclic intermediate chemicals from Dupont. None of the customers of cyclic intermediates who responded reduced purchases of cyclic intermediates from Dupont and increased purchases of imported cyclic intermediate chemicals in 1978 compared to 1977 and in the first half of 1979 compared to the first half of 1978. None of the customers of dyes reduced purchases of dyes from Dupont and increased purchases of imports in 1978 compared to 1977. Those customers who reduced purchases of dyes from Dupont and increased purchases of imported dyes in the first half of 1979 compared to the first half of 1978 did not represent a significant proportion of dyes sales from the Chambers Works in 1978. Sales and production of dyes and cyclic intermediates at the Chambers Works increased in the third and fourth quarters of 1978 and in the first and second quarters of 1979 compared to the same quarters one year earlier.

United States exports of cyclic intermediates and dyes have exceeded imports in every year from 1973 through 1978.

Elastomers

The Office of Trade Adjustment Assistance conducted a survey of customers which purchase the elastomers made at the Chambers Works. The customers were asked about their purchases of the specific elastomers made at the Chambers Works and any other products that they could use for the same purpose. None of the customers responding purchased any imported products in this category in 1977, 1978 or in the first half of 1979.

Gasoline Anti-Knock Compounds

The Office of Trade Adjustment Assistance conducted a survey of Dupont's customers of gasoline anti-knock compounds. None of the customers responding purchased any imported gasoline anti-knock compounds in 1977, 1978 or in the first half of 1979. Customers indicated that a switch to unleaded gasoline in response to U.S. Government environmental regulations is reducing the demand for anti-knock compounds. The U.S. ratio of imports to domestic production for gasoline anti-knock compounds was less than one percent in every year from 1973 through 1978 and in the first half of 1979. More than 10 percent of U.S. production of gasoline anti-knock compounds was exported in each of those same time periods.

Freon

The Office of Trade Adjustment Assistance conducted a survey of customers who purchased Freon products from Dupont. Customers were asked about their purchases of Freons made at the Chambers Works and their generic equivalents. None of the customers responding purchased any imports in these categories in 1977, 1978 or the first half of 1979. Customers indicated that U.S. government regulations restricting the use of

fluorocarbons as aerosol propellents have greatly reduced the demand for Freon.

Conclusion

After careful review, I determine that all workers of the Chambers Works, Deepwater, New Jersey of E. I. Dupont de Nemours and Company, Incorporated, Wilmington, Delaware are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

Ella Coat Co., Jersey City, N.J.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Ella, Jersey City, New Jersey. The investigation revealed that the company's name is the Ella Coat Company. It is concluded that all of the requirements have been met.

Imports of women's, misses' and children's coats and jackets increased from 1977 to 1978.

A Department survey of the manufacturers for whom Ella performed contract work indicated that they manufacturers decreased their business with Ella from 1977 to 1978 and that the experienced decreasing sales over that same period of time. A subsequent survey of the manufacturers' customers indicated that those customers had decreased their business with domestic manufacturers and increased their purchases of ladies' coats from foreign sources during the period under investigation.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' coats produced at the Ella Coat Company, Jersey City, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Ella Coat Company, Jersey City, New Jersey who became totally or partially separated from employment on or after August 1, 1978 and before March 15, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers who were separated on or after March 15, 1979 are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C. this 22nd day of August 1979.

Harry J. Gilman,

Supervisory International Economist, Office of Foreign Economic Research.

Fortex Manufacturing Co., Inc., Fort Deposit, Ala., Commerce Street, Greenville, Ala., Thamen Street, Greenville, Ala.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 14, 1979, in response to a worker petition received on June 7, 1979, which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing boxer shorts, jogging shorts, ladies' blouses, pajamas and men's shirts at Fortex Manufacturing Company, Incorporated facilities in Ft. Deposit, Alabama; Commerce Street, Greenville, Alabama; and Thamen Street, Greenville, Alabama. The investigation revealed that the plants produced primarily men's pajamas, men's robes, ladies' robes, ladies' blouses, and men's athletic shorts. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A Department survey of Fortex Manufacturing Company, Incorporated customers indicated that respondents that purchased imported men's pajamas and robes, athletic shorts, women's robes and blouses and decreased purchases from the subject firm represented an insignificant proportion of Fortex's decline in total sales.

Conclusion

After careful review, I determine that all workers of Fortex Manufacturing Company, Incorporated facilities in Ft. Deposit, Alabama; Commerce Street, Greenville, Alabama; and Thamen Street, Greenville, Alabama, are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Harry J. Gilman,

Supervisory International Economist, Office of Foreign Economic Research.

Greif & Co., Baltimore, Md., Everett, Pa., Hanover, Pa., Fredricksburg, Va., Verona, Va.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the act must be met.

The investigation was initiated on July 5, 1979 in response to a worker petition received on June 26, 1979 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing men's tailored clothing at the Baltimore, Maryland, Everett, Pennsylvania, Hanover, Pennsylvania, Fredricksburg, Virginia and Verona, Virginia plants of Greif and Company. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutely.

Evidence developed during the course of the investigation indicted the petitioning facilities operate as integrated manufacturing operation. Total company sales and production increased significantly in 1977 compared to 1976 and then remained at the same level in 1978 compared to 1977 and in the first six months of 1979 compared to the same period of 1978.

Conclusion

After careful review, I determine that all workers of Baltimore, Maryland, Everett, Pennsylvania, Hanover, Pennsylvania, Fredricksburg, Virginia and Verona, Virginia plants of Greif and Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Highlander, Ltd., Morganton, N.C.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 22, 1979 in response to a worker petition received on June 18, 1979 which was filed on behalf of workers and former workers producing ladies' knit tops at the Morganton, North Carolina plant of Highlander, Limited. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses' and children's sweaters increased both absolutely and relative to domestic production from 1975 to 1976. Imports of sweaters increased in 1977 as compared to the average level of imports for the years 1974 through 1976. The ratio of imports of sweaters to domestic production (IP ratio) exceeded 140 percent in 1976 and in 1977. The IP ratio in 1977 was higher than the average IP ratio for the period 1974 through 1976.

A survey was conducted by the U.S. Department of Commerce of customers of Highlander, Limited. The survey revealed that major customers increased their purchases of imported ladies' tops and sweaters and decreased their purchases from Highlander, Limited in 1977 as compared to 1976 and in 1976 as compared to 1975.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' knit tops produced at the, Morganton, North Carolina plant of Highlander, Limited contributed importantly to the decline in sales or production and to the total or partial separation of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of the Morganton, North Carolina plant of Highlander, Limited who became totally or partially separated from employment on or after June 14, 1978 and before January 1, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers of the Morganton, North Carolina plant of Highlander, Limited who became totally or partially separated from employment on or after January 1, 1979 are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C. this 21st day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

Italcraft, Inc., Hoboken, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 26, 1979 in response to a worker petition received on June 11, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Italcraft, Hoboken, New Jersey. The investigation revealed that the correct name of the company is Italcraft, Incorporated. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The value of Italcraft's sales increased in 1978 compared to 1977. A survey of all of the manufacturers Italcraft performed contract work for in 1977, 1978 and the first half of 1979 was conducted. None of these manufacturers imported ladies' coats and only one experienced a decline in the value of their sales in the first half of 1979 compared to the same period in 1978. This manufacturer reported that its sales decline was due to their inability to purchase a suede-like synthetic material which was withdrawn from the market late in 1978.

Conclusion

After careful review, I determine that all workers of Italcraft, Incorporated, Hoboken, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

James F. Taylor,

Director, Office of Management Administration and Planning.

BILLING CODE 4510-28-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports

of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 10, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 10, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 21st day of August 1979.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-28

[TA-W-5739]

Jafree Shirt Co., Inc., Wytheville, Va.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 11, 1979 in response to a worker petition received on June 29, 1979 which was filed on behalf of workers and former workers producing men's dress and sport shirts at the Jafree Shirt Company, Incorporated, Wytheville, Virginia. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' woven dress and business shirts increased from 64,446 thousand units in 1977 to 73,460 thousand units in 1978. Imports continued to increase to 21,087 thousand units in the first quarter of 1979 compared to 17,168 thousand units in the first quarter of 1978. The ratio of imports to domestic production increased from 68.8 percent in 1977 to 79.1 percent in 1978.

U.S. imports of men's and boys' woven sport shirts increased from 75,274 thousand units in 1977 to 95,974 thousand units in 1978. Imports continued to increase to 20,880 thousand units in the first quarter of 1979 compared to 17,415 thousand units in the same 1978 period. The ratio of imports to domestic production increased from 47.1 percent in 1977 to 65.8 percent in 1978.

Jafree Shirt Company produces men's shirts on contract for several shirt manufacturers. Results of Department surveys indicate that customers of these manufacturers increased purchases of imported men's shirts while reducing purchases from the manufacturers in 1978 and the first half of 1979. This resulted in decreasing contract work for Jafree.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's dress and sport shirts produced by the Jafree Shirt Company, Incorporated, Wytheville, Virginia contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Jafree Shirt Company, Incorporated, Wytheville, Virginia who became totally or partially separated from employment on or after November 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of August 1979.

C. Mitchael Aho,
Director, Office of Foreign Economic Research.

Kingston Knitting Mills, Inc., Kingston, N.Y.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 2, 1979 in response to a worker petition received on June 26, 1979 which was filed on behalf of workers and former workers producing knitted sweaters at Kingston Knitting Mills, Incorporated, Kingston, New York. The investigation revealed that the plant produces men's knitted shirts and sweaters. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' sweaters, knit cardigans and pullovers and U.S. imports of men's and boys' knit sport and dress shirts both increased absolutely and relatively in 1978 compared with 1977.

The Department surveyed major customers who decreased purchases from Kingston Knitting. The respondents reported increased total imports of men's knitted shirts and sweaters in 1978 compared with 1977. Customers who accounted for most of Kingston's decline in sales in the first half of 1979 compared with the first half of 1978 indicated increased imports of either men's knitted shirts or sweaters, or both, during this period.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the men's knitted shirts and sweaters produced at Kingston Knitting Mills, Incorporated, Kingston, New York contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Kingston Knitting Mills, Incorporated, Kingston, New York who became totally or partially separated from employment on or after June 22, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

James F. Taylor,
Director, Office of Management, Administration and Planning.

Modern Coat Co., Annex, Union City, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at the Modern Coat Company, Annex, Union City, New Jersey. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A Department survey of the manufacturer for whom Modern Annex performs contract work indicated that the manufacturer decreased its business with Modern Annex from 1977 to 1978 but did not purchase imported ladies' coats and that the manufacturer's sales decreased from 1977 to 1978. A Department survey of the manufacturer's customers indicated that those customers decreased their purchases from the manufacturer and substantially increased their purchases from other domestic sources. Imported coats represented a declining portion of these customers' total purchases of ladies' coats in 1978 compared to 1977.

Conclusion

After careful review, I determine that all workers of the Modern Coat Company Annex, Union City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of August 1979.

C. Michael Aho,
Director, Office of Foreign Economic Research.

[TA-W-4957]

New-Tronics Corp., Brook Park, Ohio; Negative Determination Regarding Application for Reconsideration

By application dated July 30, 1979, on which the Department granted a filing time extension, the petitioning union requested adminstrative reconsideration of the Department of Labor's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance in the case of workers and former workers producing communication antennas at the New-Tronics Corporation, Brook Park, Ohio. The determination was published in the **Federal Register** on May 22, 1979, (44 FR 29756).

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justifies reconsideration of the decision.

The petitioning union claims in its application for reconsideration that company officials stated verbally and through news articles that foreign imports were having a serious effect on their industry.

The Department's review of the investigative file revealed that workers at New-Tronics were denied eligibility because they did not meet the Trade Act of 1974's test that increased imports "contributed importantly" to worker separations. Evidence developed in the course of the investigation indicated that most customers of the subject firm did not purchase foreign antennas and the few who increased their foreign purchases also increased their purchases of anntennas from New-Tronics.

The Department does not see any validity in the petitioning union's claim that imports of CB antennas had a serious impact on New-Tronics' production of antennas in 1978 and 1979. Given the coverage limitation of the Act, whereby a certification may not cover layoffs which occurred more than one year prior to the date of the petition, possible import impact in an earlier time period would not be relevant to the subject petition. Worker separations at New-Tronics resulted from the overall decline in the CB antenna market.

Conclusion

After review of the application and the investigative file, I conclude that there has been no error or misinterpretation of fact or misinterpretation of the law which would justify reconsideration of the Department of Labor's prior decision. The application is, therefore, denied.

Signed at Washington, D.C., this 24th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

Penn State Coat & Apron, Clifton Heights, Pa.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 5, 1979 in response to a worker petition received on June 26, 1979 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing washable service apparel at Penn State Coat and Apron, Clifton Heights, Pennsylvania. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed in the course of the investigation revealed that imports of washable service apparel are negligible.

Conclusion

After careful review, I determine that all workers of Penn State Coat and Apron, Clifton Heights, Pennsylvania are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Poole Silver Co., Fall River, Mass.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 4, 1979 in response to a worker petition received on May 29, 1979 which was filed on behalf of workers and former workers producing silver-plated holloware at Poole Silver Company, Fall River, Massachusetts. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Most of the surveyed customers of Poole Silver Company did not decrease purchases from Poole Silver and increase purchases of imports.

Conclusion

After careful review, I determine that all workers of Poole Silver Company, Fall River, Massachusetts are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

[TA-W-5613]

Princeton Textile Printing Corp., New York, N.Y.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed on behalf of workers and former workers engaged in employment related to the textile printing of men's shirts and women's dresses at Princeton Textile Printing Corporation, New York, New York. The investigation revealed that the plant prints and finishes cotton and blended woven fabrics. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Department conducted a survey of the converters for which Princeton Textile Printing Corporation printed fabric. None of the converters responding to the survey utilized any foreign printers or purchased imported printed fabric in 1977, 1978 or in the first half of 1979. Customers of Princeton reported an increased reliance on domestic sources for printed fabric during this time period.

Conclusion

After careful review, I determine that all workers of Princeton Textile Printing Corporation, New York, New York are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Harry J. Gilman,

Supervisory International Economist, Office of Foreign Economic Research.

Robaix Fabrics, Inc., New York, N.Y.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the act must be met.

The investigation was initiated on June 28, 1979 in response to a worker petition received on June 25, 1979 which was filed on behalf of workers and former workers producing printed fabrics: polyester, nylon, actate/nylon, at Robaix Fabrics, Incorporated, New York, New York. In the following determination, without regard to whether any of the criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivison have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of finished fabric (bleached, dyed, and printed) decreased absolutely in terms of quantity in the first quarter of 1979 compared with the first quarter of 1978. The ratio of imports to domestic production has been less than two percent in each year from 1974 through 1977. (Data for 1978 was not available.)

The Department conducted a survey of Robaix Fabrics' customers. Survey respondents reported they did not increase purchases of imported finished fabric and decrease purchases of fabric from Robaix during comparable time periods in 1977 through June 1979.

Conclusion

After careful review, I determine that all workers of Robaix Fabrics, Incorporated, New York, New York are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

United States Steel Corp., United States Steel Products Division, Camden (Delair), N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 5, 1979 in response to a worker petition received on June 29, 1979 which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel drums and pails at the Camden (Delair), New Jersey plant of U.S. Steel Products, a division of the U.S. Steel Corporation. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Department conducted a survey of some of the customers of the Camden plant. Only one of the respondents reported purchases of imported pails and drums and that customer reduced purchases of imports both in 1978 compared to 1977 and in the first half of 1979 compared to the like 1978 period.

The ratio of imports to the domestic shipments of pails and drums was less than one percent in 1978 and in the first half of 1979.

Conclusion

After careful review, I determine that all workers of the Camden (Delair), New Jersey plant of U.S. Steel Products, a division of the U.S. Steel Corporation, are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

BILLING CODE 4510-28-M

[TA-W-5646]

United States Steel Corp., Eastern Limestone Operations, Buffalo, N.Y.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 22, 1979 in response to a worker petition received on June 18, 1979 which was filed by the AFL–CIO, Grain Millers, Local 110 on behalf of workers and former workers producing pulverized limestone at United States Steel Corporation, Eastern Limestone Operations, Buffalo, New York. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The department conducted a survey of customers representing a substantial percentage of purchases of crushed limestone from U.S. Steel, Eastern Limestone Operations, Buffalo, New York. None of these customers did any importing at all in 1977, 1978 or 1979 thru June. Customer responses indicated no evidence of competition between the crushed limestone produced at the Buffalo, New York facility of U.S. Steel and imported lime or limestone products.

The Import/Production ratio for crushed limestone was .3 percent in 1977 and 1978. Industry sources indicate that imports of crushed (pulverized) limestone are negligible due to the low value of limestone relative to its weight and for this reason it is not feasible to transport limestone over substantial distances.

Conclusion

After careful review, I determine that all workers of the United States Steel Corporation, Eastern Limestone Operations, Buffalo, New York are denied eligibility to apply for adjustment under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

[TA-W-5615]

Verdi Fashions Co., Inc., Hoboken, N.J., Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats and suits at Verdi, Hoboken, New Jersey. The investigation revealed that the correct name of the company is Verdi Fashions Company, Incorporated. It is concluded that all of the requirements have been met.

Imports of ladies' coats increased both absolutely and relative to domestic production in 1978 compared to 1977.

Imports of ladies' suits increased absolutely in 1978 compared to 1977.

A survey of the major manufacturers Verdi Fashions worked for in 1978 and the first half of 1979 was conducted. A manufacturer that accounted for a significant portion of Verdi's sales decreased purchases from the subject firm and other domestic contractors and increased purchases of imported ladies' coats and suits in 1977 compared to 1979 in the first half of 1979 compared to the same period in 1978. This manufacturer expects to continue to increase its reliance on imported coats in the future.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the ladies' coats and suits produced at Verdi Fashions Company, Incorporated, Hoboken, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Verdi Fashions Company, Incorporated, Hoboken, New Jersey who became totally or partially separated from employment on or after November 5, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of August 1979.

Harry J. Gilman,

Supervisory International Economist, Office of Foreign Economic Research.

Vinco Fashions Co., Inc., Jersey City, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 22, 1979 in response to a worker petition received on June 18, 1979 which was filed on behalf of workers and former workers producing ladies' coats at Vinco Fashions Company, Inc., Jersey City, New Jersey. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation indicated that contracting manufacturers of Vinco Fashions Company, Inc. did not increase reliance upon imported ladies' coats during the period under investigation.

The Department conducted surveys of the major manufacturers for which Vinco Fashions Company, Inc. provides contract work. The surveys revealed that the manufacturers either did not increase purchases of imported ladies' coats or the manufacturers increased contracts with other domestic sources.

Conclusion

After careful review, I determine that all workers of Vinco Fashions Company, Inc., Jersey City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of August 1979.

BILLING CODE 4510-28-M

Privacy Act of 1974; System of Records

Pursuant to 5 U.S.C. 552(a)(e)(4), Section 3 of the Privacy Act of 1974, the Department of Labor hereby publishes notice of a new system of records. The Department of Labor systems were previously published at 42 FR 49654 (September 27, 1977) and in Volume 2 of the 1977 Privacy Act Issuances Compilation. Notice is given of the addition of DOL/LMSA-19, Private Pension Plan Benefits Payments.

The system of records will become effective October 1, 1979, unless otherwise indicated through notice in the **Federal Register**.

Signed at Washington, D.C., this 28th day of August, 1979.

Ray Marshall,

Secretary of Labor.

AGENCY: Labor-Management Services Administration

ACTION: Issuance of new system of records entitled Private Pension Plan Benefits Payments.

SUMMARY: The purpose of this document is the issuance of a new system of records under the Privacy Act of records compiled by the contractor, Arthur Young & Company, for the creation of a data base for the Pension and Welfare Benefits Program of the Department of Labor in conjunction with the Social Security Administration. The records contain names, social security numbers, and certain other personal data related to the level of private pension plan benefit amounts being collected by beneficiaries as of December 1978.

DATES: Effective date of the system: October 1, 1979.

FOR FURTHER INFORMATION CONTACT: John P. Mondejar, (202) 523-9751 or Walter W. Kolodrubetz, (202) 523-9421.

SUPPLEMENTAL INFORMATION: The new system of records is being compiled in order to set up a data base with the benefits received by private pension plan beneficiaries, to be linked later on with the social security benefits they receive using social security numbers as the matching method. The data will be analyzed by the staff of the President's Commission on Pension Policy, the Social Security Administration and the U.S. Department of Labor in order to address certain crucial policy issues regarding the role of private pensions in meeting the economic security needs of the aged. For a complete list of all the information to be collected through the survey instrument in question, see attachment. The information collected will be coded and maintained on a magnetic tape under lock and key.

DOL/LMSA-19

SYSTEM NAME:

Private Pension Plan Benefit Payments.

SYSTEM LOCATION:

Arthur Young & Company, 1025 Connecticut Ave., N.W., Washington, D.C. 20036, U.S. Department of Labor, 200 Constitution Ave., N.W., Washington, D.C. 20210, Social Security Administration, Baltimore, Md.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Retirees, Terminated Employees and Beneficiaries.

CATEGORIES OF RECORDS IN THE SYSTEM:

Data collected in field survey and transferred into magnetic tape.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Chapter 43 of Title 38, United States Code and predecessor statutes.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Arthur Young & Company to create data base. The Social Security Administration to link up with social security records and creates final data base. The Department may hire other contractors for further tape manipulation or to rearrange the contents of the tape.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape.

RETRIEVABILITY:

Indexed by social security number.

SAFEGUARDS:

Tapes and other documents containing the personal information being collected and processed by Arthur Young & Company under this contract are to be accessible only to personnel working on the contract to create the data base. Materials are not to be used for any other purpose. The same safeguards hold for the U.S. Department of Labor and the Social Security Administration.

RETENTION AND DISPOSAL:

Has not yet been decided.

SYSTEMS MANAGER(S) AND ADDRESS:

Director, Office of Policy Planning and Research, Pension and Welfare Benefit Programs, Labor Management Services Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

NOTIFICATION PROCEDURE:

As above.

RECORD ACCESS PROCEDURES:

As above.

CONTESTING RECORD PROCEDURES:

As above.

RECORD SOURCE CATEGORIES:

Pension plan records of private pension plan administrators.

[FR Doc. 79-27350 Filed 8-30-79; 8:45 am]

BILLING CODE 4510-23-M

Office of Pension and Welfare Benefit Programs

[Prohibited Transaction Exemption 79-44; Exemption Application No. D-1229]

Exemption From the Prohibitions for Certain Transactions Involving the Construction Fasteners, Inc. Profit Sharing Plan

AGENCY: Department of Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption would permit the sale of fifteen Investment Certificates of John Wesley College, a Michigan non-profit corporation, by the Genasee Merchants Bank & Trust, Co. (the Trustee), as trustee for the Construction Fasteners, Inc. Profit Sharing Plan (the Plan), to the Construction Fasteners, Inc. (the Employer).

FOR FURTHER INFORMATION CONTACT: Mr. C. E. Beaver of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, (202) 523-8882. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On June 29, 1979 notice was published in the **Federal Register** (44 FR 38008) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (E) of the Code, for the sale of fifteen, $1,000 face value each, Investment Certificates of John Wesley College, a Michigan corporation, by the Trustee, for the Plan, to the Employer for not less consideration than $15,000, or the current fair market value thereof, whichever is higher. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties

respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interet of the plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the plan.

The restriction of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of fifteen John Wesley College Investment Certificates by the Trustee of the Plan to the Employer for not less than $15,000, or the current fair market value thereof, whichever is higher.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C., this 27th day of August 1979.

Ian D. Lanoff,

Administrator for Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[FR Doc. 79-27207 Filed 8-30-79; 8:45 am]

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 79-43; Application No. D-1216]

Exemption From the Prohibitions for Certain Transactions Involving the Sheboygan Memorial Hospital Retirement Plan and Trust

AGENCY: Pension and Welfare Benefit Programs Office, Department of Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption permits the sale of a mortgage and certain securities by the Sheboygan Memorial Hospital Retirement Plan and Trust (the Plan) to Sheboygan Memorial Hospital (the Employer).

FOR FURTHER INFORMATION CONTACT: Frederic Burke of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, (202) 523-8515. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On May 22, 1979 notice was published in the **Federal Register** (44 FR 29761) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) through (E) of the Code, for sale by the Plan to the Employer for cash of certain securities and a mortgage for a price not less than the greater of either the fair market value at the time of sale, or face value. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition, the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department.

This application was filed with both the Department and the Internal Revenue Service. However, the notice of pendency was issued and the exemption is being granted, solely by the Department because, effective December 31, 1978 section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the

entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interest of the Plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plan.

The restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the sale by the Plan to the Employer for cash of the Prange securities and the mortgage at a price not less than the greater of either the fair market value at the time of sale, or face value.

The availability of this exemption is subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C. this 27th day of August 1979.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 79-45; Exemption Application No. D-207]

Exemption From the Prohibitions for a Certain Transaction Involving the Profit Sharing Plan of Allied Investment Credit Corp.

AGENCY: Department of Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption exempts the loan of $24,852.21 by the Allied Investment Credit Corporation Profit Sharing Plan (the Plan) to the Allied Investment Credit Corporation (the Employer). The loan was entered into before the effective date of the Employee Retirement Income Security Act of 1974 (the Act), but after July 1, 1974, the date specified in the transition rules contained in sections 414 and 2003 of the Act.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, (202) 357-0040. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On June 15, 1979 notice was published in the **Federal Register** (44 FR 34657) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) (A) and (E) of the Code, for a transaction described in an application filed by the Employer. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department.

The application was filed with both the Department and the Internal Revenue Service. However, the notice of pendency was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor.

Since the publication of the proposed exemption, the applicant has represented that on June 27, 1979, the Employer paid to the Plan $26,683.78, which repaid in full the principal and interest outstanding on the subject loan.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(A) through (E) of the Code, shall not apply, effective January 1, 1975, to the loan agreement entered into on December 3, 1974, in which the Plan loaned $24,852.21 to the Employer.

The availability of this exemption is subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction which is the subject of this exemption.

Signed at Washington, D.C., this 27th day of August 1979.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 79-46; Exemption Application No. D-031]

Exemption from the Prohibitions for Certain Transactions Involving Weir's Early American Shop, Inc. Profit Sharing and Retirement Plan

AGENCY: Department of Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption exempts the leasing of real property by the Weir's Early American Shop, Inc. Profit Sharing and Retirement Plan (the Plan) to Weir's Early American Shop, Inc. (the Employer), and the subsequent sale of the property by the Plan to Mr. Dan Weir. The lease was entered into before the effective date of the Employee Retirement Income Security Act of 1974 (the Act), but after July 1, 1974, the date specified in the transition rules contained in sections 414 and 2003 of the Act.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, (202) 357-0040. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 13, 1979 notice was published in the Federal Register (44 FR 40956) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and from the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1954 (the Code) by reasons of section 4975(c)(1)(A) through (E) of the Code, for transactions described in an application filed by the trustees of the Plan. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested persons might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department. The applicaton was filed with both the Department and the Internal Revenue Service. However, the notice of pendency was issued and the exemption is being granted soley by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsbility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemption and transitional rules. Furthermore, the fact that a transaction is subject to an administraive or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interest of the plan and of its participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the plan.

Accordingly, the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply effective January 1, 1975, to the leasing of certain property described in the application from the Plan to the Employer for the rental amount stated in the lease, and the sale of the property by the Plan to Dan Weir on June 25, 1976, for the sum of $101,481.92, provided that such amount was not less than the fair market value of the property on that date.

The availability of this exemption is subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions which are the subject of this exemption.

Signed at Washington, D.C., this 27th day of August 1979.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 79-47; Exemption Application No. D-842]

Exemption from the Prohibitions for Certain Transactions Involving John Ostrander Co., Inc. Employees' Profit Sharing Trust and John Ostrander Co., Inc. Employees' Pension Trust

AGENCY: Department of Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption will allow John Ostrander Co., Inc. Employees' Profit Sharing Trust and John Ostrander Co., Inc. Employees' Pension Trust (the Plans) to sell their partnership interests in the Adams Court Holding Company to John N. Ostrander, a party in interest.

Since Mr. Ostrander is the sole stockholder and employee of the John Ostrander Co., Inc. and the only participant in the Plans, there is no jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (the Act) pursuant to 29 CFR 2510.3-3(c)(1). However, there is jurisdiction under Title II of the Act under section 4975 of the Internal Revenue Code of 1954 (the Code).

FOR FURTHER INFORMATION CONTACT: Alan H. Levitas of the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, (202) 523-8884. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On June 26, 1979 notice was published in the Federal Register (44 FR 37340) of the pendency before the Department of Labor (the Department) of a proposal to grant an exemption from the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (E) of the Code, for transactions described in an application filed by the trustees of the Plans. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition the notice stated that any interested person might submit a written request that a public hearing be held relating to this exemption. No public comments and no requests for a hearing were received by the Department.

This application was filed with the Internal Revenue Service. However, the notice of pendency was issued and the exemption is being granted, solely by the Department because, effective December 31, 1978 section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Code, including any prohibited transaction provisions to which the exemption does not apply; nor does the fact the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) This exemption does not extend to transactions prohibited under secion 4975(c)(1)(F) of the Code.

(3) This exemption is supplemental to, and not in derogation of, any other provisions of the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

Exemption

In accordance with section 4975(c)(2) of the Code and the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and based upon the entire record, the Department makes the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the Plans and of their participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the Plans.

Accordingly, the following exemption is hereby granted under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in Rev. Proc. 75-26.

The taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the cash sale by the Plans of their partnership interests in the Adams Court Holding Company to John N. Ostrander for fair market value, which will consist of the capital accounts of the Plans in the partnership, adjusted upward to reflect the current fair market value of the Adams Court Apartments.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to this exemption.

Signed at Washington, D.C., this 27th day of August 1979.

Ian D. Lanoff,

Administrator for Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

Employee Benefit Plans; Notice to the Public Pursuant to Section 106 of the President's Reorganization Plan No. 4 of 1978

Pursuant to section 106 of the President's Reorganization Plan No. 4 of 1978, the Department of the Treasury is required to notify the Department of Labor of certain actions which it proposes to take under certain provisions of the Employee Retirement Income Security Act of 1974 (the Act).

On August 17, 1979, the Department of the Treasury notified the Department of Labor that the Department of the Treasury intends to publish a revenue procedure and a revenue ruling relating to the determination that a plan amendment is reasonable and provides only for de minimis increases in plan liabilities within the meaning of section 412(f)(2)(A) of the Internal Revenue Code. Both the revenue procedure and the revenue ruling would apply to, among other plans, collectively bargained plans.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs.

BILLING CODE 4510-29-M

Employee Benefit Plans; Notice to the Public Pursuant to Section 106 of the President's Reorganization Plan No. 4 of 1978

Pursuant to section 106 of the President's Reorganization Plan No. 4 of 1978, the Department of the Treasury is required to notify the Department of Labor of certain actions which it proposes to take under certain provisions of the Employee Retirement Income Security Act of 1974 (the Act).

On August 17, 1979, the Department of the Treasury notified the Department of Labor that the Department of the Treasury intends to publish a revenue procedure and a revenue ruling relating to the extension of the amortization period required to amortize any unfunded liabilities described in section 412(b)(2)(B) of the Internal Revenue Code (the Code) in accordance with section 412(e) of the Code. Both the revenue procedure and the revenue ruling would apply to, among other plans, collectively bargained plans.

[Application No. D-700]

Proposed Exemption for Certain Transactions Involving Charity Hospital Association, Inc. Deferred Compensation Plan

AGENCY: Department of Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and from certain taxes imposed by the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt loans of money by Charity Hospital Association, Inc. (CHA) to Charity Hospital Association, Inc. Deferred Compensation Plan (the Plan) and a guarantee which constitutes an extension of credit to the Plan by Rush-Presbyterian-St. Luke's Medical Center (Rush), with which CHA has merged. The proposed exemption, if granted, would affect participants and beneficiaries of the Plan, Rush, the Trustees of the Plan, CHA and other persons who have participated in the completed transactions and who would participate in the proposed transactions.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before October 1, 1979. The effective date of the exemption will be January 1, 1975.

ADDRESSES: All written comments and requests for a hearing (at least three copies) should be sent to: Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D-700. The application for exemption and the comments received will be available for public comment in the Public documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Robert N. Sandler of the Department of Labor, (202) 523-8882. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of sections 406(a), 406(b)(2) and 407(a) of the Act and from the taxes imposed by sections 4975(c)(1)(A) through (D) of the Code. The proposed exemption was requested in an application filed on behalf of the Trustees of the Plan, CHA and the Board of Trustees of CHA, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

The application was filed with both the Department and the Internal Revenue Service. However, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains facts and representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicants.

1. On November 27, 1975, CHA merged with Rush, as a result of which all CHA employees who were not terminated, became employees of Rush in January, 1976. The Plan was terminated as of January 31, 1976, and there have been no contributions for years ending after June 30, 1975. The Plan Trustees, who as of March 2, 1976, were all officers of both Rush and CHA, are in the process of liquidating the assets of the Plan. They have adopted a program to make immediate lump sum distributions of the benefits due under the Plan to all Plan participants over 60 years of age who had retired prior to November 25, 1975, which was the date that the present Trustees took over the administration of the Plan. These Plan participants are retirees who, under the terms of the Plan, are due payment of their benefits either in a lump sum or in annual installments.

2. In order to make the benefits payments, it was projected that the Plan would need $110,000.00 in cash. Also, until all Plan assets were liquidated, mortgage payments of $261.47 were due monthly on real property owned by the Plan in North Carolina (North Carolina Property) and payments of $25,000 plus interest were due quarterly on real property owned by the Plan in Florida (Florida Property).

3. In order to pay out Plan benefits and continue making mortgage payments on the two properities until they were sold, the Plan has, from time to time borrowed money from CHA. These loans totalled $398,514.51 as of May 31, 1979. The loans are interest free and payable at the time that Plan assets are totally liquidated and final payment of benefits is made to the participants under the terms of the Plan.

4. On January 12, 1979, the Florida Property was sold for $690,000 to Flamingo Developments of Stuart, Inc. (Flamingo), an independent third party, with the Plan taking back a purchase money mortgage of $490,000. The terms of the mortgage call for principal payments of $70,000 for seven years with annual interest at one percent above the prime rate at the Northern Trust Company (Northern Trust), with a maximum interest rate of 14 percent per annum and a minimum interest rate of 8 percent per annum. The Trustees of the Plan propose to sell the mortgage note at face value to Northern Trust, which is an independent third party. Northern Trust will purchase the note only if payment of the note is unconditionally guaranteed by Rush. As of June 30, 1978, Rush had a net worth of approximately $79 million.

5. The North Carolina Property has not yet been sold and since mortgage payments are due each month on this property, the Trustees intend to borrow each month the amount needed to pay the mortgage until the Flamingo mortgage note is sold by the Plan to Northern Trust. The remaining balance of the mortgage on the North Carolina Property as of May 30, 1979 was approximately $4,600.

6. In summary, the applicant represents that the loans satisfy the statutory criteria of section 408(a) of the Act because:

a. There would have been substantial adverse consequences to Plan assets if the loans had not been secured from CHA;

b. The loans are interest free and are not payable until Plan assets are totally liquidated and final payment of benefits is made to Plan participants.

Notice to Interested Persons

Notice of the pending exemption will be given to all interested parties including all persons who have served as Plan Trustees since January 1, 1975, Rush and active and inactive Plan participants on or before September 10, 1979. The notice will contain a copy of this notice of pendency of exemption, will inform each recipient of his right to comment on or request a hearing with regard to the proposed exemption, and will be sent to all interested parties by registered mail.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(1) and (b)(3) of the Act, and section 4975(c)(1)(E) and (c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Request

All interested persons are invited to submit written comments or requests for a hearing on the proposed exemption to the address and within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the proposed exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the representations in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with procedures set forth in ERISA Procedure 75-1. If the exemption is granted, the restrictions of sections 406(a), 406(b)(2) and 407(a) of the Act, and the taxes imposed by sections 4975(c)(1)(A) through (D) of the Code shall not apply, effective January 1, 1975, to the past loans of cash by CHA to the Plan totaling $398,514.51, to the loan of cash by CHA to the Plan for the payment of the mortgage on the North Carolina Property, and to the proposed guarantee by Rush of the mortgage note executed by Flamingo. The pending exemption, if granted, will be subject to the express conditions that the material facts and representations are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 27th day of August 1979.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-1354]

Proposed Exemption for a Certain Transaction Involving Petroleum Marketers Equipment Co., Inc. Profit Sharing Plan

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and from certain taxes imposed by the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the proposed sale of a parcel of real property by the Petroleum Marketers Equipment Company, Inc. Profit Sharing Plan (the Plan) to Mr. C. W. Boatwright, an employee of Petroleum Marketers Equipment Company, Inc. (the Employer), the Plan sponsor. The proposed exemption, if granted, would affect the Plan Trustees, the participants and beneficiaries of the Plan and Mr. Boatwright.

DATES: Written comments must be received by the Department of Labor on or before October 1, 1979.

ADDRESS: All written comments (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D-1354.

The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Sandler, of the Department of Labor, telephone (202) 523-8882. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a) of the Act and from the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code. The proposed exemption was requested in an application filed on behalf of the Plan, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicants.

(1) The Plan has leased a parcel of real property known as 2010 Exchange Avenue, Oklahoma City, Oklahoma to the Employer since February 3, 1975. The Plan proposed to sell this parcel of real property to C. W. Boatwright, who was an officer, director and more than 10 percent shareholder of the Employer until October 1, 1976. Since that time, his only relationship to the Employer has

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

been an employee under a management/consultant contract. The proposed cash purchase price for the property is $80,000.

(2) The Plan Trustees and their relationships to the Employer are as follows: B. Gerald Newcomb, President, Director and major shareholder; Gerald E. Schmitz, Secretary, Director and major shareholder; and Curtis Scarberry, an employee of the Employer.

(3) When the Trustees were made aware of the fact, in 1978, that the lease constituted a prohibited transaction under section 406 of the Act, they decided to correct the prohibited transaction by applying for an exemption in order to sell the property to Mr. Boatwright, who will, in turn, lease it to the Employer.

(4) The Plan originally purchased the property on February 3, 1975 from an independent third party for $48,316.56. K. B. Garrett & Associates, an independent appraiser, appraised the property and determined its fair market value to be $75,000 as of February 27, 1979, or $5,000 less than the amount offered by Mr. Boatwright. While the property has substantially increased in value since its purchase in 1975, the applicant states that the appreciation occurred almost entirely within the two years immediately subsequent to the purchase. This is evidenced by the fact that on or about December 15, 1976, the fair market value of the property was appraised at $77,600 by William C. McConnell, an independent appraiser.

(5) The net rate of return to the Plan, after servicing the debt on the property, has been negligible.

(6) While the property has not been publicly advertised for sale, there have been private inquiries, one of which resulted in an offer below the February 27, 1979 appraised value.

(7) In summary, it is represented that the proposed sale of real property satisfies the statutory criteria of section 408(a) because:

(a) The transaction is a one-time occurrence for cash;

(b) The purchase price is $5,000 above the independently appraised value of the property; and

(c) The property has not appreciated in value since 1976 and the net return to the Plan from the property has been negligible.

Notice to Interested Persons

Notice of the pending exemption will be given to all interested persons, including participants and beneficiaries of the Plan, the Plan Trustees and Mr. Boatwright, within 10 days of the publication of the pending exemption in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment on the pending exemption. The notice will be provided to all interested persons by posting it at the location or locations customarily used for Employer communications to employees.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b) of the Act and sections 4975(c)(1) (E) and (F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments

All interested persons are invited to submit written comments on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code shall not apply to the sale by the Plan to C. W. Boatwright of a parcel of real property known as 2010 Exchange Avenue, Oklahoma City, Oklahoma, and legally described as Lots 3, 4, 5, 6, 7 and 8 in Block 14 in Stockyards Addition to Oklahoma City, Oklahoma, for the higher of $80,000 or the fair market value of the property at the time of the sale.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 27th day of August, 1979.

Ian D. Lanoff,

Administrator for Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[FR Doc 79–27203 Filed 8–28–79; 3:28 pm]

BILLING CODE 4510–29–M

[Application No. D–1380]

Proposed Exemption for Certain Transactions Involving the Oregon Builders, Inc. Pension and Profit Sharing Plan

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and from certain taxes imposed by the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the proposed sale of five parcels of real property by the Oregon Builders, Inc. Pension and Profit Sharing Trust (the Plan) to the Oregon Builders, Inc. (the Employer), the sponsor of the Plan. The proposed exemption, if granted, would affect participants and beneficiaries of the Plan, the Employer, and other persons participating in the transaction.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before October 1, 1979.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office Of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D–1380. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Small, of the Department of Labor, telephone (202) 523–7222. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of sections 406(a), 406(b)(1), and 406(b)(2) of the Act and from the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code. The proposed exemption was requested in an application filed by Norman Bergstrom, a trustee of the Plan pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). The application was filed with both the Department and the Internal Revenue Service. However, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicants.

(1) The Plan is a money purchase plan. As of March 29, 1979 the Plan had three participants: Norman Bergstrom, Barbara Bergstrom, and Howard Bergstrom. The trustees of the Plan are the three participants. As of February 27, 1979 the Plan had total assets of $142,979.

(2) The Employer is in the real estate development business. The Employer purchases, subdivides, improves and sells real estate. The Employer is owned by Barbara Bergstrom and Norman Bergstrom.

(3) On March 7, 1977, the Plan purchased a parcel of real property in Bliss Park in Lane County, Oregon (Bliss lot) for $5,000 from parties unrelated to the Plan. On March 24, 1978, the Plan purchased 10 parcels of real property in the Brentwood Homes section of Lane County, Oregon (Brentwood lots) for an unallocated price of $36,000 or an allocated price of $3,600 per parcel from a party unrelated to the Plan. The 10 Brentwood lots include 6 improved and 4 unimproved lots.

(4) The trustees are requesting an exemption to allow the Employer to purchase for cash from the Plan the four unimproved Brentwood lots for $34,000 and the Bliss lot for $15,300. The unimproved Brentwood lots and the Bliss lot represent approximately 35% of the assets of the Plan and have at no time produced any income. The prices for the proposed sales were determined by an independent appraisal and will involve no real estate sales commission.

(5) The applicant represents that the criteria of section 408(a) of the Act will be satisfied by the proposed sales because: (1) they will be one time transactions for cash; (2) they will allow the Plan to sell the properties at a substantial profit at a price determined by an independent appraisal; (3) they will not require the Plan to pay any real estate sales commissions; and (4) they will allow the Plan to eliminate a large percentage of Plan assets which produce no income.

Notice to Interested Persons

Notice of the proposed exemption will be given to all employees of the Employer and to all participants in the Plan by posting the Notice of Pendency in a prominent location within the place of business of the Employer. The notice will be posted within ten days of the publication of the Notices of Pendency in the **Federal Register** and shall remain posted until the end of the comment period.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not inderogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reasons of section 4975(c)(1)(A) through (E) of the Code shall not apply to the cash sale of one parcel of real property in Bliss Park in Lane County, Oregon for $15,300 and to the cash sale of four parcels of real property in the Brentwood Homes section of Lane County, Oregon for $34,000 to the Employer by the Plan provided that these amounts are not less than the fair market value of the parcels of real property at the time of the sales.

The proposed exemption, if granted, will be subject to the express conditions the the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 27th day of August 1979.

Ian D. Lanoff,

Administrator for Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. 1-1048]

Proposed Exemption for Certain Transactions Involving the New Mexico Electricians Retirement Benefit Fund

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act). The proposed exemption would exempt, retroactively and prospectively, the continuing acts of the common fiduciary under the terms of the 20 year construction and mortgage loan agreement made on March 1, 1978, by the New Mexico Electricians Retirement Benefit Fund (the Plan) to the Joint Apprenticeship and Training Committee for the Electrical Industry, Building Corporation (the Building Corporation); and would exempt, retroactively and prospectively, the continuing acts of the common fiduciaries under the terms of a 20 year lease of real property made on March 1, 1978, by the Building Corporation with the New Mexico Electrical Industry Joint Apprenticeship and Training Fund (the Welfare Plan). The proposed exemptions, if granted, would affect participants and beneficiaries of the Plan and the Welfare Plan, respectively, the Plan and the Welfare Plan, one fiduciary of the Plan and two fiduciaries of the Welfare Plan, and other persons participating in the transaction.

DATES: Written comments and requests for a public hearing must be received by the Department on or before October 14, 1979.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216. Attention: Application No. L–1048. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: C. E. Beaver, of the Department, telephone (202) 523–8882. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(b)(2) of the Act. The proposed exemption was requested in an application filed by the trustees of the Plan, pursuant to section 408(a) of the Act, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975).

Summary of Facts and Representations

The application contains representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicants.

(1) Effective March 1, 1978, a 20 year construction and mortgage loan, in the amount of $150,000 with a 9¼ percent interest charge, was made by the Plan to the Building Corporation. The purpose of the loan was to enable the Building Corporation to pay for the construction of a building on land it owned free and clear of encumbrances. At the same time, effective March 1, 1978, a 20 year lease, with rental income of $1,373.80 per month, intended to be sufficient to amortize the aforesaid loan, was executed by the Building Corporation with the Welfare Plan, which was to use the land and building as a training facility for its participants.

(2) The Plan is a Taft-Hartley multiemployer employee pension benefit plan with an estimated 967 participants. The Welfare Plan is a Taft-Hartley multiemployer employee welfare benefit plan established and maintained for the purpose of providing an apprenticeship program and other training programs for its participants. Some of the participants of the Welfare Plan are participants of the Plan, and the participants of both the Plan and the Welfare Plan and are members of the International Brotherhood of Electrical Workers Local Union No. 611, AFL–CIO (the Union). The Building Corporation, a non-profit New Mexico corporation, was formed for the general purposes of enhancing the electrical industry trades by encouraging the apprenticeship system, and, specifically, to acquire legal title to real and personal property necessary to carry out the general purposes of the Welfare Plan.

(3) The trustees for the Plan consist of seven individuals of whom three are selected by the Central New Mexico Chapter, National Electrical Contractors Association, Inc. (the Employer), an additional three are selected by the Union, and the seventh, the public representative, is selected by the first six trustees. In addition, the Plan has a bank co-trustee, and an independent professional fund manager, actuary, and auditor. The Welfare Plan has six individuals as trustees who are selected in the same manner as the first six trustees of the Plan; however, none of the trustees of the Welfare Plan serve as trustees of the Plan. The Building Corporation has six individuals who serve as its board of directors and are elected one-half by the Union and one-half by the Employer. This board of directors owns the Building Corporation.

(4) One of the seven trustees of the Plan, Michael J. Ervin, is one of the six individuals who serves on the board of directors of the Building Corporation. Mr. Ervin is a common fiduciary to both the creditor and the debtor of the 20 year construction and mortgage loan from the Plan to the Building Corporation. He serves in this dual capacity without compensation and is fully employed and compensated by the Union which employs him as its Business Manager. Two of the six trustees of the Welfare Plan, Nelson Craig and Bobby Beall, are two of the six individuals who serve on the board of directors of the Building Corporation. Messrs. Craig and Beall are common fiduciaries to both the lessor and lessee of the 20 year lease from the Building Corporation to the Welfare Plan. They both serve in this dual capacity without compensation and are fully employed and compensated by their respective employers, who are members of the Employer.

(5) The real property and its proposed improvements, Parcel 22 of Tract "C" of Cole's Industrial Subdivision No. 1 to the City of Albuquerque, New Mexico, was appraised on November 21, 1977, and determined to have a current fair market value of $225,000 by a qualified, independent appraiser. The contractors who constructed the building for the Building Corporation, which is to be used as a training facility for the Welfare Plan, were not contributing employers of the Welfare Plan or of the Plan.

(6) The loan of $150,000 by the Plan to the Building Corporation represented 4.413 percent of the total assets of the Plan as of December 31, 1977. As of December 31, 1977, the Plan had assets of $3,399,055 and a gross annual income of $1,323,679, less expenses of $69,469, leaving a net income of $1,254,210 for the year 1977.

(7) The subject lease is for a term of 20 years with consideration to be paid in monthly installments of $1,373.80 by the Welfare Plan to the Building Corporation in the total sum of $150,000 plus an interest charge of 9¼ percent, all utility charges, all insurance premiums and the property taxes thereon.

(8) The trustees of the Plan and the Welfare Plan are all associated with the electrical trades and electrical industry. The trustees, including the independent bank co-trustee, believed the loan would have an advantageous return to the Plan, would be adequately secured with no speculation involved, and would provide the sought after diversification of investments. The mortgage and note have been recorded in the County of Bernalillo, State of New Mexico and the note is serviced by Albuquerque National Bank, Albuquerque, New Mexico. A determination was made by an independent bank, Rio Grande Valley Bank of Albuquerque, New Mexico, that the terms of the loan with respect to the interest charged were as fair as an arm's-length transaction would be.

(9) If the exemptions from section 406(b)(2) are granted, (1) the common fiduciary for the Plan and the Building Corporation will be permitted to act on behalf of the Plan and Building Corporation, retroactively and prospectively, under the terms of the 20 year construction and mortgage loan agreement which gives an advantageous return on a secured and diversified investment; and (2) the common fiduciaries for the Building Corporation and the Welfare Plan will be permitted to act on behalf of the Building Corporation and the Welfare Plan, retroactively and prospectively, under the terms of the 20 year lease of real property which allows the lease to accomplish its purpose of providing the Building Corporation with sufficient income to amortize the loan from the Plan while the Building Corporation holds title to real property which is used for training purposes by the Welfare Plan.

Notice to Interested Persons

Notice to interested persons of the pendency of the exemptions will be provided by mail to all participants and beneficiaries of the Plan and the Welfare Plan, the Union, the Employer, and other interested persons within fifteen days after notice is published in the **Federal Register**. The notice to the interested parties will contain a copy of the notice of pendency of such exemption as published in the **Federal Register** and will inform interested persons of their right to comment and request a hearing within the period set forth in this notice of pendency of the exemption.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act does not relieve a fiduciary or other party in interest from certain other provisions of the Act, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(a), 406(b)(1) and (b)(3) of the Act;

(3) Before an exemption may be granted under section 408(a) of the Act, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the Plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemptions. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Base on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(b)(2) of the Act shall not apply, retroactively or prospectively, to the continuing acts of the common fiduciary under the terms of the 20 year construction and mortgage loan in the amount of $150,000, with a 9¼ percent interest charge, made on March 1, 1978, by the Plan to the Building Corporation and to the continuing acts of the common fiduciaries under the terms of the 20 year lease of real property made on March 1, 1978, by the Building Corporation with the Welfare Plan for the consideration of $150,000 plus 9¼ percent interest charge and the payment of all utilities, insurance premiums on insurance for protection of the property and all property taxes.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and

that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 27th day of August, 1979.

Ian D. Lanoff,

Administrator for Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Ocean Sciences; Subcommittee for Oversight and Evaluation; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee for Oversight and Evaluation of the Advisory Committee for Ocean Sciences.

Date and time: September 19-21, 1979, 9:00 a.m. to 5:00 p.m. each day.

Place: Rooms 510 and 643, National Science Foundation, 1800 G St., N.W., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Dirk Frankenberg, Director, Division of Ocean Sciences, Room 609, National Science Foundation, Washington, D.C. 20550, telephone (202) 632-5913.

Purpose of Subcommittee: To provide expert assistance in carrying out external oversight which is concerned with the examination of decisions made, procedures and policies in effect and focuses on operations and acitivities, priorities, program balance, and selection of awards.

Agenda: Biological Oceanography Review—Room 510 Marine Chemistry Review—Room 643.

Reason for closing: The meeting will deal with a review of grants and declinations in which the Committee will review materials containing the names of applicant institutions and principal investigators and privileged information contained in declined proposals. This meeting will also include a review of peer review documentation pertaining to applicants. Any non-exempt material that may be discussed at this meeting (proposals that have been awarded) will be inextricably intertwined with the discussion of exempt materials and no further separation is practical. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b (c), the Government in the Sunshine Act.

Authority to close meeting: This detemrination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: August 28, 1979.

Joyce F. Laplante,

Acting Committee Management Coordinator.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Waste Management; Meeting

The ACRS Subcommittee on Waste Management will hold an open meeting on September 18-19, 1979 (rescheduled from August 28-29, 1979) in Room 1046, 1717 H St., NW., Washington, DC 20555. Notice of this meeting was published August 23, 1979.

In accordance with the procedures outlined in the **Federal Register** on October 4, 1978 (43 FR 45926), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

Tuesday and Wednesday, September 18 and 19, 1979.

8:30 a.m. until the conclusion of business each day.

The Subcommittee will hear presentations by and hold discussions with representatives of the NRC Staff, the Department of Energy (DOE), and their consultants pertinent to the following:

(1) Goals of the NRC Waste Management Program.

(2) Priorities set to meet these goals.

(3) Description, budget, and time schedule for each project.

(4) Coordination of NRC and DOE Waste Management Programs.

In addition, the Subcommittee will hear presentations by the NRC Staff on its Fuel Cycle Program.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Mr. Ragnwald Muller (telephone 202/634-1414) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: August 27, 1979.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 79-27164 Filed 8-30-79; 8:45 am]

BILLING CODE 7590-01-M

Study of Nuclear Power Plant Construction During Adjudication; Meetings

As previously announced (44 FR 48831), the next meeting of the Nuclear Regulatory Commission's advisory committee on nuclear power plant construction during adjudication will be held at 9:30 a.m. Friday, August 31, 1979, in Room 415, East West Towers, 4350 East West Highway, Bethesda, Maryland. After that meeting, the advisory committee's next meeting will be on Friday, September 7, 1979 at the same time and place.

Members of the public are invited to attend the group's meetings and there will be a limited amount of time available during each meeting for members of the public to make oral statements to the study group. Written comments, addressed to the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC, 20555, Attention: Docketing and Service Branch, will be accepted for one week after each meeting. The Chairman of the study group is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the group's work, including, if necessary, continuing or rescheduling meetings to another day.

A file of documents relevant to the group's work, including a complete transcript of each meeting, memoranda exchanged between group members, public comments and other documents, is available for inspection and copying at the Commission's Public Document Room at 1717 H Street, NW., Washington, DC, 20555. The Secretary of the NRC maintains a mailing list for persons interested in receiving notices of the group's meetings and actions. Anyone wishing to be on that list should write to: Secretary of the Commission, Nuclear Regulatory Commission, Washington, DC, 20555, Attention: Docketing and Service Branch.

The study group will provide its final report to the Commission by November 1, 1979. For further information on the study group's mission, please call Stephen S. Ostrach, Office of the General Counsel, Nuclear Regulatory Commission, 202/634-3224.

Dated at Washington, DC, this 27th day of August 1979.

Gary Milhollin,

Chairman.

BILLING CODE 7590-01-M

[Docket Nos. STN 50-568, STN 50-569]

New England Power Co. (NEP-1 and NEP-2); Issuance of Director's Decision Under 10 CFR 2.206

On July 13, 1979, Concerned Citizens of Rhode Island, the Point Judith Fishermen's Cooperative, and the Thomas L. Arnold Trust (CCRI) requested the Director of Nuclear Reactor Regulation issue an order to show cause to dismiss the application for NEP Units 1 and 2 construction permits. The Director has treated the request as a petition for action under 10 CFR 2.206. Upon a review of the information provided by CCRI, the Director has determined that CCRI's request does not provide an adequate basis to issue the order to show cause. Accordingly, CCRI's request has been *denied.*

Copies of the Director's decision are available for inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and in the Local Public Document Rooms at the Cross Mill Public Library, Old Post Road, Charlestown, Rhode Island 02813, and at the University Library, University of Rhode Island, Government Publications Office, Kingston, Rhode Island 02881. A copy of this decision will also be filed with the Secretary of the Commission for review by the Commission in accordance with 10 CFR 2.206(c) of the Commission's regulations.

In accordance with 10 CFR 2.206(c) of the Commission's regulations, this decision will constitute the final action of the Commission twenty (20) days after the date of issuance, unless the Commission on its own motion institutes a review of this decision within that time.

Dated at Bethesda, Maryland, this 24th day of August 1979.

For The Nuclear Regulatory Commission.

Harold R. Denton, Director,

Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-206]

Southern California Edison Co. and San Diego Gas and Electric Co.; Issuance of Amendment To Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 45 to Provisional Operating License No. DPR-13, issued to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which revised the Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit No. 1 (SONGS, Unit 1) (the facility) located in San Diego County, California. The amendment is effective as of its date of issuance.

The amendment allows temporary, simultaneous chlorination of both condenser halves and an increase of the chlorination time during the approximately three-day special fish impingement studies required under Section 316(b) of the Federal Water Pollution Control Act.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission;s rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 31, 1979, and (2) Amendment No. 45 to License No. DPR-13, including the Commission's related transmittal letter. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, California. A single copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 16th day of August 1979.

For the Nuclear Regulatory Commission.

Dennis L. Ziemann,

Chief, Operating Reactors Branch #2, Division of Operating Reactors.

BILLING CODE 7590-01-M

OVERSEAS PRIVATE INVESTMENT CORPORATION

Adoption of Environmental Assessment Procedures Required by Executive Order 12114

On January 4, 1979, the President issued Executive Order 12114 (44 FR 1957) entitled "Environmental Effects Abroad of Major Federal Actions." The Executive Order requires federal agencies taking actions encompassed by the Order, and not exempted from it, to effectuate procedures to implement the Order. The Overseas Private Investment Corporation (OPIC) is implementing the Executive Order by the adoption of the following procedures to take effect on September 4, 1979. Persons interested in commenting on these procedures or in requesting further information should contact: Gordon Hunt, Office of Development, Overseas Private Investment Corporation, 1129—20th Street, NW., Washington, D.C. 20527.

Section 1. Purpose

As required by Executive Order 12114, issued January 4, 1979, which is incorporated herein by reference, the following procedures shall be used by OPIC to ensure that all significant environmental effects of its actions outside the United States are considered by OPIC in its review of proposed insurance and finance projects. These procedures shall supplement OPIC's existing environmental procedures and guidelines required by Section 239(h) of the Foreign Assistance Act, as amended (the "Act"), as set forth in OPIC Board of Directors resolution (74)16, the memorandum to the OPIC Board of Directors dated January 31, 1978, and the "OPIC Environmental Handbook."

Section 2. Definitions

A. *Application.* The term "application" means a formal request to OPIC in the manner specified by OPIC for assistance under an OPIC program from an eligible private party interested in investing in a project in a foreign nation.

B. *Environment.* The term "environment" means the natural and phsical environment and excludes social, economic and other environments.

C. *Global Commons.* The term "global commons" means areas outside the exercise of any national jurisdiction.

V 4 4 / 1 7 1

D. *Host County.* The term "host country" means the foreign country in which a project for which OPIC assistance is sought is or will be located.

E. *Major Action.* The term "major action" means a contractual commitment by OPIC to provide assistance under an OPIC program involving at least $1 million of insured investment, loan guaranties or direct loans, if the applicant therefor has or will have sufficient control over the design and/or operation of the project to mitigate environmental concerns raised by OPIC.

F. *OPIC Programs.* The term "OPIC program" includes OPIC's insurance, direct loan and loan guaranty programs as authorized by the Act.

G. *Significant Effect.* With respect to effects on the environment outside the United States, a proposed action has a significant effect on the environment if it does significant harm to the environment even though on balance the action is believed to result in beneficial effects on the environment.

Section 3. Applicability of Procedures

A. *Scope.* Except as provided in Subsections B, C, and D below, these procedures shall apply with respect to OPIC's review of each new application for assistance under an OPIC program, whether for new projects or expansions of existing projects, if a favorable decision on such application will result in a major action by OPIC.

B. *Exemptions.* If upon the initial review of an application the OPIC insurance or finance officer making such review determines that the project for which OPIC assistance is sought has no significant effect on the environment outside the United States, these procedures shall not apply. If upon further review of the application, and prior to taking action, it is determined that the project may have a significant effect upon the environment, this exemption shall no longer apply. Also exempt from these procedures are actions falling within the categories listed in Sections 2–5(ii) through (vii) of the Executive Order, as limited by Section 2–5(d). A concise administrative record will be prepared to document these determinations.

C. *Categorical Exclusions.* These procedures shall not apply to the review of an application for any project falling within the scope of any category of projects which are determined to involve no significant effects on the environment. OPIC's Investment Committee shall have the authority to establish such categorical exclusions.

D. *Special Exemptions.* These procedures shall not apply to the review of any application for which the General Counsel determines that an exemption is necessary as a result of emergency circumstances, situations involving exceptional foreign policy or national security sensitivities or other special circumstances (except as limited by Section 2–5(d) of the Executive Order). In utilizing any such special exemption, OPIC, through its designated Environmental Officer, shall consult as soon as feasible with the Department of State and the Council of Environmental Quality.

Section 4. Initial Determinations

A. With respect to any application for OPIC assistance falling within the scope of Section 3(A) above, the OPIC officer reviewing such application shall make the following determinations which shall be documented by a concise administrative record:

1. Whether the proposed project is likely to have a significant effect on the environment of the global commons;

2. Whether the proposed project is likely to have a significant effect on the environment of a foreign country other than the host country; and

3. Whether the proposed project is likely to have a significant effect on the environment of a foreign country because it would provide to that country:

(a) a product, or physical project producing a principal product or an emission or effluent, which is prohibited or strictly regulated by Federal law in the United States because its toxic effects on the environment create a serious public health risk, such as asbestos, vinyl chloride, acrylonitrile, isocyanates, polychlorinated biphenyls, mercury, beryllium, arsenic, cadmium, and benzene; or

(b) a physical project which in the United States is prohibited or strictly regulated by Federal law to protect the environment against radioactive substances.

4. Whether the proposed project is likely to have a significant effect on natural or ecological resources of global importance hereafter designated for protection by the President or, in the case of such a resource protected by international agreement binding on the United States, by the Secretary of State.

B. The determinations required in Subsection A above shall be based upon the information contained in the application, information reasonably available to OPIC and such additional information from the applicant as deemed necessary by the reviewing officer.

C. In the event that the reviewing officer makes a positive determination with respect to any of the categories specified in Subsection A above (i.e., that a significant effect is likely to result), and such determination is not reversed upon review by a supervisory officer or by the Investment Committee, the finance or insurance department, as the case may be, in consultation with OPIC's Environmental Officer, shall take the following actions, as appropriate, prior to acting on the application:

1. If the harmful effect is of the type described in Subsection A(1) above, an environmental impact statement shall be obtained in the manner specified in Section 5 below. Such an environmental impact statement shall consider only the effects described in Subsection A(1), regardless of whether the project would result in other kinds of environmental effects.

2. If the harmful effect is of the type described in Subsection A(2), A(3) or A(4) above, an environmental study or an environmental review shall be prepared in the manner specified in Section 6 below.

Section 5. Environmental Impact Statements

A. If a department within OPIC is required by Section 4(C)(1) to cause the preparation of an environmental impact statement for a particular project, it shall do so in accordance with Subsection B below. If an environmental impact statement for the proposed project or a project involving similar environmental issues or a generic statement covering a class of similar projects already exists, no new environmental impact statement shall be required. When one or more other agencies are also involved in a particular project requiring an environmental impact statement, OPIC may rely upon an environmental impact statement obtained by one or more of the other agencies.

B. Environmental impact statements shall be concise and no longer than necessary to permit an informed consideration of the environmental effects of the proposed project and the reasonable alternatives. The statement shall include a section on consideration of the purpose of and need for the proposed project; a section that provides a succinct description of the environment of the global commons affected by the proposed action; and a section that analyzes, in comparative form, the environmental consequences on the global commons of the proposed action and of reasonable alternatives means of structuring the project.

Section 6. Environmental Studies and Reviews

A. If a department is required under Section 4(C)(2) to produce an environmental study or review, it shall, in consultation with the Environmental Officer, determine whether an environmental study as described in Subsection B below which deals with the environmental aspects of the proposed project is available or will be undertaken elsewhere. If no relevant environmental study is or will be available, the OPIC department, in consultation with the Environmental Officer, shall undertake the preparation of an environmental review as described in Subsection C below with, as appropriate, the assistance of the applicant and of other federal agencies having jurisdiction by law or special expertise. If an environmental review for the proposed project or a project involving similar environmental issues or a generic review covering a class of similar projects already exists, no new environmental review shall be required hereunder. When one or more agencies are involved with OPIC on a particular project, a lead agency may be designated to prepare the environmental review.

B. An environmental study shall consist of a bilateral or multilateral study by the United States and one or more foreign nations or by an international body or organization in which the United States is a member or participant.

C. An environmental review shall consist of a concise analysis of important environmental issues relating to a proposed project, including identification of such issues and of the significant effects to the environment. The department involved in the preparation of an environmental review shall consider the following factors in deciding the scope, substance and timing of the review and the availability of the review to other agencies:

1. The need to avoid infringement or the appearance of infringement on the sovereign responsibilities and internal affairs of another government;

2. The availability of meaningful information on the environment of a foreign nation;

3. The need to protect confidential business information and trade secrets of the applicant;

4. The desirability of acting promptly upon applications under OPIC programs;

5. The desirability of the project in terms of its export promotion and developmental effects;

6. OPIC's ability to influence the design and/or implementation of the proposed project; and

7. The need to protect sensitive foreign affairs information and information received from another government with the understanding that it will be protected from disclosure.

Section 7. Decision

The required environmental documents developed in accordance with these Procedures shall accompany the application through the review process to enable officers responsible for approving an application and, if necessary, the Board of Directors, to be informed and to take account of the environmental considerations covered by such documents.

Section 8. Availability

Subject to the considerations of Section 6(C), environmental documents developed under these procedures shall be available to the Department of State, Council on Environmental Quality and other federal agencies and shall be included in the public information files for the pertinent applications. Foreign governments affected thereby may also be informed of such documents after coordinating with the Department of State regarding such communication with the foreign government.

Effective date. These procedures become effective on September 4, 1979.

Dated: August 27, 1979.

J. Bruce Llewellyn,

President.

[FR Doc. 79–27239 Filed 8–30–79; 8:45 am]

BILLING CODE 3210–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 10839; 8–12–4337]

Hartford Variable Annuity Life Insurance Co. et al.; Application for Order of Exemption

August 24, 1979.

In the matter of: Hartford Variable Annuity Life Insurance Company, Hartford Variable Annuity Life Insurance Company Separate Account, Hartford Variable Annuity Life Insurance Company QP Variable Account, Hartford Variable Annuity Life Insurance Company DC Variable Account-I and Hartford Variable Annuity Life Insurance Company DC Variable Account-II. Hartford Plaza, Hartford, Connecticut 06115. (812–4337)

Notice is hereby given that Hartford Variable Annuity Life Insurance Company, ("HVA"), a stock life insurance company organized under the laws of the State of Connecticut; Hartford Variable Annuity Life Insurance Company Separate Account ("HVA Separate Account"), an open-end management investment company registered under the Investment Company Act of 1940 ("Act"); Hartford Variable Annuity Life Insurance Company QP Variable Account ("HVA–QP–VA"), a unit investment trust registered under the Act; Hartford Variable Annuity Life Insurance Company DC Variable Account-I ("DC–I"), a unit investment trust registered under the Act; and Hartford Variable Annuity Life Insurance Company DC Variable Account-II ("DC–II"), a unit investment trust registered under the Act, all of Hartford Plaza, Hartford, Connecticut 06115 (herinafter collectively referred to as "Applicants"), filed and application on July 20, 1978 and amendments thereto on November 27, 1978 and June 11, 1979, pursuant to Section 6(c) of the Act for an order exempting Applicants from the provisions of Sections 26(a)(2), 27(a)(3) and 27(c)(2) of the Act and pursuant to Section 11(a) of the Act for an order approving certain offers of exchange. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

HVA Separate Acount was registered with the Commission under the Act as an open-end, diversified management investment company on December 12, 1967. DC–I was created and organized as a unit investment trust and was registered under the Act on March 12, 1976. HVA–QP–VA was created and organized as a unit investment trust and was registered under the Act on November 26, 1976. DC–II was created and organized as a unit investment trust and was registered under the Act on May 13, 1977.

Section 27(a)(3)

Applicants propose to permit owners of policies of life insurance and annuity contracts issued by (1) HVA-excepting those Annuity contracts not subject to sales charged deductions) (2) Hartford Life Insurance Company, Hartford Life and Accident Insurance Company, ITT Life Insurance Corporation or by any other member Company of the Hartford Insurance Group which issues such policies and/or contracts, and by (3) any other ITT affiliated company that issues policies of life insurance and/or annuity contracts as well as any beneficiary, annuity contract participant or annuitant under any such policy or contract to invest any part or all of any such policy or contract proceeds (payable upon the full or partial surrender or maturity of such policy or contract) in a Group or Individual Variable Annuity Contract (or in a new Group Variable Only Accumulation Contract issued by HVA) with respect to HVA–QP–VA, DC–I or DC–II with no deductions being made for sales expenses.

However, in order not to discriminate unfairly against other purchasers of New Group Variable Only Accumulation Contracts or of Group and Individual Variable Annuity Contracts issued with respect to HVA–QP–VA, DC–I and DC–II, any monies applied without any deductions being made therefrom for sales expenses toward the purchase of these contracts issued with respect to HVA–QP–VA, DC–I and DC–II by any member of a class described in the preceding paragraph will not be counted in determining the particular sales charge to be applied in the case of subsequent payments.

Section 27(a)(3) provides as follows:

It shall be unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate if the amount of sales load deducted from any one of such first payments exceeds proportionately the amount deducted from any other such payment, or the amount deducted from any subsequent payment exceeds proportionately the amount deducted from any other subsequent payment;

Rule 27a–2 provides as exemption from the provisions of Section 27(a)(3) as follows:

A registered separate account and any depositor of or underwriter for such account, shall be exempt from paragraph (3) of Section 27(a) * * *, provided that with respect to any variable annuity contract participating in such account the proportionate amount of sales load deducted from any payment during the contract period shall not exceed the proportionate amount deducted from any prior payment during the contract period.

Because no deduction for sales charges is made upon the acquisition of these contracts issued with respect to HVA–QP–VA, DC–I, or DC–II, with the proceeds of an insurance or annuity contract, whereas subsequent payments under any such acquired contract are

A G 3 1 7 9 UMI

V 4 4 / 1 7 1

subject to sales charge deductions, the exemptive Rule is not applicable.

Applicants allege that the insurance and annuity contracts have been subject to deduction for sales or other charges and to again subject the policy and contract proceeds to a second set of charges would be unfairly discriminatory.

Applicants allege that the dangers that Section 27(a)(3) was designed to protect against, i.e., disproportionate and unfair sales charges, will not be present in the case of the acquisition of Contracts issued with respect to HVA–QP–VA, DC–I or DC–II.

Applicants HVA, HVA–QP–VA, DC–I, and DC–II have requested the Commission to issue an Order exempting them from the provisions of Section 27(a)(3) in order that they might offer and sell Group and Individual Variable Annuity Contracts and Group Variable Only Accumulation Contracts issued by HVA with respect to HVA–QP–VA, DC–I and DC–II under the circumstances described above.

Section 11(c)

Applicants HVA, HVA Separate Account, HVA–QP–VA, DC–I, and DC–II request an Order, pursuant to Section 11(a), of the Act, (1) to permit offers of exchange to be made to owners of tax-qualified Group and Individual Contracts issued with respect to HVA Separate Account and HVA–QP–VA to exchange their Contracts for new Group Variable Only Accumulation Contracts or New "John Doe" Contracts and (2) to permit offers of exchange to be made to owners of tax-qualified Group and Individual Contracts issued with respect to HVA Separate Account and HVA–QP–VA and non-tax qualified Group Contracts issued with respect to DC–I and DC–II to exchange their Contracts for new Group Variable Only Accumulation Contracts.

Section 11(a) of the Act provides that it shall be unlawful for any registered open-end company, or a principal underwriter for such a company, to make, or cause to be made, an offer to the holder of a security of such company, or of any other open-end investment company, to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged unless the terms of the offer have been first submitted to and approved by the Commission. Section 11(c) provides that, irrespective of the basis of exchange, the provisions of Section 11(a) shall be applicable to any type of offer of exchange of the securities of registered unit investment trusts for the securities of any other investment company.

Applicants state that the requested Order permitting an offer of exchange to be made will make available to such HVA Separate Account Group and Individual Contract owners certain advantages (greater choice of investment and lower sales charges) which will accrue to them through owning Group Variable Only Accumulation Contracts issued by HVA with respect to HVA–QP–VA or DC–I and DC–II or John Doe Contracts issued with respect to HVA–QP–VA. Those persons presently owning Contracts issued with respect to HVA–QP–VA or DC–I and DC–II may wish to exchange their existing Contract for a Group Variable Only Accumulation Contract or a John Doe Contract because such Contracts may be more appropriate or better suited to their needs. Further, such persons will not be disadvantaged in any way since the scale of deductions under the existing HVA–QP–VA Group Contracts and the DC–I/DC–II Group Contracts are exactly the same as the scale of deductions under the new contracts.

Applicants state that no charges will be assessed in connection with the exchange, and the principal abuse at which Section 11(a) is directed—the imposition of additional sales charges—will not be present. Applicants represent that compensation will be paid to salesmen in connection with subsequent payments made under the terms of an HVA–QP–VA John Doe or Group Variable Only Accumulation Contract or a DC–I/DC–II Group Variable Only Accumulation Contract (as appropriate) issued in exchange for an HVA Separate Account Contract, an HVA–QP–VA Contract or a DC–I/DC–II Contract. Applicants represent, however, that they will seek to assist Contract owners in determining whether to make an exchange by pointing out the applicable factors and, where appropriate, will encourage exchanges. The choice of whether or not to make an exchange shall be the Contract owner's alone after full disclosure.

Applicants have requested that the Commission issue an Order pursuant to Section 11(c) of the Act approving the offers of exchange, as hereinabove described.

Section 11(c) and Section 27(a)(3)

Applicants further represent that, in connection with an exchange of an HVA Separate Account Contract for an HVA–QP–VA John Doe Contract or an HVA–QP–VA or DC–I/DC–II Group Variable Only Accumulation Contract the Contract Value(s) exchanged will be recognized for purposes of determining the appropriate sales charge level if the Contract exchanged provides for a graded sales charge deduction but not if the contract exchanged provides for a level sales charge deduction. There are at present four forms of Group and Individual Contracts which have been issued with respect to HVA Separate Account in connection with tax-qualified programs. In the case of one of the Group Contracts, sales and administrative expense charges are deducted upon a level-load basis of 5.25%, and, in the case of the remaining Group Contract, sales and administrative expense charges are deducted upon a sliding scale with the maximum charge being at 6.25%. In the case of one of the Individual Contracts, sales and administrative expense charges are deducted on a level-load basis of 7.75% and in the case of the remaining Individual Contract, such charges are deducted on a sliding scale with the maximum charge being at 8.25%.

The Commission has previously issued Orders respecting offers of exchange made to Contract Owners of Contracts issued with respect to HVA Separate Account to exchange their level-load contracts for graded-load contracts issued by HVA with respect to HVA–QP–VA and DC–I and DC–II under circumstances where no credit was given to the amounts accumulated under the exchanged contracts in determining the applicable level of sales deductions. See Investment Company Act Release Nos. 9907 and 9908.

Applicants have stated that they intend to continue to follow the same procedure with respect to the exchange of a level-load contract issued by HVA with respect to HVA Separate Account for (1) a graded load John Doe Contract issued with respect to HVA–QP–VA or (2) a graded load Group Variable Only Accumulation Contract issued with respect to HVA–QP–VA or DC–I and DC–II. Section 27(a)(3) of the Act is applicable to the exchange, and the exemption provided by Rule 27a–2 under Section 27(a)(3) of the Act is not available for similar reasons to those set forth above. Applicants request the Commission to issue an Order exempting the exchange, under the circumstances, from the provisions of Section 27(a)(3).

Section 26(a)(2) and Section 27(c)(2)

The proposed John Doe Contract to be issued by HVA with respect to HVA–QP–VA and the proposed Group Variable Only Accumulation Contract to be issued by HVA with respect to HVA–QP–VA, and DC–I and DC–II (when issued on an unallocated basis) each provide for an annual policy fee charge of $100. When the later Contract is issued on an allocated basis, the annual policy fee is $10 per Participant.

Section 26(a)(2) provides that:

> No principal underwriter for or depositor of a registered unit investment trust shall sell, except by surrender to the trustee for redemption, any security of which such trust is the issuer * * * unless the * * *, agreement of custodianship * * * pursuant to which such security is issued—
>
> * * * (a) provides, in substance, * * * (C) that no payment to the depositor of or a principal underwriter for such trust, or to any affiliated person or agent of such depositor or underwriter, shall be allowed the * * * custodian as an expense (except that provision may be made for the payment to any such person of a fee, not exceeding such reasonable amount as the Commission may prescribe as compensation for performing bookkeeping and other administrative services, of a character normally performed by * * * the custodian, itself); * * *

Section 27(c) of the Act provides that it shall be unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate, unless:

> (2) the proceeds of all payments on such certificate (except such amounts as are deducted for sales load) are deposited with * * * custodian * * * and are held by such * * * custodian under an indenture or agreement containing, in substance, the provisions required by paragraphs (2) * * * of Section 26(a) for the trust indentures of unit investment trusts.

On August 24, 1977 the Securities and Exchange Commission entered Orders of exemption (Investment Company Act Release Nos. 9907 and 9908) from the provisions of Section 26(a)(2) and 27(c)(2) of the Act pursuant to Applications filed on behalf of, *inter alia*, HVA–QP–VA and on behalf of, *inter alia*, DC–I which permitted an annual policy fee of $10.00 to be deducted by Hartford Bank (as Custodian of HVA–QP–VA and DC–I respectively) from the value of each Contract Owner's or Contract Participant's account, as appropriate, and to pay such fees to HVA.

Applicants HVA, HVA–QP–VA, and DC–I have requested that the Commission enter an Order exempting them and each of them from the provisions of Sections 26(a)(2) and 27(c)(2) to the extent necessary so that Hartford Bank may (1) deduct an annual fee of $100.00 from the account maintained with respect to a non-allocated John Doe Group Contract issued with respect to HVA–QP–VA, (2) deduct an annual fee of $10 from each Participant's account maintained under an allocated Group Variable Only Accumulation Contract issued with respect to HVA–QP–VA or DC–I and (3) deduct an annual fee of $100 from the account maintained with respect to a non-allocated Group Variable Only Accumulation Contract issued with respect to HVA–QP–VA or DC–I, and pay such fees to HVA.

The fee which is charged for the servicing and handling of the individual account or accounts under the Contracts issued with respect to HVA–QP–VA and DC–I is deducted from the value of each such Contract account on the last business day of each calendar year; provided, however, if the value of a non-allocated John Doe or Group Variable Only Accumulation Contract or the value of the interest of a Participant under an allocated Group Variable Only Accumulation Contract is redeemed in full at any time before the last business day of the year, the annual policy fee charge in the case of a non-allocated Contract, will be deducted from the proceeds of such redemption. No annual policy fee deduction in the case of a John Doe Contract issued with respect to HVA–QP–VA or a Group Variable Only Accumulation Contract issued with respect to HVA–QP–VA and DC–I will be made during the annuity pay-out period.

Applicants have consented that the foregoing requested exemptions from Sections 26(a) and 27(c)(2) may be made subject to the following conditions: (1) The charges to variable annuity contract owners for administrative services shall not exceed such reasonable amounts as the Commission shall prescribe, jurisdiction being reserved for such purpose, and (2) the payment of sums and charges out of the assets of HVA–QP–VA and DC–I shall not be deemed to be exempted from regulation by the Commission by reason of the requested Order, provided that Applicants' consent to this condition shall not be deemed to be a concession to the Commission of authority to regulate the payments of sums and charges out of such assets other than charges for administrative services, and Applicants reserve the right in any proceeding before the Commission, or in any suit or action in any court, to assert that the Commission has no authority to regulate the payment of such other sums or charges.

Notice is further given, that any interested person may, not later than September 18, 1979 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit, or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an Order disposing of the Application will be issued, as of course, following September 18, 1979, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing has been ordered, will receive any Notices and Orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. 21199; 70–6339]

Louisiana Power & Light Co.; Proposal To Finance Construction of Pollution Control Facilities

August 24, 1979.

Notice is hereby given that the Louisiana Power & Light Company ("LP&L"), 142 Delaronde Street, New Orleans, Louisiana, an electric utility subsidiary of Middle South Utilities, Inc., a registered holding company, has filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 9(a), 10 and 12(d) of the Act and Rule 44(b)(3) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

Louisiana Power & Light Company has constructed and installed at its Ninemile Point Steam Electric Generating Station ("Ninemile Point Station") in Jefferson Parish, Louisiana, certain facilities solely for water pollution control purposes.

A G 3 1 7 9 UMI

LP&L proposes to enter into a sale agreement with the Parish of Jefferson, Louisiana ("Sale Agreement"), which will provide for the Parish to issue and sell its pollution control revenue bonds ("Bonds") in the principal amount of $4,000,000, sufficient to cover construction and related costs of the pollution control facilities, for the Bond sale proceeds to be deposited with a Trustee pursuant to an Indenture ("Trust Indenture") to be entered into by the Parish and the Trustee, for LP&L to sell such pollution control facilities at the Ninemile Point Station to the Parish for cash, which is to be paid by the Trustee out of such proceeds, and for LP&L simultaneously to re-purchase from the Parish the pollution control facilities sold to it, on an installment payment basis for an aggregate price equal to the amount of money that will be required to fully pay or retire the Bonds in accordance with their terms.

The re-purchase price will be payable by LP&L in semi-annual installments, to be made on the last business day before each Bond interest payment date, in such amounts as, together with other moneys available for such purpose in the Bond Fund, will enable the Trustee to pay the interest on the Bonds, the principal amount of any of the Bonds then to be redeemed under the Trust Indenture, and any premium on any such Bonds to be redeemed. Such installment payments are to be made directly to the Trustee pursuant to an assignment and pledge thereof by the Parish to the Trustee as set forth in the Trust Indenture.

LP&L will also be obligated to pay the reasonable and necessary expenses incurred by the Parish pursuant to the Sale Agreement and the Trust Indenture and the reasonable and necessary compensation of and expenses incurred by the Trustee and any registrar or paying agent thereunder, but the initial compensation and expenses of the Trustee, and the legal, accounting, financial and printing expenses and fees, and substantially all other expenses except the fee of the underwriter or the underwriters, incurred in connection with the issuance of the Bonds, are included in the cost of the facilities as defined in the Sale Agreement and therefore will be included in the purchase and re-purchase prices and will be financed by the sale of the Bonds.

The Bonds will mature thirty years after the first day of the month in which they are initially issued, but a mandatory sinking fund effective during the eleventh through the twenty-ninth years of the term of the Bonds will effect the redemption (without premium) of $1,000,000 principal amount (25%) of the Bonds prior to such maturity date.

The Sale Agreement provides that LP&L will have the option to prepay the re-purchase price at any time upon payment of a premium corresponding to the redemption premium on the Bonds as determined by the provisions of the Trust Indenture, or without premium in certain extraordinary and burdensome circumstances. Prepayment of the re-purchase price (without premium) will be mandatory if it is determined that the interest on the Bonds is subject to Federal income tax. Under the Trust Indenture, the Bonds are non-callable for redemption prior to October 1, 1989, except in the event that the Company shall exercise its prepayment option or shall be obligated to pre-pay under the above mandatory prepayment provision, in either of which events the Bonds shall be called and redeemed without premium.

The Trust Indenture will provide for the establishment with the Trustee thereof of a Bond Fund and a Project Acquisition Fund; for any accrued interest and/or premium paid by the purchasers of the Bonds to be deposited in the Bond Fund and the remainder of the sale proceeds to be deposited in the Project Acquisition Fund; for the cash price payment to LP&L upon the sale by LP&L to the Parish of the pollution control facilities to be paid out of the Project Acquisition Fund; for any funds remaining in the Project Acquisition Fund after the pollution control facilities have been paid for to be deposited in the Bond Fund and/or used by the Trustee to purchase Bonds in the open market for cancellation, as LP&L shall direct; and for the Bond Fund to be used to pay the principal of, premium, if any, and interest on the Bonds. The installment payments to be made by LP&L in payment of the re-purchase price are to be deposited in the Bond Fund.

The Sale Agreement provides that the Parish will sell, issue and deliver the Bonds as and when but only if requested by LP&L. LP&L will not be a party to the Trust Indenture nor to the underwriting arrangements for the Bonds. However, since the amounts of the installments to be paid by LP&L in payment of the re-purchase price will be determined by the interest rate of the Bonds, LP&L will request the sale, issuance and delivery of the Bonds only if it considers satisfactory the interest rate thereof offered (and the amounts of underwriters' fees proposed) by the underwriters, and only with the further authorization of this Commission. It is contemplated in the last connection that the proposed interest rate and underwriters' fees would be reported to this Commission by post-effective amendment to this application-declaration.

LP&L presently contemplates that the Bonds will be sold to a group of underwriters who will immediately make a public re-offering thereof. However, in the event that, in the opinion of LP&L time, scheduling, costs and expenses, or other factors make it desirable or necessary that the sale of the Bonds be effected by private placement, LP&L may, prior to the issuance of the Commission's order hereon, amend this application-declaration to propose such private placement.

It is LP&L's understanding that under Section 103 of the Internal Revenue Code of 1954, as amended, the interest to be paid on the Bonds will be exempt from Federal income taxes. It is LP&L's further understanding that the interest rates of bonds and other debt obligations, the interest on which is exempt from Federal income taxes, have been in the past and can be expected to be 1½% to 2½% lower, or perhaps even lower than that at this time, than the interest rates on bonds and other debt obligations of similar tenor and comparable quality the interest which is not so exempt.

A statement of the fees, commissions and expenses to be incurred in connection with the proposed transaction will be filed by amendment. It is further stated that no federal or state commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 19, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or be mailed upon the applicants-declarants at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-16130; File No. SR-NSCC-79-6]

National Securities Clearing Corp.; Self-Regulatory Organizations; Proposed Rule Changes

Pursuant to Section 19(b) (1) of the Securities Exchange Act of 1934, 14 U.S.C. 78s (b) (1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 30, 1979, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change

The Board of Directors of National Securities Clearing Corporation has approved and adopted the following Policy Statement at its meeting which was held on June 5, 1979:

Policy Statement of the Board of Directors

* * * Application of Retained Earnings—Member Impairments * * *

Under SCC Division Rule 4, Section 4, if the Corporation suffers a loss or liability by reason of a Member's impairment, and such loss or liability is not satisfied or otherwise made good from the impaired Member's Clearing Fund deposit, the Corporation in its discretion may either satisfy such loss or liability or any part thereof out of its then existing retained earnings or, after appropriate notice to both the membership and the Securities and Exchange Commission, directly from the Clearing Fund deposits of all other Members on a pro rata basis.

While neither the Corporation nor its three predecessor clearing agencies have ever subjected their memberships to such a pro rata assessment, the ability exists for the Corporation to bypass completely its retained earnings. Since the Board of Directors of the Corporation is desirous of clarifying its intentions with respect to the usage of retained earnings in Member impairment situations, the Board has adopted this Policy Statement.

The Board of Directors of the Corporation hereby advises the membership of the Corporation that pursuant to Rule 4, Section 4 of the Rules of the SCC Division of the Corporation, the Corporation will apply no less than twenty-five percent (25%) of its retained earnings, existing at the time of a Member impairment which gives rise to a loss or liability not satisfied by the impaired Member's Clearing Fund deposit, to such loss or liability.

Nothing herein, however, shall prevent the Corporation from applying more than twenty-five percent (25%) of its then existing retained earnings, if the Board of Directors, in its sole discretion, believes such to be appropriate under the factual situation existing at the time of the Member impairment.

This Policy Statement may not be changed, modified or altered, without thirty days prior written notice to the membership and to the Securities and Exchange Commission. Any such change, modification or alteration shall only be prospective in effect, and shall not be applicable to any losses or liability previously incurred as a result of prior Member impairments.

Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change is as follows:

The proposed rule change categorizes by Statement of Policy of the Board of Directors the circumstances under which the Board will exercise its discretion, conferred by SCC Division Rule 4, Section 4 to apply corporate retained earnings to losses occasioned by Member impairments rather than satisfy the entire amount of such loss from the Clearing Fund.

The proposed rule change relates to the equitable allocation of reasonable dues, fees and other charges among NSCC's participants by clarifying how NSCC will utilize retained earnings in the event of Member impairments.

No comments on proposed rule change have been solicited or received.

The Corporation does not not perceive that the proposed rule change would constitute a burden on competition.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 21, 1979.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

August 24, 1979.

BILLING CODE 8010-01-M

[Rel. No. 6112; 18-52]

Reavis & McGrath Retirement Plan; Filing of Application for an Order

August 24, 1979.

Notice is hereby given that Reavis & McGrath (the "Applicant"), 345 Park Avenue, New York, NY 10022, a law firm organized as a partnership under the laws of the State of New York, has on May 21, 1979, filed an application for exemption from the registration requirements of the Securities Act of 1933 ("Act") for participations or interests issued in connection with the Reavis & McGrath Retirement Plan (the "Plan"). All interested persons are referred to that document, which is on file with the Commission, for the facts and representations contained therein which are summarized below.

I. Introduction

Applicant states that Applicant has adopted the Plan to provide retirement benefits for eligible employees of Applicant. Applicant states that because the Plan covers persons (in this case,

V 4 4 / 1 7 1

Applicant's partners) who are employees within the meaning of Section 401(c)(1) of the Internal Revenue Code of 1954 (the "Code"), the Plan is excepted from the exemption provided by Section 3(a)(2) of the Act for interests or participations in employee benefit plans of certain employers. Section 3(a)(2) of the Act provides, however, that the Commission may exempt from the provisions of Section 5 of the Act any interest or participation issued in connection with a pension or profit-sharing plan which covers employees some or all of whom are employees within the meaning of Section 401(c)(1) of the Code, if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

II. Description of the Plan

Applicant states that the Plan was originally established, effective December 31, 1971, to provide retirement benefits for eligible employees of the Applicant. The Plan was amended and restated effective January 1, 1975, to incorporate into one document (a) all pre-1975 amendments, and (b) amendments effective as of January 1, 1975, to effect compliance with the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). Applicant further states that the Plan and related trust received a favorable determination letter on October 15, 1976, to the effect that the Plan and related trust meet the requirements of Section 401(a) of the Code and that the Trust is tax exempt under Section 501(a) of the Code.

The Plan was further amended effective in April 1979 to permit participants in the Plan to choose to have their interests in the Plan invested in whole or in part in two separate investment funds, as explained below.

The Plan provides that employees and partners of Applicant are eligible to participate in the Plan if they are at least 25 years of age, do not own more than 10% of the capital or profit interests in Applicant and have completed 1,000 hours of service in the twelve consecutive months following the commencement of employment, or a subsequent twelve consecutive month period beginning on the anniversary date of the commencement of employment. As of December 31, 1978, 26 partners, 58 legal associates and other employees of the Applicant were participants in the Plan.

Applicant contributes on behalf of each participant who had more than 500 hours of service during the year in amounts equal to a specified percentage of that participant's compensation, up to a maximum of $7,500 for any participant. No participant is required to make contributions under the Plan. A participant may, however, make annual voluntary contributions to the Plan in amounts up to 10% of his or her compensation.

The assets of the Plan are managed by Wertheim Asset Management Services, Inc. ("WAMSI"), a registered investment adviser. The assets are held by Lewco Securities Corp., a registered broker-dealer, as agent for WAMSI. The manager is appointed by the trustees of the Plan who exercise management and control of the Plan's assets. The trustees are three partners of the Applicant. The Plan is administered by a committee appointed by Applicant (the"Committee"). The Committee is responsible for interpreting the Plan, making determinations concerning eligibility, status and rights to benefits and all other matters of administration. The Committee's actions are binding upon Applicant, trustees, participants, beneficiaries and all other persons.

The assets of the Plan are segregated into two funds. Each participant may direct that his annual contributions, including any voluntary contributions, be placed in one of the two funds or be split between the two. One fund consists of fixed income securities, to be selected by the trustees or manager selected by the trustees, to be limited to investments in certificates of deposit, treasury bills, commercial paper, notes, bonds, debentures, or other corporate or governmental debt obligations or in securities issued by an investment company registered under the Investment Company Act of 1940 whose assets are invested in substantially similar securities or in guaranteed insurance contracts. The other fund is a "balanced fund" consisting of cash, and cash equivalents, government and corporate bonds, and common stock, currently managed by WAMSI.

III. Discussion

Applicant states that if the partnership were a corporation, interests and participations in the Plan would be exempt under Section 3(a)(2) of the Act. Applicant submits that merely because Applicant is unincorporated is no reason for subjecting such interests and participations to the registration requirements of the Act. Applicant further submits that the intent of Congress in excluding from the exemption, plans in which self-employed persons were participants was to prevent the sale without registration of interests in prepackaged plans offered by financial institutions to self-employed persons lacking the sophistication to protect themselves and their employees, and that the provision permitting the Commission to grant exemption upon application was included in Section 3(a)(2) of the Act to make available an exemption for partnership plans where the plan and the entity involved are comparable to corporate plans exempted by Section 3(a)(2).

Applicant states that the Plan covers partners and employees of a single firm and is not a uniform prototype plan of a type designed to be marketed by a sponsoring finanical institution or promoter to numerous unrelated self-employed persons. Applicant represents that it has not distributed and does not intend to distribute any type of promotional material relating to the Plan (other than such material as Applicant is required under the Employee Retirement Income Security Act of 1974 to distribute to participants or to employees) and has not made and does not intend to make any solicitation of voluntary contributions under the Plan. Applicant makes available to Plan participants for inspection, upon request and without charge, copies of the Plan and all documents relating to it.

Applicant states that it is engaged in furnishing legal services of a type which necessarily involves financially sophisticated and complex matters and, for that reason as well as the extensive administrative control over the Plan maintained by the Partnership, is able to represent adequately its interests and the interests of its employees who are participants in the Plan.

Applicant concludes that for the foregoing reasons, granting the requested exemptive order would be appropriate in the public interest, consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 17, 1979, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following September 17, 1979, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Performance Review Board

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of Members of Performance Review Board.

SUMMARY: The members of a Senior Executive Service Performance Review Board must be published in the **Federal Register**.

DATE: Performance Review Board effective July 1, 1979.

FOR FURTHER INFORMATION CONTACT: James W. House, RM:P:X, 1111 Constitution Avenue, N.W., Room 1510, Washington, D.C., 20224, Telephone No. 202-566-4633, (not a toll free number).

SUPPLEMENTARY INFORMATION: Pursuant to section 4314(c)(4) of the Civil Service Reform act of 1978, the members of the Internal Revenue Service's Senior Executive Service Performance Review Board are as follows:

William E. Williams, Chairman, Deputy Commissioner.
James I. Owens, Assistant Commissioner, Taxpayer Service and Returns Processing.
S. Allen Winborne, Assistant Commissioner, Employee Plans and Exempt Organizations.
Harold A. McGuffin, Regional Commissioner, Southeast Region.
Edwin P. Trainor, Regional Commissioner, Midwest Region.
Thomas A. Cardoza, Regional Commissioner, Western Region (Alternate).
Donald J. Porter, Assistant Commissioner, Data Services (Alternate).

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the **Federal Register** for Wednesday, November 8, 1978. (43 FR 52122).

William E. Williams,

Deputy Commissioner.

BILLING CODE 4830-01-M

VETERANS ADMINISTRATION

Cooperative Studies Evaluation Committee; Meeting

The Veterans Administration gives notice pursuant to Public Law 92-463 that a meeting of the Cooperative Studies Evaluation Committee, authorized by 38 U.S.C. 4101, will be held at the Holiday Inn, Massachusetts Avenue at Thomas Circle, NW., Washington, D.C. on October 10, 11, and 12, 1979. The meeting will be for the purpose of reviewing proposed cooperative studies and advising the Veterans Administration on the relevance and feasibility of the studies, the adequacy of the protocols, the scientific validity and the propriety of technical details, including involvement of human subjects. The Committee advises the Director, Medical Research Service, through the Chief of the Cooperative Studies Program, on its findings.

The meeting will be open to the public up to the seating capacity of the room from 8 to 8:30 a.m., October 10, 11, and 12, to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. James A. Hagans, Coordinator of the Committee, Veterans Administration Central Office, Washington, D.C. (202) 389-3702 prior to September 21.

The meeting will be closed from 8:30 a.m. to 6:15 p.m., October 10-11, and 8:30 a.m. to 12:30 p.m., October 12, for consideration of specific proposals in accordance with provisions set forth in Subsection 10(d) of Pub. L. 92-463, as amended by Pub. L. 94-409, and Subsection 552b(c)(6) of Title 5, United States Code. During this portion of the meeting, discussion and decisions will deal with qualifications of personnel conducting the studies and the medical records of patients who are study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dated: August 23, 1979.

By direction of the Administrator.

John J. Leffler,

Associate Deputy Administrator.

[Notice No. 128]

Assignment of Hearings; Correction

August 28, 1979.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

Correction

MC 119789 (Sub-524F), Caravan Refrigerated Cargo, Inc. (44 CFR 49351, 9/22/79), now assigned for hearing on September 5, 1979 (3 days), at Tampa, FL, will be held at the Ramada Inn Airport, 2522 North Dale Mabry, instead of Room No. 511, Federal Court House, 500 Zack Street.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Exception No. 13 to Revised Service Order No. 1312]

Soo Line Railroad Co.; Car Service Order

Because of the inability of the railroad to assemble the cars, a movement of thirty-four (34) loaded covered hopper cars will be seriously delayed on Soo Line Railroad Company enroute to Buffalo, New York, for unloading. Standard Milling desires to ship a sixty (60) car unit-grain-train of wheat to Buffalo, New York, routed Soo Line-ConRail. The consignee at Buffalo is badly in need of the wheat, but only 34 covered hoppers have arrived at Minneapolis. Section (a) of Revised Service Order No. 1312 authorizes any railroad which is unable to supply the number of covered hopper cars required by its tariffs to transport unit-grain-trains of fewer cars in accordance with the scale in Section (b).

Pursuant to the authority vested in the Director, Bureau of Operations, by Section (h) of Revised Service Order No. 1312, Soo Line Railroad Company is authorized to operate a sixty (60) car unit-grain-train from Minneapolis, Minnesota, to Buffalo, New York, comprised of sixty (60) railroad owned covered hoppers, on a one trip basis, with a minimum of 34 loaded cars operated in the first movement, and the remaining cars of the unit-train operated together in the final movement of this unit-grain-train. The total tariff minimum weight will be transported as required except if the railroad is unable to move all of the empty covered hoppers to the loading point on the final movement, the train can be reduced by the allowable number of cars or allowable weight percentage, as set forth in Section (b) of this Service Order.

This exception applies to railroad owned covered hopper cars.

The bills of lading and waybills shall bear the following endorsement: "Unit-grain-train of ( ) tons or ( ) cars. Partial movement of ( ) tons or ( ) cars forwarded authority Exception No. 13 to ICC Revised Service Order No. 1312. ( ) tons or ( ) cars to follow."

Demurrage rules will be treated as if each of the movements of the unit-train is a complete movement in itself.

Effective August 17, 1979.

Expires 11:59 p.m., August 31, 1979.

Issued at Washington, D.C., August 17, 1979.

Joel E. Burns,

Director.

[FR Doc. 79-27284 Filed 8-30-79; 8:45 am]

BILLING CODE 7035-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Increasing the Import Restraint Levels for Certain Cotton Textile Products from the Republic of Singapore

August 28, 1979.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing the consultation levels for Category 320 (other cotton fabrics, such as lawn and voile) and 341 (women's, girls' and infants' woven cotton blouses) and controlling imports at those new levels for the agreement year that began on January 1, 1979.

SUMMARY: Paragraph 5 of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 21 and 22, 1978, as amended, between the Governments of the United States and the Republic of Singapore provides for the establishment of consultation levels for certain categories, like Category 641, which are not subject to specific limits. The two governments have agreed by an exchange of letters dated May 31 and June 20, 1979 to increase the consultation level for Category 320 from 6,000,000 square yards to 8,000,000 square yards and for Category 341, from 48,276 dozen to 55,172 dozen during the agreement year which began on January 1, 1979.

EFFECTIVE DATE: September 5, 1979.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5423).

SUPPLEMENTARY INFORMATION: On January 3, 1979, there was published in the **Federal Register** (44 F.R. 932) a letter dated December 28, 1978 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established the levels of restraint applicable to certain categories of cotton, wool and man-made fiber textile products, produced or manufactured in Singapore and exported to the United States during the twelve-month period which began on January 1, 1979 and extends through December 31, 1979.

In the letter published below, in accordance with the terms of the bilateral agreement, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton textile products in Categories 320 and 341, produced or manufactured in Singapore and exported to the United States during the twelve-month period which began on January 1, 1979, in excess of the designated levels of restraint. The levels of restraint have not been adjusted to account for imports during the January-June period of 1979. During that period imports in Category 320 have amounted to 2,743,271 square yards; in Category 341, 13,897 dozen. Further charges will be made to account for the period beginning on July 1, 1979 and extending through the effective date of this action.

Paul T. O'Day,

3Acting Chairman, Committee for the Implementation of Textile Agreements.

August 28, 1979.

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive issued to you on December 28, 1978 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Singapore.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 21, and 22, 1978, between the Governments of the United States and the Republic of Singapore; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed, effective on September 3, 1979, and for the 12-month period beginning on January 1, 1979 and extending through December 31, 1979, to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton textile products in Categories 320 and 341 in excess of the following levels of restraint:

Category	12-month level of restraint [1]
320	8,000,000 yd[2]
341	55,172 doz.

[1] The levels of restraint have not been adjusted to account for imports after December 31, 1978. During the January-June 1979 period imports have amounted to 2,743,271 square yards in Category 320 and 13, 897 dozen in Category 341.

Cotton textile products in Categories 320 and 341 that have been exported prior to January 1, 1979 shall not be subject to this directive.

Cotton textile products in Categories 320 and 341 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The actions taken with respect to the Government of the Republic of Singapore and with respect to imports of cotton textile products from Singapore have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, which are necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[M-240, Amdt. 1; Aug. 28, 1979]

CIVIL AERONAUTICS BOARD.

Deletion and addition of items to the August 31, 1979, meeting.

TIME AND DATE: 9:00 a.m., August 31, 1979.

PLACE: Room 1027, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428.

SUBJECT:

Deletion: 4. Docket 35578, (Texas International Airlines, Inc. Enforcement Proceeding) Order 79-5-127—TXI's motion to disqualify the Board Members and to dismiss Proceeding (OGC).

Deletion: 25. Agreement CAB 27337, *et al.*, Agreements for intercarrier division of joint fares (BDA, OGC, BIA, BCP).

Addition: 25a. Cancellation of the "guaranteed air fare rule" proposed by TXI and Western (BDA).

STATUS: Open (1-30). Closed (Item 31).

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary, (202) 673-5068.

SUPPLEMENTARY INFORMATION: Items 4 and 25 are being deleted from the August 31, 1979, calendar in order that the staff may have additional time to prepare and coordinate the recommendations to the Board on these matters. Item 25a is being added to the August 31, 1979, calendar because if the Board wishes to suspend the proposal, it must do so by September 1 or lose the authority to do so under section 1002 of the Federal Aviation Act of 1958. Accordingly, the following Members have voted that items 4 and 25 be deleted from the meeting and that item 25a be added to the August 31, 1979, meeting and that no earlier announcement of these changes was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

4

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at 11:00 a.m. on Tuesday, August 28, 1979, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider the application of Vista Hills Bank, a proposed new bank to be located in El Paso, Texas, for Federal deposit insurance.

In calling the meeting, the Board determined, on motion of Director William M. Isaac (Appointive), seconded by Director John G. Heimann (Comptroller of the Currency), and concurred in by Chairman Irvine H. Sprague, that Corporation business required its consideration of this matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of this matter in a meeting open to public observation; and that this matter was eligible for consideration in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: August 28, 1979.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10:45 a.m., Wednesday, August 29, 1979 (following a recess at the conclusion of an open meeting held earlier in the day).

PLACE: 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Review of Board Officer positions. (This matter was originally announced for a meeting on August 24, 1979).

2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees. (This matter was originally announced for a meeting on August 24, 1979).

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board, (202) 452–3204.

Dated: August 29, 1979.

Griffith L. Garwood,

Deputy Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of September 4, 1979, in Room 825, 500 North Capitol Street, Washington, D.C.

An open meeting will be held on Wednesday, September 5, 1979, at 2:30 p.m., immediately followed by a closed meeting.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402 (a) (8), (9)(i), and (10).

Chairman Williams and Commissioners Loomis, Pollack, and Karmel determined to hold the aforesaid meeting in closed session.

The subject matter of the open meeting scheduled for Wednesday, September 5, 1979, will be:

1. Consideration of an application by Robert L. Ferman to lift the bar imposed by Commission Order of March 29, 1973, suspending him from association with any broker-dealer in a proprietary or supervisory capacity. For further information, please contact Michael F. Perlis at (202) 755–1498.

2. Consideration of whether to issue a release soliciting comments on a rule under the Investment Company Act of 1940 (the "Act"), which would permit open-end management investment companies to bear expenses associated with the distribution of their shares, if such companies complied with certain conditions and procedures. The proposed rule would require that any decision by an open-end management investment company to use its assets to finance distribution be approved by its shareholders and directors, including its disinterested directors, following procedures generally similar to those prescribed by the Act for approval of investment advisory contracts. The proposed rule also contains provisions intended to ensure that the disinterested directors are neither dominated nor unduly influenced by management, that the directors are fully informed, and that they exercise reasonable business judgment. In addition, the Commission will consider whether to propose for public comment: (1) a rule to exempt from the requirement of prior Commission approval certain transactions between open-end management investment companies and their affiliated persons whereby investment company assets are used for distribution, if those arrangements comply with the conditions and procedures generally applicable to a plan to bear distribution expenses; and (2) certain disclosure and reporting requirements relating to the use of assets for distribution, including a revision of the registration and reporting form for open-end management investment companies. For further information, please contact Richard W. Grant at (202) 755–0242 or Dianne E. O'Donnell at (202) 755–1796.

3. Consideration of a request for rulemaking submitted by Alliance Capital Management Corporation to exempt certain transactions from the prohibition of Section 11(a) of the Securities Exchange Act of 1934. For further information, please contact Arnold Dean at (202) 755–4372.

4. Consideration of an application by Paine, Webber, Jackson & Curtis, Inc. for relief pursuant to Rule 252(f) of Regulation A. For further information, please contact Thomas J. Baudhuin at (202) 755–1290.

5. consideration of an application by Advest, Inc. for relief pursuant to Rule 252(f) of Regulation A. For further information, please contact Thomas J. Baudhuin at (202) 755–1290.

6. Consideration of whether to issue a release soliciting comments on (1) an amendment to Rule 12b–25 under the Securities Exchange Act of 1934 which would eliminate the extension of time procedures and would require notification if an issuer or reporting person is unable to timely file a report required by Sections 13 or 15(d) of the Act; and (2) a proposed Rule 12b–26 under the Securities Exchange Act which require disclosure on the cover page of a periodic report if a required portion of the report is omitted. For further information, please contact Bruce S. Mendelsohn at (202) 755–1750.

7. Consideration of whether to issue a release concerning the proxy statement disclosure requirements of Schedule 14A relating to certain business and personal affiliations of directors. The Commission will also consider whether to include a request for comments on the disclosure requirements adopted in December 1978 (Release No. 34–15384) relating to the structure, functioning and composition of boards of directors. for further information, please contact Richard B. Nesson at (202) 755–7622 or G. Michael Stakias at (202) 755–1750.

8. Consideration of whether to issue a release soliciting comments on a proposed new small issue exemption rule under Section 3(b) of the Securities Act of 1933, to be designated Rule 242, which would allow certain corporate issuers to sell up to $2,000,000 of their restricted securities to an unlimited number of institutional-type purchasers and to thirty-five other purchasers if the issuers meet conditions relating to the manner of the offering, the furnishing of information, and the filing of a notice of sales. For further information, please contact Mary Beach at (202) 755–4370.

9. Consideration of whether to affirm action taken by the duty officer to issue an order setting a briefing schedule on issues not fully examined in a proceeding involving the proposed acquisition under Sections 9(a)(1) and 10 of the Public Utility Holding company Act of 1935 by American Electric Power Company, Inc., a registered holding company, of the common stock of Columbus and Southern Ohio electric Company. For further information, please contact Grant G. Guthrie at (202) 523–5156.

The subject matter of the closed meeting scheduled for Wednesday, September 5, 1979, immediately following the 2:30 p.m. open, will be:

Formal orders of investigation.
Access to investigative files by Federal, State, or Self-Regulatory Authorities.
Litigation matter.
Institution of injunctive actions.
Formal order of investigation and subpoena enforcement action.
Institution and settlement of administrative proceedings of an enforcement nature.
Settlement of administrative proceedings of an enforcement nature.
Freedom of Information Act appeal.
Personnel security matter.
Opinions.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Mike Rogan at (202) 755—1638.

August 29, 1979.

DEPARTMENT OF ENERGY

Energy Information Administration

Annual Survey of Domestic Oil and Gas Reserves (Form FIA-23); Data Due for Report Year 1978

AGENCY: Department of Energy, Energy Information Administration.

ACTION: Notice of Reports to be Filed.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE) hereby gives notice that its Annual Survey of Domestic Oil and Gas Reserves, Form EIA-23, is to be filed for report year 1978 by certain oil and gas well operators listed herein. Form EIA-23 was approved for 1977 and 1978 report year data collection by the Office of Management and Budget on December 22, 1978. Report forms for 1977 report year data were mailed to selected respondents in January 1979.

Form EIA-23 for the 1978 report year must be filed by all oil and gas well operators who produced during that year 400,000 barrels of crude oil or more, or 2 billion cubic feet of natural gas or more, or both. In addition, a statistically selected sample of operators who produced less than these amounts must also file Form EIA-23. Report forms for 1978 report year data were mailed to the selected respondents approximately August 7, 1979.

DATES: Form EIA-23 submittals for the 1978 report year must be filed as follows: Part I—on or before September 20, 1979. Part II—on or before December 4, 1979.

ADDRESS: Completed forms must be mailed to: U.S. Department of Energy, Box OK, Norman, Oklahoma 73070.

FOR FURTHER INFORMATION CONTACT: The EIA-23 Coordinator (405) 360-1971.

SUPPLEMENTARY INFORMATION:

I. Sanctions
II. Confidentiality
III. Requests for Extensions of Time to File
IV. Requests for Exception from Filing
V. Respondents for the 1978 Report Year
VI. Form EIA-23. Category I and II Operator Package. Category III Operator Package.

I. Sanctions

Failure to provide the information requested on Form EIA-23 pursuant to the provisions of section 13(b) of the Federal Energy Administration Act of 1974 (FEAA, Pub. L. 93-275) shall be subject to penalties as provided in the FEAA, section 13(i), as amended.

II. Confidentiality

In accordance with section 14 of the FEAA, in responding to specific requests received from members of the public, data collected on this form will be held confidential to the extent that they are determined by DOE to be within the exemption for trade secrets and confidential commercial information as specified in the Freedom of Information Act (5 U.S.C. 552(b)(4)).

III. Requests for Extension of Time to File

All requests for extension of time to file Form EIA-23 must be in writing and must state the time period desired and the reason why the original filing date cannot be met. The request is to be addressed to the Director, Office of the Oil and Gas Information System, EI-82, Room 2E-076 Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585.

IV. Requests for Exception From Filing

All requests for exception from filing Form EIA-23 must be in writing and must be based on an assertion of serious hardship or gross inequity. The procedure for filing for an exception is set forth in Part 205, Subpart D of the FEA Procedural Regulations. A request for an exception from filing is to be addressed to the Director, Office of Hearings and Appeals, HG-1, U.S. Department of Energy, Room 6002A, 2000 M Street, NW., Washington, D.C. 20461.

V. Respondents for the 1978 Report Year

The group of oil and gas well operators required to file Form EIA-23 for the 1978 report year is listed in the last section of this **Federal Register** notice.

VI. Form EIA-23

The Category I and II operator package and the Category III operator package, each containing instructions, glossary and schedules, are printed for information purposes on the following pages of this **Federal Register** notice.

Issued at Washington, D.C. on August 21, 1979.

Albert H. Linden, Jr.,

Deputy Administrator, Energy Information Administration.

BILLING CODE 6450-01-C

Department of Energy,
Washington, D.C. 20461.

July 31, 1979.

Dear Sir: The Energy Information Administration (EIA) of the United States Department of Energy (DOE), as part of its legislated responsibilities, has instituted an "Annual Survey of Domestic Oil and Gas Reserves." It will provide to energy analysts verifiable and credible basic data regarding the Nation's oil and gas reserves posture. These data are, in turn, essential to the formulation and adoption of effective and fair national energy policies.

All oil or gas well operators above a certain size, as well as a statistically selected sample of smaller operators, are required to respond to the survey for report year 1978. You have been determined to be a respondent this year on the basis of your identification as an operator in Federal and/or State records. These records indicate that you produced more than 400,000 barrels of crude oil or 2 billion cubic feet of natural gas from properties which you operated in calendar year 1978. We have therefore attached a full Form EIA–23 entitled "Category I and II Operator Package." Instructions for obtaining a "Category III Operator Package" are provided in the event that your 1978 production was smaller than our records indicate. Instructions are also provided on what to do if you were not an operator in calendar year 1978.

Please note that Part I of the form which you are receiving must be submitted on or before September 20, 1979. Part II of the form must be submitted on or before December 4, 1979. Instructions for mailing are included in each package.

REQUESTS FOR FURTHER INFORMATION OR ADDITIONAL FORMS OR SCHEDULES SHOULD BE DIRECTED TO THE EIA–23 COORDINATOR AT (405) 360–1971.

You should be aware that failure to make information requested on Form EIA–23 available to the DOE or failure to allow the DOE to verify the information submitted on the form will be subject to penalties as provided in Section 13(i) of the Federal Energy Administration Act of 1974 (Pub. L. 93–275), as amended. In responding to specific requests for information made by members of the public, information collected on Form EIA–23 will be held confidential to the extent that it is determined to constitute trade secrets or commercial or financial formation considered to be privileged or confidential, in accordance with Section 14 of the above mentioned Act and the Freedom of Information Act (5 USC Sec. 552(b)(4)).

The timely provision of your best available data in the requested format is solicited. Thank you for your cooperation and participation in this portion of the National Energy Program.

Sincerely,

Lincoln E. Moses,

Administrator, Energy Information Administration.

GENERAL INSTRUCTIONS

A. Purpose

The Energy Information Administration (EIA) of the Department of Energy (DOE) seeks, with Form EIA–23, to gather and summarize credible, timely data regarding proved reserves and production of crude oil, natural gas and other related matters. The DOE will use the resulting information in many ways; for example:

- To develop national and regional estimates of production and proved reserves of domestic crude oil and natural gas, and
- To facilitate national energy policy decisions.

This survey segregates operators into three categories, according to the annual production of hydrocarbons from wells which they operated on December 31 of the report year. Proved reserve estimates are required from the smaller operators only if such data exist in company records. The largest operators must provide proved reserves data.

EIA will follow this survey with efforts to validate the data to assess the meaningfulness and accuracy of the resulting information. Respondents may encounter two principal activities included in this validation:

- Government personnel will make or supervise independent reserve estimates on a sample basis, and
- A sample of operators will be visited to confirm the data submitted.

EIA recognizes that the judgment of geologists and petroleum engineers is required in the reserve estimation process, and that as a result, proved reserves are estimates rather than precise quantitative measurements.

B. Who Must Submit Form EIA–23 for Report Year 1978

Each operator [1] of domestic oil and/or gas wells as of December 31 of report year 1978 has filing requirements as described in Section C below.

If you are not an operator (perhaps a former operator or solely a working or royalty interest owner), please submit the Part I Cover Page which immediately follows the Glossary, so EIA can remove your name from its active operator identification list.

Please note that each operating affiliate (whose production places it in Category I or II as described in Section C) of a parent company must file its own Form EIA–23. The parent company must file only if it is itself an operator. If you have an affiliate who should have received this form instead of or in addition to you, please notify EIA by contacting the EIA–23 Coordinator at (405) 360–1971.

C. What Must Be Submitted

Filing requirements are based on operator category. Your operator category is determined from the following table. "Production Level" refers to the total year's production from all domestic oil and/or gas wells you operated on December 31 of the

[1] The person responsible for the management and day-to-day operation of one or more crude oil and/or natural gas wells on December 31 of the report year. The operator is generally a working interest owner or a company under contract to the working interest owner(s). Wells included are those which have proved reserves of crude oil and/or natural gas in the reservoirs associated with them, whether or not they are producing. Wells abandoned during the report year are also to be considered "operated" on December 31.

report year, including wells abandoned during the year.

Operator Category and Report Year Production Level	Crude oil [1]	Dry natural gas [2]
I Greater than or equal to.	1,500 MBbl or	15,000 MMcf or both
II Greater than or equal to.	400 MBbl or	2,000 MMcf or both And BOTH less than category I levels
III Less than	400 MBbl and	2,000 MMcf

[1] One barrel is 42 U.S. gallons at 14.73 PSIA (pounds per square inch absolute) and 60 degrees Fahrenheit. MBbls is thousands of barrels.
[2] At 14.73 PSIA and 60 degrees Fahrenheit. MMcf is millions of cubic feet.

- Category I Operators are required to submit one copy of:

Part I Cover Page/Attestation; Summary Report.

Part II Cover Page; Schedule(s) 1 ". . . Reserves and related Data by State and Subdivision"; Schedule(s) 3 ". . . Reserves and Related Data by Field and Reservoir"; Schedule(s) 4 "Footnotes" (if needed).

- Category II Operators are required to submit one copy of:

Part I Cover Page/Attestation; Summary Report.

Part II Cover Page; Schedule(s) 1 ". . . Reserves and Related Data by State and Subdivision"; Schedule(s) 2 ". . . Reserves and Production Data by Field"; Schedule(s) 4 "Footnotes" (if needed).

A Category II operator may elect to file as a Category I operator.

- Category III Operators are required (if they have received a forms package) to submit one copy of:

Part I only. Contact the EIA–23 Coordinator at (405) 360–1971 to obtain the Category III forms package, if necessary.

D. When and Where To Submit

Part I of Form EIA–23 must be submitted on or before September 20, 1979, for report year 1978 data. Part II of Form EIA–23 must be submitted on or before December 4, 1979, for report year 1978 data.

Completed forms should be submitted to: U.S. Department of Energy; Box OK; Norman, OK 73070.

For information concerning requests for extensions of time to file Form EIA–23, contact the EIA–23 Coordinator at (405) 360–1971.

E. Record Keeping Requirements

All records necessary to reconstruct the data reported on this form must be kept for a period of three (3) years at the reporting site.

F. Sanctions

Failure to make information requested on Form EIA–23 available to the Secretary of DOE or failure to allow the Secretary to verify the accuracy of the information he has received in that form shall be subject to penalties as provided in the Federal Energy Administration Act of 1974 (FEAA, P.L. 93–275) Section 13(e)(2) and (i), as amended.

G. Confidentiality

In accordance with Section 14 of the FEAA, in responding to specific requests received from members of the public, data collected on this form will be held confidential to the extent that they are determined by the DOE to be within the exemption for trade secrets and confidential commercial information as specified in the Freedom of Information Act (5 USC Section 552(b)(4)).

H. Reporting Standards

1. Operated and Ownership Reporting Bases

Data on all schedules, except Schedule 1 of Part II, are to be reported on a Total Operated Basis. On Schedule 1, data are requested to be reported on both a Total Operated Basis (right side) and a Gross Working Interest Ownership Basis (left side). (See definitions in the Glossary.)

When reporting on a *Total Operated Basis*, production and reserve changes data are required for the full report year, even though the operator of the wells on December 31 may not have operated those wells for the entire year. These data will differ from those reported previously if the operator has acquired, or disposed of, operated properties during the report year.

When reporting on a *Gross Working Interest Ownership Basis*, the respondent reports what he owned at the beginning of the year, and all subsequent reserves changes, including sales and purchases of in-place reserves. Gross working interest is sometimes known as expense interest.

Under this reporting concept total reserves for a given property equal the sum of the reserves attributable to all the gross working interests in that property. Thus the respondent reports all of his own working interest plus a proportionate share of royalty and overriding royalty interests. The proportionate share is determined by the respondent's working interest relative to the total of all working interests. If the respondent's only interest in a particular property is royalty interest or overriding royalty interest, then he should not include such property in his Gross Working Interest Ownership Basis computations.

The respondent must include data in his ownership report for properties owned by affiliated companies if *both* of the following conditions are satisfied:

a. The respondent operates the subject property for his affiliate, *and*

b. The affiliate is a nonoperator or a Category III operator and therefore not required to file Part II.

Examples:

- Of the total interest, respondent's working interest is 75 percent and the combined royalty is 25 percent. Respondent reports 100 percent of proved reserves (75 percent plus 25 percent).
- Of the total interest, respondent's working interest if 40 percent. Another working interest is 40 percent and royalty owners' combined interest is 20 percent. Respondent reports 50 percent of proved reserves (40 percent plus one half of 20 percent).
- Of the total interest, respondent has royalty interest of 10 percent. The working and combined royalty interests of other parties total 90 percent. Respondent does not include ownership data for this property.

As opposed to reporting on a Total Operated Basis, data on ownership are required only for the portion of the year in which the respondent actually was an owner.

- Respondent acquires a property on July 1 via purchase or merger. He reports the proved reserves purchase as a "Purchase of In-Place Reserves" and includes in the reported production data only production from July 1 to December 31. Reserve changes data are reported in a similar manner.

2. States and Geographic Subdivisions

The determination of which State or geographic subdivision within which to report proved reserves and production data is based on the location of the reservoir(s) containing the oil and/or gas. If a reservoir or field overlaps two or more States or subdivisions, the proved reserves data must be split into the appropriate geographic components. Offshore proved reserves data are required separately for the State and Federal domain. If a field or reservoir lies on or between disputed boundaries, include all data in the State Offshore area, and for Part II *only* note this fact is a footnote.

3. Proved Reserves: Tested and Untested

In this survey a distinction is made between reserves which have been proved by a flow test or by actual production (tested), and reserves proved by well log or core analyses only (untested). It is not intended that operators review their old well logs for the purpose of "finding" untested proved reserves except as they normally do so in their course of business.

4. Report Year Production

Production data are required from all operators. If actual production data are not available at the time Form EIA–23 is prepared, estimate production. Note that amended schedules are *not* required to correct preliminary production data. To the extent that production data are corrected in a subsequent report year, operators would report corrections to previously reported proved reserves as a data item. (See CORRECTIONS in the Glossary.)

5. Crude Oil

All crude oil volumes are to be reported in thousands of stock tank barrels (MBbls) (42 U.S. gallons per barrel) at 14.73 PSIA (pounds per square inch absolute), corrected to 60 degrees Fahrenheit and excluding basic sediment and water.

6. Natural Gas

All natural gas volumes are to be reported as *dry* natural gas in millions of cubic feet (MMcf) at 14.73 PSIA and 60 degrees Fahrenheit. It is recognized that although natural gas is defined on a dry basis, the operator in many instances has no knowledge of the ultimate reduction of the gas stream resulting from natural gas liquids extraction by other parties.

The operator is expected to generate dry natural gas data by applying a shrinkage factor based upon all data available to him. He is not expected to perform gas analyses to determine the shrinkage factor, except as required for business reasons. (See NATURAL GAS, DRY and SHRINKAGE FACTOR in the Glossary.)

Operators must segregate most natural gas data into associated-dissolved and nonassociated gas entries. If the classification of gas type for a given reservoir should change from one to the other for any reason, the respondent should record all data according to the latest classification of gas type. Category I operators are to footnote changes arising from gas type reclassification of reservoirs.

7. Natural Gas Liquids—Lease Condensate Production

Proved reserves of natural gas liquids and lease condensate production volumes are to be reported in thousands of stock tank barrels (MBbls) (42 U.S. gallons per barrel), at 14.73 PSIA and 60 degrees Fahrenheit. Note that natural gas liquids proved reserves data are not required for report years 1977 and 1978, but lease condensate production data are required for *all* report years.

Natural gas liquids proved reserves are calculated by the use of a factor applied to the total volume of recoverable gas. Such a factor, usually expressed in stock tank barrels per million cubic feet of gas, is based on the recovery efficiency of installed or planned processing facilities. Such factors may be judged from laboratory gas analyses adjusted to surface processing facility efficiency or obtained from actual plant or separator production statistics. The calculation of proved reserves of natural gas liquids takes into consideration the effect of retrograde condensation in the reservoir where applicable.

When no information is available on plans for processing of gas known to contain liquefiable hydrocarbons, recoveries used in the calculation of reserves are based on separator yields or formation tests.

8. Schedule Preparation Standards

a. *Negative and Positive Volumes.* Negative volumes are by definition acceptable only for data items marked (+,−). They are to be reported by entering a minus (−) sign to the left of the left-most digit. Plus (+) signs should never be used.

b. *Rounding.* When rounding crude oil and natural gas volumes, round 500 barrels or 500 Mcf and above up; less than 500 barrels or 500 Mcf, round down.

Examples	Actual volume	Repoted volume
Crude oil	7,500 barrels	8 MBbls.
	7,469 barrels	MBbls.
Gas	8,500,000 cubic feet	9 MMcf.
	10,457,000 cubic feet	10 MMcf.

c. *Collation of Part II.* Prior to submission, completed Part II must be assembled and page-numbered consecutively in the following order:

Page 1.—Part II Cover Page.

Page 2, 3, 4, etc.—Schedule(s) 1 in alphabetical order by State, and by subdivision within applicable States. Schedule(s) 2 (if required) in alphabetical order by State, by subdivision within applicable States, and by field name within subdivision or State. Schedule(s) 3 (if required) in alphabetical order by State, by subdivision within applicable States, and by field name within subdivision or State. Schedule(s) 4 (if needed).

Note.—Do not staple or bind your filing.

d. *Reproduction.* If mechanically reproduced forms are submitted in lieu of originals, they must have been clearly reproduced, must be of identical format and scale (within 3 percent overall dimension) to the provided forms and must have been accurately aligned during the reproduction process. Computer printouts on other than an exact duplicate of the provided original forms are not acceptable. Computer tapes are not acceptable at the present time.

e. *Character Set.* Responses must be typed or printed in black ink. If you are writing the response by hand, print and use all capital letters. Long hand is unacceptable. The form was designed to be completed using a 10-pitch (Standard Pica) typewriter, although a 12-pitch machine can be used.

SPECIFIC INSTRUCTIONS

I. Part I: Operator Identification and Summary Report

1. Cover Poge (Page 1)

Item Instructions

Note.—Numbers in parentheses immediately following item, subitem or column titles indicate the maximum number of spaces avaiable for the data.

Item A: *Were you an operator*—Check the appropriate box.

Item B: *I.D. code (6)*—Copy into this space the six digit number which appears on the mailing label affixed to this forms package. If no code has been assigned, please leave this space blank.

Item C: *Identification*—Name, Address, City, State, ZIP Code, Responsible Preparer, Telephone Number. IMPORTANT: If the company name or address as it appears on the mailing label does not match your response to this item, check the box.

Enter the legal name and address of the operator. Please use standard State abbreviations found in the Glossary.

If a foreign address, enter city, local equivalent of State name (e.g., province), and country on the second address line.

Enter the full name and business telephone number of the individual who is responsible for the preparation of Form EIA–23.

Item D: *EIN number (9)*—Enter the operating firm's IRS Employer Identification Number (EIN) if it has one. If the operator does not have an EIN, enter the social security number of the attestor and check the box.

Item E: *Parent company identificotion*—Name, Address, City, State, ZIP Code. Enter the legal name and address of the parent company, if any, which exercises *ultimate* control over the respondent.

Example: You are Company A, which takes direction from Company B, which in turn takes direction from Company C. Report Company C as the parent company, rather than Company B.

Item F: *Parent company EIN number (9)*—Enter the EIN number of the parent company, if any.

Item G: *Attestation*—Enter the name and title of the individual designated by the company to sign the certification, and the date of signing, in the spaces provided. This report must be sworn to or affirmed by a responsible officer (for example: a senior officer or the officer responsible for regulatory filings).

2. Summary Report (Poges 2 and 3)

On the Summary Report (Pages 2 and 3 of Part I), operators must supply proved reserves and production estimates on a Total Operated Basis (see definition in the Glossary) for all properties operated on December 31 of the report year.

Exception: Category II and III operators are required to report proved reserves data only for those properties for which estimates exist in company records. To the extent that Category II and III operators do not have proved reserve estimates associated with one or more specific properties, they must separate their production data according to production from properties for which proved reserves have been estimated, and production from properties for which proved reserves have not been estimated.

Data filed in Part II will automatically supersede that filed in Part I. Thus, an amended Part I need not be submitted.

Section 1.0: Operator and Report Identification Data

The information in Section 1.0 is to be reported on both pages 2 and 3 of Part I.

Item Instructions

Item 1.1: *Operator I.D. Code (6)*—Copy into this space the six digit operator code which you entered on the Cover Page. If no code has been assigned to you, leave this space blank.

Item 1.2: *Operator Name (35)*—Enter the first 35 characters of the operator name from the Cover Page. If the name exceeds 35 characters, do not abbreviate, but simply truncate the extra characters on the right.

Item 1.3: *Report Date (2)*—Enter the last two digits of the report year to which data reported on this schedule pertain.

Item 1.4: *Original (1)*—Enter an 'X' if this is the first submission of this schedule for the report year; otherwise leave blank.

Item 1.5: *Amended (1)*—Enter an 'X' if this schedule amends a previously submitted schedule; otherwise leave blank.

Section 2.0: State and Geographic Subdivision Data

Provide data in Columns A–F for each State or geographic subdivision in which you were an operator of oil and/or gas wells on December 31 of the report year. Proved reserves and production (for the report year) of crude oil and dry natural gas are to be reported on a Total Operated Basis (see definition in the Glossary); include production from wells abandoned during the year. If all column entries for a particular State or subdivision are zero, leave that line blank.

For fields or reservoirs overlapping two or more States or subdivisions, the data are to be separated and reported in their respective States or subdivisions. Refer to maps in the glossary for subdivision boundaries in the States of Alaska, California, Louisiana, New Mexico, and Texas.

of Alaska, California, Louisiana, New Mexico, and Texas.

Sum all columns and enter the totals on line 64—"U.S.—Totals."

Column A: Crude Oil Reserves—End of Report Year (10) and Column D: Dry Natural Gas Reserves—End of Report Year (10). Enter estimates of total proved reserves (tested and untested) for operated properties: the estimates should be based on your most recent evaluations, adjusted for production through December 31 of the report year and for any other relevant factors. The resulting estimates for reserves should be consistent with the definitions of proved reserves in the Glossary. (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.) If you are a Category II operator and no proved reserves estimates are available, enter 'NA'. If depleted during the report year, enter zero (0). Operators need not review well logs to "find" untested proved reserves except as is normally done in the course of their business.

Production data are required of all respondents. If actual data are not available at the time this Part of the form is being prepared, the data must be estimated.

Column B: Crude Oil Report Year Production—Reserves Estimated (10) and Column E: Dry Natrual Gas Report Year Production—Reserves Estimated (10). Enter the production for the report year from those operated properties for which proved reserves data were reported in Columns A or D. (See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Column C: Crude Oil Report, Year Production—Reserves Not Estimated (10)—(Category II and III Operators Only) and Column F: Dry Natural Gas Report Year Production—Reserves Not Estimated (10)—(Category II and III Operators Only). Enter the production for the report year from operated properties for which proved reserves estimates are not avalilable in existing company records. (See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Note.—Category III operators are not required to proceed to part II.

J. Part II: Detailed Report

1. Cover Page

Item Instructions

Note.—Numbers in parentheses immediately following item, subitem or column titles indicate the maximum number of spaces available for the data.

Item A: *Operator I.D. Code (6)*—Copy into this space the six digit number which appears on the mailing label affixed to this forms package. If no code has been assigned, leave this space blank.

Item B: *Operator Identification*—Name, Address, City, State, ZIP Code, Responsible Preparer, Telephone Number.

Enter the legal name and address of the operator. Use the standard State abbreviations found in the Glossary.

If a foreign address, enter city, local equivalent of State name (e.g., province), and country on the second address line.

Enter the full name and business telephone number of the individual who is responsible for the preparation of Form EIA–23.

Item C: *Attestation*—Enter the name and title of the individual designated by the company to sign the certification, and the date of signing, in the spaces provided. This report must be sworn to or affirmed by a responsible officer (for example: a senior officer or the officer responsible for regulatory filings).

2. Schedule 1—"Crude Oil, Dry Natural Gas, and Natural Gas Liquids Reserves and Related Data by State and Subdivision"

A separate Schedule 1 is to be completed for each State or geographic subdivision in which you:

a. Were an operator of oil and/or gas wells on December 31 of the report year, *or*

b. Held working interest ownership in oil or gas reserves *during* the report year whether you were the operator of those reserves or not, provided you were an operator elsewhere in the U.S.

Section 1.0: Operator and Report Identification Data

This information is to be entered on each Schedule 1 submitted.

Item Instructions

Item 1.1: *Operator I.D. Code (6)*—Copy into this space the six digit operator code which you entered on the Part II Cover Page. If no code has been assigned to you, leave this space blank.

Item 1.2: *Operator Name (35)*—Enter the first 35 characters of the operator name from the Cover Page. If the name exceeds 35 characters, do not abbreviate, but simply truncate the extra characters on the right.

Item 1.3: *Report Date (2)*—Enter the last two digits of the report year to which data reported on this schedule pertain.

Item 1.4: *Original (1)*—Enter an 'X' if this is the first submission of this schedule for the report year; otherwise leave blank.

Item 1.5: *Amended (1)*—Enter and 'X' if this schedule amends a previously submitted schedule; otherwise leave blank.

Item 1.6: *Page (4) of Pages (4)*—Enter the current page number, and then the last page number of your entire Part II filing.

Item 1.7: *Page Footnote (4)*—Enter the page number on which Schedule 4 footnotes pertaining to data filed on this schedule begin. Leave blank if there are no footnotes to the data filed on this schedule.

Item 1.8: *State Abbreviation (2)*—Enter the two character alphabetic abbreviation of the State to which data reported on this schedule pertain. For an offshore area, enter the abbreviation of the adjacent State. (See Location Codes in the Glossary.)

Item 1.9: *Subdivision Code (2)*—Enter the two digit code of the geographic subdivision to which data reported on this schedule pertain; leave blank if not applicable. (See Location Codes in the Glossary.)

Section 2.0 Proved Reserves Data and Report Year Reserves Changes Gross Working Interest Ownership Basis (Columns A–D)

Report on a Gross Working Interest Ownership Basis (see definition in the Glossary), data for any proved reserves located in the State or subdivision in which you had a working interest during the report year. Include both operated and nonoperated properties. These data should reflect only that portion of the report year in which you were actually a working interest owner.

Along with you ownership data, you are required to include data on proved reserves, production and reserves changes for properties which you operated for any affiliated company, but ONLY if that company is not required to file PART II. Identify these affiliate(s) by name and IRS Employer Identification Number (EIN) in a footnote.

Total Operated Basis (Columns E–H)

Report on a Total Operated Basis (see definition in the Glossary), data for all proved reserves associated with the wells you operated on December 31 of the report year, regardless of whether or not you were a working interest owner of such reserves. Include data for the entire year's operations of these properties, even if they were operated by another firm earlier in the report year. Also report data for properties abandoned during the report year.

When a comparable data item appears on Schedule 2 or 3, the Schedule 1 entry must be the sum of data reported on those schedules.

Category I operators are required to provide information for each data item requested.

Category II operators must provide only those proved reserves estimates which exist in the company's records.

Item 2.1: *Reserves—End of Previous Year (10)*—Enter in Columns A–H, the volumes of proved reserves at the end of the calendar year *preceding* the report year. Proved reserves data for natural gas liquids (Columns D and H) are not required for report years 1977 and 1978. (See Proved Reserves of Crude Oil, and Proved Reserves of Natural Gas or Proved Reserves of Natural Gas Liquids in the Glossary.)

Item 2.2: *Purchases of In-Place Reserves (10)*—Enter in Columns A–C, the volumes of proved reserves purchased or otherwise acquired during the report year. In the case of each merger, footnote the name of the company absorbed. (See Purchases of In-Place Reserves in the Glosary.)

Item 2.3: *Sales of In-Place Reserves (10)*—Enter in Columns A–C, the volumes of proved reserves sold or otherwise disposed of during the report year. Production is not to be included here. Do not use a minus (−) sign. (See Sales of In-Place Reserves in the Glossary.)

Item 2.4: *Corrections (+, −) (10)*—Enter in Columns A–C and E–G, the net changes to "Reserves—End of Previous Year" attributable to corrections made during the report year. Use a minus sign (−) to indicate net reductions. (See Corrections in the Glossary.)

Item 2.5: *Revision Increases (10)*—Enter in Columns A–C and E–G, the additions to "Reserves—End of Previous Year" attributable to revisions made during the report year. (See Revisions in the Glossary.)

Item 2.6: *Revision Decreases (10)*—Enter in Columns A–C and E–G, the reduction from "Reserves—End of Previous Year" attributable to revisions made during the report year. Do not use a minus (−) sign. (See Revisions in the Glossary.)

Item 2.7: *Extensions (10)*—Enter in Columns A–C and E–G, the increases to "Reserves—End of Previous Year" attributable to extensions made during the report year. (See Extensions in the Glossary.)

Item 2.8: *New Field Discoveries (10)*—Enter in Columns A–C and E–G, the additions to "Reserves—End of Previous Year" attributable to new fields discovered during the report year. (See New Field Discoveries in the Glossary.)

Item 2.9: *New Reservoir Discoveries in Old Fields (10)*—Enter in Columns A–C and E–G, the additions to "Reserves—End of Previous Year" attributable to new reservoirs discovered in old fields during the report year. (See New Reservoir Discoveries in Old Fields in the Glossary.)

Item 2.10: *Report Year Production—Reserves Estimated (10)*—Enter in Columns A–C and E–G, the volumes produced during the report year from properties for which data were entered in Items 2.1 through 2.9. (See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Item 2.11: *Reserves—End of Report Year (10)*—Enter in Columns A–H, the volumes of proved reserves at the end of the report year. Specifically: Columns A–C and E–G: These volumes should equal the algebraic sum of Items 2.1, 2.2, 2.4, 2.5, 2.7, 2.8, and 2.9, less the sum of Items 2.3, 2.6, and 2.10. Columns D and H: Proved reserves data for natural gas liquids are not required for report years 1977 and 1978.

Item 2.12: *Reserves in Nonproducing Reservoirs (10)*—Enter in Columns A–H, the volumes of proved reserves at the end of the report year which are attributable to reservoirs which were in a nonproducing status. Entries in Columns D and H are not required for report years 1977 and 1978. (See Nonproducing Reservoirs in the Glossary.)

Item 2.13: *Report Year Production—Reserves Not Estimated (10)*—Category II Operators Only)—Enter in Columns A–C and E–G, the volumes produced during the report year from properties for which proved reserves estimates and reserves changes data are not included in Items 2.1–2.9 and 2.11.

Item 2.14: *Report Year Lease Condensate Production (10)*—Enter in Columns D and H, the volumes of lease condensate produced during the report year. (See Production, Lease Condensate in the Glossary.)

Section 3.0: Indicated Additional Reserves of Crude Oil (8)

Enter the estimated volumes of crude oil which may become available through the application of improved (enhanced) recovery techniques. (See Indicated Additional Reserves of Crude Oil in the Glossary.)

Section 4.0: Commitment Status of Proved Natural Gas Reserves

Report in this section the total proved reserves of natual gas reported in Item 2.11, sum of Columns B and C , on a Gross Working Interest Ownership Basis, according to the commitment status of the reserves. (See Commitment Status of Proved Natural Gas Reserves in the Glossary.)

Item 4.1: *Interstate Contracts*—Enter in Columns A–E, the proved natural gas reserves committed for sale under contracts subject to the jurisdiction of the Federal Energy Regulatory Commission (FERC) as of December 31 of the report year.

Item 4.2: *Intrastate Contracts*—Enter in Columns A–E, the proved natural gas reserves committed for sale under contracts not subject to FERC jurisdiction as of December 31 of the report year.

Column A: For Resale—Long-Term (10)—Enter the volumes of proved natural gas reserves committed for resale under "long-term" contracts. Interstate: "Short-term" contracts are distinguished in FERC Order Nos. 418, 431, or 491 A–D. All others are "long-term". Intrastate: "Long-term" contracts are those longer than one year's duration.

Column B: For Resale—Short-Term (10)—Enter the volumes of proved natual gas reserves committed for resale under "short-term" contracts. Interstate: "Short-term" contracts are distinguished in FERC Order Nos. 418, 431, or 491 A–D. Intrastate: "Short-term" contracts are those of one year's duration or less.

Column C: Direct Sale—Industrial (10)—Enter the volumes of proved reserves committed to industrial end-users of natural gas under interstate and intrastate contracts. This includes sales to other producers and to electric utilities.

Column D: Direct Sale—Other (10)—Enter the volumes of proved reserves committed to end users other than industrial consumers under interstate and intrastate contracts. Include reserves dedicated to gas processing plants where the ultimate disposition of gas is unknown to the respondent, and include any distribution sales to residential and commerical users.

Column E: Warranty (10)—Enter the volume of proved reserves committed under interstate and intrastate warranty contracts. Report only the volume of proved reserves held for fulfillment of warranty gas sales contracts as of the end of the report year. Do not report contract sales volumes. In a footnote on Schedule 4, indicate the volumes of proved reserves that may yet need to be dedicated to fulfill the terms of this type of contract.

Item 4.3: *Other*—Enter, in Columns A–D, the volumes of proved natural gas reserves committed for uses other than sale, or uncommitted, as of December 31 of the report year. Columns A–D are:

Column A: Company Use—Feedstock (10)—Enter the estimated volume of proved reserves committed for use as feedstock in plants owned by you. (See Feedstock in the Glossary.)

Column B: Company Use—Fuel (10)— Enter the estimated volume of proved reserves committed for use as fuel in your operations. (See Fuel Use in the Glossary.)

Column C: Other Committed (10)—Enter the estimated volume of proved reserves committed under any other contractual arrangement. Specify details in a footnote on Schedule 4.

Column D: Uncommitted (10)—Enter the estimated volume of proved reserves uncommitted as of the end of the report year.

Section and Item 5.0: Commitment Status of Nonproducing Natural Gas Reserves

In this section, the total proved reserves of natural gas in nonproducing reservoirs are to be reported on a Gross Working Interest Ownership Basis (Item 2.12, sum of Columns B and C) according to the following commitment status categories:

Column A: Committed Interstate (10)—Enter the volumes of nonproducing proved natural gas reserves committed under interstate contracts.

Column B: Committed Intrastate (10)—Enter the volumes of nonproducing proved natural gas reserves committed under any arrangement, company use or commitment, other than interstate contracts.

Column C: Uncommitted (10)—Enter the volumes of nonproducing proved natural gas reserves not committed under any arrangement.

Section and Item 6.0: Net Successful Nonassociated Natural Gas Well Footage (10)

Enter your "gross working interest" portion of the total net footage drilled which is related to the nonassociated natural gas reserve changes reported in Column C, Items 2.7 through 2.9. Do not include footage of expendable wells (e.g., stratigraphic tests). (See Net Successful Nonassociated Natural Gas Well Footage in the Glossary.)

EXAMPLES:

1. A 2,000 foot TD (total depth) well is completed for nonassociated gas at TD. Include 2,000 feet in your answer to this item, multiplied by your gross working interest percentage.

2. A 12,000 foot TD well is completed for nonassociated gas at 7,000 feet and for oil at 11,000 feet. Include 7,000 feet in your answer to this item, multiplied by your gross working interest percentage.

3. An old 5,000 foot well is deepened to a TD of 6,000 feet and completed for nonassociated gas at 5,500 feet. Include 500 feet in your answer to this item, multiplied by your gross working interest percentage.

4. A 14,000 foot TD well is completed for oil at 12,000 feet and for nonassociated gas at 13,000 feet. Include 1,000 feet in your answer to this item, multiplied by your gross working interest percentage.

3. Schedule 2—"Crude Oil and Dry Natural Gas Reserves and Production Data by Field"

All proved reserves and production data on Schedule 2 are to be reported on a Total Operated Basis (see TOTAL OPERATED BASIS in the Glossary) by field for each State or geographic subdivision in which the respondent operated oil and/or gas wells on December 31 of the report year, including fields abandoned during the report year.

Section 1.0: Operator and Report Identification Data

This information is to be reported on each Schedule 2 submitted.

Item Instructions

Item 1.1: *Operator I.D. Code (6)*—Copy into this space the six digit operator code which you entered on the Part II Cover Page. If no code has been assigned to you, leave this space blank.

Item 1.2: *Operator Name (35)*—Enter the first 35 characters of the operator name from the Cover Page. If the name exceeds 35 characters, do not abbreviate, but simply truncate the extra characters on the right.

Item 1.3: *Report Date (2)*—Enter the last two digits of the report year to which data reported on this schedule pertain.

Item 1.4: *Original (1)*—Enter an 'X' if this is the first submission of this schedule for the report year. Otherwise leave blank.

Item 1.5: *Amended (1)*—Enter an 'X' if this schedule amends a previously submitted schedule. Otherwise leave blank.

Item 1.6: *Pages (4) of Page (4)*—Enter the current page number, and then the last page number of your entire Part II filing.

Item 1.7: *Page Footnote (4)*—Enter the page number on which Schedule 4 footnotes pertaining to data filed on this schedule begin. Leave blank if there are no footnotes to the data filed on this schedule.

Section 2.0: Field Data

Enter only one type of hydrocarbon (crude oil, associated-dissolved dry gas, or nonassociated dry gas) on each line. Group all data pertaining to an individual field on consecutive lines, and group all fields by State and by geographic subdivision within each State. Complete all lines of Section 2.0 before using any additional Schedule 2 pages.

Note that provision is made in Column F to avoid sequential recopying of identical field identification data.

If a field overlaps two or more States and subdivisions, data pertaining to each must be separately reported.

Items 2.1 Through 2.34

Column A: Field Code (6)—Do not fill in. This space is reserved for future use.

Column B: Field Name (26)—Enter the name of the field to which data on this line pertain. If this is a new field discovery, indicate this in a footnote on Schedule 4. (See Field and Reservoir Naming Conventions in the Glossary.)

Column C: State Abbreviation (2)—Enter the two character alphabetic abbreviation of the State to which data reported on this line pertain. For an offshore area, use the abbreviation of the adjacent State. (See Location Codes in the Glossary.)

Column D: Subdivision Code (2)—Enter the two digit code of the appropriate geographic subdivision to which data on this line pertain; leave blank if not applicable. (See Location Codes in the Glossary.)

Column E: County Code (3)—For onshore areas, enter the three digit numeric code for the county or parish in which the field is located. If the field is located in more than one county, enter the code of the county which contains the largest lease acreage, overlying proved reserves, which you operate. Identify by Federal Information Processing Standards (FIPS) Code other counties (within the State or subdivision) in a footnote on Schedule 4. For State and Federal Offshore areas leave this item blank. (Sources of county and parish codes include: FIPS publication 6–2, and Rand McNally's *Commercial Atlas and Marketing Guide).*

Column F: Continuation Block (2)—If, for a given line, the field identification data (Columns B–E) are the same as the immediately previous line enter an 'X' in this block. You then need not recopy the field identification data in Columns B–E.

Column G: Oil (2)—Enter an 'X' in this block if the data reported on the line pertain to crude oil. Otherwise leave blank. (See Crude Oil in the Glossary.)

Column H: Associated—Dissolved Gas (2)—Enter an 'X' in this block if the data reported on the line pertain to associated-dissolved natural gas. Otherwise leave blank. (See Natural Gas, Associated-Dissolved in the Glossary.)

Column I: Nonassociated Gas (2)—Enter an 'X' in this block if the data reported on the line pertain to nonassociated natural gas. Otherwise leave blank. (See Natural Gas, Nonassociated in the Glossary.)

Column J: Proved Reserves—End of Report Year—Tested (8)—Enter the estimated volume of tested proved reserves, as of the end of the report year, for the field and type of hydrocarbon indicated on the line. If no tested or untested proved reserves estimates are available from your existing records for this field, enter 'NA'. If all proved reserved are untested or were depleted during the report year, enter zero (0). (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.)

Column K: Proved Reserves—End of Report Year—Untested (8)—Enter the estimated volume of untested proved reserves, as of the end of the report year, for the field and type of hydrocarbon indicated on the line. If no tested or untested proved reserves estimates are available from your existing records for this field, enter 'NA'. If all proved reserves are tested, or were depleted during the report year, enter zero (0). (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.)

Column L: Report Year Production—1977 (7)—Enter the volume produced during the report year from the field and for the type of hydrocarbon indicated on the line. If none, enter zero (0). See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Columns M Through P: Prior Annual Production—1977 Through 1974 (7)—If you entered a volume of proved reserves in either Column J or Column K or both, leave Columes M through P blank. If an 'NA' was entered in both Column J and Column K you must report the annual production, which occurred during each of the years 1974 through 1977, from the field and for the type of hydrocarbon indicated on the line. If there was no production in a particular year, enter a zero (0) for the year.

Note.—Prior annual production volumes in Columns M through P are not required if you reported these production data in report year 1977 From EIA–23.

4. Schedule 3—"Crude Oil and Dry Natural Gas Reserves and Related Data by Field and Reservoir"

All proved reserves, production and reserve changes data on Schedule 3 are to be reported on a Total Operated Basis (see Total Operated Basis in the Glossary), for each field in which the respondent operated oil and/or gas wells on December 31 of the report year, including abandonments during the report year.

Section 1.0: Operator and Report Identification Data

This information is to be reported on each Schedule 3 submitted.

Item Instructions

Item 1.1: *Operator I.D. Code (6)*—Copy into this space the six digit operator code which you entered on the Part II Cover Page. If no code has been assigned to you, leave this space blank.

Item 1.2: *Operator Name (35)*—Enter the first 35 characters of the operator name from the Cover Page. If the name exceeds 35 characters, do not abbreviate, but simply truncate the extra characters on the right.

Item 1.3: *Report Date (2)*—Enter the last two digits of the report year to which data reported on this schedule pertain.

Item 1.4: *Original (1)*—Enter an 'X' if this is the first submission of this schedule for the report year. Otherwise leave blank.

Item 1.5: *Amended (1)*—Enter an 'X' if this schedule amends a previously submitted schedule. Otherwise leave blank.

Item 1.6: *Page (4) of Pages (4)*—Enter the current page number, and then the last page number of your entire Part II filing.

Item 1.7: *Page Footnote (4)*—Enter the page number on which Schedule 4 footnotes pertaining to data filed on this schedule begin. Leave blank if there are no footnotes to data filed on this schedule.

Section 2.0: Field Identification Data

Repeat Items 2.1 through 2.5 for each Schedule 3 page submitted.

Item 2.1: *Field Code (6)*—Do not fill in. This space is reserved for future use.

Item 2.2: *Field Name (26)*—Enter the name of the field to which data reported on this Schedule 3 pertain. (See Field and Reservoir Naming Conventions in the Glossary.)

Item 2.3: *State Abbreviation (2)*—Enter the two character alphabetic abbreviation of the State to which data reported for this field pertain. For offshore fields, use the abbreviation of the adjacent State. (See Location Codes in the Glossary.)

Item 2.4: *Subdivision Code (2)*—Enter the two digit code of the appropriate geographic subdivision to which data reported for this field pertain; leave blank if not applicable. (See Location Codes in the Glossary.)

Item 2.5: *County Code (3)*—For onshore areas, enter the three digit numeric code for the county or parish in which the field is located. If the field is located in more than one county, enter the code of the county

which contains the largest lease acreage, overlying proved reserves, which you operate. Identifying other counties, by FIPS code, (within the State or subdivision) in a footnote on Schedule 4. For State and Federal Offshore areas leave this item blank. (Sources for county and parish codes include FIPS Publication 6–2 and *Rand McNally's Commercial Atlas and Marketing Guide.)*

Item 2.6: *OCS Block Number (6)*—For offshore fields, enter the block number, if it exists, of that offshore block which contains your largest lease acreage, overlying proved reserves. This block number need not be identical to the block number appearing in the field name. If two blocks have equal proved acreage, enter the number of the block having the earliest lease date; arbitrarily choose one block number if multiple answers are still possible given these selection rules. Leave blank if OCS block number is not applicable.

Item 2.7: *Federal Lease Number (5)*—Offshore Fields—Enter the numeric portion of the OCS Lease number (excluding the initial letter) which is associated with the block number reported in the previous item.

Onshore Fields—Enter the numeric portion of the Federal lease number (excluding the initial letter) of that lease which contains your largest lease acreage, overlying proved reserves. If two leases have equal proved lease acreage, enter the number of the lease having the earliest lease date; arbitrarily choose one lease number if mulitple answers are still possible given these selection rules. Leave blank if Federal lease number is not applicable.

Item 2.8: *Water Depth (4)*—For an offshore field, enter the average depth of water (from sea level to seabed) over the field in feet. Leave blank if an onshore field.

Item 2.9: *Field Discovery Year (4)*—Enter the calendar year in which the field was discovered. Footnote on Schedule 4 if this represents a change from the previously reported discovery year. Enter "NA" if not known. (See Field Discovery Year in the Glossary.)

Item 2.10: *Number of Reservoirs in Field (4)*—Enter the number of reservoirs which you operate in this field. This reservoir count should *include* any reservoirs having Indicated Additional Reserves of Crude Oil, or which were abandoned during the report year due to proved reserves depletion.

Section 3.0: Reservoir Data

For report years 1977 and 1978, only the following oil and/or gas reservoirs must be individually reported:

- All gas reservoirs operated by jurisdictional natural gas companies (as defined by the Natural Gas Act);
- New reservoirs;
- Reservoirs for which proved reserves estimates were subject to corrections or revisions or were increased by extensions during the report year;
- Reservoirs which were nonproducing during the last quarter of the report year; and
- Reservoirs located under Federal lands.

Items 3.1 Through 3.4

Subitem 1: *Reservoir Code (6)*—Do not fill in. This space is reserved for future use.

Subitem 2: *Reservoir Name (38)*—Enter the name of the reservoir to which data reported in this item pertain. (See Field and Reservoir Naming Conventions in the Glossary.)

Subitem 3: *Depth to Midpoint (5)*—Enter the average distance, in feet, from ground level (or sea level, if offshore) to the midpoint of the reservoir. For commingled reservoirs, enter depth to midpoint of the deepest reservoir. (See Depth to Midpoint in the Glossary.)

Subitem 4: *Reservoir Discovery Year (2)*—Enter the last two digits of the calendar year in which the reservoir was discovered. For commingled reservoirs, enter the year for the earliest discovered reservoir; use a footnote (Schedule 4) to indicate whether this represents a change to previously reported data. Enter "NA" if not known. (See Reservoir Discovery Year in th Glossary.)

Subitem 5: *Year of First Production (2)*—Enter the last two digits of the calendar year in which production of oil and/or natural gas from the reservoir first began. For commingled reservoirs, enter year for the earliest produced reservoir. Enter "NA" if not known. Leave blank if the reservoir has never produced. (See year of first production in the Glossary.)

Subitem 6: *Lithology (1)*—For reservoirs discovered during the report year, enter the one digit numeric code for the predominant lithology of the reservoir; optional for old reservoirs. Otherwise leave blank. (See Codes for Lithology in the Glossary.)

Subitem 7: *Trap Type (1)*—For reservoirs discovered during the report year, enter the one digit numeric code for the type of trap applicable to the reservoir; optional for old reservoirs. Otherwise leave blank. (See Codes for Trap Type in the Glossary.)

Subitem 8: *Geologic Age (3)*—For reservoirs discovered during the report year, enter the three digit numeric code for the geologic age of the reservoir rock; optional for old reservoirs. Otherwise leave blank. For commingled reservoirs, enter the code for the youngest reservoir rock. Footnote older age reservoir rocks, if known, on Schedule 4. Use the code that presents the most detailed information available. (See Codes for Geologic Age in the Glossary.)

Subitem 9: *Gas Type (1)*—Enter an "A" if the type of gas occurring in the reservoir is predominantly associated-dissolved. Enter an "N" if the type of gas occurring in the reservoir is predominantly nonassociated. Leave blank if no gas data are reported for this reservoir. For commingled reservoirs, enter the code letter corresponding to the overall predominant gas type. If the classification of gas type has changed from that previously reported, note and explain why in a footnote on Schedule 4. (See Natural Gas, Associated–Dissolved and Natural Gas, Nonassociated in the Glossary.)

Subitem 10: *Shrinkage Factor (3)*—Following the preprinted decimal point, enter the first three digits of the shrinkage factor as of December 31 of the report year used in computing the dry natural gas data shown for this reservoir. Leave blank if no gas data are reported. Enter "0" if there is no shrinking. (See Shrinkage Factor in the Glossary.)

Subitem 11: *Type Calculation (1)*—Enter the one digit numeric code applicable to the type of calculation used to make the oil and/or gas proved reserve estimates for this reservoir. (See Codes for Type of Calculation, and Calculation Types in the Glossary.)

Subitem 12: *Recovery Method (2)*—Enter the two digit numeric code applicable to the predominant type of recovery method which is currently used, or will be used (if a new or nonproducing reservoir), for production from this reservoir. (See Codes for Recovery Method in the Glossary.)

Subitem 13: *Indicated Additional Reserves of Crude Oil (8)*—Enter the volumes of crude oil, other than proved reserves, which are estimated to be recoverable through the application to this reservoir of secondary and tertiary (enhanced) recovery methods. Enter a zero (0) if none. Leave blank if a nonassociated gas reservoir. (See Indicated Additional Reserves of Crude Oil in the Glossary.)

Subitem 14: *Production Status (1)*—Enter an 'N' if there as no production from this reservoir during the last three months of the report year. Otherwise leave blank.

Subitem 15: *Reason Nonproducing (2)*—If the reservoir was in a nonproducing status, enter the two digit code which identifies the principal reason for its nonproducing status. If in producing status, leave blank. (See Codes for Reason Nonproducing in the Glossary.)

Subitem 16: *Date of Last Production (4)*—If the reservoir was in a nonproducing status, enter the month and the last two digits of the year in which the reservoir last produced. (Example: enter '0377' for March, 1977.) Leave blank if the reservoir is in producing status or if the reservoir has never produced.

Subitem 17: *Estimated Date of Future Production (4)*—For reservoirs in a nonproducing status, enter the estimated month and last two digits of the year in which production is expected to commence. (Example: enter '0280' for Feburary, 1980.) Leave blank if the reservoir is in producing status.

Subitem 18: *Oil (MBbls)*—Report in Columns A–K the following data for the reservoir pertaining to crude oil; and

Subitem 19: *Gas (MMcf)*—Report in Columns A–K the following data for the reservoir pertaining to dry natural gas for the indicated gas type.

Column A: Tested (1)—Enter an 'X' in this block if the data reported on this line pertain to tested proved reserves. Leave blank if untested. (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.)

Column B: Untested (1)—Enter an 'X' in this block if the data reported on this line pertain to untested proved reserves. Leave blank if tested. (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.)

Column C: Original Hydrocarbons In-Place (10)—Enter the estimated original in-place

V 4 4 / 1 7 1

volumes in the reservoir. Enter 'NA' if not available. Changes to previously reported proved reserve estimates may also necessitate changes in estimates of original hydrocarbons in-place. (see Original Hydrocarbons In-Place in the Glossary.)

Column D: Cumulative Production (10)—Enter the volumes of cumulative production as of December 31 of the report year for the reservoir. Note that production from untested proved reserves is zero (0) by definition. If cumulative production is not available or partially available, enter 'NA' and provide annual production data where available in a footnote on Schedule 4. (See Production, Cumulative Crude Oil and Production, Cumulative Natural Gas in the Glossary.)

Column E: Reserves—End of Previous Year (10)—Enter the volumes of proved reserves which existed as of the end of the calendar year preceding the report year. Enter a zero (0) for a new reservoir. (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.)

Column F: Corrections (+,−) (10)—Enter the net changes to "Reserves—End of Previous Year" attributable to corrections made during the report year. Use a minus sign (−) to indicate net reductions. Enter a zero (0) if there were no net corrections or if this is a new reservoir. Explain any net correction in excess of 200 MBbls of oil or 2,000 MMcf of gas in a footnote on Schedule 4. (See Corrections in the Glossary.)

Column G: Revisions (+,−) (10)—Enter the net changes to "Reserves—End of Previous Year" attributable to revisions made during the report year. Use a minus sign (−) to indicate net reductions. Enter a zero (0) if there were no net revisions or if this is a new reservoir. Explain any net revisions in excess of 200 MBbls of oil or 2,000 MMcf of gas in a footnote on Schedule 4. Regardless of magnitude, indicate positive revisions due to transfer of reserves from the "Indicated Additional" to "Proved" category in a footnote. (See Revisions in the Glossary.)

Column H: Extensions (10)—Enter the increases to "Reserves—End of Previous Year" attributable to extensions made during the report year. Enter a zero (0) if there were not extensions, or if this is a new reservoir. (See extensions in the Glossary.)

Column I: New Discoveries (10)—If the reservoir was discovered during the report year, enter the estimated initial volumes of proved reserves (before reducing it by production during the report year, if any). Enter a zero (0) if the reservoir was discovered prior to the report year. (See New Discovery in the Glossary.)

Column J: Report Year Production (10)—Enter the volumes produced during the report year. Enter a zero (0) if there was no production. (See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Column K: Reserves—End of Report Year (10)—Enter the volumes of proved reserves at the end of the report year. Enter a zero (0) if the reservoir is depleted. This item should equal the algebraic sum of Columns E–I, less Column J.

Section 4.0: Field Total Data

This section should be filled out only on the last Schedule 3 used in reporting on a particular field. These data must include and represent all reservoirs in which you operate in the field (regardless of the number of individual reservoirs for which you reported data by reservoir for report years 1977 and 1978).

Item 4.1: Oil (MBbls), *and* Item 4.2: Associated-Dissolved Gas (MMcf), *and* Item 4.3: Nonassociated Gas (MMcf). Data reported in Columns A–I should equal the algebraic sum of the appropriate reservoir data for a given field unless some reservoir items were not required to be reported or were not available.

Column A: Reserves—End of Previous Year (10)—Enter the volumes of proved reserves at the end of the calendar year preceding the report year. Enter a zero (0) for a new field. (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.)

Column B: Corrections (−,+) (10)—Enter the net changes to "Reserves—End of Previous Year" attributable to corrections made during the report year. Use a minus sign (−) to indicate net reductions. Enter a zero (0) for a new field or if there were no net corrections. (See Corrections in the Glossary.)

Column C: Revisions (−,+) (10)—Enter the net changes to "Reserves—End of Previous Year" attributable to revisions made during the report year. Use a minus (−) sign to indicate net reductions. Enter a zero (0) for a new field or if there were no revisions. (See Revisions in the Glossary.)

Column D: Extensions (10)—Enter the increases to "Reserves—End of Previous Year" attributable to extensions made during the report year. Enter a zero (0) for a new field or if there were no extensions. (See Extensions in the Glossary.)

Column E: New Discoveries (10)—If the field, or any reservoir in the field, was discovered during the report year, enter the estimated initial volumes of proved reserves attributable thereto, (before reducing it by production during the report year, if any). Enter a zero (0) if this is *not* a new field *and* if there were no new reservoirs discovered in it. (See New Discoveries in the Glossary.)

Column F: Report Year Production (10)—Enter the volumes produced from the field during the report year. Enter a zero (0) if there was not production for the field. (See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Column G: Reserves—End of Report Year (10)—Enter the volumes of proved reserves at the end of the report year. Enter a zero (0) if the field is depleted. This item should equal the algebraic sum of Columns A–E, less Column F.

Column H: Nonproducing Reserves (10)—Enter the estimated volumes of proved reserves in the field which were in nonproducing status at the end of the report year. Enter a zero (0) if there were none. (See Nonproducing reservoirs in the Glossary.)

Column I: Untested Reserves (10)—Enter the estimated volumes of untested proved reserves which existed in the field at the end of the report year. Enter a zero (0) if there were none. (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.)

5. Schedule 4—"Footnotes"

At a minimum submit footnotes in clarification of reported data items when required to do so by the instructions for the applicable schedule. Additionally, you may footnote any other reported item if this will enhance its clarity.

Section 1.0: Operator and Report Identification Data

This information is to be reported on each Schedule 4 submitted.

Item Instructions

Item 1.1: *Operator I.D. Code (6)*—Copy into this space the six digit operator code which you entered on the Part II Cover Page. If no code has been assigned to you, leave this space blank.

Item 1.2: *Operator Name (35)*—Enter the first 35 characters of the operator name from the Cover Page. If the name exceeds 35 characters, do not abbreviate, but simply truncate the extra characters on the right.

Item 1.3: *Report Date (2)*—Enter the last two digits of the report year to which data reported on this schedule pertain.

Item 1.4: *Orginal (1)*—Enter an "X" if this is the first submission of this schedule for the report year. Other wise leave blank.

Item 1.5: *Amended (1)*—Enter an "X" if this schedule amends a previously submitted schedule. Otherwise leave blank.

Item 1.6: *Page (4) of Pages (4)*—Enter the current page number, and then the last page number of your entire Part II filing.

Section 2.0: Footnote Data

Please use all lines on each Schedule 4 page before using additional pages. Columns A–E must be filled in only for the first line of each footnote.

Column A: Schedule Number (5)—Enter the schedule number referenced by the footnote which starts on this line.

Column B: Page Number (5)—Enter the page number that is referenced by this footnote.

Column C: Item Number (5)—Enter the item number that is referenced by this footnote.

Column D: Subitem Number (5)—(Applicable only to Schedule 3)—Enter the subitem number (1 through 19) that is referenced by this footnote. Leave blank if not applicable.

Column E: Column Designation (5)—Enter the column designation (alphabetic character) that is referenced by this footnote, if applicable. Otherwise leave blank.

Column F: Sequence Number (5)—Enter the line number of this line of the footnote. For a single line footnote, enter "1" and increase this number one unit with each successive line of the footnote. Always revert to "1" with each new footnote.

Column G: Notation (75)—Enter the actual footnote, including all appropriate information, using as many lines as necessary.

A G 3 1 7 9 UMI

Form EIA–23

Glossary and Codes

The definitions contained herein have been formulated with reference to the particular purposes to be served by EIA forms. They are not necessarily synonymous with the same or similar terms as used in DOE regulations, and are not to be construed as definitions applicable for any purpose other than for the collection and reporting of data on EIS forms.

Contents

A. Definitions.
B. Location Codes and Maps:
1. State Abbreviation and Geographic Subdivision Codes.
2. Subdivision Maps:
a. Alaska,
b. California,
c. Louisiana,
d. New Mexico,
e. Texas.
C. Field and Reservoir Naming Conventions:
1. Fields.
2. Reservoirs.
D. Codes Specific to Part II, Schedule 3:
1. Lithology of Reservoir.
2. Trap Type.
3. Geologic Age.
4. Type of Calculation.
5. Recovery Method.
6. Reason Nonproduction.

A. Definitions

Affiliated (Associated) Company—An "affiliate" of, or a person "affiliated" with, a specific person is a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the person specified. (See Person and Control.)

Calculation Types—

1. *Material Balance—Reservoir Simulation:* Estimates of reserves in which the theory of fluid flow in porous media and phase behavior data have been used to simulate reservoir performance and provide estimates for depletion. Reservoir simulation is a more complex and costly procedure than material balance, usually used only for large projects. Both methods are primarily used to predict reservoir performance; however, reserve estimates are derived in the process.

2. *Pressure Decline:* Calculation of gas reserves by recording the decline in reservoir pressure as a function of the cumulative production from the reservoir. The proved reserves of the reservoir are a measure of the point at which the pressure is reduced to the extent that the reservoir will no longer economically produce.

3. *Time Decline:* Calculation of reserves by production decline over time. Generally an equation is found which fits the observed rate-time graph and is used for extrapolation into the future. Three of the most useful equations are equal percentage decline, harmonic decline, and hyperbolic decline. Normally an economic limit based on the operating costs is used to determine a cut-off for economically recoverable reserves.

4. *Volumetric:* Calculation of reserves by determination of the pore volume of reservoir rock that can be occupied by hydrocarbons and the application of a recovery factor to it based on knowledge of the type of reservoir drive mechanism. Where available, analogous comparisons to producing reservoirs of the same physical characteristics are made. Primarily, calculation is based on well log analysis and when available, core data.

5. *Nominal:* Estimate of reserves based on the operator's experience, where producing characteristics or other information available do not allow for reserve estimation by any of the above calculation techniques.

Commitment Status of Proved Natural Gas Reserves—Applies to those proved reserves committed to a customer or other recipient under terms of a gas purchase contract, by advance payment agreements or by some other contractual arrangements, or set aside for the respondent's own use. Proved reserves not so committed are classified as "uncommitted".

Commitment Categories

1. *For Resale:* Proved natural gas reserves committed for sale to natural gas pipeline or distribution utilities for resale purposes.

2. *Direct Sale:* Proved natural gas reserves committed for sale to end users.

3. *Warranty:* Proved natural gas reserves committed through gas sales agreements wherein the seller warrants that an amount of gas will be available to meet the contracted commitments over the life of the contract.

4. *Company Use:* Proved natural gas reserves committed for use as feedstock in respondent-owned plants or as fuel in respondent's operations. (See Feedstock and Fuel Use.)

5. *Other Committed:* Proved natural gas reserves committed under any arrangements other than (1), (2), (3) or (4) above (e.g., gas taken in-kind by a royalty owner; vented and flared gas).

6. *Uncommitted:* Proved natural gas reserves that have not been committed by the respondent, including those reserves under negotiation or option as of December 31 of the report year.

Control—The term "control" (including the terms "controlling", "controlled by" and "under common control with") means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting shares, by contract, or otherwise. (See Person.)

Corrections—Net changes to proved reserves attributable to correction of prior arithmetic or clerical errors, or to adjustments of previously reported production volumes.

Crude Oil—A mixture of hydrocarbons that exists in the liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities. Crude oil may also include:

1. Small amounts of hydrocarbons that exist in the gaseous phase in natural underground reservoirs but are liquid at atmospheric pressure after being recovered from oil well (casinghead) gas in lease separators, and that subsequently are commingled with the crude stream without being separately measured; and

2. Small amounts of nonhydrocarbons produced with the oil.

Note.—When a State regulatory agency specifies a definition of crude oil which differs from that set forth above, the State definition is to be followed and its use footnoted on Schedule 4.

Depth to Midpoint—The average vertical distance, in feet, from ground level (or sea level, if offshore) to the midpoint of a reservoir.

Extensions—The reserves credited to a reservoir because of enlargement of its proved area. Normally the ultimate size of newly discovered fields, or newly discovered reservoirs in old fields, is determined by wells drilled in years subsequent to discovery. When such wells add to the proved area of a previously discovered reservoir, the increase in proved reserves is classified as an extension.

Feedstock—Natural gas used as a raw material for its nonfuel chemical properties in creating an end product.

Field—An area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structural feature and/or stratigraphic condition. There may be two or more reservoirs in a field which are separated vertically by intervening impervious strata, or laterally by local geologic barriers, or by both.

Field Area—A geographic area encompassing two or more pools that have a common gathering and metering system, the reserves of which are reported as a single unit. This concept applies primarily to the Appalachian region. (See Pool.)

Field Discovery Year—The calendar year in which a field was first recognized as containing economically recoverable accumulations of oil and/or gas.

Fuel Use—All natural gas used by the respondent, other than for feedstock, which was produced by the respondent and not purchased from other producers.

Gross Working Interest Ownership—Gross working interest ownership is the respondent's working interest in a given property plus the proportionate share of any royalty interest, including overriding royalty interest, associated with the working interest. (See definitions of Working Interest and Royalty (including Overriding Royalty) Interests in the Glossary, and examples in the GENERAL INSTRUCTIONS, p. 6.)

Indicated Additional Reserves of Crude Oil—Quantities of crude oil (other than proved reserves) which may become economically recoverable from existing productive reservoirs through the application of improved recovery techniques using current technology.

These recovery techniques may: (1) Already be installed in the reservoir, but their effects are not yet known to the degree necessary to classify the additional reserves as proved, or (2) be installed in another similar reservoir, where the results of that installation can be used to estimate the indicated additional reserves.

Indicated additional reserves are not included in proved reserves due to their uncertain economic recoverability. When economic recoverability is demonstrated, the

V 4 4 / 1 7 1

indicated additional reserves must be transferred to proved reserves as positive revisions.

Natural Gas—A mixture of hydrocarbon compounds and small quantities of various nonhydrocarbons existing in the gaseous phase or in solution with crude oil in natural underground reservoirs at reservoir conditions. The principal hydrocarbons usually contained in the mixture are methane, ethane, propane, butanes and pentanes. Tpical nonhydrocarbon gases which may be present in reservoir natural gas are carbon dioxide, helium, hydrogen sulfide and nitrogen. Under reservoir conditions, natural gas and the liquefiable portions thereof occur either in a single gaseous phase in the reservoir or in solution with crude oil, and are not distingusihable at that time as separate substances. (See Natural Gas, Nonassociated and Natural Gas, Associated-Dissolved.)

Natural Gas, Associated-Dissolved—The combined volume of natural gas which occurs in crude oil reservoirs either as free gas (associated) or as gas in solution with crude oil (dissolved).

Natural Gas, Dry—The actual or calculated volumes of natural gas which remain after: (1) The liquefiable hydrocarbon portion has been removed from the gas stream, and (2) any volumes of nonhydrcarbon gases have been removed where they occur in sufficient quantity to render the gas unmarketable.

Natural Gas, Nonassociated—Natural gas not in contact with significant quantities of crude oil in a reservoir.

Natural Gas Liquids—Those hydrocarbons which are separated from natural gas as liquids either in the reservoir through retrograde condensation or at the surface through a variety of means (e.g., condensation, absorption or adsorption in separators, scrubbers, gas processing plants, or cycling plants). Such liquids generally consist of propane and heavier hydrocarbons. Hydrocarbons lighter than propane recovered as liquids, are also included in natural gas liquids.

Net Successful Nonassociated Natural Gas Well Footage—The total net footage, based on the respondent's gross working interest, of successful gas well drilling completed during the report year related to nonasssociated natural gas reserve additions. This footage is the distance from the surface to the point of deepest penetration measured along the well bore, or any portion of this distance drilled, which results in nonassociated reserve additions. (See p. 24 for examples, and see Gross Working Interest Ownership Basis.)

New Discoveries—New field discoveries or new reservoir discoveries in old fields made during the report year.

New Field—A field discovered during the report year.

New Field Discoveries—The volumes of proved reserves of crude oil and/or natural gas discovered in new fields during the report year.

New Reservoir—A reservoir discovered during the report year.

New Reservoir Discoveries in Old Fields—The volumes of proved reserves of crude oil and/or natural gas discovered during the report year in new reservoir(s) located in old fields.

Nonproducing Reservoirs—Reservoirs in which proved oil and/or gas reserves have been identified, but which did not produce during the last 3 months of the report year regardless of the availability and/or operation of production, gathering, or transportation facilities.

Old Field—A field discovered prior to the report year.

Old Reservior—A reservoir discovered prior to the report year.

Operator—The person responsible for the management and day-to-day operation of one or more crude oil and/or natural gas wells as of December 31 of the report year. The operator is generally a working interest owner or a company under contract to the working interest owner(s). Wells included are those which have proved reserves of crude oil and/or natural gas in the reservoirs associated with them, whether or not they are producing . Wells abandoned during the report year are also to be considered "operated" as of December 31. (See Person, Proved Reserves of Crude Oil, Proved Reserves of Natural Gas, Report Year, and Reservoir.)

Original Hydrocarbons In-Place—The estimated volumes of crude oil and/or dry natural gas contained in known reservoirs prior to any production.

Ownership—See Gross Working Interest Ownership Basis.

Parent Company—The parent company of a business entity is an affilated company which exercises ultimate control over that entity, either directly or indirectly through one or more intermediaries. (See Affiliated (Associated) Company and Control.)

Person—An individual, a corporation, a partnership, an association, a joint-stock company, a bussiness trust, or an unicorporated organization.

Pool—In general, a reservoir. In certain situations a pool may consist of more than one reservoir. (See Field Area.)

Production, Crude Oil—The volumes of crude oil which are extracted from oil reservoirs during the report year. These volumes are determined through measurement of the volumes delivered from lease storage tanks, or at the point of custody transfer, with adjustment for (1) net differences between opening and closing lease inventories, and for (2) basic sediment and water. Oil used on the lease is to be included.

Production, Cumulative Crude Oil—The sum of the actual or estimated crude oil production during the report year and prior years.

Production, Cumulative Natural Gas—The sum of the actual or estimated dry natural gas production during the report year and prior years.

Production, Lease Condensate—The portion of natural gas liquids recovered in lease separators or field facilities from associated or nonassociated natural gas produced from gas wells during the report year.

Production, Natural Gas—The volume of natural gas withdrawn from producing reservoirs during the report year less (1) the volume returned to such reservoirs in cycling, repressuring of oil reservoirs and conservation operations; less (2) shrinkage resulting from the removal of the liquefiable portions of the gas; and less (3) nonhydrocarbon gases where they occur in sufficient quantity to render the gas unmarketable. Volumes of gas withdrawn from gas storage reservoirs and native gas which has been transferred to the storage category are not considered production.

Proved Reserves of Crude Oil—Proved reserves of crude oil as of December 31 of the report year are the estimated quantities of all liquids defined as crude oil, which geological and engineering data demonstrate with reasonable certainly to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Reservoirs are considered (1) *proved* and *tested* if economic producibility is supported by either actual production or conclusive formation tests (drill stem or wire line), or (2) *proved* and *untested* if economic producibility is supported only by core analyses and/or electric or other log interpretations. The area of an oil reservoir considered proved includes (1) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any; and (2) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

Volumes of crude oil placed in underground storage are not to be considered proved reserves.

Reserves of crude oil which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the "proved" classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.

Estimates of proved crude oil reserves do not include the following: (1) oil that may become available from known reservoirs but is reported separately as "indicated additional reserves"; (2) natural gas liquids (including condensate); (3) oil, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics, or economic factors; (4) oil that may occur in undrilled prospects; and (5) oil that may be recovered from oil shales, coal, gilsonite and other such sources. It is not necessary that production, gathering or transportation facilities be installed or operative for a reservoir to be considered proved.

Proved Reserves of Natural Gas or Proved Reserves of Natural Gas Liquids—Proved reserves of natural gas or proved reserves of natural gas liquids as of December 31 of the report year are the estimated quantities which analysis of geologic and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Reservoirs are considered (1) *proved* and *tested* of economic producibility is supported by either actual production or conclusive formation test (drill stem or wire line), or (2) *proved* and *untested* if economic producibility is supported only by core analyses and/or electric or other log interpretations. The area of a gas reservoir considered proved includes (1) that portion delineated by drilling and defined by gas-oil and/or gas-water contacts, if any; and (2) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

Volumes of natural gas placed in underground storage are not to be considered proved reserves.

For natural gas an appropriate reduction in the reservoir gas volume is made to cover the removal of the liquefiable portions of the gas and the exclusion of nonhydrocarbon gases where they occur in sufficient quantity to render the gas unmarketable.

It is not necessary that production, gathering or transportation facilities be installed or operative for a reservoir to be considered proved. It is to be assumed that compression will be initiated if and when economically justified.

Purchases of In-Place Reserves—Proved crude oil, natural gas, or natural gas liquids reserves within the reservoir (in-place) purchased or otherwise acquired by the respondent during the report year.

Report Year—The calendar year to which data reported herein pertain; the current report year is shown on the Cover Pages to Part I and Part II.

Reserves—See Proved Reserves.

Reserve Additions—The algebraic sum of all reserve changes during the report year.

Reserve Changes—Positive and negative corrections, positive and negative revisions, extensions, new reservoir discoveries in old fields, and new field discoveries, which occurred during the report year.

Reservoir—A porous and permeable underground formation containing an individual and separate natural accumulation of producible hydrocarbons (oil and/or gas) which is confined by impermeable rock or water barriers and is characterized by a single natural pressure system.

Reservoir Discovery Year—The year in which a reservoir was first recognized as containing economically recoverable accumulations of oil and/or gas.

Revisions—Changes in earlier estimates, either positive or negative, resulting from new information, except for an increase in proved acreage (extension). Revisions for a given report year also include increases in proved reserves associated with the installation of improved recovery techniques.

Royalty (including Overriding Royalty) Interests—These interests entitle their owner(s) to a share of the mineral production from a property or to a share of the proceeds therefrom. They do not contain the rights and obligations of operating the property, and normally do not bear any of the costs of exploration, development and operation of the property.

Sales of In-Place Reserves—Proved crude oil, natural gas or natural gas liquids reserves within the reservoir (in-place) sold, or otherwise disposed of, by the respondent during the report year.

Shrinkage Factor—The fraction as of December 31 of the report year (expressed as a decimal) by which the volume of natural gas is reduced by the removal of natural gas liquids and/or nonhydrocarbon gases where they occur in sufficient quantity to render the gas unmarketable.

Example: The removal of 112 MMcf of natural gas liquids vapor and/or nonhydrocarbon gase from 1000 MMcf of natural gas represents a shrinkage factor of 0.112.

Subdivision—A prescribed portion of a given State or other geographical region defined herein for statistical reporting purposes. (See State Abbreviation and Subdivision Codes, p. 55 of this glossary.)

Subsidiary Company—A company which is controlled through the ownership of voting stock, or a corporate joint venture in which a corporation is owned by a small group of businesses as a separate and specific business or project for the mutual benefit of the members of the group. (See Control.)

Total Operated Basis—The total reserves or production of oil or gas associated with the wells operated by an individual operator. This is also commonly known as the "gross operated" or "8/8ths" basis.

Working Interest—A working interest permits the owner(s) to explore, develop and operate a property. The working interest owner(s) bear(s) the costs of exploration, development and operation of the property, and in return is (are) entitled to a share of the mineral production from the property or to a share of the proceeds therefrom.

Year of First Production—The year in which continuous, sustained production of crude oil and/or natural gas from the reservoir commenced.

B. Location Codes and Maps

Wherever applicable, the following codes are those specified in Federal Information Processing Standards (FIPS).

1. State Abbreviation and Geographic Subdivision Codes: (State Abbreviation Used In: Schedule 1, Item 1.8; Schedule 2, Items 2.1–2.35 (Column C); Schedule 3, Item 2.3) (Subdivision Code Used In: Schedule 1, Item 1.9; Schedule 2, Items 2.1–2.35 (Column D); Schedule 3, Item 2.4).

State name and geographic subdivisions[1]	State abbreviation	Subdivision code

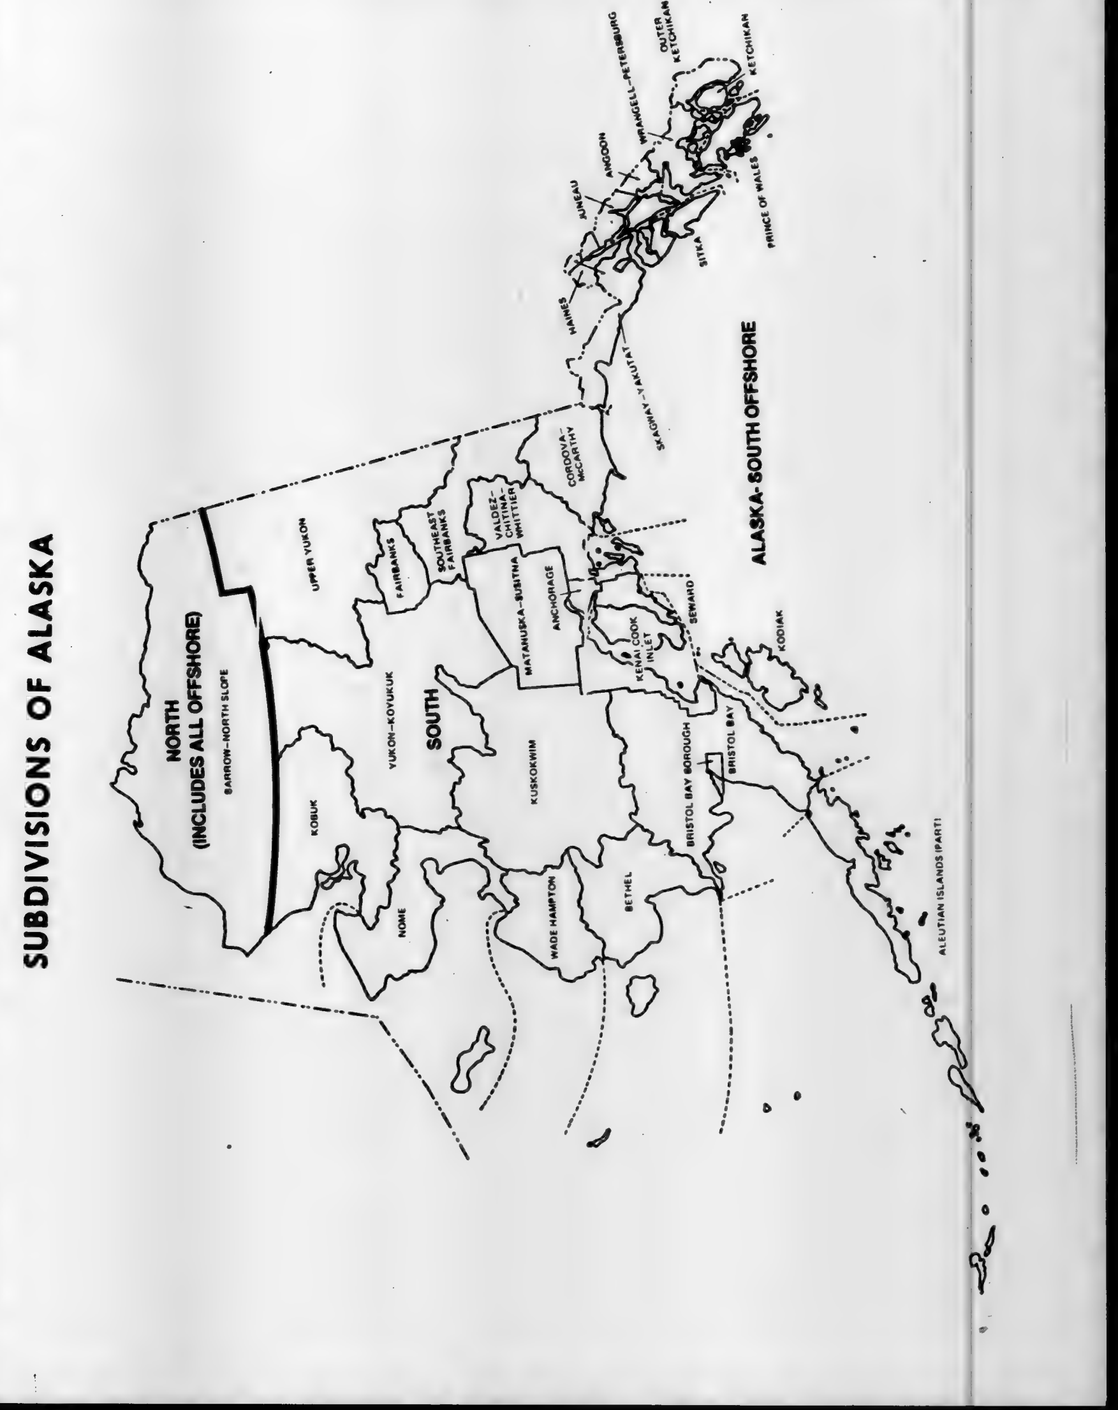
Pacific Coast—Other Federal Offshore[4]	OP	00

[1] Refer to maps on pages 58–62 for subdivision boundaries in the States of Alaska, California, Louisiana, New Mexico, and Texas, respectively.

[2] If you are not certain whether an offshore field lies in the Federal or the State domain, assume that it lies in the State domain and indicate this in a footnote on Schedule 4.

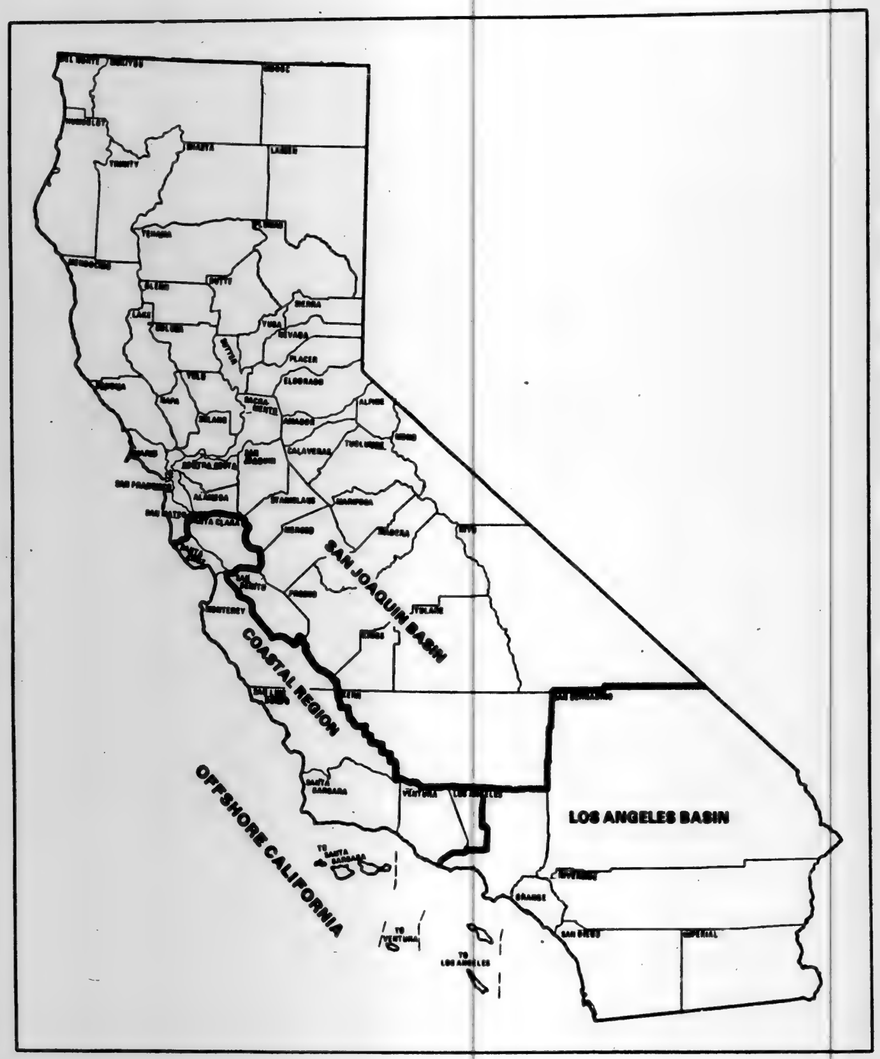
[3] Includes both State and Federal domain.

[4] Gulf of Mexico—Other Federal Offshore includes areas adjacent to Mississippi, Alabama and Florida only. Pacific Coast—Other Federal Offshore includes areas adjacent to Oregon and Washington only.



County Codes

Used In: Schedule 2, Items 2.1–2.34, Column E; Schedule 3, Item 2.5.



County codes, Parish codes (in Louisiana), and Census Division codes (in Alaska), used in the completion of Schedules 2 and 3, may be found in FIPS Publication 6–2, available at most municipal and college libraries. FIPS county codes may also be found in the *Commercial Atlas and Marketing Guide*, Rand McNally and Company, Chicago.

C. Field and Reservoir Naming Conventions

1. *Fields.* In most instances, field names will reflect the conventions imposed by State oil and gas regulatory agencies. In the absence of such authority, field names which have come into general acceptance in an area may be used. In the Appalachian Region field area names may be used.

Exceptions occur for names of fields located in Texas and New Mexico, in which States the regulatory agencies consider distinct geologic reservoirs to be "fields." For example, in Texas, Parker (Pennsylvanian) and Parker (Wolfcamp) are considered separate fields by the State. In actuality, Parker is the name of the geologic field and Pennsylvanian and Wolfcamp are the names of the geologic reservoirs in the field (by Texas Railroad Commission convention, the geologic reservoir name appears in parentheses after the geologic field name). For the purpose of reporting field names on Schedules 2 and 3 of Form EIA–23, the geologic field name will be used. In the example above, Schedule 3 would be headed with the field name "Parker" and the reservoir names "Pennsylvanian" and "Wolfcamp" would appear below it in the data space marked "Reservoir Name".

Offshore field names usually (but not always) consist of a basic offshore area name and block number specified by the U.S. Geological Survey. Example: East Cameron South Addition Block 265. If offshore area names must be abbreviated to fit within the 26 characters allowed, the following standard abbreviations should be used: North, N; North Addition, NA; South, S; South Addition, SA; East, E; East Addition, EA; West, W; West Addition, WA; Block, BLK; South Extension, SX; Island, IS; East Extension, EX.

For example, High Island East Addition South Extension Block A–375 would be abbreviated as follows: HIGH IS EA SX BLK A–375.

2. *Reservoirs.* In reservoirs or unitized fields where the gas or oil is commingled prior to metering, the production cannot be credited to an individual reservoir, and the word "commingled" may be entered in place of a reservoir name. All commingled reservoirs within a field should be reported as a single "commingled" entry. Known names of any individual reservoirs which were reported as commingled should then be listed in a footnote on Schedule 4.

In the Appalachian Region, some multiple reservoirs have not been defined because of unknown areal extent, complex geology, or other reasons. In these cases the term "undifferentiated" may be entered for the reservoir name. Also in this area, pool names may be used where they consist of multiple reservoirs and data are available for the pool only.

Except in the above mentioned cases, reservoirs must be listed separately for each field. Reservoir names such as "All", "Various", "Combined", or "Other" *are not acceptable.*

D. Codes Specific to Part II, Schedule 3

Codes for Lithology of Reservoir

[Used in Schedule 3, Items 3.1–3.4, Subitem 6]

Lithology	Code
Sandstone	1
Carbonate	2
Other	3

Codes for Trap Type

[Used in Schedule 3, Items 3.1–3.4, Subitem 7]

Trap Type	Code
Structural	1
Stratigraphic	2
Combined Structural and Stratigraphic	3

Codes for Geologic Age[1]

[Used in Schedule 3, Items 3.1–3.4, Subitem 8]

Code	Era	Code	System	Code	Series
100	Cenozoic	110	Quaternary	111	Recent
				112	Pleistocene
		120	Tertiary	121	Pliocene
				122	Miocene
				123	Oligocene
				124	Eocene
				125	Paleocene
200	Mesozoic	210	Cretaceous		
		220	Jurassic		
		230	Triassic		
300	Paleozoic	310	Permian		
		320	Pennsylvanian		
		330	Mississippian		
		340	Devonian		
		350	Silurian		
		360	Ordovician		
		370	Cambrian		
400	Pre-Cambrian				

[1] If the age of the reservoir rock is a combination of the above, e.g. Permo-Triassic, footnote this fact on Schedule 4 and enter on Schedule 3 the code of the youngest age involved, e.g. Triassic (230).

Codes for Type of Calculation

[Used in Schedule 3, Items 3.1–3.4, Subitem 11]

Type of Calculation	Code
Volumetric	1
Pressure Decline	2
Material Balance	3
Time Decline	4
Nominal	5

Codes for Recovery Method

[Used in Schedule 3, Items 3.1–3.4, Subitem 12]

Recovery Method	Code
Primary:	
Solution Gas	01
Water Drive	02
Gas Cap	03
Gravity Drainage	04
Fluid Expansion (Depletion)	05
Combinations	06
Secondary or Tertiary:	
Waterflood	07
Polymer Waterflood	08
Natural Gas Injection	09
Combination of Water and Natural Gas Injection	10
Carbon Dioxide, Alcohol or Miscible (Solvent) Fluid. Slug	11
Steam Drive	12
In-situ Combustion	13
Steam Soak	14
Surfactant	15
Caustic	16
Other: (Explain in a footnote on Schedule 4)	17

Codes for Reason Nonproducing

[Used in Schedule 3, Items 3.1–3.4, Subitem 15]

Reason Nonproducing	Code
Insufficient pressure to deliver into sales line	01
Waiting for installation of producing facilities	02
Waiting for installation of pipeline facilities	03
Workover required or in progress	04
Associated gas cap awaiting depletion of oil reserves	05
Too remote to justify connection at this time	06
Reservoir depleted during report year	07
Proved reserves known to exist but not being produced because of State or Federal regulations	08
Awaiting State or Federal governmental action	09
Behind pipe awaiting depletion of other zone(s) in the well(s)	10
Proved reserves being developed by drilling	11
Replacement well or additional well required	12
Negotiating sales contract	13
Other (Explain in a footnote on Schedule 4)	14

ANNUAL SURVEY OF DOMESTIC OIL AND GAS RESERVES
REPORT YEAR 1978

This report is mandatory under Public Law 93-275. Failure to comply may result in criminal fines, civil penalties and other sanctions as provided by law

PART I, COVER PAGE

A. WERE YOU AN OPERATOR *(see definition of* **OPERATOR**, *p. 2 footnote)* of one or more oil or gas wells on December 31 of the report year?

☐ YES or ☐ NO

If *no*, please fill out only items B, C and G below and return this page to the address given on page 2 (or 4) of this forms package.

If *yes*, fill out all of Part I *(after reading the instructions beginning on page 1)* and return it to the address given on page 2 (or 4) of this forms package.

Department of Energy,
Washington, D.C. 20461.

July 31, 1979.

Dear Sir:

The Energy Information Administration (EIA) of the United States Department of Energy (DOE), as part of its legislated responsibilities, has instituted an "Annual Survey of Domestic Oil and Gas Reserves." It will provide to energy analysts verifiable and credible basic data regarding the Nation's oil and gas reserves posture. These data are, in turn, essential to the formulation and adoption of effective and fair national energy policies.

All oil or gas well operators above a certain size, as well as a statistically selected sample of smaller operators, are required to respond to the survey for report year 1978. You have been determined to be a respondent this year on the basis of your identification as an operator in Federal and/or State records. These records indicate that you produced more than 400,000 barrels of crude oil or 2 billion cubic feet of natural gas from properties which you operated in calendar year 1978. We have therefore attached a full Form EIA–23 entitled "Category I and II Operator Package." Instructions for obtaining a "Category III Operator Package" are provided in the event that your 1978 production was smaller than our records indicate. Instructions are also provided on what to do if you were not an operator in calendar year 1978.

Please note that Part I of the form which you are receiving must be submitted on or before September 20, 1979. Part II of the form must be submitted on or before December 4, 1979. Instructions for mailing are included in each package.

Requests for further information or additional forms or schedules should be directed to the EIA–23 Coordinator at (405) 360–1971.

You should be aware that failure to make information requested on Form EIA–23 available to the DOE or failure to allow the DOE to verify the information submitted on the form will be subject to penalties as provided in Section 13(i) of the Federal Energy Administration Act of 1974 (Public Law 93–275), as amended. In responding to specific requests for information made by members of the public, information collected on Form EIA–23 will be held confidential to the extent that it is determined to constitute trade secrets or commercial or financial information considered to be privileged or confidential, in accordance with Section 14 of the above mentioned Act and the Freedom of Information Act (5 USC Sec. 552(b)(4)).

The timely provision of your best available data in the requested format is solicited. Thank you for your cooperation and participation in this portion of the National Energy Program.

Sincerely,

Lincoln E. Moses,

Administrator, Energy Information Administration.

GENERAL INSTRUCTIONS

A. Purpose

The Energy Information Administration (EIA) of the Department of Energy (DOE) seeks, with Form EIA–23, to gather and summarize credible, timely data regarding proved reserves and production of crude oil, natural gas and other related matters. The DOE will use the resulting information in many ways; for example:

To develop national and regional estimates of production and proved reserves of domestic crude oil and natural gas, and

To facilitate national energy policy decisions.

This survey segregates operators into three categories, according to the annual production of hydrocarbons from wells which they operated on December 31 of the report year. Proved reserve estimates are required from the smaller operators only if such data exist in company records. The largest operators must provide proved reserves data.

EIA will follow this survey with efforts to validate the data to assess the meaningfulness and accuracy of the resulting information. Respondents may encounter two principal activities included in this validation:

Government personnel will make or supervise independent reserve estimates on a sample basis, and

A sample of operators will be visited to confirm the data submitted.

EIA recognizes that the judgment of geologists and petroleum engineers is required in the reserve estimation process, and that as a result, proved reserves are estimates rather than precise quantitative measurements.

B. Who Must Submit Form EIA–23 for Report Year 1978

Each operator [1] of domestic oil and/or gas wells as of December 31 of report year 1978 has filing requirements as described in Section C below.

If you are not an operator (perhaps a former operator or solely a working or royalty interest owner), please submit the Part I Cover Page which immediately follows the Glossary, so EIA can remove you name from its active operator identification list.

Not all Category III operators (those with the smallest annual production) are being asked to file Form EIA–23 at this time. Each year, a sample of all Category III operators will be selected. Receipt of this forms package indicates that you are among those selected this year.

C. What Must Be Submitted

You have been tentatively identified as a Category III (small) operator. To minimize reporting burden, EIA requires Category III operators to submit one copy of only Part I of Form EIA–23. There is a Part II which has not been included in your forms package. If the total year's production from wells which you operated as of December 31, 1978 was equal to or more than 400,000 barrels of crude oil or more than 2 billion cubic feet of dry natural gas, or both, you have been sent the wrong forms package. Contact the EIA–23 Coordinator at (405) 360–1971 to obtain the correct package.

D. When and Where to Submit

Part I of Form EIA–23 must be submitted on or before September 20, 1979, for report year 1978 data. Mail the completed forms to: U.S. Department of Energy, Box OK, Norman, OK 73070.

For information concerning requests for extensions of time to file Form EIA–23, contact the EIA–23 Coordinator at (405) 360–1971.

E. Record Keeping Requirements

All records necessary to reconstruct the data reported on this form must be kept for a period of three (3) years at the reporting site.

F. Sanctions.

Failure to make information requested on Form EIA–23 available to the Secretary of DOE or failure to allow the Secretary to verify the accuracy of the information he has received in that form shall be subject to penalties as provided in the Federal Energy Administration Act of 1974 (FEAA, P.L. 93–275), Section 13(e)(2) and (i), as amended.

[1] The person responsible for the management and day-to-day operation of one or more crude oil and/or natural gas wells on December 31 of the report year. The operator is generally a working interest owner or a company under contract to the working interest owner(s). Wells included are those which have proved reserves of crude oil and/or natural gas in the reservoirs associated with them, whether or not they are producing. Wells abandoned during the report year are also to be considered "operated" on December 31.

G. Confidentiality

In accordance with Section 14 of the the FEAA, in responding to specific requests received from members of the public, data collected on this form will be held confidential to the extent that they are determined by the DOE to be within the exemption for trade secrets and confidential commercial information as specified in the Freedom of Information Act (5 U.S.C. Section 552(b)(4)).

H. Reporting Standards

1. Crude Oil

All crude oil volumes are to be reported in thousands of stock tank barrels (MBbls) (42 U.S. gallons per barrel) at 14.73 PSIA (pounds per square inch absolute), corrected to 60 degrees Fahrenheit and excluding basic sediment and water.

2. Natural Gas

All natural gas volumes are to be reported as *dry* natural gas in millions of cubic feet (MMcf) at 14.73 PSIA and 60 degrees Fahrenheit. It is recognized that although natural gas is defined on a dry basis, the operator in many instances has no knowledge of the ultimate reduction of the gas stream resulting from natural gas liquids extraction by other parties.

The operator is expected to generate dry natural gas data by applying a shrinkage factor based upon all data available to him. He is not expected to perform gas analyses to determine the exact shrinkage factor, except as required for business reasons. (See NATURAL GAS, DRY and SHRINKAGE FACTOR in the Glossary.)

3. Schedule Preparation Standards

a. *Rounding.* When rounding crude oil and natural gas volumes, round 500 barrels or 500 Mcf and above up; less than 500 barrels or 500 Mcf, round down.

Examples:	Actual volume	Reported volume
Crude Oil...	7,500 barrels	8 MBbls
	7,567 barrels	5 MBbls
Gas	8,500,000 cubic feet	9 MMcf
	10,459,000 cubic feet	10 MMcf

b. *Reproduction.* If mechanically reproduced forms are submitted in lieu of originals, they must have been clearly reproduced, must be of identical format and scale (within 3% overall dimension) to the provided forms and must have been accurately aligned during the reproduction process. Computer printouts on other than an exact duplicate of the provided original forms are not acceptable. Computer tapes are not acceptable at the present time.

Note.—Do not staple or bind your filing.

c. *Character Set.* Responses must be typed or printed in black ink. If you are writing the response by hand, print and use all capital letters. Long hand is unacceptable. The form was designed to be completed using a 10–pitch (Standard Pica) typewriter, although a 12-pitch machine can be used.

SPECIFIC INSTRUCTIONS

I. Part I: Operator Identification and Summary Report

1. Cover Page (Page 1)

Item Instructions:

Note.—Numbers in parentheses immediately following item, subitem or column titles indicates the maximum number of spaces available for the data.

Item A: *Were you an Operator*—Check the appropriate box.

Item B: *I.D. Code (6)*—Copy into this space the six digit number which appears on the mailing label affixed to this forms package. If no code has been assigned please leave this space blank.

Item C: *Identification*—Name, Address, City, State, ZIP Code, Responsible Preparer, Telephone Number. Important: If the company name or address as it appears on the mailing label does not match your response to this item, check the box. Enter the legal name and address of the operator. Please use the standard two-letter State Postal abbreviation. If a foreign address, enter city, local equivalent of State name (e.g., province), and county on the second address line. Enter the full name and business telephone number of the individual who is responsible for the preparation of Form EIA–23.

Item D: *EIN Number (9)*—Enter the operating firm's IRS Employer Identification Number (EIN) if it has one. If the operator does not have an EIN, enter the social security number of the attestor and check the box.

Item E: *Parent Company Identification*—Name, Address, City, State, ZIP Code. Enter the legal name and address of the parent company, if any, which exercises *ultimate* control over the respondent. Example: You are Company A, which takes direction from Company B, which in turn takes direction from Company C. Report Company C as the parent company, rather than Company B.

Item F: *Parent Company EIN Number (9)*—Enter the EIN number of the parent company, if any.

Item G: *Attestation*—Enter the name and title of the individual designated by the company to sign the certification, and the date of signing, in the spaces provided. This report must be shown to or affirmed by a responsible officer (for example: a senior officer or the officer responsible for regulatory filings).

2. Summary Report (Pages 2 and 3)

On the Summary Report (Pages 2 and 3 of Part I), operators must supply proved reserves and production estimates on a Total Operated Basis (see definition in the Glossary) for all properties operated on December 31 of the report year.

Exception: Category III operators are required to report proved reserves data only for those properties for which estimates exist in company records. To the extent that Category III operators do not have proved reserve estimates associated with one or more specific properties, they must separate their production data according to production from properties for which proved reserves have been estimated, and production from properties for which proved reserves have not been estimated.

Section 1.0: Operator and Report Identification Data

The information in Section 1.0 is to be reported on both pages 2 and 3 of Part I.

Item Instructions

Item 1.1: *Operator I.D. Code (6)*—Copy of this space the six digit operator code which you entered on the cover Page. If no code has been assigned to you, leave this space blank.

Item 1.2: *Operator Name (35)*—Enter the first 35 characters of the operator name from the Cover Page. If the name exceeds 35 characters, do not abbreviate, but simply truncate the extra characters on the right.

Item 1.3: *Report Date (2)*—Enter the last two digits of the report year to which data reported on this schedule pertain.

Item 1.4: *Original (1)*—Enter an 'X' if this is the first submission of this schedule for the report year. Otherwise leave blank.

Item 1.5: *Amended (1)*—Enter an 'X' if this schedule corrects a previously submitted schedule. Otherwise leave blank.

Section 2.0: State and Geographic Subdivision Data

Provide data in Columns A–F for each State or geographic subdivision in which you were an operator of oil and/or gas wells as of December 31, 1978. Also include production from wells abandoned during the report year. If all column entries for a particular State or subdivision are zero, leave that line blank.

For fields or reservoirs in which your operated proved reserves overlap two or more States or subdivisions, the data are to be separated and reported in their respective States or subdivisions. Refer to maps in the Glossary for subdivision boundaries in the States of Alaska, California, Louisiana, New Mexico, and Texas.

If you are not certain whether an offshore field or reservoir lies in the Federal or the State domain, assume it lies in the State domain.

Sum all columns and enter the totals on line 64—"U.S.—TOTALS."

Column A: Crude Oil Reserves—End of Report Year (10) and Column D: Dry Natural Gas Reserves—End of Report Year (10). Enter estimates of total proved reserves (tested and untested) for operated properties; the estimates should be based on your most recent evaulations, adjusted for production through December 31 of the report year and for any other relevant factors. The resulting estimates for reserves should be consistent with the definitions of proved reserves in the Glossary. (See Proved Reserves of Crude Oil and Proved Reserves of Natural Gas in the Glossary.) If no proved reserves estimates are available, enter 'NA'. If depleted during the report year, enter zero. Operators need not review well logs to "find" untested proved reserves except as is normally done in the course of their business.

Production data are required of all respondents. If actual data are not available at the time this form is being prepared, the data must be estimated.

A G 3 1 7 9 UMI

Column B: Crude Oil Report Year Production—Reserves Estimated (10) and Column E: Dry Natural Gas Report Year Production—Reserves Estimated (10). Enter the production for the report year from those operated properties for which proved reserves data were reported in Columns A or D. (See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Column C: Crude Oil Report Year Production—Reserves Not Estimated (10) and Column F: Dry Natural Gas Report Year Production—Reserves Not Estimated (10). Enter the production for the report year from operated properties for which proved reserves estimates are not available in existing company records. (See Production, Crude Oil and Production, Natural Gas in the Glossary.)

Form EIA-23

Glossary

The definitions contained herein have been formulated with reference to the particular purposes to be served by EIA forms. They are not necessarily synonymous with the same or similar terms as used in DOE regulations, and are not be construed as definitions applicable for any purpose other than the collection and reporting of data on EIA forms.

CONTENTS

A. Definitions.
B. Subdivision Maps:
1. Alaska.
2. California.
3. Louisiana.
4. New Mexico.
5. Texas.

A. Definitions

Crude Oil—A mixture of hydrocarbons that exists in the liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities. Crude oil may also include:

1. Small amounts of hydrocarbons that exist in the gaseous phase in natural underground reservoirs but are liquid at atmospheric pressure after being recovered from oil well (casinghead) gas in lease separators, and that subsequently are commingled with the crude stream without being separately measured; and

2. Small amounts of nonhydrocarbons produced with the oil.

Note.—When a State regulatory agency specifies a definition of crude oil which differs from that set forth above, the State definition is to be followed.

Field—An area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structrual feature and/or stratigraphic condition. There may be two or more reservoirs in a field which are separated vertically by intervening impervious strata, or laterally by local geologic barriers, or by both.

Natural gas—A mixture of hydrocarbon compounds and small quantities of various nonhydrocarbons existing in the gaseous phase or in solution with crude oil in natural underground reservoirs at reservoir conditions. The principal hydrocarbons usually contained in the mixture are methane, ethane, propane, butanes and pentanes. Typical nonhydrocarbon gases which may be present in reservoir natural gas are carbon dioxide, helium, hydrogen sulfide and nitrogen. Under reservoir conditions, natural gas and the liquefiable portions thereof occur either in a single gaseous phase in the reservoir or in solution with crude oil, and are not distinguishable at that time as separate substances.

Natural Gas, Dry—The actual or calculated volumes of natural gas which remain after: (1) The liquefiable hydrocarbon portion has been removed from the gas stream, and (2) any volumes of nonhydrocarbon gases have been removed where they occur in sufficient quantity to render the gas unmarketable.

Operator—The person responsible for the management and day-to-day operation of one or more crude oil and/or natural gas wells as of December 31 of the report year. The operator is generally a working interest owner or a company under contract to the working interest owner(s). Wells included are those which have proved reserves of crude oil and/or natural gas in the reservoirs associated with them, whether or not they are producing. Wells abandoned during the report year are also to be considered "operated" as of December 31. (See Person, Proved Reserves of Crude Oil, Proved Reserves of Natural Gas, Report Year, and Reservoir.)

Person—An individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or an unincorporated organization.

Production, Crude Oil—The volumes of crude oil which are extracted from oil reservoirs during the report year. These volumes are determined through measurement of the volumes delivered from lease storage tanks, or at the point of custody transfer, with adjustment for (1) net differences between opening and closing lease inventories, and for (2) basic sediment and water. Oil used on the lease is to be included.

Production, Natural Gas—The volumes of natural gas withdrawn from producing reservoirs during the report year less (1) the volume returned to such reservoirs in cycling, repressuring of oil reservoirs and conservation operations; less (2) shrinkage resulting from the removal of the liquefiable portions of the gas; and less (3) nonhydrocarbon gases where they occur in sufficient quantity to render the gas unmarketable. Volumes of gas withdrawn from gas storage reservoirs and native gas which has been transferred to the storage category are not considered production.

Proved Reserves of Crude Oil—Proved reserves of crude oil as of December 31 of the report year are the estimated quantities of all liquids defined as crude oil, with geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Reservoirs are considered (1) *proved* and *tested* if economic producibility is supported by either actual production or conclusive formation test (drill stem or wire line), or (2) *proved* and *untested* if economic producibility is supported only by core analyses and/or electric or other log interpretations. The area of an oil reservoir considered proved includes (1) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any; and (2) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

Volumes of crude oil placed in underground storage are not to be considered proved reserves.

Reserves of crude oil which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the "proved" classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.

Estimates of proved crude oil reserves do not include the following: (1) oil that may become available from known reservoirs but is reported separately as "indicated additional reserves"; (2) natural gas liquids (including condensate); (3) oil, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics, or economic factors; (4) oil that may occur in undrilled prospects; and (5) oil that may be recovered from oil shales, coal, gilsonite and other such sources. It is not necessary that production, gathering or transportation facilities be installed or operative for a reservoir to be considered proved.

Proved Reserves of Natural Gas—Proved reserves of natural gas as of December 31 of the report year are the estimated quantities which analysis of geologic and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Reservoirs are considered (1) *proved* and *tested* if economic producibility is supported by either actual production or conclusive formation test (drill stem or wire line), or (2) *proved* and *untested* if economic producibility is supported only by core analyses and/or electric or other log interpretations. The area of gas reservoir considered proved includes (1) that portion delineated by drilling and defined by gas-oil and/or gas-water contacts, if any; and (2) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

Volumes of natural gas placed in underground storage are not to be considered proved reserves.

An appropriate reduction in the reservoir gas volume is made to cover the removal of the liquefiable portions of the gas and the exclusion of nonhydrocarbon gases where they occur in sufficient quantity to render the gas unmarketable.

It is not necessary that production, gathering or transportation facilities be installed or operative for a reservoir to be considered proved. It is to be assumed that compression will be initiated if and when economically justified.

Report Year—The calendar year to which data reported herein pertain; the current report year is shown on the Cover Page to Part I.

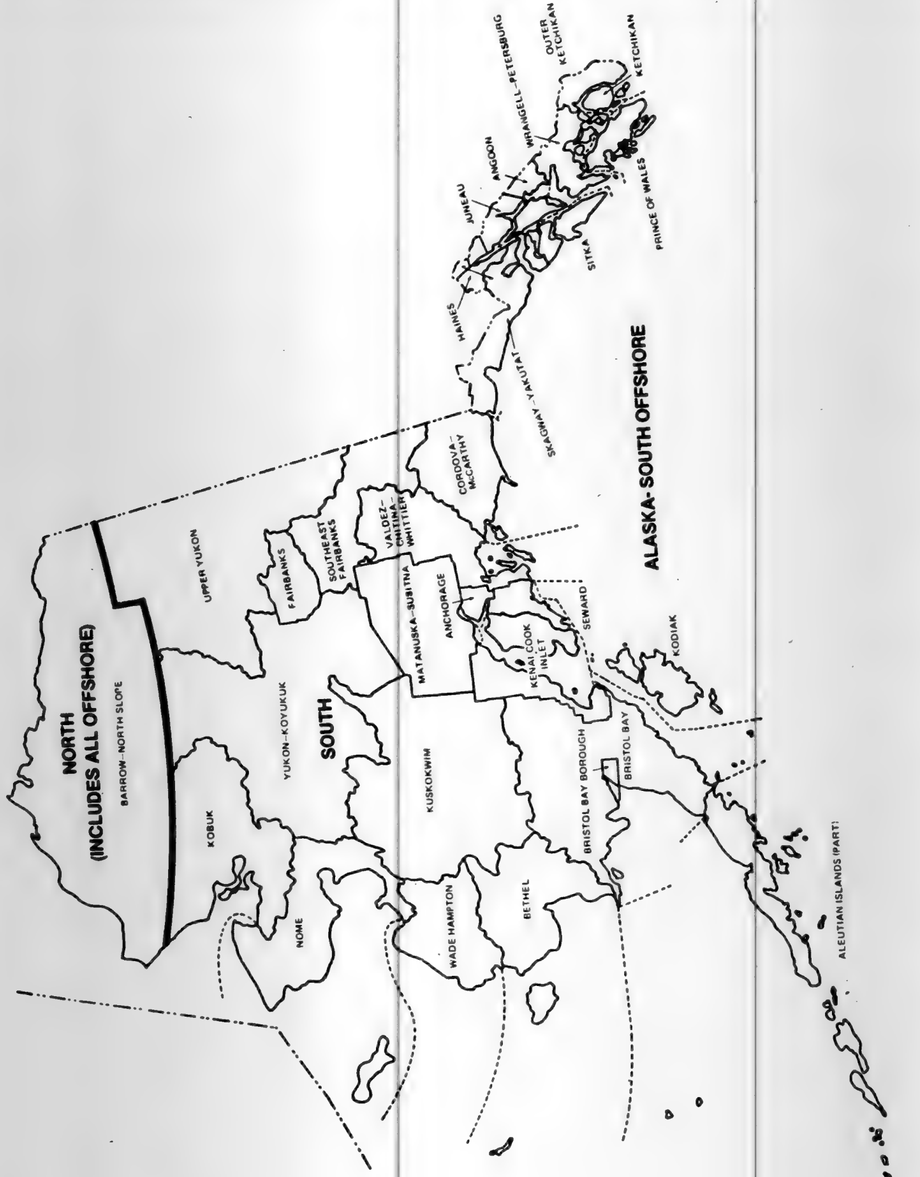
Reservoir—A porous and permeable underground formation containing an individual and separate natural accumulation of producible hydrocarbons (oil and/or gas) which is confined by impermeable rock or water barriers and is characterized by a single natural pressure system.

Shrinkage Factor—The fraction as of December 31 of the report year (expressed as a decimal) by which the volume of natural gas is reduced by the removal of natural gas liquids and/or nonhydrocarbon gases where they occur in sufficient quantity to render the gas unmarketable.

Example: The removal of 112 MMcf of natural gas liquids vapor and/or nonhydrocarbon gases from 1000 MMcf of natural gas represents a shrinkage factor of 0.112.

Subdivision—A prescribed portion of a given State or other geographical region defined herein for statistical reporting purposes. (See Subdivision Maps below.)

Total Operated Basis—The total reserves or production of oil or gas associated with the wells operated by an individual operator. This is also commonly known as the "gross operated" or "8/8th" basis.



B. Subdivision Maps (Used in: Summary Report, Section 2.0)

The following maps indicate the boundaries of the geographic subdivisions:

- Subdivisions of Alaska, p. 16.
- Subdivisions of California, p. 17.
- Subdivisions of Louisiana, p. 18.
- Subdivisions of New Mexico, p. 19.
- Subdivisions of Texas, p. 20.

DEPARTMENT OF LABOR

Employment Standards Administration

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 224–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Construction Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

New General Wage Determination Decisions

Maryland.....MD79–3026
New York.....NY79–3030

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

Alabama:
AL79–1043..... Mar. 9, 1979

FOOTNOTE:
a. Paid Holidays: A through F, provided the employee has worked the day before and after the holiday.

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS A
Laborers, drill tenders, flagmen, outboard and hand boats.

CLASS B
Bull float, chain saw, concrete aggregate, bin concrete bootman, gin buggy, hand or machine vibrator, jackhammer, mason tender, mortar mixer, pavement breaker, handlers of all steel mesh, small generators for laborers' tools, installation of bridge drainage pipe, pipelayers, vibrator type rollers, tamper, drill doctor, tail or crew op. on asphalt paver, water pump op. (1½" and single diaphram), nozzle (asphalt, gunnite, seeding and sandblasting), laborers on chain link fence erection, rock splitter and power unit, pusher type concrete saw and all other gas, electric, oil and air tool operators, wrecking laborer.

CLASS C
All rock or drill machine operators (except quarry master and similar type), acetylene torch op., asphalt raker, powderman.

CLASS D
Blasters, form setter, stone or granite curb setters.

DECISION NO. NY79-3030

POWER EQUIPMENT OPERATORS - BUILDING CONSTRUCTION:

GROUP I - Cranes:
A - 121 ft. & under
B - Between 121 - 151 ft.
C - Between 151 - 201 ft.
D - Between 201 - 251 ft.
E - Between 251 - 301 ft.
F - Between 301 - 351 ft.
G - Between 351 - 401 ft.
H - Between 401 - 451 ft.

GROUP II - Air tugger, backhoe, clamshell, dragline, shovel and similar machines over three eighths (3/8) cu. yd. capacity (factory rating), big generator plant, bridge crane (all types), cableway, caisson auger & similar type machine, climbing and/or tower crane (all kinds and all types), derrick, dredge, forklift (with factory rating of fifteen (15) ft. or more of lift) hoist (on steel erection), mucking machine, Ross Carrier (and similar types), three drum hoist (when all drums are in use)

GROUP III - "A" Frame truck, back filling machine, Barber Green and similar type loader, belt crete and similar type machine, bituminous spreading machine, bulldozer, carry-all type scraper, compressors; four (4) not to exceed 2000 c.f.m. combined capacity, three (3) or less with more than 1200 c.f.m., but not to exceed 200 c.f.m., concrete mixer, concrete pump, core drill, crane-hoe-shovel (3/8 yd. capacity or less), (factory rating), dinky locomotive (all types), elevating type grader, elevator, fine grade machine (all kinds), front end loader, forklift (with factory rating of less than (15) fifteen ft. of lift.), high pressure boiler (over 15 pounds pressure), hoist (1 or 2 drums), Motor grader, maintenance engineer, post hole digger, sheepsfoot roller, side boom, stone crusher, submersible Electric Pump, when used in lieu of well point system, tandem roller, Tournedozer and similar types, tournapull, tower mobile and similar kinds trenching machine, vibratory type roller and similar equipment of all kinds, welder, well drill, well point system

GROUP IV - Any combination (not to exceed three (3) pieces of equipment) pumps, welding machines or mechanical conveyors, (over 12 ft. in length), belt crete generator, compressors - 3 or less not to exceed 1200 c.f.m. combined capacity, Fireman, longitudinal float, mechanical heater, roller (fill and grade), rubber tired tractor, oilers

LABORERS

Group 1: All cleanup work of debris, grounds and buildings including Brushloader and windows and tile; Dumpman or Spotter (other than asphalt); General Laborer; Gardeners and Landscape Laborers; Limber, Brushloader and Piler; Flagman

Group 2: Choker Setter or Rigger (clearing work only); Pittsburgh Chipper and similar type Brush Shredders; Concrete Worker (wet or dry) - all concrete work not listed in Group 3; Crusher or Grizzly Tender; Guinea Chaser (Stakeman); Panel Forms (wood or metal) - handling, cleaning and stripping of; Loading and unloading, carrying and handling of all rods and materials for use in reinforcing concrete; Railroad Trackmen (maintenance, repair or builders); Sloper; Semi-skilled Wreckers (salvaging of building materials other than those listed in Group 3); Greasing Dowels

Group 3: Asphalt Workers (Ironers, Shoveler, Cutting Machine); Buggymobile; Chainsaw, faller, logloader and bucker; Compactor (all types); Concrete Mixer, under 1/2 yd.; Concrete Pan Work (broadpan type) (handling, cleaning, stripping); Concrete Saw, shipping, grinding, sanding, vibrator; Cribbing, Shoring, Lagging, Trench Jacking, handguided Lagging Hammer; Curbing or Divider Machine; Curb Setter (pre-cast or cut); Ditching Machine (handguided); Driller's Tender, Chuck Tender; Form Raiser, Slip Forms; Grouting of concrete walls, windows and door jams; Headerboardman; Jackhammer, Pavement Breaker, Air Spade; Mastic Workers (wet or dry); Pipe Wrapper, Kettleman, Potman, and Men applying asphalt, creosote and similar type materials; All power tools (air, gas or electric not listed in Group 5); Pipejacking; Posthole Digger (air, gas or electric); Post Driver; Riprap-stonepaver and Rock Slinger, including placing of sack concrete wet or dry; Rototiller; Rigger and Signaling in connection with Laborers' work; Sandblaster, Potman, Gunman or Nozzleman; Vibra-screed; Skilled Wrecker (removing and salvaging of sash, windows, doors, plumbing and electrical fixtures.

Group 4: Burning and Welding in connection with Laborers' work; Joy Drill Model TWM-2A, Gardner Denver Model DN 143 and similar type drills; Track Drillers, Diamond Core Drillers, Wagon Drillers, Mechanical Drillers on multiple units; High Scalers; Concrete Pump; Heavy Duty Vibrator with stinger 5" diameter or over; Pipelayer, Caulker and Bander; Pipelayer - waterline, sewerline, gasline or conduit; Asphalt Rakers

Group 5: Blasters and Powdermen, all work or loading, placing and blasting of all powder and explosives of any type, regardless of method used for such loading and placing

Group 6-A: Nozzleman

Group 6-B: Gunman, Material

Group 6-C: Reboundman

SEE "AREA DEFINITIONS" Following TRUCK DRIVERS' Classifications.

Group 1-A: Assistant to Engineer, including Brakeman, Deckhand, Fireman, Oiler, Partsman (heavy duty repair shops parts room when needed), Switchman, Tar Pot Fireman; Boiler Tender

Group 2: Compressor; Material Loader and/or Conveyor (handling building materials); Pump; Tar Pot Fireman (power agitated)

Group 3: Box Operator (Bunker); Concrete Curing Machines (streets, highways, airports, canals); Conveyor Belt (tunnel); Engineer Generating Plant (500 H.W.); Fireman, Hot Plant, Hydraulic Monitor; Lubrication and Service Engineer (mobile and grease rack); Mixer Box Operator (concrete plant); Motorman; Rotomist; Screedman (except asphaltic or concrete paving); Oiler (truck crane); Rodman or Chainman; Bobcat or similar loader, 1/4 cu. yd. or less

Group 4: Ballast Jack Tamper; Ballast Regulator; Ballast Tamper Multipurpose; Boxman (asphalt plant); Concrete Mixer, skip type; Dinky; Fork Lift (construction job site); Ross Carrier; Skip Loader (under 1 cu. yd.); Tie Spacer; Line Master

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 5: Concrete Mixer (over 1 cu. yd.); Concrete Pumps or Pumpcrete Guns; Elevator and Material Hoist (1 drum); Screedman (Barber-Greene and similar)(asphaltic or concrete paving); Shuttle Car; Signalman

Group 6: Boom Truck or Dual Purpose "A" Frame Truck; B.L.H. Lima Road Pactor or similar; Chip Box Spreader (flaherty type or similar); Concrete Batch Plant (wet or dry); Concrete Saw (highways, streets, airports, canals); Highline Cableway Signalman; Locomotive (over 30 tons); Maginnis International Full Slab Vibrator (airports, highways, canals, warehouses); Mechanical Burn, Curb and/or Curb Gutter Machine (concrete or asphalt); Power Jumbo (setting slip forms, etc., in tunnels); Roller (except asphalt); Self-propelled Compactor (single engine); Slip Form Pump (power driven by hydraulic, electric, air, gas, etc., lifting device for concrete forms); Stationary Pipe Wrapping, Cleaning and Bending Machine; Pavement Breaker or Tamper (with or without compressor (combination); Pavement Breaker, truck mounted, with compressor combination; Small Rubber-tired Tractors; Self-propelled Tape Machine; Auger type drilling equipment up to and including 30 ft. depth digging capacity m.r.c.

Group 7: Compressor (over 2); Concrete Conveyor; Concrete Conveyor or Concrete Pump, truck or equipment mounted (boom length to apply); Crusher Plant Engineer; Deck Engineer; Drilling and Boring Machinery, vertical and horizontal (not to apply to Waterliners, Wagon Drills or Jackhammers); Generators; Grade Setters; Grade Checker; Kolman Loader; Material Hoist (2 or more drums); Mechanical Finishers or Spreader Machine (asphalt, Barber-Greene and similar); Mine or Shaft Hoist; Pipe Bending Machines (pipelines only); Pipe Cleaning Machines (tractor propelled and supported); Pipe wrapping machines (tractor propelled and supported); Portable Crushing and Screening Plants; Pumps (over 2); Refrigeration Plant; Self-propelled Boom type lifting device (center mount)(10 ton capacity or less); Slusher; Soil Tester (certified); Surface Heater and Planer; Trenching Machine (maximum digging capacity 5 ft. depth); Truck type Loader; Welding Machines (gasoline or diesel); Roller (asphalt); Instrument Man; Auger type drilling equipment over 30 ft. depth capacity m.r.c.

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 8: Asphalt Plant Engineer; Car Passer; Cast-in-place Pipe Laying Machine; Combination Slusher and Motor; Dozer; Concrete Batch Plant (multiple units); Elevating Grader; Grooving and Grinding Machine (highways); Heavy Duty Repairman and/or Welder; Ken-seal; Loader (up to and including 2½ cu. yds.); Mechanical Trench Shield; Mixermboile; Push Cats; Road Oil Mixing Machine; Wood-mixer (and other similar pugmill equipment); Rubber-tired Earthmoving equipment (up to and including 35 cu. yds. "struck" m.r.c.)(Euclids, T-Pulls, DW's 10, 20, 21 and similar); Self-propelled Compactor with Dozer; Sheepfoot; Small Tractor (with boom); Soil Stabilizer P & H or equal); Timber Skidder (rubber tire) or similar equipment; Tractor; Tractor drawn Scraper; Tractor mounted Compressor Drill Combination; Trenching Machine (over 3 ft. depth); Tri-batch Paver; Tunnel Badger or Tunnel Boring Machine; Tunnel Mole Boring Machine; Vermeer T-600 B Block Cutter

Group 9: Canal Finger Drain Digger; Chicago Boom; Combination Backhoe and Loader (up to and including 3/8 yd.); Combination Mixer and Compressor (gunnite); Lull Hi-lift (20 ft or over); Mucking Machine; Tractor with boom (D-6 or larger); Track Laying type earth moving Machine (single engine with tandem Scrapers); Sub-grader (Gurries or other types)

Group 10: Boom type Backfilling Machine; Bridge Crane; Carylift or similar; Chemical Grouting Machine; Derricks; Derrick Barges (except excavation work); Euclid Loader and similar types; Heavy Duty Rotary Drill Rigs; Lift-slab (Vagtborg and similar types); Loader (over 2½ cu. yds. up to and including 4 cu. yds.); Locomotive (over 100 tons) (single or multiple units); Multiple Engine Earth Moving Machines (Euclid, Dozers, etc.); Pre-stress Wire Wrapping Machine; Rubber-tired Scraper, self-loading; Self-propelled Reservoir-debris equipment floating (200 HP and over); Shuttle Car (Re-claim Station); Single Engine Scraper (over 35 cu. yds.); Train Loading Station; Vacuum Cooling Plant; Whirley Crane (up to and including 25 tons); Trenching Machine; Multi-engine with sloping attachments (JEFFCO or similar); Chief or Party

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 10-A: Backhoe (up to and including 1 cu. yd. hydraulic); Backhoe (up to and including 1 cu. yd. cable); Cranes (not over 25 tons) (Hammerhead and Gantry); Grade-alls (up to and including 1 cu. yd.); Motor Patrol; Power Shovels, Clamshells, Draglines, Cranes (up to and including 1 cu. yds.); Rubber-tired Scraper, self-loading (twin engine); Self-propelled Boom type lifting device (center mount)(over 10 tons); CMI dual lane Auto-grade SP 30 or similar

Group 11: Automatic Asphalt or Concrete Slip Form Paver; Automatic Railroad Car Dumper; Canal Finger Drain Backfiller; Canal Trimmer; Cranes (over 25 tons); Highline Cableway Operator; Loader (over 4 yds. up to and including 12 cu. yds.); Multi-engine Earthmoving Equipment (up to and including 75 cu. yds. "struck" m.r.c.); Power Shovels, Clamshells, Draglines, Backhoes, Gradeall (over 1 yd. and up to and including 7 cu. yds. m.r.c.); Self-propelled Compactor (with multiple propulsion power units); Single Engine Rubber-tired Earth-moving Machine (with Tandem Scraper); Slip Form Paver (concrete or asphalt); Tandem Cats and Scrapers; Tower Crane Mobile; Universal Liebher and Tower Cranes (and similar types); Whirley Cranes (over 25 tons); Euclid Loader when controlled from the Pullcat

Group 11-A: Band Wagons (in conjunction with wheel excavators); Loaders (over 12 cu. yds.); Multi-engine Earth-moving Equipment (over 75 cu. yds. "struck" m.r.c.); Operator or Helicopter (when used in construction work); Power Shovels and Draglines (over 7 cu. yds. m.r.c.); Remote-controlled Earth-moving equipment; Wheel Excavator (over 750 cu. yds. per hour)

[Docket No. 76N-0483]

Warner-Lambert/Parke-Davis & Co.; Benylin; Final Decision

AGENCY: Food and Drug Administration.

ACTION: Final Decision following a formal evidentiary public hearing in an adjudicatory proceeding.

SUMMARY: The Commissioner of Food and Drugs is issuing his Final Decision concerning a supplemental new drug application for Benylin (diphenhydramine hydrochloride) a drug which the sponsor, Warner-Lambert/Parke-Davis & Co., claims is indicated for use in the treatment of cough due to colds or inhaled irritants. The Commissioner has determined that Benylin has not been shown to be effective for this use and is refusing to approve the application. In view of the decision on effectiveness, the Commissioner has not decided whether Benylin is safe for over-the-counter (OTC) distribution. The Decision reverses the Initial Decision of the Administrative Law Judge, which found that Benylin is effective for its recommended use and is safe for OTC distribution.

EFFECTIVE DATE: June 29, 1979.

ADDRESS: The transcript of the hearing, evidence submitted, and all other documents cited in this decision may be seen in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Tenny P. Neprud, Compliance Regulations Policy Staff (HFC-10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3480.

SUPPLEMENTARY INFORMATION: The purpose of this proceeding has been to determine whether the Food and Drug Administration (FDA) should approve a supplemental new drug application (NDA 6-514 S-007) for the over-the-counter (OTC) marketing of Benylin Expectorant (Benylin) as an antitussive drug (a drug which specifically inhibits or suppresses coughs).

Benylin is a liquid preparation containing, among other ingredients, diphenhydramine hydrochloride, ammonium chloride, and sodium citrate. Warner-Lambert/Parke-Davis (WL/PD), the sponsor of the supplemental new drug application (NDA), holds an approved NDA for prescription distribution of Benylin as an antitussive drug. WL/PD markets two other well known products, Benadryl and Benylin DM, which should not be confused with the product that is the subject of this proceeding. Benadryl is a prescription antihistamine drug with several other uses; it has diphenhydramine hydrochloride as its active ingredient. The recommended adult antihistiminic dosage of Benadryl provides 50 mg diphenhydramine hydrochloride every 4 hours. The recommended adult antitussive dosage of Benylin provides 25 mg diphenhydramine every 4 hours. Benylin DM is an OTC antitussive drug having dextromethorphan, rather than diphenhydramine hydrochloride, as its active ingredient. Benadryl has been on the market since the 1940's; marketing of Benylin DM began during this proceeding.

The effect of this Decision is to refuse to approve the supplemental NDA for marketing of Benylin as an OTC antitussive drug. This Decision leaves unaffected the approved NDA for marketing of Benylin as a prescription antitussive. However, the finding that Benylin has not been shown to be effective for its recommended use is equally applicable whether the drug is marketed OTC or is subject to prescription requirement. Accordingly, in light of this finding, the Bureau of Drugs (the Bureau) should consider whatever action seems appropriate with respect to the approved NDA for prescription Benylin.

In a notice published in the **Federal Register** of November 30, 1976 (41 FR 52537), the Bureau proposed to deny approval of the supplemental NDA for the OTC marketing of Benylin as an antitussive drug on two grounds:

1. That diphenhydramine hydrochloride, one of the ingredients in Benylin, causes a level of drowsiness in those who take it that is sufficient to render it unsafe for use except under the supervision of a physician or other practitioner licensed to dispense prescription drugs.

2. That the studies submitted to establish the effectiveness of Benylin as an antitussive drug do not provide substantial evidence of its effectiveness for that use as required by section 505(d) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 355(d)) and § 314.111(a)(5) of the regulations (21 CFR 314.111(a)(5)).

I. Background

A more detailed history of the regulation of Benylin and of this proceeding is found in the Bureau's November 30, 1976 proposal to deny approval of the supplemental NDA. The original NDA, approved in 1948, was for use of the drug as an expectorant (a drug that makes it easier for a patient to raise secretions from the chest and throat). Restriction to prescription was a condition of the approval of the drug, then called "Benylin Expectorant."

In 1966, FDA permitted the inclusion of an antitrussive indication in the labeling. During the same year, FDA began a review of the effectiveness of all drugs that had been approved before the Drug Amendments of 1962 added to the act the requirement that the sponsor of an NDA show the new drug to be effective, as well as safe. This review, carried out in cooperation with the National Academy of Sciences/National Research Council (NAS/NRC), resulted in a 1971 NAS/NRC report and an FDA notice in the **Federal Register** of June 18, 1971 (36 FR 11758), classifying diphenhydramine hydrochloride as "lacking substantial evidence of effectiveness" as an antitussive. In a notice published in the **Federal Register** of February 9, 1973 (38 FR 4006), the Bureau announced its conclusion that there is a lack of substantial evidence of the effectiveness of Benylin Expectorant and certain other products as fixed combinations for the indications in their labeling, and offered an opportunity for a hearing on a proposal to withdraw approval of the NDA for Benylin Expectorant.

By letter of March 9, 1973, WL/PD requested a hearing on the proposed withdrawal. In its request, the firm referred to the submission it had filed for review by the Advisory Review Panel on OTC Cold, Cough, Allergy, Bronchodilator, and Antiasthmatic Drugs (CCABA Panel). The CCABA Panel had been established as part of FDA's program for review of the safety and effectiveness of all OTC drugs. The firm also responded to the notice of opportunity for a hearing by filing, on March 22, 1973, a supplemental NDA for Benylin Expectorant. The supplemental NDA provided for changing the name of the product to "Benylin Cough Syrup," for deletion of all ingredients except diphenhydramine hydrochloride from from the list of active ingredients, but not from the product formulation, and for a change in the description of the product's mechanism of action and in the indications for which the product was recommended. By letter of November 28, 1973, the Bureau refused to approve the supplemental NDA.

On February 5, 1974, WL/PD also submitted a supplemental NDA with

two studies relating to the effectiveness of Benylin as an antitussive. On November 25, 1974, the firm submitted a supplemental NDA with revised labeling providing for OTC use of Benylin as an antitussive. The later supplemental NDA is the subject of this Decision. By letter of March 11, 1975, the Bureau informed the firm that no action would be taken on the two supplemental NDA's pending completion of review by the CCABA Panel of the data before it.

In response to a letter from WL/PD, FDA's Division of OTC Drug Evaluation informed the firm on March 18, 1975, that OTC marketing of Benylin would be unlikely to be subject to regulatory action under the enforcement policy then in effect comcerning new OTC products. Thereafter, WL/PD commenced OTC marketing of Benylin with indications for use as an antitussive.

On August 4, 1976 (41 FR 32580), however, FDA published a final regulation, based on a proposal published on December 4, 1975 (40 FR 56675), that changed FDA's enforcement policy concerning OTC marketing of drug ingredients that had previously been limited to prescription use and for which OTC use had not been approved by FDA. This regulation, codified in §§ 310.200 and 330.13 (21 CFR 310.200, 330.13) allows the OTC marketing of products containing such ingredients upon publication of the report of an OTC advisory review panel recommending that the ingredients and indications be classified as generally recognized as safe and effective for OTC use (Category I) unless the Commissioner of Food and Drugs (the Commissioner) disagrees with that decision.

In the **Federal Register** of September 9, 1976 (41 FR 38312), the Commissioner published a proposal setting forth the report and recommendations of the CCABA panel. The Panel recommended that diphenhydramine hydrochloride be classified in Category I for OTC use as an antitussive. In the preamble to the proposal, the Commissioner stated that his decision concerning the safety and effectiveness of diphenhydramine hydrochloride as an antitussive would be made in the context of his ruling on the supplementyal NDA for OTC marketing of Benylin.

On September 8, 1976, the Bureau informed WL/PD that its supplemental NDA for Benylin as an OTC antitussive was not approvable. On September 17, 1976, the firm requested that the supplemental NDA for OTC use of Benylin be filed over protest pursuant to § 314.110(d) (21 CFR 314.110(d)).

In a notice published in the **Federal Register** of November 30, 1976 (41 FR 52537), the Bureau proposed to deny approval of the supplemental NDA for OTC marketing of Benylin Expectorant and provided WL/PD with notice of opportunity for a hearing on this proposed action. On the same date, the Commissioner published a notice (41 FR 52536) announcing that he did not, at that time, accept the CCABA Panel's recommendation that diphenhydramine hydrochloride be classified in Category I for OTC antitussive use. Accordingly, any OTC product marketed containing diphenhydramine hydrochloride was subject to immediate regulatory action. The Commissioner had concluded that the recommended antitussive dose of diphenhydramine hydrochloride (25 mg) causes an unacceptable level of drowsiness for an OTC drug. Furthermore, although he agreed with the Panel that some data indicated that this ingredient has some antitussive effect, he found that there was a lack of substantial evidence consisting of adequate and well-controlled studies, as required by § 314.111(a)(5)(ii) (21 CFR 314.111(a)(5)(ii)), on which to base a determination concerning the effectiveness of Benylin for the temporary control of cough.

On November 29, 1976, the firm filed an action seeking a declaratory judgment that Benylin is not a new drug or, in the alternative, an order enjoining FDA enforcement actions involving Benylin pending final determination of the drug's status (Civil Action No. 6-72464, E.D. MI). On November 30 and December 1, 1976, three United States Attorneys for other districts filed complaints resulting in seizures of Benylin. The Michigan case ultimately resulted in a decision by the United States Court of Appeals for the Sixth Circuit holding that the district court lacked jurisdiction to review the agency's decision to initiate enforcement action and that the pending enforcement actions provided an opportunity for full hearing on all issues. *Parke, Davis & Co.* v. *Califano*, 564 F.2d 1200 (6th Cir. 1977), *rev'g Parke, Davis & Co.* v. *Mathews*, Civil Action No. 6-72464 (E.D. MI, Memorandum Opinion issued Jan. 7, 1977).

WL/PD then submitted a request for hearing, which the Commissioner granted in a notice published in the **Federal Register** of March 29, 1977 (42 FR 16675). The proceeding was referred to the presiding officer, Administrative Law Judge Daniel J. Davidson.

The March 29, 1977, notice of hearing observed that the issue of the effectiveness of Benylin as an OTC product is indistinguishable from the issue of its effectiveness as a prescription product and therefore announced that the hearing would concern the effectiveness of Benylin for prescription use as well as for OTC use. For this reason, the Administrative Law Judge (ALJ) in a pretrial order dated June 2, 1977, broadened the issues at the hearing to include consideration of "[w]hether there is any other evidence relating to the effectiveness of Benylin as an antitussive." Although the effectiveness of Benylin as a prescription antitussive is required to be resolved in a separate withdrawal proceeding, "there would be no need to duplicate the hearing process with respect to other evidence relating prescription use" (ID,[1] p. 4).

As revised by the ALJ, the issues at the hearing were:

1. Whether the NDA for Benylin contains reports of investigations or other information adequate to demonstrate the safety of the drug for OTC distribution, as required by 21 U.S.C. 355(d)(1), (2), and (4);

2. Whether the NDA for Benylin demonstrates that there is substantial evidence of effectiveness of the drug as an antitussive in the form of adequate and well-controlled clinical investigations, as defined by § 314.111(a)(5) (21 CFR 314.111(a)(5)), on the basis of which it could fairly and responsibly be concluded by experts, qualified by scientific training and experience to evaluate drugs, that Benylin is effective as an antitussive for OTC use;

3. Whether there is any other evidence relating to the effectiveness of Benylin as an antitussive;

4. Whether Benylin is generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use as an OTC antitussive under the conditions prescribed, recommended, or suggested in its labeling.

The oral portion of the hearing was held from October 11 through 25, 1977. The parties were the Bureau, in support of the proposed denial, and WL/PD, in opposition to the proposed denial. Both parties filed briefs.

[1] The following abbreviations have been used in citing material in the record: Initial Decision: ID; Transcript: Tr; Brief of a participant to the ALJ: Brief; the Bureau's exceptions to Initial Decision: Exceptions; WL/PD's reply to the Bureau's exceptions to Initial Decision: Reply. This decision refers to the exhibits submitted to the record, including written direct testimony, by the symbol for the participant and number assigned to them upon filing by the Hearing Clerk. The Hearing Clerk used the following symbols to refer to the exhibits by the participants: WL/PD: P; Bureau: G.

II. Alleged Deficiencies in Clinical Studies of Benylin's Effectiveness

In an appendix to the Initial Decision, the ALJ summarized the major clinical studies submitted by WL/PD to show that Benylin is an effective antitussive agent. For convenience, excerpts from that summary are set forth as Appendix A to this Decision, and the Bureau's allegations concerning deficiencies in these studies are listed below.

The Bureau contends that studies of Benylin in groups other than the target population may be considered only if diphenhydramine hydrochloride is shown conclusively to act specifically on the cough center of the brain, and not through some other mechanism such as soothing the throat or causing general sedation (G–11, pp. 11–13; G–29, pp. 2–3). The Bureau also asserts that it has not been shown that this drug acts specifically on the cough center (G–1 pp. 8, 14–15; G–11, pp. 12–13; G–29, pp. 2, 7; T–529, T–961). The Bureau contends that Benylin has not been shown to be effective as an antitussive because the two submitted studies of Benylin in the drug's target population contain deficiencies that prevent the studies from being considered adequate and well-controlled investigations meeting the requirements of 21 CFR 314.111(a)(5)(ii).

The Bureau assets that the Tebrock study (Protocol 266–17, P9–1 through P9–6) is deficient in the following respects:

(a) Both a positive control and a placebo control should have been used (Brief, pp. 98–108; G–11, p. 5; G–13, pp. 6–7; G–17, p. 14; G–27, pp. 6–7; G–138, p. 465).

(b) The study lacks an adequate placebo control in that the Benylin vehicle contains ingredients, ammonium chloride and sodium citrate, that may be active (Brief, pp. 24–52; G–11, pp. 8–10, 18, 20; G–13, pp. 5–6; G–15, pp. 7–8; G–27, pp. 18–19).

(c) The subjective measurement of cough improvement used in the study does not permit quantitative evaluation of test results as required by 21 CFR 314.111(a)(5)(ii)(*a*)(*4*); the sponsor should have measured cough improvement by objective means, e.g., having subjects keep detailed diaries throughout the day, rather than rate their cough improvement once daily on a 4-point scale (Brief pp. 82–92; G–11, p. 21; G–17, pp. 12–13; T–564).

(d) Having subjects evaluate their cough improvement by comparing their cough experience on one day to that on the previous day does not permit quantitative evaluation and statistical analysis of the results of treatment and control as required by 21 CFR 314.111(a)(5)(ii)(*a*) (*4*) and (*5*); the protocol should have had subjects compare their coughs after treatment to their coughs on the day immediately preceding the 3-day trial (G–13, pp. 8, 9; G–7, p. 4; G–17, p. 11).

(e) Data from the 5 test centers should not have been pooled because homogeneity of treatment effect among centers is a prerequisite to such pooling, and statistical tests show lack of homogeneity (Brief, pp. 52–72; G–7, pp. 7–8; G–13, p. 9).

(f) The results of the study are not clinically significant; an improvement in cough of only 9 percent in the Benylin group compared to the Benylin vehicle group is not sufficient to satisfy the requirement of substantial evidence of effectiveness (Brief, pp. 73–81; G–11, pp. 20–21; G–13, pp. 10–11; G–15, pp. 9–10; G–27, p. 19; T–560).

The Bureau contends that the Burke study (Protocol 266–9 P7–1 through P7–5) is deficient in the following respects:

(a) Both a positive control and a placebo control should have been used (Brief, pp. 98–107; G–11, p. 5; G–13, p. 7; G–27, pp. 6–7; G–138, p. 465).

(b) Because the effectiveness of a combination of Benylin and codeine has not been established, the use of this combination is not an "effective regimen of therapy," i.e., a positive control, meeting the requirements of 21 CFR 314.111(a)(5)(ii)(*a*)(*4*)(*iii*) (Brief, pp. 137–143; G–11, p. 19; G–13, p. 11; G–15, pp. 10–11; G–17, p. 11; G–27, p. 17).

(c) The study results do not permit quantitative evaluation because the study relied on subjective evaluations by children, most of whom were between the ages of 6 and 12; children of this age group are unreliable for the subjective evaluation of an antitussive drug when the evaluation requires a single judgment of the effects of the drug over 3 to 4 days (Brief at 147–153; G–3, pp. 8–9; G–11, p. 19; G–31, p. 17).

III. Initial Decision

On May 31, 1978, the ALJ issued an Initial Decision in which he found that Benylin had been shown, by adequate investigations, to be safe and effective for use as an OTC antitussive and ordered that the supplemental NDA (6–514/S–007) be approved.

A. Specific Findings

Specifically, the ALJ found (ID, pp. 21–22):

(1) The evidence of record in this proceeding is insufficient to determine whether Benylin, in the opinion of the medical community, is generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use as an OTC antitussive under the conditions prescribed, recommended, or suggested in its labeling. Therefore, the exemption from new drug status * * * has not been shown to apply to Benylin.

(2) The supplemental NDA for Benylin (NDA 6/514/S–007) contains reports of investigations or other information adequate to demonstrate the safety of the drug for OTC distribution as required by 21 U.S.C. 355(d) (1), (2) and (4).

(3) The supplemental NDA for Benylin (NDA 6–514/S–007) demonstrates that there is substantial evidence of effectiveness of the drug as an antitussive in the form of adequate and well-controlled clinical investigations, as defined by § 314.111(a)(5) [21 CFR 314.111(a)(5)], on the basis of which it could fairly and responsibly be concluded by experts, qualified by scientific training and experience to evaluate drugs, that Benylin is effective as an antitussive for OTC use.

(4) There is no other evidence relating to the effectiveness of Benylin as an antitussive for prescription use.

Also included in the initial Decision was a detailed discussion of the ALJ's findings with respect to the safety and effectiveness of Benylin. (To conform to the format elsewhere in this Decision, the summary below of the Initial Decision first discusses effectiveness, then safety.)

B. Effectiveness

The ALJ considered only the Tebrock study (Protocol 266–17, P9–1 through P9–6) and the Burke study (Protocol 266–9, P9–1 through P9–6), the two studies in patients with cough due to cold, in support of Benylin's claimed effectiveness in cough due to cold. He rejected all of the Bureau's contentions with respect to alleged deficiencies in these studies. He found with respect to both studies that there is no requirement in the regulations that both a positive and a negative control be used (ID, pp. 9, 20).

With respect to the Tebrock study, the ALJ also found:

(a) The Benylin vehicle was a suitable placebo; the Bureau had failed to show that ammonium chloride or sodium citrate possesses activity (ID, pp. 10–11, 20).

(b) The subjective measurement of cough improvement used in the study was acceptable (ID, pp. 11–12, 20–21);

(c) Having subjects compare cough improvement by comparing experience on one day with that on the previous day is acceptable, given the study results (ID, p. 12);

(d) It was appropriate for WL/PD to pool data from 5 test centers (ID, pp. 12–14);

(e) WL/PD had met the statutory requirement of proof of effectiveness, because the results of this study showed that Benylin offers a statistically

significant benefit over the control and these results were corroborated by the Burke study, which the ALJ interpreted as showing Benylin to be 8 percent more effective than codeine [2] (ID. pp. 14–15, 21).

With respect to the Burke study, the ALJ found that:

(a) The study was adequately controlled (ID, pp. 11, 20, 21), and

(b) The study results were susceptible to quantitative evaluation despite the reliance upon subjective evaluations by young children (ID, p. 12).

The ALJ considered two of the induced cough studies (Protocols 266–18, P6–6 through P6–9; and 794–1, P6–10 through P6–14) as substantial evidence of the effectiveness of Benylin for cough due to inhaled irritants (ID, pp. 16–19). He also accepted a third study (the 1960 Bickerman Protocol, P6–3 through P6–5) as corroborative evidence of the effectiveness of Benylin for this use (ID, p. 18). He rejected the Bureau's contentions that these studies qualify only as Phase I studies of the pharmacological action of Benylin, that there is no target population having cough due to inhaled irritants, that the numbers of subjects were too small, that the studies are not adequate and well-controlled, that cough reduction in Protocol 266–18 may have been due to an anesthetic effect from gargling rather than antitussive activity, and that Protocol 794–1 did not test the finished drug product.

C. Safety

The ALJ found that the supplemental NDA for Benylin contains reports of investigations or other information adequate to demonstrate the safety of the drug for OTC distribution as required by section 505(d) of the act (ID, pp. 9,-22). (He did not, however, mention any particular studies as satisfying this requirement.) The ALJ cited the extensive use of Benylin over a period of 30 years and its approval for prescription use as "a substantial indication that it can be used safely" (ID, p. 5).

The ALJ also stated that the Bureau's argument that limiting Benylin to prescription use would reduce the chance of the drug causing injury "does not take into account the limited scope of agency authority" under section 503(b) of the act to restrict drugs to prescription, and under section 505(d) of the act to consider use of drugs contrary to label provisions (ID, pp. 6–8). He stated his belief that drowsiness due to Benylin while driving a motor vehicle is the only hazard that the Bureau contends is associated with the drug (ID, p. 6). He pointed out that this drowsiness presents a hazard only when a patient ignores the proposed lable warning against use of Benylin while driving a motor vehicle (ID, pp. 6–8). He considered this use to be outside the scope of the provision that the safety of a drug is to be evaluated in terms of its use "under the conditions prescribed, recommended, or suggested in the proposed labeling thereof" (ID, p. 7). The ALJ held that "questions of the safety of a drug when it is used in a manner contrary to the label warnings can be considered in only limited circumstances" (ID, p. 8). Once the manufacturer has shown a drug to be safe under the conditions prescribed, recommended, or suggested in the labeling, the drug is approvable unless the Bureau can show, by "convincing evidence of harm," that "there is a reasonable probability that such non-label indicated uses can be expected to occur" before the Bureau can deny approval of a drug because of hazards when used contrary to label warnings (ID, p. 8). Finding that the Bureau had made no such showing in the record of this csse, the ALJ found the safety record of Benylin during 30 years of its use to be "controlling in this proceeding" (ID, pp. 8–9).

The Bureau filed exceptions to the Initial Decision and appealed it to the Commissioner. WL/PD filed a reply disagreeing with each of the Bureau's exceptions and urging that the Initial Decision be affirmed.

IV. Statute and Regulations

A. Effectiveness

The act requires that a sponsor show a new drug to be effective before FDA may approve it for marketing. Section 505(d) of the act requires the Commissioner (by delegation from the Secretary, 21 CFR 5.1) to issue an order refusing to approve an NDA if the Commissioner finds, after notice and opportunity for a hearing, that:

(5) evaluated on the basis of the information submitted to him as part of the application and any other information before him with respect to such drug, there is a lack of substantial evidence that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the proposed labeling thereof * * *[T]he term "substantial evidence" means evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of the drug involved, on the basis of which it could fairly and responsibly be concluded by such experts that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling or proposed labeling thereof.

FDA has promulgated regulations (21 CFR 314.111(a)(5)(ii)) that set forth the principles concerning the conduct of adequate and well-controlled clinical investigations and that provide the basis for determining whether there is "substantial evidence" to support claims of effectiveness for new drugs.

Also relevant to this proceeding are the regulations describing the principles to be used to determine general recognition that an OTC drug is effective (21 CFR 330.10(a)(4)(ii)):

(ii) Effectiveness means a reasonable expectation that, in a significant proportion of the target population, the pharmacological effect of the drug, when used under adequate directions for use and warnings against unsafe use, will provide clinically significant relief of the type claimed. Proof of effectiveness shall consist of controlled clinical investigations as defined in § 314.111 (a)(5)(ii) of this chapter, unless this requirement is waived on the basis of a showing that is not reasonably applicable to the drug or essential to the validity of the investigation and that an alternative method of investigation is adequate to substantiate effectiveness. Investigations may be corroborated by partially controlled or uncontrolled studies, documented clinical studies by qualified experts, and reports of significant human experience during marketing. Isolated case reports, random experience, and reports lacking the details which permit scientific evaluation will not be considered. General recognition of effectiveness shall ordinarily be based upon published studies which may be corroborated by unpublished studies and other data.

B. Safety

The act requires that a sponsor show a new drug to be safe before FDA may approve it for marketing. Section 505(d) of the act (21 U.S.C. 355(d)) requires the Commissioner to issue an order refusing to approve an NDA if the Commissioner finds, after notice and opportunity for a hearing,

That (1) the investigations, reports of which are required to be submitted * * *, do not include adequate tests by all methods reasonably applicable to show whether or not [the new] drug is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling thereof; (2) the results of such tests show that such drug is unsafe for use under such conditions or do not show that such drug is safe for use under such conditions; * * * (4) upon the basis of the application, or upon the basis of any other

[2] As noted correctly in the summary of the Burke study in the appendix to the Initial Decision, Benylin was compared to a combination of Benylin plus 20 mg of codeine. However, elsewhere in the Initial Decision it is stated, incorrectly, that the Burke study compared Benylin to a combination of the Benylin vehicle plus codeine (ID, pp. 10, 18), or to codeine (ID, pp. 15, 20, 21).

A G 3 1 7 9 UMI

information before him with respect to such drug, he has insufficient information to determine whether such drug is safe for use under such conditions * * *.

Because the safety issue in this proceeding concerns whether Benylin is safe for OTC distribution, section 503(b)(1) of the act (21 U.S.C. 353(b)(1)) defining the criteria for restricting drugs to prescription use also is important in this proceeding. Section 503(b)(1) states:

> A drug intended for use by man which—
> (A) Is a habit-forming drug to which section 502(d) applies; or
> (B) Because of its toxicity or other potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its use, is not safe for use except under the supervision of a practitioner licensed by law to administer such drug; or
> (C) Is limited by an approved application under section 505 to use under the professional supervision of a practitioner licensed by law to administer such drug; shall be dispensed only (i) upon a prescription of a practitioner licensed by law to administer such drug * * *.

The agency's authority to restrict drugs to prescription did not originate with the prescription drug provisions set forth above, which were added by the Durham-Humphrey Amendments of 1951 (Pub. L. 82–215). Before the enactment of these Amendments, FDA had issued regulations restricting certain drugs to prescription. These regulations were upheld in *United States* v. *Sullivan*, 332 U.S. 689 (1948) and *United States* v. *El-O-Pathic Pharmacy*, 192 F.2d 62 (9th Cir. 1951). The House Report on the 1951 Amendments explained the legal basis for the regulations:

> The Present law prohibits the over-the-counter sale of drugs labeled as being for prescription only, but it does this in the following indirect manner.
> A drug is required by present law to bear adequate directions for use. This requirement may be relaxed by the Federal Security Administrator [predecessor of the Commissioner] when such directions are not necessary for the protection of the public health. Drugs suitable for use only by or under the order of a licensed practitioner have been exempted from the adequate directions requirement on condition that they be labeled "Caution—To be dispensed only by or on prescription of a physician." If a druggist just sells without a prescription a drug bearing this caution label, the drug is misbranded and the druggist violates the act.

H R. Rept. No. 82–700, 82d Cong., 1st Sess. 4 (1951). The Durham-Humphrey Amendments' criteria for classifying a drug as a prescription drug were essentially the same as those contained in the FDA regulations. H.R. Rept. No. 82–700 at 11; S. Rept. No. 82–946, 82d Cong., 1st Sess. 4 (1951).

Also relevant to the agency's decision concerning the safety of Benylin as an OTC antitussive are the regulations setting forth the principles to be used to determine general recognition that a category of OTC drugs is safe (21 CFR 330.10(a)(4)(i)):

> Safety means a low incidence of adverse reactions or significant side effects under adequate directions for use and warnings against unsafe use as well as low potential for harm which may result from abuse under conditions of widespread availability. Proof of safety shall consist of adequate tests by methods reasonably applicable to show the drug is safe under the prescribed, recommended, or suggested conditions of use. This proof shall include results of significant human experience during marketing. General recognition of safety shall ordinarily be based upon published studies which may be corroborated by unpublished studies and other data.

C. General Recognition of Safety and Effectiveness

Section 201(p)(1) of the act (21 U.S.C. 321(p)(1)) defines "new drug" as:

> Any drug * * * the composition of which is such that such drug is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use under the conditions prescribed, recommended, or suggested in the labeling thereof * * *.

The applicant has the burden of proving that a drug is generally recognized as safe and effective for use under the conditions prescribed, recommended, or suggested in the labeling. See *Weinberger* v. *Hynson, Westcott, and Dunning*, 412 U.S. 609, 620–21, 628–31 (1973); 21 CFR 12.87(e). The regulations governing hearing procedures for proposed denials of new drug applications (21 CFR 314.200(e)) further state:

> (1) A contention that a drug product is generally recognized as safe and effective within the meaning of section 201(p) of the act must be supported by submission of the same quantity and quality of scientific evidence as is required to obtain approval of a new drug application for the product * * *. General recognition of safety and effectiveness shall ordinarily be based upon published studies which may be corroborated by unpublished studies and other data and information.

The Supreme Court has held that "general recognition" of a drug's safety and effectiveness requires at least substantial evidence of effectiveness as required for approval of an NDA. *Weinberger* v. *Hynson, Westcott and Dunning, supra*, at 629.

A. Effectiveness

In reviewing the Initial Decision, I have all the powers that I would have in making the Initial Decision (21 CFR 12.130). The Initial Decision and this Decision must meet the requirements of 21 CFR 12.120 and 12.130.

After reviewing the record carefully, I reverse the Initial Decision. I find, based on the evidence in the record, that there is a lack of substantial evidence that Benylin will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the proposed labeling. Expert witnesses who testified in this proceeding came to the same conclusion (G–1, pp. 5–6, 16; G–11, pp. 30–31; G–13, p. 4; G–15, pp. 5–6, 19; G–27, pp. 4, 27–28).

1. *Which Studies May be Considered.* An understanding of the principles for study of drugs to suppress coughs requires, first, an understanding of why and how humans cough.

Cough is a protective reflex that occurs in the healthy as well as in the ill (G–39, p. 113; G–40, p. 443; G–138, p. 462; P14–1, p. 38321; P22–18, p. 395). The function of a cough is to clear the respiratory tract of secretions or inhaled irritants (id.). In many cases, it is unwise to suppress coughs (G–19, pp. 7–8; G–35). A variety of stimuli can cause cough, including mechanical, thermal, chemical, allergic, and toxic agents (G–38, p. 492; G–138, p. 471).

Coughing is normally produced by the stimulation of a patient's "cough receptors" (sensory endings of the glossopharyngeal and vagus nerves) in the patient's throat and respiratory passageway (G–46, p. 426; G–138, p. 461). The "cough center," located in the medulla of the brain, is largely responsible for control of the cough reflex in humans (G–1, p. 7; G–46, p. 426; P22–18, p. 395). The central nervous system pathways for coughing are not fully understood (G–40, p. 445; P22–18, p. 396).

The CCABA Panel described an antitussive agent as one that "specifically inhibits or suppresses the act of coughing" (P14–1, p. 38338). Drugs may inhibit cough in several ways: by depressing the cough center or higher centers of the brain by diminishing the sensitivity of the cough receptors; by interrupting the transmission of cough impulses to the brain or to the muscles that are involved in the act of coughing; or by removing irritants and excessive secretions through improved bronchial drainage (P14–1, p. 38338, P19–2, p. 16; G–1, p. 7, G–29, pp. 2–3; G–40, p. 446; G–138, p. 462; P22–18, p. 397).

Among the causes of cough are chronic conditions (such as chronic bronchitis or emphysema), the common cold, and other acute upper respiratory infections. Chronic cough is quite different from acute cough (G–1, p. 13–15; G–15, pp. 11–12; G–17, pp. 8–9, T–938–39). In chronic lung conditions, chronic inflammatory processes in the patient's lower bronchial pulmonary passages produce thick, tenacious sputum; patients with such conditions need to cough in order to evacuate this sputum. Patients with acute upper respiratory infection usually cough because of minor irritation of the upper portions of the throat or respiratory system by thin secretions from the upper nasal and nasal pharyngeal passages. In such patients, the cough is generally of short duration and generally does not produce the thick, tenacious secretions seen in chronic lung conditions. Aside from these observable clinical differences between acute cough and chronic cough, chronic cough may involve nerve pathways from the throat or lungs to the cough center that are different from those involved in acute cough (T–995; T–942). Also, in chronic cough, patients cough for such a long period that they adapt to the cough by becoming less aware of the cough and sometimes less sensitive to cough stimuli (G–36, p. 422; G–46, p. 427; T–559–60). Adaptation to chronic cough may have physiological as well as pyschological origin; it may result from decreased excitability of certain receptors in the lung (T–995, G–40, p. 445).

The major indication for use of antitussive drugs is suppression of cough in a patient who has an upper respiratory infection that is interfering with rest and sleep (P22–18, p. 397). By suppressing cough, the drug allows the patient to sleep.

Investigation of an antitussive drug involves both animal studies and human (clinical) studies. With respect to new drugs generally and antitussive drugs in particular, there is no absolute requirement that a sponsor show the precise mechanism of action of a drug. In fact, mechanisms of action have not been identified for many drugs, including certain drugs marketed subject to approve NDA's. This situation reflects certain limits, both technical and ethical, on the extent to which biomedical research may establish pharmacological mode of activity in human subjects. Because these limits exist in the case of antitussive drugs, animal studies are used to determine, among other things, the mechanism of action of such drugs, i.e., specific inhibition of the cough center or other action as described earlier in this section. Many drugs have antitussive effects but do not act specifically on the cough center.[3] For example, a drug that depresses the entire central nervous system also will suppress cough. However, it is important to eliminate general depression of the central nervous system as the cause of a drug's antitussive effect: if a drug only suppresses cough due to such general depressant effect, the patient would have to take a dose large enough to produce sedation to a hazardous degree (P19–1, p. 6).

Clinical studies of antitussive drugs have been done in healthy volunteers in whom cough is experimentally induced, in chronic cough patients, and in patients with cough due to cold or other upper respiratory infections (P14–1, p. 38341). It is generally, but not universally, believed that an antitussive drug needs to be studied in the target population, unless the drug is shown to act by specific suppression of the cough center (G–1, pp. 13–18; G–11, pp. 11–12; G–17, pp. 8–9). Some clinical studies of antitussive drugs have employed subjective techniques in which evaluation is based on the opinions of patients regarding the frequency and intensity of cough and other matters (G–46, p. 433; G–61, p. 146; G–64, p. 125; G–138, pp. 463–64). Others have employed objective measures, such as cough counting devices or use of trained observers (id.).

Applying these principles to this proceeding, I first confront the threshold question of which clinical studies of Benylin or diphenhydramine hydrochloride (see Appendix A) may be considered in support of Benylin's claimed effectiveness "[f]or the temporary relief of cough due to minor throat and bronchial irritation as may occur with the common cold or with inhaled irritants" (P14–5). Different answers to this question have been offered by the parties, the CCABA Panel and the ALJ.

The Bureau contends that studies of Benylin in groups other than the target population may be considered only if diphenhydramine hydrochloride is shown conclusively to act specifically on the cough center of the brain, and not through some other mechanism such as soothing the throat or causing general sedation (G–11, pp. 11–13; G–29, pp. 2–3). The Bureau also asserts that it has not been shown that this drug acts specifically on the cough center (G–1, pp. 6, 14–15; G–11, pp. 12–13; G–29, pp. 2, 7; T–529; T–961).

WL/PD argues that all of the studies submitted should be considered, and that the issue of the mechanism and site of action of diphenhydramine hydrochloride as an antitussive has been "distorted out of proportion" and "is of only marginal importance in this case" (Brief, pp. 87–93). The companies claim that, in any event, two of the animal studies (P5–5; study by Rispat, et al., attached to P19–16) show that diphenhydramine hydrochloride's antitussive activity occurs in the cough center of the brain.

The CCABA Panel reached the following conclusion concerning the mechanism of activity of diphenhydramine hydrochloride (41 FR 38312; September 9, 1976):

> The exact mechanism of action of diphenhydramine is not precisely known. However, because of its ability to inhibit the cough reflex resulting from stimulation of the superior laryngeal nerve, the Panel believes a central site of activity of diphenhydramine is a reasonable mode of action. Furthermore, the animal studies are cited as evidence that cough inhibition is not due to a general depression of the central nervous system but to a specific action, similar to codeine, on the "cough center."

Based upon this conclusion, the CCABA Panel apparently considered all studies of diphenhydramine in its determination that the drug is a safe and effective antitussive agent.

In the Initial Decision, the ALJ considered only the two studies in subjects with acute cough in support of Benylin's claim for relief of cough due to cold; he considered only the studies of subjects with experimentally induced cough in support of Benylin's claim for relief of cough due to inhaled irritants (ID, pp. 15–17, 19, 20). The ALJ found that animal studies indicated that diphenhydramine hydrochloride possessses antitussive activity (ID, p. 17). He did not, however, find that the drug acts specifically on the cough center. In addition, he did not accept clinical studies in patients with chronic cough (Protocols 702–3, P7–6 through P7–10; 702–4, P8–1 through P8–5; 184–35, P9–7 through P9–10; 184–36, P9–11 through P9–14; and 184–37, P9–15 through P9–19) as evidence of Benylin's effectiveness. He reasoned that chronic cough is not among the proposed conditions of use in the labeling (ID, p. 16).

Due to the differences among types of coughs and the possibility of underlying neurological differences, as described above, I find that an antitussive drug needs to be studies in its intended target population, unless the sponsor shows that the drug specifically suppresses activity in the cough center of the brain (G–1, pp. 13–15; G–11, pp. 11–13, 18, 30–31; G–17, pp. 8–9). If the sponsor shows that an antitussive drug intended for use

[3] For example, before a patient is bronchoscoped, a local anesthetic may be applied to the bronchial mucosa to prevent the patient from coughing (T–940; G–46, p. 435). Although the anesthetic stops cough, it is not classified as an antitussive drug (id.). Similarly, drugs that paralyze the musculature prevent cough, but are not classified as antitussive drugs (id.).

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

in cough due to cold specifically suppresses activity in the cough center of the brain, the sponsor may study the drug in patients with other forms of pathological cough, e.g., chronic cough (id.). Nevertheless, studies in the target population are best and are considered by some experts to be indispensable (G–15, pp. 11–12; G–27, pp. 13, 27; G–78, p. 2193). I find that an antitussive drug that acts by inhibiting the cough center is likely to be effective in both chronic and acute cough (G–1, pp. 13–15; G–11, pp. 11–12, 18, 30–31; G–17, pp. 8–9, G–46, p. 437), at least in the absence of certain overwhelming stimuli that may exist in extreme cases of certain diseases (G–1, p. 14). If the sponsor does not show that an antitussive drug's mechanism of action is specific suppression of activity in the cough center, the sponsor must submit at least two studies in the target population to satisfy the statutory requirement of substantial evidence of effectiveness (G–11, p. 31; G–27, pp. 5–6).

Because WL/PD has not shown that diphenhydramine hydrochloride suppresses or inhibits cough by means of specific activity in the cough center, it is scientifically inappropriate for FDA to consider the chronic cough studies in support of Benylin's claimed effectiveness for cough associated with the common cold. If in the future WL/PD proves such activity, the agency will consider these studies.

The requirement of at least two studies is found in § 505(d) of the act "*investigations*" (emphasis added) and in §§ 314.1(c)(2)12.c. and 314.111(a)(5)(i) of the regulations (21 CFR 314.1(c)(2)12.c. and 314.111(a)(5)(i)). These requirements are founded upon a basic proposition of science that an experiment must be reproducible in order for the results to be considered valid (G–11, p.13).

In reaching my finding about diphenhydramine hydrochloride's mechanism of action, I considered those animal studies in the record that were submitted as relevant to this question. Several of the reports submitted (P5–4, P5–6 through P5–11) were not designed to allow determination of the drug's mechanism of action; others lack sufficient detail to permit scientific evaluation or do not even mention diphenhydramine (G–1, pp. 8–12; G–29, pp. 6–7). WL/PD's one expert witness on the drug's mechanism of action does not refer to these reports (P19–16).

The company relies on two studies, the Domenjoz study (P5–5) and the Rispat study (Attachment, P19–16), to show that the antitussive activity of diphenhydramine occurs in the cough center of the brain (Brief, p. 93; P19–16, pp. 4–6).

The 1952 Domenjoz study was conducted in anesthetized cats in which cough was induced by stimulating the superior laryngeal nerve (P5–5; G–1, p. 12; P19–16, pp. 2–3). This is one of the major nerves carrying impulses from the upper respiratory tree, including the throat and larynx, to the medulla, where the central cough center is located (G–1, p. 12). The principal purpose of this study was to describe the mechanical aspects of this type of experiment (P5–5; G–1, p. 12; G–11, p. 12). Although the author states that "we were also able to observe a clear antitussive action of benedryl [diphenhydramine hydrochloride] * * * with the use of our method," he gives no supporting data for this statement that would allow any sound conclusions to be drawn about diphenhydramine's mechanism of action (G–1, p. 12; G–11, p. 12; G–29, p.3).

The 1976 Rispat study (Attachment, P, 19–16) was a French study, also conducted in anesthetized cats. WL/PD learned about this study from its expert witness, during the proceeding. The Rispat study employed the Domenjoz method and another method which, the witness conceded, does not distinguish between central and peripheral action of an agent (P19–16, p. 5). The study compared a drug called zipeprol to several antitussive drugs, including diphenhydramine. From the report of the study, it is evident that the authors did not consider the method used to be capable of establishing conclusively a drug's mechanism of action. With respect to zipeprol, the article states that "[t]he antitussive properties *appear to be* due to a central action" and that "[t]he antitussive properties of zipeprol *may be* attributable to a central action" (Attachment, P19–16, pp. 523, 530, emphasis added). The article also states that "other properties may be implicated in the antitussive action of zipeprol (id., p. 530). Moreover, it is unclear whether "a central action" refers to general action on the central nervous system or to specific action in the cough center (T–961). Thus, the results of this study are consistent with the Bureau's position that the mechanism of action of diphenhydramine has not been conclusively established (T–529). In analyzing the Rispat study, WL/PD's expert witness claimed only that "[t]he antitussive properties of diphenhydramine *may* thus be attributable to a central action" and conceded that the study does not rule out cough suppression due at least in part to diphenhydramine's "potential anticholinergic and antihistaminic properties" (P19–16, p. 5). The Bureau agrees (G–29, pp. 5–7; T–529).

Both of these studies are subject to the fundamental criticism that the superior laryngeal nerve stimulation method is incapable of distinguishing general depression of the central nervous system from specific action in the cough center of the brain (G–29, p. 5; T–523–29; T–993). In recent years, many researchers have begun using more sophisticated methods such as insertion of needle electrodes directly into the cough center of the laboratory animal's brain to determine the mechanism of action of an antitussive drug (G–1, p. 13; T–981, 982, 985, 986, 993; P23–12; P23–9). The superior laryngeal nerve stimulation method still is sometimes used to determine whether a drug under study possesses *any* antitussive activity (P23–10, P23–11).

Another limitation of the Domenjoz method is the need for controls to eliminate the possibility that the drug used to anesthetize the subject cats, rather than the test drug, is responsible, through general depression of the central nervous system, for any observed antitussive effect (G–29, pp. 3–5; G–46, p. 429). Alternatively, or additionally, local anesthetic properties of diphenhydramine may have contributed to suppression of cough in the Domenjoz and Rispat studies of this drug (G–29, p. 5; G–46, p. 436; G–51, p. 606).

WL/PD's expert witness argues that because the Domenjoz method requires that the cats be deeply anesthetized before challenge with the potential antitussive agent, the Rispat study rules out the possibility that diphenhydramine stops cough through general central nervous system depression (P19–16, p. 5). I reject this argument, for two reasons. First, the authors do not state that the cats were deeply anesthetized (Attachment, P19–16; T–961–62). Second, Domenjoz describes this method as requiring light anesthesia (P5–5, p. 3). Pronounced anesthesia would interfere with the elicitation of cough by means of electrical stimulation of the superior laryngeal nerve (G–29, p. 4).

I find, therefore, that the Domenjoz and Rispat studies do not provide any basis for concluding that any antitussive effects of diphenhydramine are due to specific action on the cough center of the brain (G–1, pp. 8, 14–15; G–11, pp. 12–13; G–29, p. 7; T–529, T–961). Due to limitations in the method used in these studies, their results are not inconsistent with the Bureau's belief that diphenhydramine hydrochloride has antitussive activity but that neither the mechanism by which diphenhydramine acts nor the proper dose for cough suppression has been established (G–11, pp. 11, 30; G–17, p. 15; G–27, pp. 9, 26; G–29, p. 7; T–588–09). This activity may be general central nervous system depression rather than specific depression of the cough center (G–1, pp. 7–8, 14–15; G–5, p. 5; G–11, pp. 11–30; G–29, pp. 6–7; G–40, p. 446; T–529).

To determine the mechanism of action of diphenhydramine hydrochloride, the CCABA Panel considered several of the animal studies referred to above (P5–4; P5–6; P5–7) and a review article, Loew, E. R., "Pharmacology of Antihistamine Compounds," *Physiological Reviews*, 27:542, 1947) (P14–1, p. 38341). Among the literature the Panel considered was a discussion in another paper (P5–9, p. 425) that mentions the Domenjoz study (P5–5). As mentioned above, the Panel acknowledged that "[t]he exact mechanism of action of diphenhydramine is not precisely known," but concluded that "a central site of activity of diphenhydramine is a reasonable mode of action" (P14–1, p. 38341). The Panel went on to say that "the animal studies are cited as evidence that cough inhibition is not due to a general depression of the central nervous system but to a specific action, similar to codeine, on the 'cough center'" (id.).

It is evident from the Panel's own words that it had reservations about its findings concerning diphenhydramine's mechanism of action. The Panel found merely that a central site of action is a "reasonable" (meaning "plausible") mechanism of action and apparently treated the animal studies as persuasive although not conclusive evidence in support of this finding. It is on the question of how certain one must be that an antitussive drug acts specifically on the cough center, before FDA may consider clinical studies in other than the target population, that I part company with the Panel. I believe that the Panel applied too loose a standard. It is not enough that specific action on the cough center be a plausible inference from the various animal studies. Plausibility is not proof. Under section 505 of the act, approval of an NDA must be based, among other things, on scientifically rigorous and valid evidence of effectiveness. The requirement for such evidence applies to each step in the chain of reasoning intended to show effectiveness. It is necessary, therefore, that a sponsor show with scientific rigor and validity that specific action on the cough center is an antitussive drug's mechanism of action, before FDA may accept studies done in other than the target population as substantial evidence of the drug's effectiveness. All of the evidence in the record concerning the mechanism of action of diphenhydramine hydrochloride is merely suggestive; more carefully designed studies are needed to establish precisely what this mechanism is.

I am also concerned that the Panel's protocols for studies required to move a Category III drug (one for which available data are now insufficient to permit final classification of the drug) into Category I (consisting of drugs that are generally recognized as safe and effective) (P14–1, pp. 38354–55) do not recognize the principle that an antitussive drug needs to be studied in the target population unless scientifically rigorous and valid evidence exists that the drug acts specifically on the cough center. The Panel recommended that the two required studies consist of either one study with experimentally induced cough plus a study in cough due to respiratory disease, or two studies by different investigators in patients with respiratory disease (P14–1, p. 38355). FDA will respond to this recommendation, and to my concerns, in its tentative final regulation on the CCABA Panel report and the September 9, 1976 proposal.

The induced cough studies considered in this proceeding (see Appendix B, paragraphs 3, 4, and 5) show that diphenhydramine hydrochloride possesses some pharmacologic activity in subjects with experimentally induced cough (G–17, pp. 6–8; G–27, pp. 10–11), but do not clearly demonstrate antitussive effects even in this artificial setting (G–11, pp. 13–15). Moreover, there is strong evidence that studies of an antitussive drug in subjects with experimentally induced cough are only of limited value in demonstrating that the drug has antitussive properties for treatment of pathological cough (G–1, pp. 17–18; G–11, pp. 14–15, comparing G–136, G–46, G–137, and G–64; G–17, pp. 7–8; G–36, p. 421; G–46, pp. 431–33; G–51, pp. 278–79; G–61; G–62; G–64; P19–11, p. 10; T–745–46).[4] Accordingly, I find that, in determining the effectiveness of a drug whose precise mechanism of antitussive action has not been established and that is offered for treatment of cough associated with the common cold, induced cough studies are no substitute for adequate and well-controlled studies in the target population (id.). (If the sponsor shows specific action on the cough center, the sponsor may study the drug in patients with chronic cough.) Induced cough studies do, however, have value as an early screening technique to determine whether an agent has any form of antitussive activity (G–1, pp. 17–18; G–11, p. 14; G–17, p. 7; G–138, p. 465), but cannot be offered as substantial evidence of the drug's effectiveness in pathological cough. Induced cough studies simply do not show that the drug will have the effect it purports or is represented to have under the recommended conditions of use (section 505(d) of the act).

Because I do not believe that diphenhydramine has been shown to act by specific suppression of the brain's cough center, it is necessary that Benylin has been the subject of two or more adequate and well-controlled studies producing evidence of a significant reduction in coughs in the target population.

What is the target population for Benylin? The sponsor-proposed labeling for Benylin states that the drug is "[f]or the temporary relief of cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants." In its brief, WL/PD identifies two studies (Protocols 266–9 and 266–17) as having been done in the "target population of patients with coughs associated with the common cold" (Brief p. 48). Similarly, the Bureau identifies these two studies of Benylin as the only ones done in the target population (Brief, p. 159). The Bureau also asserts that no target population exists, outside industrial settings, that has cough due to inhaled irritants (id.). In the Initial Decision, the ALJ interpreted the labeling as creating two distinct conditions for Benylin usage: cough due to the common cold, and cough due to inhaled irritants (ID, pp. 15–16).

I find that the target population for Benylin is cough associated with the common cold. In the first place, even if there exists a target population with cough due to inhaled irritants, it is not clear that it would be desirable for these patients to suppress coughs that would help eliminate the irritants (G–46, p. 427; T–801). Second, to the extent that such population consists of individuals who work in industrial environments in which they are exposed to inhaled irritants, many of these individuals would be performing tasks, e.g., operation of machinery, that contraindicate use of a drug that produces drowsiness (G–5, p. 5). Third, even if there exists a target population with cough due to inhaled irritants, I find that the record does not support the

[4] The cited sources raise additional and legitimate doubts about the wisdom of the CCABA Panel's recommendation that FDA treat significant results from one induced cough study and one study in cough due to respiratory disease as acceptable evidence of effectiveness.

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

ALJ's finding (ID, p. 17) that there is sufficient similarity between experimentally induced cough and cough due to inhaled irritants to extrapolate test results from one situation to another. Early studies of the induced cough technique explored the suitability of various irritants for inducing coughs (G–36, pp. 402–407; G–46, pp. 428–29). These studies suggest that different irritants (or even different concentrations of the same irritant) do not uniformly have the same effects on subjects in terms of production of coughs (id.). Nor are the coughs produced by different irritants consistently affected by standard antitussives (id.). These studies show that it cannot be assumed that an agent effective in suppressing cough induced by citric acid aerosol or another test substance will suppress cough due to any other inhaled irritant.

Finally, cough due to inhaled irritants to which a patient is exposed over a long period of time may differ from experimentally induced cough in which the subject is exposed suddenly and briefly to an irritant; this possible difference also renders invalid any prediction of antitussive effect on cough due to inhaled irritants that is based on induced cough studies (G–36, p. 422).

In light of the above findings, FDA should consider disagreeing with the recommendation of the CCABA panel that the emphasized phrase in the following claim be regarded as acceptable indication for a safe and effective OTC antitussive drug: "For the temporary relief of cough due to minor throat and bronchial irritation as may occur with the common cold (cold) *or with inhaled irritants*" (P14–1, p. 38342, emphasis added).

2. *Adequacy of studies in patients with cough due to cold.* Two of the studies of Benylin were done in patients with cough due to the common cold (the Tebrock study, Protocol 266–17, P9–1 through P9–6), and the Burke Study, Protocol 266–9, P7–1 through P7–5. Neither is an adequate and well-controlled study that offers substantial evidence of Benylin's effectiveness as an antitussive drug (G–3, p. 8; G–7, pp. 3, 9; G–11, p. 31; G–13, p. 5; G–15, pp. 7, 10–11).

Before I discuss the particular deficiencies in these studies, I believe I should express my general disappointment that the sponsor, a major pharmaceutical firm, submitted so many studies that fall so short, in so many different ways, of meeting scientific standards for clinical evaluations. It seems almost tragic that the Tebrock study, a large study in the target population, was not designed to include adequate controls and to use sufficiently objective methods so that Benylin's effectiveness as an antitussive could be evaluated.

Even if the design and conduct of the Tebrock study satisfied fully the requirements of the act and 21 CFR 314.111(a)(5)(ii) for an adequate and well-controlled investigation (which they do not, as explained elsewhere in this Decision), the results of the study do not provide substantial evidence of Benylin's effectiveness under the conditions of use recommended in its labeling. In this study, Benylin relieved cough in 32.4 percent of patients receiving it, while the "placebo" (Benylin vehicle) relieved cough in 23.2 percent of patients receiving it. Thus Benylin offered only a 9 percent advantage over the control. As discussed below, the statute's requirement that a drug "have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the proposed labeling thereof" (section 505(d) of the act) is not met unless a drug offers a clinically significant benefit.

Both the Tebrock study and the Burke study employed unsuitable controls. The "placebo" in the Tebrock study contained ingredients that may be active. Also, no positive control was used. The Burke study is deficient in that it did not include a placebo drug. Furthermore, the positive control used (Benylin plus codeine) is not a suitable positive drug control.

The issues of clinical significance and the need for adequate controls are of overriding importance and deserve detailed treatment here. There are other important deficiencies in the Tebrock and Burke studies that prevent their consideration as substantial evidence of Benylin's effectiveness. These deficiencies are addressed below in section VI. of this Decision, below.

3. *Clinically Significant Effectiveness.* The evaluation of any drug starts with a determination of its effectiveness. FDA may approve a new drug only if the sponsor shows, by substantial evidence, "that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the proposed labeling thereof" (section 505(d) of the act). Even a drug that is not a new drug is misbranded and subject to regulatory action under section 502 (a) and (f) of the act (21 U.S.C. 352 (a) and (f)) if it does not perform as claimed.

Although the act provides an exact standard for evidence of new drug effectiveness, it does not define "effectiveness" itself. Congress has left to FDA the task of deciding exactly how effective a new drug must be to merit approval. As mentioned above in section IV.A. of this Decision, FDA has by regulation established a definition of "effectiveness" for OTC drugs (21 CFR 330.10(a)(4)(ii)).

In administering the act and regulations thereunder, the agency has not quantified the required degree of effectiveness for new drugs, and cannot do so. FDA recognizes that a drug may not be effective for all patients with a disease, or may not be equally effective in all patients. See S. Rept. No. 1703, 87th Cong., 2d Sess. 16 (1962). Determination of a drug's effectiveness is a part of the risk-benefit analysis that lies at the center of the drug approval process and that takes into account such factors as the seriousness of the disease for which the drug is intended, the availability of other therapies, and the public health implications of the product's availability (Ref. 1, pp. 3, 61). Thus, a drug that is moderately or even highly effective in the treatment of such minor, self limiting conditions as the common cold would not be approved if it were characterized by even moderately serious side effects. On the other hand, relatively toxic drugs are approved if they have value in the treatment of malignant tumors.

Drug effectiveness is determined principally through comparative clinical experiments (see 21 CFR 314.111(a)(5)(ii)). The objective of these experiments is to detect a difference between the test drug and a control. A statistical test can determine the probability that an observed difference between the test drug and the control occurred by chance. As a matter of scientific custom, a statistically significant difference has sometimes been considered one that is likely to occur by chance 1 in 20 times or less (P19–9, p. 2; T–557). The probability (P) of 1 in 20 or less is expressed as a decimal $P<0.05$. With increased use of computers, it has become more common for statisticians to supply the probability that a difference is likely to occur by chance and leave to others judgments about the significance of the result in the particular settings in which it is to be used (e.g., medicine, engineering, sociology, or industry). One expert on design of clinical trials explains that, "[i]t is well to remember that statistics prove nothing—they are merely a device for establishing the betting odds on the reproducibility of the results by mere chance" (G–78, p. 2196).

Clinical significance concerns the degree of benefit a patient will receive from a drug (G–13, pp. 10–11). In its

exceptions to the Initial Decision, the Bureau essentially equates clinically significant effectiveness with substantial evidence of effectiveness as required by section 505 of the act (Exceptions, p. 56). Statistically significant evidence is not the same as clinically significant evidence that a drug will have the effect it is represented to have (G–13, p. 10).

Achievement of a statistically significant difference between groups depends heavily on sample size (T–278, 946–47). Using large enough samples of subjects, an investigator testing a particular drug could obtain results that are highly significant statistically even if the clinical advantage of the drug is trivial (Ref. 2):

> [In a therapeutic trial of 200 patients, improvement occurs] in 49 of 100 patients treated with Drug W, and in 50 of 100 patients treated with Drug V. Noting the small increment of 1 percent between 49 percent and 50 percent, we would conclude that the difference was clinically unimportant. Suppose we now conducted the same therapeutic trial with a sample size of 50,000 rather than 200 patients. If we encountered the same difference of 49 percent improvement for Drug W and 50 percent for Drug V, we might still be unimpressed by the difference of 1 percent. Nevertheless, in the second trial, with 50,000 patients, the 1 percent difference is "statistically significant" ($X^2=5.0$; $P<0.05$), whereas in the first trial of 200 patients, the identical increment of 1 percent is not "significant" ($X^2=0.02$, $P<0.75$).

In this example, the 1 percent difference would not be judged clinically significant if the improvement represented 2 pounds lost after treatment with an anorectic agent (Ref. 1, pp. 18–19). But if the treatment were life-saving, the 1 percent difference, representing 250 individuals out of 25,000 whose lives were saved by Drug V, would be judged highly important. Thus, the seriousness of the disease for which a drug is indicated is a critical element in a judgment whether a statistically significant difference is also clinically significant.

The fallacy of equating statistical significance with clinical significance can be shown by considering that in a study of 100,000 subjects in which 50,000 subjects receive the test drug and 50,000 subjects receive the control, an improvement in just 5 subjects who received the test drug would have statistical significance ($P=0.03$). Yet the percentage of subjects in the test drug group who improved would be only 0.01 percent. Although only one in 10,000 subjects responded, the results would be statistically significant because of the large sample size. This result is a *reductio ad absurdum* of the argument that statistical significance is the same as, or is sufficient for, clinical significance. (Obviously, with such a result, no risks associated with the drug could be considered acceptable.)

These examples show why, in determining whether results are clinically significant, a decisionmaker must take into account factors in addition to the 95 percent confidence level. It should also be noted that, in other cases, a result that is only at the 90 percent confidence level could have great clinical significance.

Applying these principles to the Tebrock study of Benylin, I find that the 9 percent difference on the first day of the study between patients receiving Benylin and those receiving the vehicle may be statistically significant because of the large number of patients involved and the analysis used, but is not clinically significant (G–11, p. 21; G–13, p. 11; G–15, pp. 9–10; G–27, p. 19, T–557–560).[5] Aside from the smallness of this difference, the percentages of patients reporting improvement in both groups—32.4 percent in the Benylin group and 23.2 percent in the Benylin vehicle group—seem surprisingly low considering the placebo effects that have been observed with the administration of antitussive drugs (G–36, p. 400; G–46, pp. 434–35) and considering the self-limiting nature of upper respiratory infections. Of every 3 patients who received Benylin, 2 were not helped; of every 5 patients who received the vehicle, 4 were not helped. Thus, calculations of the statistical significance of differences between the groups are based on figures that already seem low, in terms of clinical significance. With these considerations in mind, a demonstration of only 9 percent difference between the groups is particularly unimpressive. Based on the results of the Tebrock study, of every 9 patients who receive Benylin, 6 will report no benefit. Of the 3 who report benefit, only 1 will report benefit from the drug itself, while the other 2 who report benefit might have been equally benefitted by a placebo. (For purposes of this analysis; I am treating the Benylin vehicle as a true placebo.) A demonstration of no more than a 1 in 9 [6] chance of obtaining relief from a cough preparatation does not show that the drug will have the effect it purports to have under the conditions of use suggested in Benylin's labeling.

The discussion so far considers the Tebrack study results from the viewpoint of a physician or other scientist trying to decide whether statistically significant results are also clinically significant. Also important is the viewpoint of the patient, especially when one considers that the sponsor has proposed to make Benylin available to the public without a prescription. A patient who buys an OTC drug for relief of symptoms associated with the common cold expects that it will, in fact, treat the indicated condition effectively. The patient does not expect to be taking a 1 in 9 chance that the drug will help. If the drug were for a more serious condition (which generally, but not always, would be a prescription drug), the patient may be more willing to take such a chance when that course of action appears medically advisable. In the case of a prescription drug, the labeling sometimes makes available to physicians summaries of the findings of clinical studies, including differences between results with the drug and those with the controls. Some physicians may even explain to patients that studies of a prescription drug have not shown effectiveness in all who take it. In the case of OTC drugs, however, such information is not provided in the labeling or otherwise available to patients. Certainly, the proposed labeling of Benylin does not provide information about the clinical studies of the drug's effectiveness.

It should also be noted that the results of the Tebrock study were statistically significant only on the first day of the study, and that the results even on that day were just on the borderline of statistical significance (G–15, pp. 9–10). A change in the reports of just a few patients would have eliminated this significance (id.).

In addition, results of the study's other measures of drug-attributable results, which do not support Benylin's effectiveness, should not be ignored (G–7, p. 6). The second such measure was a question directed to patients as to whether they would take this medication the next time they got a cough. More patients were satisfied with the Benylin vehicle (90.3 percent) than with Benylin (84.3 percent).

The other such measure was a question directed to investigators, which called for an overall rating as to beneficial drug-attributable results from medication. The results did not reveal any statistically significant differences

[5] In another context, witnesses for WL/PD who testified concerning the Tebrock study recognized the distinction between statistical significance and clinical significance by arguing that the incidence of drowsiness in the Benylin group, although statistically significant, was not clinically significant (P19–5, p. 3; P19–20, p. 3).

[6] The Bureau's argument that the likelihood of benefit from Benylin is 1 in 11 (G–11, p. 21; G–13, p. 10; T–560) is based on the difference between 32.4 percent in the Benylin group and 23.2 percent in the placebo group. The argument does not take into account the large numbers of subjects unaided by either medication.

V 4 4 / 1 7 1

between Benylin and the Benylin vehicle: positive ratings were 91.6 percent for Benylin and 89.9 percent for the vehicle. Thus, the slight but statistically significant improvement in cough response reported by the Benylin group on day 1 does not carry over to other responses that also are relevant to overall evaluation of the drug's treatment effect.

Witnesses for WL/PD have speculated that the relatively small difference between results with Benylin and results with placebo may have been due to demulcent (soothing) activity of ingredients in the Benylin vehicle, which was used as a control (P19–3, p. 6). The company has also speculated that the percentage of patients who reported subjective observation of reduction in cough is lower than the percentage whose coughs actually were reduced (P19–3, p. 6, T–558–559). (This speculation is based on studies of chronic cough patients; these studies which are not pertinent here because chronic cough patients become acclimated to their coughs in a way that patients with acute cough associated with the common cold do not (T–560, T–995). Adaptation by chronic cough patients is discussed above in section V.A.1. of this Decision.) Moreover, it is at least possible that the subjective methodology resulted in more differences between the two groups than actually existed (T–232; G–46, p. 434; G–64). These theories would not need to be offered if the Tebrock study had employed a true placebo, an active control, and more objective methods of measuring improvement, as discussed in sections V.A.4., VI.A.5, and VI.A.6. of this Decision. In any event, I cannot base my decision on speculations about what the Tebrock study might have shown had it been designed differently.

I also reject the assertion that "[t]he issue of whether 32 percent versus 23 percent (a difference of 9 percent) is clinically significant can only be answered yes when subjective estimates of benefits are used in a disease with a highly variable course" (P19–7, p. 16; T–76; T–108; T–111–113; P19–19, p. 2). As discussed above, I cannot base a decision on speculation that, because of the subjective methodology employed, the test results may show less difference than actually existed. In addition, the bare fact that a drug is for use in a disease with a highly variable course does not have much bearing on the acceptability of a 9 percent difference between test drug and control without consideration of the seriousness of the disease and other relevant factors.

4. *Need for Adequate Controls.* A clinical investigation to show new drug effectiveness must be "adequate and well-controlled" (section 505(d) of the act). FDA's regulations on adequate and well-controlled clinical investigations (21 CFR 314.111(a)(5)(ii)) spell out the principles recognized by the scientific community as the essentials of such investigations (G–1, p. 5, G–3, p. 4; G–5, p. 4; G–11, p. 4; G–13, p. 13; G–15, p. 5; G–17, p. 6; G–31, p. 6). The regulations' "criteria for an adequate and well-controlled clinical investigation * * * are minimal requirements for any valid objective study." *Pharmaceutical Manufacturers Ass'n* v. *Richardson,* 318 F. Supp. 301, 310 (D. Del. 1970). Compliance with the regulations does not guarantee, however, that the investigation will be scientifically valid in every respect.

The regulations require, among other things, that the protocol and the report of study results provide "a comparison of the results of treatment or diagnosis with a control in such a fashion as to permit quantitative evaluation" and state that, "[g]enerally," four types of comparison are recognized: no treatment, placebo control, active treatment control, and historical control (21 CFR 314.111(a)(5)(ii)(*a*)(*4*)).

The Bureau argues that this provision, in some cases, requires more than one of the four types of "generally recognized" controls (G–11, p. 5; G–27, pp. 6–7; T–492–96, T–690–92; Brief, pp. 98–99).

I agree with the Bureau and find that § 314.111(a)(5)(ii)(*a*)(*4*) establishes general principles and essential requirements of adequate and well-controlled studies generally, but does not prescribe detailed directions for every type of study. Scientific principles determine whether, in a particular study on series or studies, all or some of the types of comparison listed in the regulation are properly used (G–11, p. 5; G–27, pp. 6–7).[1] In the case of some drugs or conditions, use of more than one type of comparison may be necessary. The types of comparison listed thus are illustrative, rather than alternative and mutually exclusive. It is no more correct to interpret the regulation as requiring use of but one of the methods of comparison listed than to interpret the regulation as requiring use of all four of these methods. Moreover, the regulation requires that the controls be used "in such a fashion as to permit quantitative evaluation." As discussed below, quantitative evaluation of drug effects is impossible in some cases without use of more than one type of control. Interpreting the regulation to mean that selection of any of the four named types of controls is acceptable in all cases would compel FDA to accept as substantial evidence of effectiveness studies that, due to the nature of certain drugs and the conditions in which they are used, are not in fact well-controlled, susceptible to quantitative evaluation, or otherwise scientifically valid. This result obviously would be at odds with the statutory intent.

I find, based upon what appears to me to be the preponderance of expert opinion, that use of a placebo is necessary to assure the validity of studies of antitussive drugs; in addition, use of a positive control is essential in some such studies, e.g., those that rely on patients' subjective responses, insensitive experimental methods, or experimental methods of unknown sensitivity (G–7, p. 5; G–11, pp. 5, 20–21; G–13, pp. 6–7; G–15, pp. 7, 10–11; G–17, p. 14; G–39, p. 118; G–78, pp. 2195, 2198; G–79, p. 120; G–138, p. 465; T492–96).

A placebo control is needed to distinguish between a true pharmacological effect of the test drug and fortuitous matters such as psychological effects of taking medication or spontaneous improvement of the disease (G–13, p. 5; G–15, p. 7; G–39, p. 126; G–46, p. 431; G–78, p. 2195). A positive control (e.g., a drug known to be effective) is needed to measure the sensitivity of the experimental procedure, i.e., its ability to measure or detect a drug-related effect when one occurs (G–13, pp. 6–7; G–17, p. 14; G–27, p. 7; G–78, p. 2198; G–79, p. 120). Both controls are essential when the sensitivity of an experimental procedure is in doubt (id.). Both controls are at least highly desirable, and may sometimes be essential, when a high degree of sensitivity is needed to detect or measure an effect, such as suppression of cough due to colds, or where the disease or condition is of short duration or is self-limiting (G–7, p. 5; G–11, p. 5; G–17, p. 14; G–27, pp. 6–7).

Applying these principles to Benylin, I find that neither the Tebrock study (Protocol 266–17) nor the Burke study (Protocol 266–9) is well-controlled. The Tebrock study is deficient because it

[1] There are many ways in which FDA informs sponsors of what FDA expects in investigations. FDA encourages sponsors to consult with FDA to determine what controls are needed in studies of particular drugs (T–754–55). FDA provides sponsors with the opportunity to submit protocols for FDA comments before studies begin and to confer with the agency's reviewing staffs (T–754). FDA also makes available guidelines and other information concerning the conduct of drug investigations (G–11, pp. 3–4). Although WL/PD did consult with the CCABA Panel concerning the additional clinical studies needed to show safety and effectiveness, it apparently did not consult the agency's new drug evaluation staff, as would be appropriate for a new drug subject to a prescription requirement.

failed to include a positive control (G–11, pp. 20, 21; G–13, pp. 6–7; G–27, p. 19), which was essential given the study's reliance upon patients' subjective evaluations. Inclusion of a positive control woud have helped determine whether the lack of any statistically significant difference on days 2 and 3 of the study was due to the normal course of the cold, by showing whether a recognized antitussive such as codeine demonstrated a statistically significant difference on these days (G–17, p. 14). Without this information, we do not know whether the lack of difference between Benylin and the vehicle shows that Benylin is ineffective or that most patients' colds had improved rapidly (G–17, pp. 14–15). In addition, the Tebrock study did not employ a true placebo (see section VI.A.5. of this Decision, below).

The Burke study is deficient because it failed to include a placebo control (G–11, p. 19; G–13, p. 11; G–15, p. 10–11). It therefore is not known whether either of the drugs tested, Benylin or Benylin plus codeine, actually had a significant effect of suppressing cough. Furthermore, the Burke study did not include an adequate positive control; a combination of Benylin and codeine is not adequate because the combination has not itself been established as an effective antitussive drug product (G–11, p. 19; G–13, p. 11; G–15, pp. 10–11, 13; G–17, p. 11; G–27, pp. 14, 17). With a combination that has not been established as an effective drug product, there may be an interaction among the ingredients that results in a different pharmacological effect, e.g., decreased effectiveness of one or more ingredients due to lack of adequate absorption (G–15, p. 10; T–535). The CCABA Panel characterized the Burke study as "uncontrolled" (P14–1, p. 38341). Due to the lack of controls, no conclusions may be drawn from the Burke study at to Benylin's effectiveness.

Witnesses for WL/PD contended that the Burke study should not be considered deficient due to lack of placebo control because it would be unethical to use a placebo with sick children (P19–4, p. 4; P19–11, pp. 9–10). Although I agree that there are many cases in which it would be unethical to use a placebo control with sick children (P23–3, pp. 17–18), I do not believe that this practice is unethical in tests of drugs for mild, self-limiting conditions such as cough due to the common cold (T–788–89, T–849). Indeed, the principal investigator in the Burke study testified that none of the subjects was critically ill or had a disease of a serious nature (P19–4, p. 2).

B. *Safety*

In view of my finding that Benylin has not been shown to be effective, I need not reach a final decision on whether Benylin is safe for OTC distribution. When the effectiveness of a drug is unknown, the agency cannot decide whether its benefits outweigh its risks. These alternative products are discussed in section V.B.7. of this Decision, below. As discussed earlier, it is appropriate for the agency to scrutinize carefully the risks associated with use of a drug for a mild condition, especially when effective alternative products are available that present only acceptable risks. Moreover, any additional clinical studies of Benylin intended to show its effectiveness as an antitussive may shed new light on its safety for OTC use. Accordingly, I cannot now find that WL/PD has satisfied the requirements for establishing the safety of a new drug.

In fairness to the parties, who have long been at odds on the question of Benylin's safety as an OTC drug, I will give my opinion on this question based on studies in the present record and FDA policies. My opinion is that the risks associated with the use of Benylin in the recommended adult dosage of 25 mg might not be so severe as to require a prescription, if Benylin were shown to be effective and were adequately labeled and packaged for OTC use.

1. *Bureau's Safety Concerns.* The Bureau concedes the safety of Benylin if restricted to prescription (Bureau's Motion to Strike, p. 27). It contends, however, that WL/PD has not met its burden of proof that Benylin is safe for OTC distribution and, further, that the available evidence shows conclusively that Benylin is unsafe for use as an OTC antitussive (Bureau's Brief, p. 232).

The Bureau's belief that Benylin is unsafe for OTC distribution is based principally on its soporific (sleep-inducing) effects, which the Bureau believes are associated with impairment of psychomotor functions required in the performance of such tasks as driving a motor vehicle and operating machinery (41 FR 52537 (November 30, 1976); Bureau's Brief, p. 232). The Bureau's position is that a drug that causes drowsiness in the degree that Benylin does is safer when restricted to prescription because patients believe that a prescription drug is potent and are more likely to handle the product carefully and heed any oral warnings given by a physician concerning a prescription drug than the written warnings accompanying an OTC drug (see section V.B.5, below).

The Bureau asserts that Benylin presents additional hazards besides drowsiness: undesirable drying of secretions, which may interfere with the ability of individuals with chronic coughs to raise secretions and to breathe (G–19, pp. 4–5; G–15, p. 18); the possibility of injury to children due to accidental ingestion of Benylin (G–3, pp. 4–6; G–9, pp. 5–6; G–31, pp. 6–18); the possibility that Benylin will be used to treat children, due to its sedative effects, and its toxicity in children (G–3, pp. 5–6; G–9, pp. 5–6, 9; G–31, pp. 6–13, 15); evidence that diphenhydramine's soporific effects are magnified by interaction with barbiturates (G–29, p. 4; G–63; G–66; G–67) or alcohol (G–3, p. 8; G–21, pp. 6–7; G–23, pp. 12–13; G–53, G–55, G–83, G–146); and concern about the interaction between Benylin and other drugs (G–21, p. 7).

I find, however, that the critical safety issue is whether Benylin causes such drowsiness that it should continue to be restricted to prescription. The other safety concerns expressed by the Bureau are also raised by many products that are now distributed OTC and can be addressed adequately by labeling and child resistant packaging.

2. *FDA's Authority to Restrict Benylin to Prescription.* Like the Bureau, I believe that the Initial Decision erred in finding that FDA has limited authority under section 503(b) of the act (21 U.S.C. 353(b)) to restrict a drug such as Benylin to prescription use (Exception A.2, pp. 10–17, citing ID, pp. 6–9). The Initial Decision adopts an overly restrictive interpretation of section 503(b) of the act. That interpretation is unsupported by the statute's plain language, its legislative history, and judicial interpretation. As discussed below in numbered paragraph VI.B.2., Rulings on Exceptions, FDA has ample authority to restrict a drug such as Benylin to prescription use if the agency finds that this restriction is necessary for the protection of the public health.

Although FDA has broad authority to restrict a drug such as Benylin to prescription use, the agency is not compelled to use this authority if it determines that there is sufficient evidence that the drug is safe for OTC distribution.

3. *Evidence Concerning Benylin's Safety.* The record includes voluminous evidence relevant to Benylin's safety. Benylin has been the subject of a number of studies aimed at measuring either effects of diphenhydramine on psychomotor function (Protocol 266–15, P2–6; the Moskowitz study, G–23A, G–146) or drowsiness (Protocol 184–15, P2–10; Protocol 184–18, P3–3; Protocol 184–40, P16–1; Protocol 184–41, P17–1).

A G 3 1 7 9 UMI

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

Certain of the clinical studies intended to show Benylin's effectiveness also produced data on drowsiness and other effects (Protocols 266–17, 184–35, 184–36, 184–37, P9–3, P9–9, P9–13, P9–17).

I find that two of the studies of drowsiness (Protocol 184–15, P2–10; Protocol 184–18, P3–3) are not valid evidence concerning the safety of Benylin because they were conducted on prisoners, who are an unsuitable population for the study of drowsiness due to medication because prisoners often are drowsy and bored anyway due to inactivity) G–11, pp. 26–27; G–13, pp. 15–17; G–19, pp. 10–11; G–21, pp. 20–21, P10–5, p. 8; P19–9, p. 2; T–248–49; T–583). Prisoners may also be unusually suggestible, may exchange information or the test drugs themselves, and may not be motivated to cooperate fully in the study (id.). In both studies, there was a high frequency of drowsiness reports by subjects in the placebo groups as well as by subjects in the diphenhydramine groups. See Appendix B, paragraphs 3 and 4. I disagree with WL/PD's argument (P19–9, p. 2) that the double-blind, randomized nature of Protocol 184–15 allows comparison of various treatment groups despite the normal drowsiness among prisoners. Subjects who would have reported drowsiness with a placebo can also actually experience a drug effect; it cannot be determined how many of the treated subjects were reporting a drug effect and how many, if any, were reporting a placebo effect (G–13, p. 16; T–281, T–571–72).

Based on the remainder of the studies, I find that there is substantial evidence in the record to support either a finding that Benylin is safe for OTC distribution, or that Benylin is not safe for OTC distribution, if the required information establishing Benylin's effectiveness were available for use in essential therapeutic risk-benefit judgments.

When the record supports either finding, it is important to identify the factors that are criticial in making a choise, to consider these factors from the perspective of public protection, and to reach a decision based on the preponderence of evidence on these factors. Although I cannot now make a final decision on safety, I will, nevertheless, identify the critical factors in such a decision in the hope that this effort will assist the agency should Benylin be shown in the future to be an effective antitussive. First, FDA should pinpoint the extent and degree of risks to the public due to the drowsiness that Benylin causes. Second, FDA should consider whether, and to what extent, prescription status will reduce these risks. Third, FDA should consider the benefits of OTC distribution. Fourth, FDA should consider the benefits and risks of alternative OTC antitussive drugs.

4. *Risks Due to Drowsiness From Benylin.* Diphenhydramine hydrochloride has a pronounced tendency to produce drowsiness in a relatively high proportion of those who take it (G–51, p. 608; G–9, p. 6; G–11, p. 22; G–21, p. 4; G–49, p. 197; G–115, p. 57304). Drowsiness is dose-related: more patients report drowsiness after receiving the antihistaminic dose (50 mg) than after receiving the antitussive dose (25 mg) (G–51, p. 608; P9–10). Objective studies using brain wave measurements have demonstrated that both 25 mg and 50 mg of diphenhydramine hydrochloride have a sedative effect (G–50; G–11, p. 25).

Based upon Protocols 184–40 (P16–1) and 184–41 (P17–1), I find that approximately one-fourth to one-third [8] of patients receiving diphenydramine 25 mg can expect to feel drowsy as a result of the medication. Most of the drowsiness experienced would be moderate or mild, but some patients would feel extremely drowsy (id.; G–17, pp. 16–18; G–21, pp. 14–15).

I reject WL/PD's argument that the evidence of reports of drowsiness in these studies should be disregarded because these reports were inflated by the informed consent procedure and the choice of a relatively sophisticated group of subjects (P16–2, p. 3, P17–2, p. 3; P19–16, pp. 6, 8; T–129). First, I am not convinced that the informed consent procedure employed was unduly suggestive) G–21, pp. 15–16; G–118, G–119). Furthermore, even if this procedure, or the nature of the subject population, or both, tended to inflate the number of reports of drowsiness, these factors would have had an equal impact on reports of drowsiness in the placebo, dextromethorphan, and codeine groups in this double blind study. The study results show, however, that the incidence of drowsiness in these other groups was much lower than the incidence of drowsiness in the diphenhydramine group (P16–3, p. 4, P17–3, p. 4; G–21, p. 16). See Appendix B, paragraph 7. Thus, the results show that most of the reported drowsiness is due to the pharmacological activity of diphenhydramine (T–130–31).

Drowsiness is a common side effect of OTC antihistamine products (P14–1, pp. 38379–92). However, Benylin probably causes drowsiness in more cases than do other products (id.). The degree of drowsiness that Benylin causes may also be more pronounced than that caused by current OTC products (id.). Moreover, it is inappropriate to do a comparative risk/benefit analysis of drugs used for different indications or under different conditions of use (G–21, pp. 17–18; G–31, p. 18). The benefits of many OTC antihistamines under their recommended conditions of use are established; the benefit of Benylin as an antitussive is not.

5. *Significance of Prescription Status in Assuring Drug Safety.* I am not persuaded by the record that a drug that causes drowsiness is safer when restricted to prescription. The Bureau argues that patients believe that a prescription drug is potent and are more likely to handle the product carefully and heed any oral warnings given by a physician than the written warnings accompanying an OTC drug (G–3, pp. 5–6; G–5, p. 6; G–9, p. 9; G–11, pp. 24–25; G–15, pp. 17–18; G–19, p. 5; G–21, p. 22; G–31, p. 16; G–49, pp. 213–216; T–592, 636, 646–47, 668–70, 842). Yet virtually all of the reports of injuries from Benylin found in the record (e.g., G–3, pp. 4–5; G–9, pp. 5–6; G–31, pp. 7–11; G–41; G–44; G–45; G–49, pp. 203–10; G–60; G–65; G–85; G–88; G–91; G–92; G–117; G–135) occurred with Benylin or Benadryl that had been dispensed upon prescription. Obviously, prescription status is no guarantee that injuries from a drug will not occur (G–49, p. 214).

I believe that, if Benylin were shown to be an effective antitussive drug, it might be possible to devise labeling that would provide adequate warnings of the risk of drowsiness and other ill effects and that, coupled with child-resistant packaging, would enable the product to be safely used as an OTC drug. In devising any such labeling, WL/PD and the Bureau would have to consider inclusion of some or all of the information in the approved labeling for prescription Benylin as well as that

[8] In Protocol 184–40, the incidence of drowsiness in the diphenhydramine group was 38 percent and in the placebo group, 10 percent, a difference of 28 percent. In Protocol 184–41, the incidence of drowsiness in the diphenhydramine group was 34.3 percent and in the placebo group, 10.1 percent, a difference of 24.2 percent. The true difference between the two groups may be greater than the 28 percent found in Protocol 184–40 or the 24.2 percent found in Protocol 184–41. Some of the subjects who reacted to placebo might also have reacted to diphenhydramine (G–13, p. 16; T–281; T–571–72). (In the alternative, some of the subjects who reacted to diphenhydramine might also have reacted to placebo; if this were the case, the true incidence of drowsiness due to diphenhydramine would be less than the difference between the reported figures.) The Bureau argues, in addition, that individuals afflicted with cough due to cold are weak and therefore more susceptible to drowsiness than were the healthy volunteers who were the subjects in these studies, so that drowsiness in the target population may be actually higher (G–15, p. 15).

recommended by the CCABA Panel.[9] The risk to patients from a drug that causes drowsiness is indirect. The drowsiness itself does not cause harm. It is only when the patient tries to undertake a task that requires alertness, such as driving a car, that the drug's sedative qualities pose a risk to the patient and to other members of the public. Suitable labeling of an OTC drug may provide sufficient safeguards for a drug that presents such indirect risks. When a drug presents serious direct risks (e.g., of cancer or other serious disease), adequate labeling for lay use without medical supervision generally cannot be written.

With respect to indirect risks associated with drowsiness, I do not believe that the risk that consumers will not read, or will read and disregard, the OTC drug labeling is greater than the risk that the prescribing physician will not give or that the patient will not remember and heed equivalent oral warnings.

Physicians should provide patients with information about prescription drugs (G–48, p. 33), but often do not (G–80, Refs. 3, 4). Patients often cannot remember much of what their physicians do tell them, especially about treatments (G–80, Refs. 5–10). Oral communications by health professionals are useful when they occur, but they simply are not a dependable source of information that patients need to have in order to use prescription drugs properly. For this reason, FDA has required patient labeling for certain prescription drugs (see, e.g., §§ 310.501, 310.501a, and 310.502 of the regulations (21 CFR 310.501, 310.501a, and 310.502)). Moreover, the agency has underway a program to require most prescription drug products dispensed for human use to be dispensed with labeling directed to the patient to serve as an adjunct to oral communications between the physician and the patient. In the **Federal Register** of November 7, 1975 (40 FR 52075) FDA published a notice requesting comments to help formulate this program. In the future, FDA will publish a proposed regulation concerning patient labeling for most prescription drugs.

Available information on the inadequacy of oral communications undermines the Bureau's argument that a soporific drug such as Benylin is safer when restricted to prescription because a consumer is more likely to heed a physician's oral warnings than OTC written warnings. A consumer cannot heed a warning he or she does not receive or does not remember. Although it is undoubtedly true that some consumers would not read and heed written information accompanying an OTC drug [10] because that information accompanies each package, it will at least be available to reach more consumers than are reached by physicians' oral warnings (P19–15, pp. 1–2). Moreover, the written information that would appear on the OTC drug will remain with the drug for its shelf life (P19–15, p. 2), long after many consumers would have forgotten any information provided orally. (Eventually, this advantage of OTC status will diminish as prescription drugs become subject to patient labeling requirements, when FDA implements its comprehensive prescription drug patient information program. Meanwhile, more and more pharmacists use stick-on labels to provide certain information vital to safe and effective use of prescription drugs.)

The Bureau's expert witnesses testified that consumers are more likely to assume that a prescription drug is potent and, therefore, are more likely to adhere to the recommended dosage and heed any warnings that are given (G–31, p. 14; T–842). Studies show, however, that many consumers (30 to 80 percent) fail to follow the recommended regimen for prescription drugs (G–80, Refs. 11–14). It is clear that consumers often do not take prescription drugs and what physicians say about them seriously (T–301). To the extent that patient noncompliance stems from a patient's lack of information about the drug, written labeling may improve compliance (Ref. 15). Moreover, even if it is true that many consumers believe that prescription drugs are more potent than OTC drugs, I question whether this belief alone would justify restricting to prescribing a drug that could be adequately labeled and packaged for OTC distribution.

With respect to some drugs, including Benylin, the principal reason for the prescription restriction is the desire to assure patient compliance with instructions and warnings. (Other reasons for such a restriction are discussed in section VI.B.1. of this Decision, below.) It is tempting to reason that all drugs restricted to prescription solely for this reason can be transferred from prescription to OTC status, once adequate patient labeling is required. In some cases, however, the agency may properly decide that the risks a drug poses when patients do not comply are so serious that it is necessary to provide for the additional protection of physician warnings (when they are given) as well as the required written information. For such drugs, the ideal situation would be one in which the physician provides essential drug information orally when writing the prescription, the patient receives a patient information leaflet containing clear, concise, and complete drug information, and the vial of the dispensed drug bears on its label the most important features of this information.

In the case of Benylin, however, the risks presented by the drug do not seem sufficient to warrant continued restriction to prescription as a way of gaining the added protection of physician communications, when they occur, provided that the manufacturer provides essential information in the labeling and packages the drug in child-resistant containers.

6. *Benefits of OTC Distribution.* The preceding section discusses one present advantage of OTC status; the guarantee that important drug information is at least available to consumers. As mentioned, this advantage will eventually be eliminated through implementation of FDA's prescription drug patient information program.

There are other benefits of OTC status where a drug is for a condition that can be self-diagnosed and self-treated, including cough due to cold. OTC status makes a product for such a condition available to consumers without wasting physicians' time and consumers' time and money in office visits. OTC drugs are cheaper than prescription drugs. In addition, because OTC drugs may be purchased in other retail outlets in addition to pharmacies, they also are more readily available and can be obtained with less delay.

Of course, a drug can be made safer by restricting it to prescription, particularly if this restriction is accompanied by a requirement of patient labeling with the dispensed drug. But these restrictions carry costs that should not be imposed unnecessarily.

Self-medication is important, both to consumers as individuals and to a society that is concerned about how best to use its scarce health care resources. FDA should, therefore, strive to allow drugs to be available without need of a prescription whenever this can

[9] In advising WL/PD on any new labeling for Benylin, and in preparing the tentative final regulation based on the CCABA Panel report, FDA needs to examine carefully the Panel recommendation that the labeling of diphenhydramine 25 mg warn of the possibility of "marked drowsiness." (P14–1, p. 38341). The word "marked" may not be understood by the average consumer.

[10] In Protocol 184–41 (P17–1), at least 2 of the 100 subjects failed to heed both written and oral warnings not to drive. We know this because two subjects, one in the diphenhydramine group and one in the dextromethorphan group, reported impaired driving ability as an adverse effect (P17–3, p. 4).

V 4 4 / 1 7 1 A G 3 1 7 9 UMI

be done without exposing the public to unacceptable risks.

7. *Risks and Benefits of OTC Antitussives.* When evaluating a drug, it is important to carry out a therapeutic risk/benefit analysis that includes consideration of alternative therapies. There are two drugs, codeine and dextromethorphan, that may now be used as active ingredients in OTC antitussive products. The CCABA Panel found that both drugs have been shown to be effective antitussive drugs, with specific activity on the cough center (G–46, p. 437; P22–18, pp. 400–01), and that they present acceptable levels of risk (P14–1, pp. 38339–40). Neither the Bureau nor the agency has disagreed with this finding (G–11, p. 17). The risks associated with the use of these drugs are described in the CCABA Panel report (P14–1, pp. 38339–40). The principal adverse effect of these drugs is respiratory depression, generally due to doses well above antitussive doses (id.). Neither of these drugs causes much drowsiness at antitussive doses (id.; P16–3, pp. 4; P17–3, pp. 4–5; G–3, p. 7; G–9,pp. 7, 9–10; G–11, p. 23; G–13, p. 14; G–15, p. 14–15; G–17, p. 20; G–21, p. 16; G–31, p. 18; G–46; G–47).

Considering diphenhydramine's unproven effectiveness as an antitussive, its pronounced tendency to produce drowsiness, and the relatively low toxicity of codeine and dextromethorphan in OTC antitussive doses, I find that Benylin exposes the patient to greater risks, with little or no proven benefit, compared to codeine and dextromethorphan. This view is supported by substantial evidence in the record (G–3, pp. 9–10; G–5, p. 7; G–11, p. 27; G–15, p. 19; G–17, p. 20; G–19, pp. 5–7; G–21, p. 16; G–27, p. 22; G–31, pp. 18–19).

* * * * *

As noted at the outset of this section, V.B., on safety, because I have found that Benylin has not been shown to be effective, I do not decide whether it has been shown to be safe.

C. *General Recognition of Safety and Effectiveness*

Because WL/PD has failed to submit substantial evidence of effectiveness (see section V.A. of this Decision above), Benylin is a "new drug" within the meaning of section 201(p)(1) of the act. In addition, there is a lack of published medical and scientific data on the safety and effectiveness of the drug, including literature describing adequate and well-controlled studies demonstrating the effectiveness of the drug (G–1, p. 6; G–15, p. 5; G–17, p. 5; G–31, pp. 4–5). I find that Benylin is not generally recognized by qualified experts as safe and effective under the conditions of use prescribed, recommended, or suggested in the proposed labeling (G–1, p. 6; G–3, p. 3; G–5, pp. 6–7; G–7, p. 9; G–9, pp. 4–5; G–11, p. 6; G–15, p. 5; G–17, pp. 4–6; G–19, p. 11; G–21, pp. 13–14; G–27, pp. 8, 28; G–31, pp. 4–5).

VI. Rulings on Exceptions

A. *Effectiveness*

The Bureau expressed general concern that by relying upon such poorly controlled, poorly designed, and poorly executed studies as the Tebrock and Burke studies, Protocols 266–17 and 266–9, the Initial Decision has set a new low standard for the approval of new drugs and that this standard will adversely affect the Bureau's evaluation of effectiveness studies generally (Exceptions, p. 32). The Bureau requests that I consider the impact of the Initial Decision on the Bureau's evaluation of all NDA's (Exceptions, p. 6).

1. *Burden of Proof Concerning Alleged Deficiencies in Studies.* The Bureau contends that the Initial Decision improperly places on the Bureau the burden of substantiating certain alleged deficiencies in effectiveness studies of Benylin (Exception B.1, pp. 32–35, citing ID, pp. 11, 12, 21). The Bureau argues that because the Initial Decision has misplaced the burden of proof, the Initial Decision's ultimate finding that Protocols 266–17, 266–9, 266–18 and 794–1 are adequate and well-controlled studies is invalid. WL/PD maintains that the Initial Decision does not shift the burden of proof from the manufacturer to the agency and that WL/PD has met its burden in the proceeding (Reply, pp. 27–31).

It may be useful to explain who has the burden of showing what under the new drug provisions of the act. There appears to be no dispute that a manufacturer has the burden of establishing the safety and effectiveness of a new drug. See *Weinberger* v. *Hynson, Westcott and Dunning, Inc., supra, North American Pharmacal, Inc.* v. *HEW*, 491 F.2d 546 (8th Cir. 1973); *Ubiotica Corp.* v. *FDA*, 427 F.2d 376, 378 (6th Cir. 1970). In fact, WL/PD concedes that it has the burden of proof in this proceeding (Reply, pp. 8–10, 27, 48). It is also clear that the manufacturer has the initial burden of coming forward with some evidence of safety and effectiveness to which the Bureau may respond. If there were absolutely no evidence on either point, the NDA plainly could not be approved because the Commissioner would be required to make the negative findings enumerated in section 505(d).

When the Bureau proposes to withdraw approval of an NDA, it bears the initial burden of adducing new information that, when evaluated together with the information available when the NDA was approved, shows that the drug is not shown to be safe or effective for use under the conditions of use upon the basis of which the NDA was approved. *Hess & Clark* v. *FDA*, 495 F.2d 975 (D.C. Cir. 1974). To meet its burden, the Bureau need only raise significant doubts as to the prior showing of safety or effectiveness. Once this threshold burden is met, the manufacturer is required to prove the drug's safety, effectiveness, or both.

In a proceeding such as this one involving a proposed denial of approval of an NDA (in contrast to a withdrawal of a previous approval), it is less clear whether, and to what extent, the Bureau has a burden of coming forward with evidence or arguments raising an issue. Less guidance is available from the legislative history and case law. Clearly, the Bureau's burden is less than in a withdrawal proceeding, because "new information" obviously is not a prerequisite to initiation of a denial proceeding. In any event, when, in a denial proceeding, the manufacturer has presented its initial evidence of safety and effectiveness and the Bureau has come forward with evidence or arguments that raise a significant question about the adequacy of that evidence to support approval, it seems reasonable that the manufacturer then be required to persuade the decisionmaker that, notwithstanding the question, the drug is safe and effective; if the manufacturer fails to carry its burden of persuasion, the NDA must be denied approval. This allocation carries forward the de facto allocation that prevailed during the period when the NDA was under review in the Bureau. It is the obligation of the applicant to present sufficient evidence to resolve significant questions raised by the Bureau concerning effectiveness or safety. Any different allocation of burden at the denial hearing would distort the pre-hearing review process.

The Bureau takes exception to the following findings: (1) "* * * in the absence of quantitative evidence of activity, ammonium chloride and sodium citrate must be considered inactive substances" (ID, p. 11); (2) "* * * in the absence of a showing of unreliability, the subjective responses of children from the ages of 6 to 12 for Protocol 266–9 will be considered reliable" (ID, p. 12); (3) "[e]ven though the applicant has the burden of showing that a study is adequate and well-controlled, subjective responses will be considered reliable in the absence of a showing that such responses are inaccurate" (ID, p. 21); and any other findings that similarly place a burden on the Bureau to make a showing as to the inadequacy of a particular aspect of a study. I have identified two such findings in addition to those quoted by the Bureau: (1) "[m]ere allegation by counsel for the Bureau without substantiation that these hypothesized differences between test groups are fatal to the validity of a test cannot be held to be controlling in the present determination" (ID, p. 13); and (2) "[n]o evidence in support of [the Bureau's assertion that the reduction of cough by Benylin in Protocol 266–18 may have been due to gargling the drug for 15 seconds before swallowing, resulting in topical anesthesia of the contact surface and not in antitussive activity] is offered by the Bureau" (ID, p. 18).

I agree with the Bureau that these findings place upon it an inappropriate burden to substantiate possible deficiencies in effectiveness studies. I believe that the Bureau has met its burden of coming forward with evidence or arguments concerning these alleged deficiencies. The Bureau's evidence on these issues, and my resolution of them, are discussed below in numbered paragraphs 5, 6, 7, 9, and 14 of the Decision. The questions raised by the Bureau are not frivolous or trivial; they are significant and material. Therefore, the manufacturer bears the burden of persuading the decisionmaker that the studies are adequate and well-controlled despite the Bureau's allegations.

2. *Definition of "Antitussive".* The Bureau argues that the Initial Decision improperly takes official notice of the definition of "antitussive" in Dorland's Illustrated Medical Dictionary; the Bureau contends that the Initial Decision should, instead, have relied on the definition of "antitussive agent" in the CCABA Panel report (41 FR 38312, September 10, 976; P14–1) (Exception B.2, pp. 35–39, citing ID, pp. 9, 20–21). WL/PD replies that the Bureau's objection to reference to Dorland's definition is "just preposterous" (Reply, p. 31).

I do not share the Bureau's belief that the ALJ erred in taking official notice of Dorland's definition of "antitussive" ("an agent that relieves or prevents cough"). A definition in such a work properly may be the subject of official notice under § 12.95 (21 CFR 12.95).

I do, however, agree with the Bureau that it was improper to treat this definition as controlling in this proceeding, particularly when both parties apparently agree with the definition of "antitussive agent" (an agent that "specifically inhibits or suppresses the act of coughing") in the CCABA Panel report (P14–1, p. 38338). The difference between the two definitions is that Dorland's treats as an antitussive a drug that "relieves" cough without necessarily preventing, inhibiting, or suppressing it. The ALJ then interpreted "relief" of cough as follows (ID, pp. 9, 20–21):

> Relief is the removal or lightening of something oppressive, painful, or distressing. This, in turn, means that as long as an antitussive lessens the intensity or discomfort of a cough, then it is effective regardless of whether or not a reduction in cough frequency has occurred.
>
> * * * * *
>
> Antitussive action is not limited to a mere reduction in number of coughs. A reduction in the severity of the cough or its disconfort can constitute an antitussive action.

The Bureau contends that that interpretation of "antitussive" holds Benylin to too low a standard and that, as a result, the initial Decision's ultimate finding on effectiveness is "meaningless" (Exceptions, p. 37).

I agree with the Bureau that mere relief of the discomfort of a cough is an inadequate criterion against which to judge an antitussive drug. Many products, including alcoholic beverages, may reduce the discomfort of a cough without affecting its frequency or severity. An antitussive drug should reduce the frequency of cough, or stop it altogether.

It is unclear how the definition of "antitussive" adopted in the Initial Decision affected its ultimate finding that Benylin has been shown to be effective. The definition played but a minor part (ID, pp. 20–21) in the discussion of the clinical studies on which the ALJ based his finding of effectiveness (ID, pp. 9–21).

3. *Use of Both a Positive Control and a Placebo.* The Bureau disagrees with the Initial Decision's conclusion that FDA's regulations do not require that a study has employed both a positive control and a placebo (Exception B.3, pp. 39–40, with respect to ID, pp. 9–20). WL/PD replies that no FDA regulation requires use of both a positive control and a placebo (Reply, pp. 33–34).

As explained above in section V.A.4, I agree with the Bureau's view that, in certain cases, a study does not meet the requirements of the act and 21 CFR 314.111(a)(5)(ii) unless it included both a positive control and a placebo.

4. *Adequacy of Control in Burke Study.* The Bureau points out that the Initial Decision states that the control in the Burke study (Protocol 266–9) was the Benylin vehicle plus codeine, when actually the control was Benylin plus codeine (Exception B.4, pp. 41–42, citing ID, p. 11). The Bureau contends that this factual error invalidates the Initial Decision's conclusion that the study employed an adequate positive control because a combination of a known active drug such as Benylin and a known effective drug such as codeine is not an adequate positive control. WL/PD contends that the Bureau has distorted the ALJ's comments (Reply, pp. 34–37).

I agree with the Bureau that the finding in the Initial Decision that the Burke study is adequately controlled may have been based on a misunderstanding concerning the control used (see footnote 2, above, of this Decision). In any event, as explained above in section V.A.4. of this Decision, I have found that a combination of Benylin plus codeine is not an acceptable positive control.

5. *Use of Benylin Vehicle as Placebo in Tebrock Study.* The Bureau maintains that the Initial Decision concludes erroneously that the Benylin vehicle is an adequate placebo in the Tebrock Study (Protocol 266–17); the Bureau argues that ammonium chloride and sodium citrate, ingredients in the vehicle, may be active substances (Exceptions B.5, B.6, and B.7, pp. 42–46, citing ID, 10–11, 18, 20). (Five ml of Benylin contain 12.5 mg diphenhydramine hydrochloride, 125 mg ammonium chloride, 50 mg sodium citrate, 1 mg menthol and 5 alcohol; 5 ml of the Benylin vehicle contain all of these ingredients except the diphenhydramine). WL/PD replies that the Bureau has mischaracterized both the expert testimony by a witness for the company and the Initial Decision (Reply, pp. 37–39). The company believes that the presence of ammonium chloride and sodium citrate in the Benylin vehicle does not prevent its use as a placebo.
